Statutory Authority

ND Constitution Article V; North Dakota Century Code Titles 20.1, 37, 44, 50, 54, 55, 56 and 61.

Agency Description

The Governor is the chief executive office of the state of North Dakota and serves as the spokesperson for North Dakota state government. The Governor coordinates the policies of executive branch agencies, submits the executive budget, gives the State of the State report, makes recommendations on programs requiring legislative approval and is mandated by law to serve on and make appointments to boards, commissions, and committees. The Lt. Governor assumes the duties of the Governor if the Governor is unable to serve. The Lt. Governor also serves as President of the North Dakota State Senate as well as other boards outlined by Century Code.

Agency Mission Statement

The mission of the Governor's Office is to Empower People, Improve Lives and Inspire Success, while effectively and efficiently performing the duties of the Governor as outlined in the North Dakota Constitution and Century Code.

Major Accomplishments

- 1 Signed a landmark \$515 million tax relief package, including an estimated \$358 million in individual income tax relief by zeroing out the state's bottom tax bracket and combining the top four brackets into two brackets with reduced tax rates of 1.95% or 2.5%. The remaining \$157 million was property tax relief made available to homeowners by claiming a \$500 property tax credit on their primary residence and through expanded eligibility in the state's Homestead Property Tax Credit program for homeowners ages 65 and older.
- 2 Using the governor's ND Works plan as a starting point, signed legislation investing \$30 million into Regional Workforce Impact Grants, worker recruitment and retention programs, skilled workforce training, internships and New American workforce training. The Regional Workforce Impact Grant has successfully supported 59 locally led workforce solutions statewide. For the first time, supported general fund dollars for the H2A Visa Program for temporary agricultural workers, which has grown significantly in the last 15 years. Also pushed continued funding in the Job Service budget that funds a collaborative effort with the Department of Corrections and Rehabilitation and a nonprofit entity to create a Job Placement Pilot Program that will connect recently or soon-to-be released residents with in-demand jobs.
- 3 Hosted the seventh and eighth annual Governor's Summit on Innovative Education, held the seventh annual Recovery Reinvented and the sixth annual Main Street ND Summit.
- 4 Welcomed tribal members and other attendees to the fifth Strengthening Government to Government (G2G) Conference, highlighting progress made through collaboration between the state and the five tribal nations with whom North Dakota shares geography and outlining challenges and opportunities to address in the upcoming legislative session and beyond.
- 5 Joined officials from ADM and Marathon Petroleum Corp. (MPC) at the Spiritwood Energy Park to mark the grand opening of the Green Bison Soy Processing plant, North Dakota's first dedicated soybean processing plant. Highlighted the project as an example of how partnerships between agriculture and energy are growing both sectors in North Dakota. The plant has the capacity to process over 50 million bushels of soybeans a year, adding in-state value added ag.
- 6 Joined local, state and federal officials and community members for a ribbon cutting ceremony for the new North Dakota Soybean Processors plant near Casselton, which had ground broken only two years ago. The plant is expected to process up to 42.5 million bushels of soybeans annually into soybean oil, soybean meal and soybean hull pellets.

Major Accomplishments

-
- 7 Signed SB 2142, bipartisan legislation creating an Office of Legal Immigration within the North Dakota Department of Commerce to help businesses recruit and retain foreign labor and address the state's workforce challenges.

 - 8 Helped pass HB 1382, which allows state scholarship dollars for qualifying students to be used toward apprenticeship programs in North Dakota. Students who meet the requirements and are enrolled in qualifying registered apprenticeship programs would be eligible for a scholarship of \$500 each term, up to \$6,000.

 - 9 Worked with state lawmakers to pass a historic child care package containing nearly \$66 million to address child care affordability, accessibility and quality and support child care services as a critical component in alleviating North Dakota's labor shortage.

 - 10 Worked with lawmakers to pass and sign HB 1371, which modernizes North Dakota's corporate farming law to encourage growth and drive capital investment in the state's animal agriculture sector.

 - 11 Signed several bills related to "backing the blue," including HB 1279, SB 2147, HB 1307, HB 1183 and HB 1309. These bills expanded workers' compensation coverage for full-time firefighters and law enforcement officers; exempted law enforcement retirement pay from state income tax; provided \$3.5 million that can be used for providing hiring and retention bonuses to new and current officers, including correctional officers, and for providing tuition and fee payments on behalf of law enforcement trainees; moved peace officers employed by the state to the Bureau of Criminal Investigation (BCI) retirement plan, ensuring the state's game wardens, park rangers and parole and probation officers are on a level playing field when it comes to retirement benefits; and adjusted retirement benefits for BCI agents with the goal of allowing them to retire closer to age 55, helping the agency recruit and retain the best and brightest in law enforcement and ensure appropriate succession planning.

 - 12 With recommendations from the Red Tape Reduction Working Group created by executive order, signed more than 50 bills aimed at eliminating over 400 antiquated, unnecessary and burdensome regulations. Launched Red Tape Reduction 2.0 to continue the momentum with a greater focus on business and citizen engagement.

 - 13 Called for "Renaissance Zone 2.0" legislation to refresh the successful state program that is used by more than 60 communities statewide and incentivizes smart, efficient use of existing infrastructure in community development projects. Signed SB 2391, which expanded the tax exemption benefit period from 5 to 10 years and reduced red tape and barriers to having projects approved, as well as HB 1266, which allows cities with expired Renaissance Zone areas to reapply to join the program.

 - 14 Approved a \$68 million line of credit to help finance the construction of 13 planned career academies across the state where students can pursue high-demand careers in the trades, health care, technology and other sectors to help meet workforce needs.

 - 15 In ongoing efforts to make North Dakota the most military-friendly state in the nation, signed SB 2293 to exempt military pay from state income tax for active duty, National Guard and Reserve members; increased availability of State Tuition Assistance to North Dakota National Guard Members who attend college out-of-state; signed SB 2182 allowing child care providers licensed by the U.S. Department of Defense to operate in North Dakota with their DOD license and without redundantly being licensed with the state; signed HB 1132 allowing military-connected children the option of starting their education virtually at a North Dakota school prior to arriving or to complete the semester with a North Dakota school after their parent's reassignment to help relieve stress and support educational success.

 - 16 Signed HB 1021, which provided \$5 million plus staffing to implement the Business Gateway, a one-stop shop for businesses interacting with state government.

 - 17 Collaborated with the Department of Corrections and Rehabilitation (DOCR) to obtain \$131.2 million for design and construction of a new women's correctional center in Mandan to replace the existing Dakota Women's Correctional Rehab Center.

 - 18 Eliminated the state's "trigger" tax on oil production, through the signing of HB 1286, with the goal of encouraging more investment in North Dakota's energy sector.
-

Major Accomplishments

-
- 19 Signed HB 1385, which allows the State Water Commission to directly enter into agreements with tribal nations for a cost-share program that provides state funding for water development projects, including water supplies, flood protection and other general water management efforts, rather than having to go through an eligible non-tribal partner.
-
- 20 Signed SB 2377 which allows each of the five tribal nations with whom North Dakota shares geography to enter into a tax-sharing agreement with the state on alcoholic beverages sold at the retail and wholesale levels within their respective reservations. Tribal nations that adopt the alcohol tax will keep 80% of the tax revenue, while the state's general fund will receive 20%.
-
- 21 Worked with North Dakota Information Technology to pass SB 2073 which provides IT and cybersecurity services to tribal schools and colleges should they choose to utilize the services.
-
- 22 Provided emergency grants, through SB 2183, to help cover extraordinary snow removal costs for local governments whose budget were challenged by a record-breaking winter, appropriating \$20 million for emergency snow removal grants to eligible tribal governments, counties, cities and townships.
-
- 23 Signed HB 1014 which provides for a \$140 million expansion to the existing \$250 million line of credit to support loans or loan guarantees issued from the Clean Sustainable Energy fund and allocated \$3 million for the Intelligent Pipeline Integrity Program (iPIPE) to continue the development of world-class pipeline safety technology through innovation.
-
- 24 Established North Dakota as the first state in the nation to approve legislation requiring cybersecurity education with the governor's signing of HB 1398, which requires the teaching of computer science and cybersecurity and the integration of these content standards into school coursework from kindergarten through 12th grade.
-
- 25 Worked to appropriate \$6 million, through the passage of SB 2284, to provide free meals to K-12 students from families whose income is between 130% and 200% of the federal poverty level, helping to ensure all students have nutritionally balanced meals as they engage in learning.
-
- 26 Continued to invest in North Dakota's surface transportation system with over \$1 billion of state and federal resources allocated for road and bridge improvements. Also create a new Flexible Transportation Fund, with \$222.5 million to prioritize projects that leverage federal funding and corridor improvements on county and township roadways.
-
- 27 Supported the state Water Resources budget to include \$780 million for water projects across the state, including \$368 million for municipal and rural water supply grants, \$116 million for flood control and \$9 million in discretionary funding.
-
- 28 Signed legislation allocating \$55 million in federal funds to the Department of Health and Human Services to replace the existing public health lab built in 1974 with a state-of-the-art lab that will be better able to respond to changing demands and emergencies.
-
- 29 Signed legislation creating a Destination Development grant program within the Department of Commerce. The program awarded \$25 million of matching grants to create new attractions in North Dakota communities, enable significant expansions of existing attractions and support key amenities aiding the tourism economy across the state through a competitive grant process.
-
- 30 Worked with legislators to secure a \$20 million line of credit from the Bank of North Dakota to help pay for construction of a North Dakota Military Museum, creating a place where current and future generations can learn about and reflect upon the incredible legacy of the men and women from North Dakota who courageously served their country in the military.
-
- 31 Signed legislation providing \$6 million for new park facilities at Pembina Gorge, North Dakota's newest state park. Ground was broken in May 2024 on the project, which will include underground utilities, roads, an approximately 55-site campground, six all-season full-service cabins, a comfort station and a shop.
-

Major Accomplishments

-
- 32 Continued funding Free Through Recovery, a community-based behavioral health program designed to increase recovery support services to individuals involved with the criminal justice system. The Free Through Recovery program has served over 6,900 individuals; as of August 2024 over 1,450 participants were being served through 45 care coordination providers. Over 8,000 individuals accessed the state's Substance Use Disorder Voucher program, which received \$18 million for this biennium; more than 1,200 peer support specialists have been trained to use their lived experience to assist others on their journey to recovery and wellness; and over 1,000 people have been served through the Recovery Housing Assistance Program created in May 2022, with 10 providers and 31 recovery homes across the state.
-
- 33 Continued funding of unmanned aircraft systems (UAS) with \$39 million from HB 1018 to support and advance North Dakota's status and strategy as a leader in UAS. Funding will be used to build out the VANTIS network, develop Grand Sky aviation park and help the UAS Northern Plains UAS Test Site.
-
- 34 Signed legislation providing average compensation increases of 6% during the first year of the biennium and 4% the second year.
-
- 35 Signed HB 1040, a major pension reform bill that protects the retirement benefits for existing public employees and retirees and also protects taxpayers in the long-term by addressing a \$1.9 billion unfunded liability in the North Dakota Public Employees Retirement System (NDPERS). The bill closes the state's existing defined benefit plan, increases the employer contribution rate by 1% in 2024 and injects \$200 million into NDPERS to reduce the \$1.9 billion unfunded liability, helping to ensure the state can meet its future obligations to more than 53,000 employees and retirees from state government and local governments enrolled in the plan. The bill also shifts new hires to a generous defined contribution plan, similar to 401(k) plans offered to employees in the private sector.
-
- 36 Deployed approximately 100 soldiers from the North Dakota National Guard's Wahpeton-based 188th Engineer Company to the U.S.-Mexico border as part of Operation Lone Star. The governor authorized the deployment in response to an Emergency Management Assistance Compact (EMAC) request from Texas Gov. Greg Abbott for National Guard and law enforcement to help secure the border.
-
- 37 Celebrated the 100th Main Street Community in Sheyenne, N.D. A total of 107 Main Street communities are now engaged in supporting community development and rural prosperity.
-
- 38 Pioneered, in partnership with Commerce, the Sustainable Food Delivery Program, a groundbreaking pilot grant initiative targeting rural grocery store sustainability and the expansion of food accessibility. This initiative not only supports local businesses but also ensures vital nourishment for underserved communities.
-
- 39 Created a Task Force for Teacher Retention and Recruitment to address the state's teacher shortage and ensure teachers have the support they need to deliver a world-class education for our students.
-
- 40 After many years of efforts by safety advocates, Vision Zero stakeholders, including the North Dakota Department of Transportation and North Dakota Highway Patrol, were successful in getting a primary seat belt law passed through the Legislature and signed by the governor. The law went into effect Aug. 1, 2023.
-
- 41 Signed legislation designating curling as North Dakota's official state sport.
-
- 42 Awarded the Theodore Roosevelt Rough Rider Award, the state's highest citizen honor, to five-time world champion boxer Virgil Hill and NASA astronaut James (Jim) Buchli.
-
- 43 Participated in the grand opening of the new Innovation Shop at Grand Farm, highlighting how the facility will support innovation in autonomous and precision agriculture technology and help boost productivity for farmers.
-
- 44 Appointed a North Dakota Housing Initiative Advisory Committee to lead the development of a comprehensive housing strategy for North Dakota.
-

Critical Issues

-
- 1 Recruitment and retention of workforce to fill more than 30,000 open and available online job openings.
-
- 2 Ensuring an adequate statewide supply of available, affordable and quality child care services.
-

Critical Issues

-
- 3 Establishing an abundant supply of affordable, available and stable housing options for all income levels.

 - 4 Federal policies which overreach and threaten the 10th Amendment and in turn the rights of North Dakota residents and businesses.

 - 5 Continued support for leaders across the state in creating healthy, vibrant communities to attract a 21st century workforce while building financially solvent communities using smart, efficient infrastructure.

 - 6 Continued support for programs and efforts to erase the shame and stigma of the disease of addiction and expand treatment and recovery options for North Dakotans struggling with substance abuse and behavior health issues.

 - 7 Strengthening engagement with the five sovereign tribal nations with whom North Dakota shares geography.

 - 8 Transforming education to prepare students to succeed in the 21st century economy.

 - 9 Harnessing technology to reinvent government to make it as efficient and responsive as possible for the benefit of taxpayers.
-

Performance Measures

The Governor meets on a regular basis with staff, cabinet directors, elected officials and many other industry stakeholders to ensure the state’s policies are advanced.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As we move toward digital transformation, incorporating AI tools such as ChatGPT and Copilot will significantly enhance productivity, streamline workflows, and improve decision-making. The \$21,000 increase will be used for licensing and monthly user fees for each member of the Governor's Office team.

Necessary resources for implementation (including FTE's)*: Funding for the licensing and monthly user fees associated with the use of new technology.

Are resources being redirected or are they new or additional (including FTE's)*: New resources being requested.

Who is served and impact of not funding*: The GO staff will be using ChatGPT and Copilot to enhance productivity in delivering services to citizens.

101 Governor's Office

Agency 101

Roughrider Awards (Priority: 02)

Total	4,200	-	4,200	0.00	4,200	-	4,200	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The budget for Rough Rider has been \$10,800 per biennium for many years. With an estimated 2 inductees per biennium, it is a challenge to cover the costs for the portrait for the Hall of Inductees, duplicate for the recipient, framing, Theodore Roosevelt bust and travel costs for recipient if necessary. We propose this budget be increased to \$15,000. Traditionally, we have secured sponsorships to help with event costs.

Necessary resources for implementation (including FTE's)*: Additional funding for the roughrider awards program. No new FTE being requested.

Are resources being redirected or are they new or additional (including FTE's)*: New resources.

Who is served and impact of not funding*: The Roughrider Award recipients as the cost of the award continues to increase.

Children's Cabinet (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	-	-	-	0.00	35,000	65,000	100,000	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

101 Governor's Office

Agency 101

Request explanation and justification (include any statutory authority)*: Proposal to add the Children’s Cabinet as a line in the Governor’s Office budget.

Necessary resources for implementation (including FTE’s)*: Request includes a one-time \$65,000 appropriation for facilitation consultants and \$35,000 ongoing appropriation for travel reimbursement to cabinet members.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources

Who is served and impact of not funding*: Children’s Cabinet would have a stable funding source and oversight by the Governor’s Office.

Statutory Authority

North Dakota Constitution Article V, Section 2, Article III, Article IV Section 12, Article IV Section 12 and 13, Article V Section 5, Article V Section 11, Article IX Section 3, and Article X Section 17.

North Dakota Century Code Title 10 and Title 16.1 North Dakota Century Code Chapters 15.02, 35-01, 35-05, 35-17, 35-21, 35-29, 35-30, 35-31, 41-09, 43-07, 44-06.1, 45-10.2, 45-10.1, 45-11, 45-22, 45-23, 47-22, 47-25, 50-22, 53-01, 54-05.1, 54-09, 54-16, and 55-01.

Agency Description

The North Dakota Office of the Secretary of State conducts a wide range of licensing, regulatory, registration, and administrative functions. We are the office of record for certain legal documents generated by the executive and legislative branches of state government, as well as public records and notices involving various business.

The Office of the Secretary of State is your trusted source for election information, and along with North Dakota’s 53 counties, works to administer and protect the integrity of our election process.

Agency Mission Statement

The Office of the Secretary of State is North Dakota’s starting point for democracy and transparency.

We serve, guide, and engage citizens, through elections, business and official records.

Major Accomplishments

- 1 Upgrading Systems – 2023-2025 saw the commitment of one-time funds to allow for needed upgrades to critical systems in business and elections. All projects are moving forward to replace FirstStop (currently in build), Election Management System & Campaign Finance (completing RFP/Contract Stage). Carry-over of funds from SIIF and ARPA will be needed into the 2025-2027 biennium.
- 2 Customer Service – the last biennium has seen team dedication to providing excellent customer support. Filing turn around times have been reduced by greater than 45% from 6.65 days for processing in 2022 reduced to under 3 days in 2024.
- 3 Information Outreach – introduction of communications team members has greatly expanded the agency’s ability for outreach in all channels and stakeholder groups – growing awareness across all program areas.
- 4 Citizenship Effort with DOT – working in collaboration with the North Dakota Department of Transportation, a communication effort was mounted to let non-citizens know that if they achieve citizen status, they need to update their ID for voting. The agency provided the funds to cover costs for New Americans updating their license. Over 2,000 letters have been sent with approximately 1600 ID processed at a cost of \$25,000 to SOS.
- 5 Elections Outreach – communications and training efforts have been a key component in ensuring county election officials are prepared for election administration; greater outreach to all stakeholders with materials and voter security awareness efforts have been reaching new and broader audiences.
- 6 Lawsuits – although not an accomplishment multiple lawsuits have engaged staff at the agency over the past year. These efforts take many hours of dedicated staff time to navigate in addition to regular responsibilities.

Major Accomplishments

- 7 Petition Process – agency efforts to process candidate petitions took 6 days in 2022, but were reduced to only 1 day in 2024, which allowed for greater transparency and ability to provide voter awareness through current platforms. The biennium also had multiple initiated measures which impact many hours of staff time to review and process for approval/denial.
- 8 Election Cycle – 2024 has seen a successful Primary Election and appreciation from both voters and county auditors for the increase in communication, education and training. All of which support continued planning for the 2024 General Election.
- 9 Addressing agency equity-salary competitiveness – legislatively supported general fund dollars have allowed for the agency to address salary inequities and bring employees closer to competitive market wages, supporting recruitment and retention goals.

Critical Issues

- 0 Carryforward of one-time funding – the agency will need to seek carryover of one-time SIIF and ARPA funds to complete needed technology projects in the coming biennium.
- 0 Changes in Election/Campaign Behaviors – the 2024 election cycle saw new disruptive behaviors related to the enforcement of election statutes. The agency has many statutes related to election violations but enforcement through local channels can be challenging based on other high priority tasks at that level. Discussions at multiple levels of government are happening attempting to find ways to better address this issue and support enforcement.
- 0 Election equipment replacement – implementation of new election requirements is anticipated in the coming years which will require a major funding ask to replace election equipment (tabulation equipment) by 2029 across the state.
- 0 IT cost increases – unified IT requires the agency to use NDIT for its technology needs, however unforeseen charges to their billing have created large increases this budget cycle; the increased staff/team turnover at NDIT also does not allow for continued knowledge of critical infrastructure systems related to elections and other facets of the agency’s work.
- 0 Legal resources – greater lawsuits and behaviors in the election space are creating more need for specialized election knowledge to address legal questions. The agency believes this need will expand and may require greater resources dedicated to this area than are currently available.
- 0 State funding support for elections – critical infrastructure for statewide elections is mostly supported by HAVA funding dollars that are uncertain at the federal level. The agency continues to push for statewide support of North Dakota’s elections and election equipment.
- 0 Tech debt – this agency has many technology systems that are in the process of upgrades or in need of upgrades. Ability to support these systems through maintenance and enhancements will need greater general fund support to make up for technology increases that have not been sought in past cycles.

Performance Measures

The Office of the Secretary of State measures outcomes in three areas:

Serving Business – providing fast, efficient service to business and individuals who seek to operate in North Dakota; providing exceptional customer service in resolving questions and issues faced by customers. METRICS – filing, corrections, call resolution

Guiding Elections – providing support to election officials to ensure the integrity of North Dakota’s elections; increasing awareness of election processes and security measures to support public confidence in our elections. METRICS – results, training, voter knowledge/awareness

Team Engagement – Striving to provide an environment where team members feel valued, connected to our mission, and have the opportunity to grow their skillsets to meet the changing needs of our audiences, METRICS – employee survey, culture engagement, training

Program Statistical Data

REVENUE IMPACT - \$17 M in total revenues generated with \$14.6 M to general fund.

2022 Absentee Ballots Cast 69,757 | 2022 In-Person Ballots Cast 172,769

Explanation of Program Costs

The Office of the Secretary of State relies on people and technology to perform our statutory work using the following funding sources:

General Funds

The agency's general fund appropriation for the 2023-2025 biennium was \$6.7 million with 85% of the authority directed to salaries and wages. Operating expenses made up approximately 15% of our general fund authority, with special funds covering 77% of operating costs. General fund authority for operating also includes Tribal Grants, Petition Review, and Public Printing all of which are designated for specific purposes for which the Secretary of State has no discretion.

Special Funds - Agency

The agency generates special funds from statutorily approved fees for services provided to the public which are deposited into the General Services (special) Fund. The General Services Fund covers approximately 50% of the office's spending authority from state sources and is currently responsible for funding 77% of the expenses for office operations.

This fund was intended to be used for technology maintenance and enhancements by law, but the agency has been asked to fund operating out of this line as well. Technology maintenance costs are now outpacing the revenues generated in this line.

Special Funds – One-Time

The agency is in the process of upgrading multiple technology systems to better serve customers and received \$7.5 million in one-time funding (\$1.5 M SIF, \$6 M ARPA). The agency has received one-time dollars to convert to online services. As digital services transform, they now require consistent ongoing fiscal funds with a shift from one time licensing to annual subscriptions, maintenance, and support.

Federal Funds

Federal funds received through the Help America Vote Act make up approximately 30% of the agency's budget and support 90% of Elections administration and equipment/maintenance costs of approximately \$1.65 M annually.

Program Goals and Objectives

Key goals for the agency in the 2025-2027 biennium include:

- Implementing a new election management and campaign finance system (requires carryover of one-time funds) – solving for end-of-life and usability issues.
- Replacement of PollPads – updates to operating systems by 2026 for security issues will require new iPads (updated operating systems) to host PollPad software.
- Seek funding for support for loss of HAVA \$ - maintenance support of election equipment is currently funded by uncertain federal funding assistance.
- Increased operating funds – supporting education and outreach, and needed growth in technology funding to support system maintenance/enhancements.
- Expand education/communication efforts – establish GovDelivery platform to expand communication to audiences.
- Explore Power BI dashboarding options – seek platforms that increase digital visualization for transparency with audiences.
- Seek platform upgrades to technology systems – upgrade/replacement for central indexing solutions, public meetings notices, etc.

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Under NDCC 16.1-02, the Secretary of State must maintain a central voter file and generate pollbooks for use in elections. North Dakota uses PollPads as an electronic pollbook – a system using iPads with KNOWiNK PollPad software and a secure internet connection managed through cradlepoints which access cellular networks – at all voting locations to check-in qualified voters. The PollPad system ensures one person = one vote by informing all PollPads across the state that a voter has checked in to vote.

The current iPad operating systems are iOS17, and the next security release from Apple planned for 2025 will not be compatible with the iOS17 operating system. This requires an update to iPads with iOS18 to ensure security updates to protect election integrity can be in place. The cradlepoints used to create the cellular network connection between the PollPads are also at the end of their life and require updating to ensure appropriate connection/speed for sharing of voter check-in information.

Necessary resources for implementation (including FTE's)*: Funding to purchase equipment through proper procurement channels.

NDIT staff to assist with implementation and maintenance of equipment

Are resources being redirected or are they new or additional (including FTE's)*: Cost for purchase of equipment is additional one-time funding. Resources used for current maintenance activities will be redirected to the new equipment.

Who is served and impact of not funding*: The systems impacted in this request are used to ensure election integrity and security of voter information. They potentially impact every qualified voter in North Dakota.

GENERAL FUND SUPPORT FOR EXISTING POSITIONS (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	781,000	-	781,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	781,000	-	781,000	0.00	-	-	-	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Office of the Secretary of State believes staffing for critical state programming should be supported by general fund dollars. The agency currently has three positions supported with federal funds in the elections division and one position supported with special funds in the licensing area. We are seeking general fund support for these programming positions so we can redirect dollars supporting staffing to support for programming and other needs.

Necessary resources for implementation (including FTE's)*: No additional resources are needed.

Are resources being redirected or are they new or additional (including FTE's)*: There are no existing resources to be redirected resulting in request for new on-going funding. Federal Help America Vote Act Resources are being reduced. The election positions are required to carry out election administration duties for statewide elections even if Help America Vote Act funds are no longer available. The intent of the general services special funds is to support technology, A portion of these funds are currently being redirected towards salary and general operating costs as a result of lack of general funds.

Who is served and impact of not funding*: With the reduction of Help America Vote dollars, it is critical those dollars continue to be used towards the support and maintenance of voting equipment and software. With additional general fund support the agency would be able to use the dollars saved to support election program areas and other operating expenses and ensure that staffing is general fund supported since federal funds are not guaranteed and put in jeopardy critical positions related to election administration.

PUBLIC PRINTING (Priority: 04)

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Office of the Secretary of State, under its statutory authority, conducts a wide range of licensing, regulatory, registration, and administrative functions, related to business, elections, central indexing, notaries, and official acts. These systems require enhancements, maintenance, and security updates to ensure users continue to have efficient, user-friendly systems with which to interact. The systems currently in place at the agency were all implemented between 2016-2019. Asks to support ongoing enhancements for timely upgrades were not completed in the past which has created a funding gap in needed operating dollars to adequately support the ongoing maintenance and enhancements of these systems.

The Secretary of State provides a repository for central indexing and lien filings under a variety of statutes found in: NDCC Title 41, Title 35, and Title 57. State law requires that all central indexing filings be completed online. The system currently used to file UCC and lien filings with the NDSOS is an application built by Civix. The current system was implemented in 2016 (version 1.0) and the agency seeks to upgrade this technology to the latest version – 4.0.

One-time funding granted during the 2023-2025 biennium has allowed for the beginning of replacement of systems and upgrades to critical election and business systems to begin. This decision package seeks to support funding for annual licensing, maintenance, and user enhancements needed to ensure systems remain usable and secure.

The agency is allowed the authority to retain a portion of funds from fees to support technology through its general services (special) fund. Currently, the agency is able to retain \$2.5 million of an estimated \$16 million generated, with between the \$13-\$14 million remaining going to support the general fund. Based on the number of systems in the agency to support business, licensing, central indexing and elections, the \$2.5 retained from the general services (special) fund does meet needs to support licensing, maintenance, and enhancements. In addition, hosting fees and NDIT technology rates have also increased by over \$350,000 for the coming biennium for the agency.

We are seeking a total of \$2 million in one-time and on-going operating expenses to support continued technology costs and needed upgrades.

Necessary resources for implementation (including FTE's)*: Funding to purchase software through proper procurement channels.

NDIT staff to assist with implementation on state servers and coordinated NDIT support for hosting of apps, and databases.

108 Secretary of State

Agency 108

Are resources being redirected or are they new or additional (including FTE's)*: The are limited resources to be redirected resulting in request for new on-going funding. Cost for one-time purchase of upgrade will be new funding, however SOS will redirect any dollars currently used for maintenance to the new system.

Who is served and impact of not funding*: The ability to maintain critical systems and support needed licensing, support and enhancements is key to providing good customer services in a digital world. The Central Indexing System serves filers across the state including real estate, agriculture, tax and lending agencies who files liens against individuals.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Replace existing application? No

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits*: System efficiency and security improvements to benefit all users.

Project Risk*: Failure to update systems could result in security updates not being possible.

Issue/Solution*: Support replacement and upgrade of needed systems.

Statutory Authority

North Dakota Century Code 54-44.

Agency Description

- Fiscal Management oversees the budgeting, accounting, payroll, purchasing

card program and financial reporting functions for North Dakota state

government entities.

- The Human Resource Management Services' (HRMS) mission is to provide leadership and expertise in human resource management, build a 21st century workforce to serve the 21st century citizen and empower our HR partners to be strategic business partners by automating and streamlining administrative HR processes. HRMS provides human resource guidance and assistance, promotes consistent HR practices, maintains the state classification and compensation plan, and provides training and development services to state agencies.

- Shared Services (formerly Central Services) provides procurement services, printing services, a central mail room service, and central supply of commonly used office supplies to state agencies; Surplus Property disposes of state-owned fixed assets and distributes federal surplus property to eligible entities.

- Facility Management maintains the state capitol complex, plans for future

growth requirements and provides tours.

- Risk Management addresses third-party liability exposures of the State. Risk Management promotes safety and reduces loss resulting from claims by identifying and measuring risk of loss to the State and implementing appropriate measures to address those risks.

Agency Mission Statement

The Office of Management and Budget provides innovative leadership and support to state government. OMB will set the standard for leadership and expertise in state government.

We will:

- Provide consistency in policies and practices.
- Set the standard for state agency operations.
- Be an agency with whom others choose to work.
- Provide competitive compensation and benefits.

110 Management and Budget

Agency 110

- Establish performance measures.
- Communicate in a seamless and ongoing manner.
- Guarantee continuum of government.
- Be respected and trusted by customers.
- Strive for overall customer satisfaction.
- Be the employer of choice.
- Improve functionality of automated systems.

Our Core Values are:

- Respect
- Integrity
- Excellence
- Resourcefulness
- Responsiveness

Major Accomplishments

- 1 Fiscal Management: Implemented GASB 96 utilizing the Lease Administration module in PeopleSoft. Completed multiple patches and a major upgrade to PeopleSoft/PeopleTools. Implemented OGL, an interactive training guide where team members can be guided through steps on how to do something right in Production. Rolled out Travel & Expense module within PeopleSoft which enables agencies to submit their reimbursement requests electronically. Multiple agencies had either merged or new agencies created, which took a large collaborative effort between OMB, NDI and the impacted agencies. Reworked payroll reports so they are now all electronically accessible and can easily be ran ad hoc if/when agencies need them. Installed GT eForms and nearing deployment of our first forms—this will eliminate fillable PDF's and/or paper forms, make these accessible online, and if needed, on final approval we can now take action (e.g. create journals/entries automatically). ACFR team reworked closing packages to streamline compiling the information and generating the entry(ies) needed to be entered. Deployed a utility that allows agencies to handle re-orgs much easier.
-

Major Accomplishments

- 2 HRMS continues to serve as thought leaders, change agents, and resourceful partners who build talent, drive results, and work as one. HR is structured into five core areas: HR Business Partners, Operations and Digital, Talent Acquisition, Talent Management and Development, and Total Rewards. HRMS supported 31 agencies on HR issues, including but not limited to talent acquisition, team member engagement, team member relations, performance and talent management, training, policy application, organizational development, workforce planning, and compensation. HRMS worked across agencies to effectively implement the compensation package that was implemented for the 2023-25 biennium including the target market equity program and general legislative performance increases to position the state to better compete in the current labor marketplace. HRMS continues to provide all state team members with PeopleSoft Total Rewards statements, showing the value of the entire state package of compensation and benefits. HRMS collaborated closely with agency HR teams to facilitate leave management alignment through the partnership with FMLASource. FMLASource was implemented to administer FMLA leave and ensure consistent application across agencies. This service has improved efficiency by streamlining processes and reducing errors, saving Team ND an estimated 2,741 hours of administrative time from March to September 2024. The team has continued to lead the ongoing effort in the development of universal employment policies. To date, 47 universal employment policies have been developed, enacted in cabinet agencies, and made available for non-cabinet statewide agency use. HRMS launched the Manager Toolkit to serve as a one-stop-shop for navigating the responsibilities required of a people manager for the state of North Dakota. HRMS continues to update the ELM learning library to make courses available for cross-agency use. HRMS facilitates an interagency mentorship program as part of a targeted talent development approach and building channels for team members to work as one across agencies. HRMS partners with Gallup to administer the annual team member engagement survey. In 2023, the state achieved 74% participation with an increase of 13% in engaged employees since the survey was implemented in 2020 (2024 results will be out in early November). HRMS designed and launched the Engagement Playbook to serve as a roadmap to understanding and implementing engagement practices consistently. HRMS also launched the Leadership Everywhere: Elevate series which has targeted techniques for hiring, increasing accountability, improving communication, and keeping teams connected.

- 3 Risk Management: Maintained the state’s actuarially projected funding needs for the 2023-25 biennium at \$3.350 million. Third party claims remained consistent with an average of 93 claims, down from a high of 351 claims in FY2001. State entities have overall reduced their required contributions to the fund by more than \$2.5 million by participating in the discount program. Provided resources and training to assist approximately 85 percent of state entities to develop Continuity of Operations Plans and implement procedures for emergency notification. Assumed responsibility for state entity cyber liability exposures (except BND).

- 4 Shared Services: Provided procurement support to major information technology projects and established many new state contracts. State Print and Mail updated production software and equipment this biennium. State Procurement began implementation of a Procurement Automation system.

- 5 Facility Management: Completed projects include the replacement of the mechanical equipment in the Legislative chambers and Brynhild Haugland Room. During FY2024 the tour guides provided tours to 7,145 visitors.

Critical Issues

- 1 Retention of state employees - continued and increasing turnover due to growing economic opportunities.

- 2 Recruitment of new employees due to vacancies resulting from the many retirements of baby boomers and increased competition for qualified staff.

- 3 Continued funding for the statewide systems maintained by OMB.

- 4 Prepare for and evaluate timing to move the State ERP to a cloud system.

- 5 Maintaining the capitol infrastructure while the costs of operating and extraordinary repairs continue to increase.

Performance Measures

- Goal 1: Fulfill OMB’s Statutory Requirements

110 Management and Budget

Agency 110

- Goal 2: Inform and Engage Stakeholders
- Goal 3: Provide Training to State Employees
- Goal 4: Inform and Engage OMB Workforce
- Goal 5: Improve, Upgrade, and Leverage Technological Capabilities

Program Statistical Data

Administration:

Program Statistics are reported by the five divisions of OMB that report to Administration.

Fiscal:

- Fiscal Management serves 92 state agencies.
- The division processes over 1 million accounting transactions and over 135,000 payroll deposits each year.
- The division manages the statewide Purchasing Card Program. The program includes 78 state agencies, 13 colleges and universities which includes the ND University System and Core Technology Services, 82 school districts, 27 counties, 13 cities, 10 state board and commissions. This program has 6,357 active procurement cards, which results in approximately 399,454 transactions totaling just over \$198 million for the past year.

HRMS:

- HRMS facilitates several communities of practice that offer the statewide HR community the opportunity to provide input regarding HR initiatives for quality, effectiveness, and efficiency. Approximately 59 agencies are represented.
- Workforce plans are in place to assist with forecasting and planning for gaps in talent supply and demand to ensure the organization has the workforce needed to achieve its goals. Plans have been submitted by 33 agencies.
- ePerformance has been used to assign 15,193 performance evaluations in 48 state agencies.
- The Shared Leave solution has processed 138 requests and 701 requests across agencies.
- Automated notifications have been developed to provide state job applicants with more information about the progress of their application to improve the candidate experience.
- The transfer of in-progress performance documents to the new manager has been automated on the effective date of the "reports to" change, which facilitates the completion of the performance document.
- Recruiting Solutions (PeopleSoft) had 2,989 job postings to which 30,490 employment applications were submitted.

110 Management and Budget

Agency 110

- Internships continue to be successful experiences across agencies with 75 interns in 16 agencies participating in the Internship Funding/Stipend program administered through HRMS in career fields such as Accounting, Computer Science, Criminal Justice, Cybersecurity, Communications, Finance, Engineering, Human Resources, IT, Law, Marketing, and Psychology to list a few.
- LinkedIn Recruiter advertises Team ND job openings and builds connections with passive candidates. Through this tool we've highlighted 126 job openings and hired over 70 team members for partnering agencies in the last 12 months. State-wide sourcing metrics help agencies understand how candidates learn about opportunities at Team ND.
- A Managers Essential 4-week training program has been implemented to help managers navigate leading people and teams in the state environment.
- The change management program continues to grow and evolve. Since the program's implementation the following have been realized: 44 participating agencies, 1,616 unique learners, 4,800 seats have been filled across various classes, 244 certified Change Practitioners, 273 certified Change Managers, 10 Prosci certified trainers.
- HRMS administers the statewide LinkedIn Learning license. The state has approximately 1,750 learners across 40+ agencies, allowing us access to a drastically reduced subscription price of \$38.50/user/year.
- 650 positions were reviewed for classification assignments and 345 position classification changes were delegated to agencies.
- The 2nd Total Rewards Survey was conducted in 2024 and achieved a 63% response rate.
- Expanded salary data survey sources to support enhanced total rewards planning processes.
- Implemented a more comprehensive Total Rewards planning and communication effort to better serve the needs of the organization and our team members.

Risk Management:

- The Risk Management Fund administers an average of 129 claims and lawsuits per year.
- The Workers Compensation account for state agencies as of June 30, 2024 included 296 open claims within the \$100,000 deductible and 5 above the deductible amount.

Facility Management:

- Total number of visitors totaled 7,145 for fiscal year 2023.
- During fiscal year 2024, 3,755 work orders were completed, with a goal to respond to each work order within one hour.

Shared Services:

- State Print and Mail services: FY24 annual business volume - \$1,472,914

110 Management and Budget

Agency 110

- Central Mail Room: FY24 processed 2,432,777 pieces of mail
- State Supply: FY24 annual business volume - \$218,618
- Surplus Property: FY24 proceeds from state and federal property - \$530,844
- Law Enforcement Support Office (LESO): Federal FY23 total LESO property acquired valued at \$15,199,295
- State Procurement: During FY24 646 issued solicitations were made on the State Procurement Online System

Explanation of Program Costs

Administration: Major program costs include funding for Prairie Public Broadcasting, state contingency fund, statewide dues, and salaries for 4 employees. In addition, it includes statewide unemployment benefits, which are paid from special funds.

Statewide dues include:

- Commission of Uniform State Laws (CUSL) - \$162,800
- Council of State Governments (CSG) - \$240,125
- Western Governor's Association (WGA) - \$83,160
- National Governor's Association (NGA) - \$79,590
- Education Commission of the States - \$117,882
- National Conference of Lt. Governor's - \$2,100

Fiscal: Ninety-eight (98) percent of the budget for the Fiscal Management Division falls into three categories—data processing/IT, professional fees and services, and salaries. All functions of the division depend on technology and people. Other large expenses include IT consultants and other professional consultants. Consultants are hired for revenue forecasting, cost allocation, updating and maintenance of Sherpa, implementation of PeopleSoft accounting and payroll modules, and assistance in completing the Statewide Annual Comprehensive Financial Report (ACFR).

HRMS: Seventy-nine (78) percent of HRMS program costs are for salaries. Operating expenses account for twenty-one (22) percent of HRMS program costs with IT and professional development being the costliest expenses. The operating expenses incurred are directly related to providing services and support to other agencies.

Facility Management: Approximately 52.7 percent of Facility Management's budget is for salaries due to all the functions of the division depend on personnel to provide services. The second highest budget item for the division is for utilities for the Capitol Complex. This expense accounts for 66 percent of the division's operating line item.

Shared Services: Cost of the special funded programs of State Print and Mail, State Supply, and State Surplus Property include the salaries, facilities, materials, and equipment necessary to deliver these services. Costs incurred by State Print and Mail and State Supply are recovered from using agencies. State Surplus Property's

110 Management and Budget

Agency 110

operating costs are recovered from the proceeds generated from the distribution and sales of state-owned and Federal surplus property. Services from the State Procurement Office are provided with general funds.

Risk Management: Is all special funds:

- Salary represents 4.0 FTE's who provide administrative support and loss control services.
- The operating funds are needed to administer the program.
- The most significant costs of the program are for excess liability coverage premium, IT services for maintenance of Risk software programs, and actuarial fees required to determine the financial viability of the funds and amount of required contributions or premium.

Program Goals and Objectives

Administration: The Office of Management and Budget provides innovative leadership and support to state government.

Fiscal: The mission of Fiscal Management is to provide our customers responsive guidance and knowledgeable management in fiscal operations.

HRMS: Human Resource Management Services mission is to provide leadership and expertise in human resource management.

Facility Management: The mission of Facility Management is to provide a clean and safe environment with friendly, respectful, and efficient service to all who use the North Dakota Capitol Complex.

Shared Services: The objective of Shared Services Division is to support state government by providing our customers with quality products and services, enabling them to accomplish their mission.

Risk Management: The mission of the Risk Management Division is to coordinate efficient functions that promote safety and reduce loss resulting from tort liability or employee injury claims.

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

110 Management and Budget

Agency 110

Request explanation and justification (include any statutory authority)*: Utilities/ Operating for New Lab - Estimated to cost \$500,000 per year in operating costs which would include utilities. Plus Salaries and Benefits for 5 employees.

Necessary resources for implementation (including FTE's)*: \$1,000,000 in operating and 5 new FTEs

Are resources being redirected or are they new or additional (including FTE's)*: DEQ and DHHS employees will be relocating into the new lab. These are new resources for OMB.

Who is served and impact of not funding*: The visitors and staff at the new lab. This funding is needed to operate the new facility.

Increased Operating Costs (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	2,758,940	15,000	2,773,940	0.00	2,758,940	15,000	2,773,940	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Operating costs continue to rise due to inflation. In the 23-25 biennium OMB did receive some one-time funding for inflationary increases. It was requested as one-time funding so we could reevaluate the cost of goods and services after the global pandemic and supply shortages ended. However, costs continue to rise as a result inflation.

OMB's Shared Services Print and Mail division provide services to the other state agencies and Surplus acquires property from the Federal GSA and sells it to non-profits and government entities. These departments are revenue generating to cover their costs, but they need to have the appropriation authority available to support their business operations.

Inflationary increases and additional funding is also being requested for the Mailroom. The operating costs of the mailroom are supported by the General Funded. The mailroom expanded it's services to the DOT, so operating costs for supplies such as meter tape, equipment costs, and ink have increased.

Data Processing Increases and licenses for ChatGPT. There has been a significant increase in data processing charges due to modifications that were needed because of items that were passed in the 2023 legislative session (ie. vacant/new FTE pool, working parent child credit) and from agencies requesting modifications. OMB wants 25 licenses for Chat GPT /Copilot. ChatGPT Enterprise licenses is \$60 per month (60 per month* 25 licenses at OMB * 24 months) = \$36,000. (4 SF licenses and 21 GF licenses).

110 Management and Budget

Agency 110

News media monitoring software and social media scheduling/monitoring software for OMB's communications division. This software will help them monitor things in the news and where information is being reported.

We also had to cut the special fund budget as part of the budget reduction, we are asking for that funding back, to ensure we can continue to provide services to our customers.

Necessary resources for implementation (including FTE's)*: Additional appropriation authority to support operations.

Are resources being redirected or are they new or additional (including FTE's)*: New and continuing, a portion of the request is asking for a continuation of the onetime funding that was received in the 23-25 biennium for \$340,000 inflationary increases, and a portion is requesting funds back what needed to be reduced for the 3% budget reduction.

Who is served and impact of not funding*: The state agencies and the customers that are served by OMB will be impacted. Our ability to provide innovative leadership and support to our customers will be impacted if this is not funded.

Talent Manager (Priority: 03)

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Expanding cooperative purchasing services.

Cooperative purchasing is authorized under North Dakota Century Code Section 54-44.4-14. Government entities can purchase goods and services from the Office of Management and Budget (OMB) State Contracts. OMB State Procurement establishes contracts for goods and services commonly used by government entities.

Partnering with the OMB State Procurement Office can reduce administrative time and save money.

In addition, you can be confident knowing that your purchases have met the standards of ethical and accountable public procurement.

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*:

Special	-	-	-	0.00	-	-	-	0.00
Total	200,000	-	200,000	0.00	200,000	-	200,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increases in electricity and natural gas costs.

Necessary resources for implementation (including FTE's)*: \$200,000

Are resources being redirected or are they new or additional (including FTE's)*: Additional

Who is served and impact of not funding*: ND Citizen would benefit and the impact of not funding would not being able to maintain the Capitol Complex buildings.

Hay Methodology for HRMS (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	134,000	-	134,000	0.00	134,000	-	134,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	134,000	-	134,000	0.00	134,000	-	134,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: OMB HRMS is legislatively required to use Hay Methodology which is provided by KornFerry and their contract costs have significantly increased.

110 Management and Budget

Agency 110

The Hay Method is a pay equity compliant and gender-neutral evaluation system that assesses a job based on skill, effort, responsibility, and working conditions.

Necessary resources for implementation (including FTE's)*: We have 16,000 in our base budget and the new contract costs will be \$150,000 a biennium.

Are resources being redirected or are they new or additional (including FTE's)*: Additional

Who is served and impact of not funding*: The state's compensation methods are served. Impact of not funding would be needing to establish a new compensation methodology.

FMLA Source (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	324,000	-	324,000	0.00	324,000	-	324,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: On going costs for FMLA Source which is the system used by the state to ensure compliance with FMLA requirements.

Necessary resources for implementation (including FTE's)*: \$162,000/yr = \$324,000/biennium

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: State agencies are served. If this is not funded agencies would have to establish their own processes for ensuring compliance of FMLA requirements.

Temporary Salaries (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	200,000	-	200,000	0.00	200,000	-	200,000	0.00

110 Management and Budget

Agency 110

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	200,000	-	200,000	0.00	200,000	-	200,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Temporary Salaries allows for hiring employees with specialized skills when projects arise that cause an increased workload or training new hires in after turnover occurs.

This request is also for the mailroom, where additional temporary salaries are needed because they expanded their services to the DOT.

This funding will also allow OMB to participate in the HRMS internship program.

Necessary resources for implementation (including FTE's)*: Additional funding of \$163,960

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: This would serve OMB as projects arise that impact the workload, having the support from a Temp positions helps ensure OMB's services are still being adequately provided.

HHS Pay Initiative Support (Priority: 12)

Special	-	-	-	0.00	-	-	-	0.00
Total	1,206,536	-	1,206,536	4.00	644,396	-	644,396	2.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

110 Management and Budget

Agency 110

Request explanation and justification (include any statutory authority)*: 3 Business Analysts and 1 developer to support the Procure to Pay system.

DHHS received funding for a new procure to pay system for the 23-25 biennium. This system will be rolled out as an Enterprise system that will be used by all agencies.

This system will have all of the modules to support the procure to pay process in addition to new processes and development needed to support and maintain the system.

- 1) Contract Management
- 2) Supplier Portal
- 3) Accounts Payable
- 4) E-Market place
- 5) Source to Pay
- 4) Managing Security
- 5) Integration with PeopleSoft with multiple connection points and combo edits,
- 6) Training

Necessary resources for implementation (including FTE's)*: 3- Business Analysts to collaborate with stakeholders and identify business needs, analyze data, identify issues, review and establish business processes to enhance efficiency and effectiveness of the system. The Business Analysts positions would be the functional support of the system.

1- Developer to analyze issues and debug the coding, testing processes to ensure quality, managing upgrades to the system, maintain security access, configure processes in integrate with PeopleSoft.

Are resources being redirected or are they new or additional (including FTE's)*: Additional- DHHS received funding for a Procure to Pay system for the 23-25 biennium.

Who is served and impact of not funding*: The new system will improve the State's procure to pay process.

Development of a Enhance Recruiting Management System (ERMS) (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	300,000	250,000	550,000	0.00	300,000	250,000	550,000	0.00

110 Management and Budget

Agency 110

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	300,000	250,000	550,000	0.00	300,000	250,000	550,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Development of a Enhance Recruiting Management System (ERMS)

This system would change the application workflow and works with the hiring platforms such as Indeed,

The CRM (Customer Relation Management) on the backend can feed the applicants to other similar job postings.

This system will have one time development costs and ongoing annual subscription fees/support.

Necessary resources for implementation (including FTE's)*: One- time funding for development on on-going funding for subscription/ support of the system.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: Applicants and State Agencies are served as this will improve the hiring process at the State. Impact of not funding is losing out on good candidates.

Student Internship Program (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	500,000	-	500,000	0.00	-	500,000	500,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Unassigned Employees	-	-	-	0.00	-	-	-	0.00
Total	500,000	-	500,000	0.00	-	500,000	500,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

110 Management and Budget

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The ND State Government Student Internship Program brings students into state government where they will gain an understanding of governmental processes while being introduced to the increasingly complex challenges facing North Dakota.

OMB moves appropriation authority to the agencies that have their workplans approved by HRMS. Internship positions are generally eligible to receive up to 50% reimbursement depending on budget availability.

Necessary resources for implementation (including FTE's)*: \$500,000

Are resources being redirected or are they new or additional (including FTE's)*: Continuing resources- OMB had one time internship appropriation in the 23-25 biennium for \$500,000

Who is served and impact of not funding*: State agencies and students. This is a good way to recruit students.

Leave Payouts (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	99,305	99,305	0.00	-	99,305	99,305	0.00
Special	-	50,695	50,695	0.00	-	50,695	50,695	0.00
Total	-	150,000	150,000	0.00	-	150,000	150,000	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Leave Payouts for employees that will meet the Rule of 85.

There will be 11 out of OMB's 110 FTE that will meet the rule during the 25-27 biennium.

Necessary resources for implementation (including FTE's)*: One time funding of 150,000 to cover the State's compensated absence liability.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: OMB employees are served.

110 Management and Budget

Agency 110

LESO Program (Priority: 18)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	67,000	-	67,000	0.00	-	-	-	0.00
Special	(67,000)	-	(67,000)	0.00	-	-	-	0.00
Total	-	-	-	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: OMB's Surplus Property Division is part of the Law Enforcement Support Office (LESO) Program. This program makes excess federal military property, such as firearms and

tactical vehicles, available to law enforcement agencies. Compliance checks are required by the Department of Defense to participate in this program. Training is also an important part of this program. Surplus currently has one employee's salary 25% funded by the General Fund for his time spent on the LESO program. To better support the LESO program, this position should be 50% funded by the General Fund. We are requesting that \$67,000 be switched from Special Fund authority to General Fund authority.

Necessary resources for implementation (including FTE's)*: No additional resources, just need funding authority changed from Special Funds to General Funds.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are being redirected.

Who is served and impact of not funding*: The North Dakota law enforcement agencies that participate in the LESO program are served. The impact of not funding is that the OMB position will not be able to dedicate the additional 25% of this time supporting the LESO program since it is not generating revenue.

Early Warn Fraud Prevention (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	25,000	-	25,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	25,000	-	25,000	0.00	-	-	-	0.00

State Initiative:* Other

110 Management and Budget

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Early Warn (JP Morgan) is used by 10 major banks and allows us to validate the account holder any time a change is made. Using Early Warn is a security measure to reduce the risk of fraud.

Necessary resources for implementation (including FTE's)*: 25,000 a biennium

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: This is a Fraud Prevention tool that would benefit all state agencies. The impact of not funding is risk of fraudulent payments being issued.

Facility Management Special Fund Authority (Priority: 21)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	(2,144,396)	-	(2,144,396)	0.00	(2,144,396)	-	(2,144,396)	0.00
Special	2,144,396	-	2,144,396	0.00	2,144,396	-	2,144,396	0.00
Total	-	-	-	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Pursuant to NDCC 54-44-11

The office of management and budget has established a facility management operating fund. Rental fees collected pursuant to section 54-21-19 are deposited into this fund. Facilities can use this fund for operating expenses and salaries.

Request is to change funding authority for \$2,144,396 from General Fund to Special Fund so that operating costs and salaries can be paid out of the special fund. We are also requesting the new custodial staff's salaries for the Lab be paid out of the special funds which totals \$475,194.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting general fund dollars to special fund.

110 Management and Budget

Agency 110

Who is served and impact of not funding*: N/A

Improvements and Enhancements to the Capitol (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	500,000	500,000	0.00	-	-	-	0.00
Special	-	1,000,000	1,000,000	0.00	-	3,000,000	3,000,000	0.00
Total	-	1,500,000	1,500,000	0.00	-	3,000,000	3,000,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In consultation with the Capitol Grounds Planning Commission, we would like funding to make improvements and enhancements to the Capitol complex.

Some improvements could consist of:

- 1) Working with a consultant to maximize the use of the public areas at the Capitol.
- 2) New Christmas decorations to enhance visitor experience at the Capitol, during the holiday season.
- 3) Capitol 18th floor remodel project with exhibits done in two phases:
 Phase One: To remodel to replace carpet, walls, fixtures, etc.
 Phase Two: Turn the 18th floor into a museum - sort of an extension to the Heritage Center.
- 4) Creating virtual reality for each of the Roughrider portraits to enhance the visitor experience at the Capitol.

Necessary resources for implementation (including FTE's)*: One- Time Funding

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: This will enhance the visitor experience and make the Capitol a destination.

Large IT Project Summary

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Ivalua has been awarded the e-procurement system contract. The yearly fees for the contract were 394,567 for year one (billed in March of 2025), 787,502 for year two & three, and 826,971 for year four, and 868,320 for year five.

Total Subscription Fees per the agreement are \$3,664,862.

There are also one- time implementation costs for system support, training, PeopleSoft Integration of \$515,052 and other on-going operating costs for Ivalua NOW-Professional Development and electronic signatures.

OMB received \$1 million in the base budget for 23-25 for the subscription costs.

Necessary resources for implementation (including FTE's)*: Subscription Fees, one-time implementation costs, and on-going costs. More detail provided in the Request explanation section.

Are resources being redirected or are they new or additional (including FTE's)*: Addition Resources.

Who is served and impact of not funding*: Improved Procurement practices will benefit the state agencies and bidders.

110 Management and Budget

Agency 110

Start Date (MM/DD/YYYY): 8/5/2024

End Date (MM/DD/YYYY): 6/30/2025

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* Procurement Automation Project is a continuation of project started in 2021-2023 biennium with initial budget over approx. \$2 million. For the 23-25 biennium \$1,924,344 was carried over from the previous biennium and additional appropriation was received of \$1,000,000 for the annual subscription, and \$400,000 in one time funding for development.

This System will replace the State Procurement online solicitation system and adds a new system for enterprise contract management. The contract management system will also be used to provide online information for government entities ordering from state contracts. Procurement Automation integrates with PeopleSoft, and the State and NDUS Supplier/Payee databases.

Project Risk:* Limited employee resources for State/NDUS to implement and maintain given the additional workload.

Issue/Solution:* Additional workload associated with the increased functionality/complexity of the solicitation replacement system and new additional enterprise contract management solution.

Statutory Authority

North Dakota Century Code Chapters 54-44.6, 54-46 and 54-46.1, 54-59.

Agency Description

The North Dakota Information Technology (NDIT) department, led by the Chief Information Officer who reports directly to the Governor, is committed to driving innovation, efficiency, and security across the state's digital infrastructure. NDIT provides critical IT services to all state agencies, including institutions under the State Board of Higher Education, as well as local government entities such as counties, cities, and school districts.

In alignment with its mission to foster a more efficient and effective government, NDIT plays a central role in coordinating the deployment of information technology across state government. This includes establishing IT standards, setting strategic technology guidelines, and providing oversight for major IT projects, ensuring they align with the state's long-term goals and deliver maximum value to citizens.

NDIT administers and oversees several key statewide initiatives and programs that are vital to North Dakota's digital transformation:

EduTech: Provides educational technology services to K-12 schools across the state, enhancing digital learning opportunities.

Statewide Longitudinal Data System (SLDS): An initiative that enables data-driven decision-making by linking and analyzing data across different state agencies and educational institutions.

Geographic Information System (GIS) Program: Supports the development and deployment of geospatial technologies to better serve state agencies, local governments, and citizens.

Health Information Exchange (HIN): Facilitates the secure sharing of health information across different healthcare providers, improving patient care and public health outcomes.

State Interoperability Radio Network (SIRN): A critical communications infrastructure that ensures first responders and public safety officials can communicate seamlessly during emergencies.

As NDIT continues to innovate and evolve, it remains steadfast in its mission to empower North Dakota's state government with the tools, technologies, and strategies needed to serve its citizens effectively and securely. Through strategic partnerships, future-proof workforce development, and a focus on delivering exceptional citizen experiences, NDIT is helping to build a stronger, more resilient North Dakota.

Agency Mission Statement

At NDIT, our mission is to be a trusted business partner through frictionless technology and proactive services.

Our vision is to enable partners to provide the "Best Government Experience," empowering people, improving lives, and inspiring success through technology. As we look toward the future, we focus on several key priorities that drive our technological advancements:

Strategic Partnerships: We aim to enhance service delivery and efficiency by deepening our partnerships with state and local agencies and educational institutions.

112 Information Technology

Agency 112

Cybersecurity: We prioritize protecting our state's data and systems with a "Whole of State" approach to cybersecurity, involving comprehensive collaboration and preparedness exercises.

Workforce Development: By collaborating with universities and colleges, we ensure our workforce is equipped with the latest technological skills and knowledge.

Business and Citizen Gateway Project: We are working to streamline access to government services through a one-stop portal for businesses and citizens.

Data Governance and Literacy: We are committed to enhancing data governance and literacy, enabling informed decision-making across state agencies.

This strategic approach ensures that NDIT continues to support North Dakota's technological growth and innovation, paving the way for a brighter, more connected future for our state.

Major Accomplishments

- 1 • Third Party Risk Assessments – NDIT performed security risk assessments on 187 third-parties (vendors) in 2023. • Risk Assessments - In 2024, NDIT has already completed 253 security risk assessments on third-parties. • System Assessments - From 2023-2024, NDIT completed security control analysis on nearly 150 applications to ensure security controls address and mitigate risk for state agencies. • Aligned Policies to Latest NIST Framework – NDIT's Governance, Risk, and Compliance team updated all IT and Security policies to the latest industry standard requirements per NIST 800-53 r5. • Security Awareness Training – State employees complete quarterly training, with a 98% completion rate. • Internal Phishing Campaigns - NDIT tests state employees monthly to recognize phishing emails: the phish failure percentage (amount of staff that failed a phishing campaign) went from 13.3% to 7.8% • Tabletop Exercises - NDIT facilitated 9 tabletop exercises in the past year around a simulated ransomware attack, advocating for planning and preparation from counties, cities, K-12, and State Agencies to have business resilience plans created and tested. • AI Policy - NDIT created an Artificial Intelligence (AI) policy in February, 2024 to highlight the benefits and security concerns with this emerging technology. NDIT presented the policy to numerous agencies to support the use of AI and using the data classification policy as guardrails for ethical, privacy, and security considerations. • Cyber Maturity Assessment (CMA) – NDIT sends a biennial assessment to all government entities in North Dakota to gauge each entity's cybersecurity posture and identify common control weaknesses within each government sector and for the entire state. The data from the assessments helps solidify recommendations to address risks, as well as seek grant programs to assist in NDIT's "Whole of State" cybersecurity strategy. • NetMotion – Upgrades were made to the Netmotion VPN solution which provides an improved authentication for our first responders and has reduced the number of incidents related to supporting the platform. • Vulnerability Scanning – Expanded our deployment of Tenable agents from 27k devices to 43k devices and added additional vulnerability scanners across the network to improve the effectiveness and cadence of our vulnerability scans. • Tenable Identity Exposure – Recently implemented a new application for assessing and remediating risks associated with our identity platform and monitoring for attacks against our identity infrastructure. • Cyber Operations Center – NDIT's Cyber Operations Center identifies, investigates, and responds to over 50,000 potential security incidents on an annual basis. • SOC-CMM Maturity Assessment – NDIT used the Security Operations Center Capability Maturity Model (SOC-CMM) to evaluate our cybersecurity operations maturity. This assessment identified key strengths and areas for improvement in People, Process, Technology, and Services. This provided insight into where we can enhance our monitoring, incident response, threat intelligence, threat hunting, vulnerability management, and staff training and education. • Quarterly Purple Team Exercises – NDIT is performing quarterly purple team exercises to test and strengthen our cybersecurity defenses. These drills between our offensive and defensive security teams help identify vulnerabilities, enhance our detection capabilities, and improve our overall incident response. • CyberShield 2024 – NDIT Cyber Operations team participated in CyberShield 2024, a premier cybersecurity exercise conducted by the National Guard in collaboration with industry partners, government agencies, and international allies. This annual event focused on enhancing cyber capabilities, building partnerships, and strengthening the nation's cyber posture. This year's event specifically emphasized defending operational technology against a cyber-attack on a critical infrastructure network. Over 800 National Guard airmen, soldiers, and partners from 36 states and five partner nations participated in the exercise. • JCSOC (Joint Cybersecurity Operations Center) - A multi-state engagement comprising of 13 states emphasizing sharing of threat intelligence and collaboration on cybersecurity and discussion of best practices between states. We have matured to include additional Governance, Risk and Compliance conversations with GRC leads. (StateRAMP, AI, Audit conversations). In November of 2023, we facilitated a Live-Fire and Crisis Simulator Exercise among member states that created an opportunity to simulate a real world cyber attack. Analysts from each state responded to a simulated exercise while executives from each state discussed challenges and practiced decision making during a cyber event. In June of 2024, we also facilitated a Table Top Exercise (our 3rd annual) to bring together security practitioners to engage in discussions on policies, processes, and best practices for responding to various types of cybersecurity incidents. • Web Application Firewall (WAF) – NDIT is currently implementing a web application firewall security platform that will bring additional capabilities to protect our internet-facing web applications from threats including malicious bots, distributed denial of service (DDoS) attacks, and many of the most common and critical web application risks such as the OWASP Top 10. • Extended Security Intelligence and Automation Management (XSIAM) – NDIT finalized an enterprise agreement with Palo Alto Networks to secure access to some of the latest cybersecurity technology offered, enabling North Dakota to leverage state-of-the-art solutions to protect the state network. We have begun work to migrate our cyber operations to this new platform which will bring enhanced capabilities to protect against the latest threats and continue to provide world-class services to our customers. • Automating the SOC – NDIT continues to focus efforts on automating operations within the security department. Our team of automation engineers has complete 400 feature requests throughout the SOC and has worked with other teams within NDIT to continue to explore and develop automations. • Red Team Expansion – Red team has continued to expand their scope in the last year. They have completed 105 web application penetration tests while also building and implementing and executing 12 penetration tests for entities throughout the state government. The red team also worked with the Analysis and response team to standup and execute the first 8 purple team exercises to test commonly seen TTPs to feed into detection engineering and threat hunt processes and track all the information from those purple team exercises in a tool called vectr. • Threat Intelligence – Threat Intelligence has worked to complete 208 threat intelligence requests from many different areas inside of the SOC and from customers outside of the SOC giving valuable information on

Major Accomplishments

-
- 2 Service Desk: -Processed 52,050 over the last six months, averaging just over 8,600 a month. -Service desk achieved a 97% satisfaction rating related to incident management. -Service desk achieving 68% first call resolution.

 - 3 Statewide Longitudinal Data System (11271) State Longitudinal Data System (SLDS) public interactive dashboards and data site, Insights of North Dakota (<https://Insights.nd.gov>), expanded to include more data domains including Career and Technical Education (CTE) and additional K12 data along with Workforce Supply and Demand in post-secondary institutions.

 - 4 EduTech/K-12 Network (11273 & 11274) Provides PowerSchool, the PK-12 student information system, for 175 school districts (168 public and 7 non-public) as well as 3 CTE Centers, 4 REAs and 1 ITV Consortium. During the 23-24 half of the biennium, NDIT-EduTech provided over 1,100 professional learning sessions to 12,000 participants with 30,000 hours of professional learning impact. All ND K12 school districts benefit from the Microsoft 365 system managed by NDIT-EduTech with 29,000 users actively using the system on an average day. To date, NDIT-EduTech has obtained over one million dollars in grant funding from Microsoft, Cyber.org, and other partners to underwrite computer science and cybersecurity training. As a result, nearly 800 ND K12 teachers have received or are eligible to receive their computer science/cybersecurity credential. Conferences such as IgniteND, (270 attendees) and PowerSchool User Group (85 attendees) were hosted by NDIT-EduTech to ensure ND K12 technology leaders maximize the benefits of educational technology services provided by the state. ND CyberMadness, launched by NDIT in 2022, is a Cybersecurity competition for students that is fully funded by private sponsors. Over 600 participants from 49 North Dakota schools gained Cyber and IT Careers experiences and have received \$30,000 in scholarships.

 - 5 State Interoperability Radio Network Accomplishments (11278) Public safety agencies in 5 areas across the state have successfully migrated to the Statewide Interoperable Radio Network (SIRN), over the next three years the remaining agencies across the entire state will follow. The first users of SIRN went live with new, feature rich and resilient network providing the public safety community with a communications network they require. SIRN is a highly redundant, trunked radio network that provides the interoperability and redundancy required in modern public safety communications. SIRN also has the capability to leverage and integrate future technological advances in communications. Implemented a new computer aided dispatch solution provided for the state public safety officials enabling a feature rich platform for years to come. Upgraded the next gen 911 core infrastructure to ensure the highly reliable and resilient requirements of the 911 solution are maintained. Significant progress has been made in rolling out encryption, centralized radio management, and addressing processes and procedures for support and maintenance of the system.

 - 6 North Dakota Health Information Network (NDHIN) is a health information exchange charged with expanding secure exchange of health information across the state of North Dakota. NDHIN has over 400 health care locations participating across the state with over 5,000 clinical users participating in the system. The master patient index now houses over 1.7 million unique patient records. NDHIN completed COVID-19 Electronic Lab Reporting (CELR) for the state. CELR data comes into the Department of Health for ELR reporting, which sends a copy of these messages to NDHIN. Prior to and throughout COVID, NDHIN implemented Electronic Test Orders & Results (ETOR) with large integrated delivery networks and out-of-state reference labs. This allowed test orders to flow electronically to and from the ND Public Health State Laboratory with the capability of being imported to the provider's electronic health record. The North Dakota Healthcare Directive Registry development has been completed and is available at <https://apps.nd.gov/itd/hin/hdir/login>. This system allows citizens to store, maintain, and retrieve important healthcare documents, such as advance directive documents that are key when determining proper patient care. Users can share documents with providers and family as they choose. NDHIN is integrated with the ND Immunization Information System/Registry with bidirectional exchange of data. NDHIN is also providing data to the Autism Registry; syndromic surveillance and electronic laboratory data to Department of Health systems to support public health initiatives.

Critical Issues

-
- 1 EduTech Training Application, a custom enterprise application which manages all functions related to course creation and participant registration, billing etc... for EduTech training is in critical need of replacement. We wish to move to a commercial, off the shelf solution in order to eliminate limitations and retire the technical debt caused by the current application.
-

Critical Issues

-
- 2 Statewide Interoperable Radio Network (11278) Increasing costs and logistical challenges are putting pressure on the both the project and operational budgets. The successful planning, engineering, and implementation of integration such as paging, sirens, and other ancillary systems remain a challenge. As we proceed towards operational transition, NDIT looks for help in funding the ongoing operational needs of the system (estimated at approximately 10-12M per year). Operational funding is current funded through 911 service fees and recovering approximately (4.5M) per year. Without adequate support for the project or operations, public safety communication will not be sufficient to meet the requirements of the public safety community and response by that community will be significantly impacted and potentially resulting in the loss of life and property throughout the state. Partial completion of this project or insufficient operational funding would leave communications vulnerable to failure, degraded, un-encrypted or unmanaged, and not realize the intent of the original funding to benefit first responders.
-
- 3 Health Information Network (11277) NDHIN has received funding from the Centers for Medicare and Medicaid (CMS) under the Health Information Technology for Economic and Clinical Health (HITECH) program which sunset at the end of the federal fiscal year 2021. CMS has directed states to work together to transition funding for these programs, such as NDHIN, to the State Medicaid Agency. Recent CMS guidance indicates that federal support of HIEs can continue dependent on collaboration between the State Medicaid Agency and HIE to determine value/benefit and the appropriate cost allocation. NDHIN has been having discussions with ND Medicaid on a cost allocation methodology and has arrived at a cost allocation approved by federal CMS, however even with the current cost allocation of federal funds, NDHIN is not yet self-sustainable. Funds are necessary to ensure there is not a gap or discontinuation of the services that NDHIN provides to benefit citizens of North Dakota. NDHIN provides many valuable services that benefit the citizens of North Dakota. NDHIN benefits all North Dakota citizen with a mission to advance the adoption and use of technology to exchange health information and improve healthcare quality, patient safety, and the overall efficiency of healthcare and public health services in North Dakota. NDHIN currently contains over 1.7 million unique patient IDs. NDHIN aggregates patient electronic health information from participating healthcare systems into a cumulative patient medical record. NDHIN connects over 400 organizations representing diverse providers, hospitals, clinics, and labs to make electronic health information available on demand at the point of care. Appropriate, timely sharing of vital information can better inform decision making at the point of care and allow providers to avoid readmissions, avoid medication errors, improve diagnoses, and decrease duplicate testing improving care for citizens. NDHIN is used by providers as can be evidenced in the month of June 2024, over 35,000 patient records were accessed through the NDHIN and over 390,000 messages were sent and received between providers and payers. NDHIN continues to recruit and onboard additional participants. NDHIN has completed connectivity to national networks via the eHealth Exchange hub which provides provider query access to key organizations such as the Mayo Clinic, as well as HIEs in other states and networks such as Carequality and Commonwell Health Alliance. Although NDHIN has continued to operate and make some progress over the past year there are many opportunities for the state of North Dakota in leveraging this secure statewide network that has now collected over a decade of clinical patient information. The state of North Dakota is very fortunate to have a statewide network in NDHIN to support this critically important work. A lack of funding to sustain NDHIN risks erasing the progress made during the past decade and reverting to less efficient methods of sharing health information between providers and the state which would increase provider burden, be less secure, and potentially more costly. Many states are working to identify quality, value, and cost of care across their population to improve overall citizen health and wellbeing. Many health information exchanges are now transitioning to the Health Data Utility model, which NDHIN is exploring as well to determine what features will add value for participants and stakeholders.
-

Performance Measures

ITD publishes an annual report that discusses our performance measures in more detail. The report can be found at <https://www.ndit.nd.gov/about-us/annual-report/2022-2023-annual-report>

Program Statistical Data

NDIT currently provides information technology services for over 600 customers including state agencies, higher education, political subdivisions, libraries and the K-12 education community.

112 Information Technology

Agency 112

In the past six months the NDIT cybersecurity team has:

- Defended against more than 4,000,000 malware, phishing, and spam messages.
- Investigated over 1,500,000 alerts.
- Resolved over 52,000 security incidents.
- Performed risk assessments on nearly 100 third-party vendors hosting or transmitting state data.

Service Desk:

- Processed 52,050 over the last six months, averaging just over 8,600 a month.
- Service desk achieved a 97% satisfaction rating related to incident management.
- Service desk achieving 68% first call resolution.

Statewide Longitudinal Data System (11271):

State Longitudinal Data System (SLDS) public interactive dashboards and data site, Insights of North Dakota (<https://Insights.nd.gov>), expanded to include more data domains including Career and Technical Education (CTE) and additional K12 data along with Workforce Supply and Demand in post-secondary institutions.

EduTech/K-12 Network (11273 & 11274):

Provides PowerSchool, the PK-12 student information system, for 175 school districts (168 public and 7 non-public) as well as 3 CTE Centers, 4 REAs and 1 ITV Consortium. During the 23-24 half of the biennium, NDIT-EduTech provided over 1,100 professional learning sessions to 12,000 participants with 30,000 hours of professional learning impact. All ND K12 school districts benefit from the Microsoft 365 system managed by NDIT-EduTech with 29,000 users actively using the system on an average day.

To date, NDIT-EduTech has obtained over one million dollars in grant funding from Microsoft, Cyber.org, and other partners to underwrite computer science and cybersecurity training. As a result, nearly 800 ND K12 teachers have received or are eligible to receive their computer science/cybersecurity credential.

Conferences such as IgniteND, (270 attendees) and PowerSchool User Group (85 attendees) were hosted by NDIT-EduTech to ensure ND K12 technology leaders maximize the benefits of educational technology services provided by the state.

ND CyberMadness, launched by NDIT in 2022, is a Cybersecurity competition for students that is fully funded by private sponsors. Over 600 participants from 49 North Dakota schools gained Cyber and IT Careers experiences and have received \$30,000 in scholarships.

Geographic Information System (11276):

112 Information Technology

Agency 112

The core of the State Geospatial Program is the GIS Hub which leverages the State's existing data, infrastructure, and geospatial expertise to share core geographic datasets to state agencies and the public. The State Geospatial Committee, consisting of 15 state agencies, enhances the GIS Hub by adding data and increasing awareness of the GIS Hub by promoting its use, value, and functionality.

Health Information Network (11277)

NDHIN currently contains 1.57 million unique patient IDs. NDHIN aggregates patient electronic health information from participating healthcare systems into a cumulative patient medical record. NDHIN connects over 356 organizations representing diverse providers, hospitals, clinics, and labs to make electronic health information available on demand at the point of care.

NDHIN is used by providers as can be evidenced in the month of June, 2024, over 33,000 patient records were accessed through the NDHIN. In the month June 2024, over 390,000 messages were sent and received between providers and payers.

State Interoperable Radio Network (11278):

The State's current public safety radio networks are comprised of approximately 900 public safety and other public sector agencies comprised of 20,000 user devices and 22 Public Safety Answering Points ("PSAP", "Dispatch", or 9-1-1 Call Centers") distributed across all 53 counties and several state agencies. Users of SIRN will include: city, county, state, federal, tribal, and approved privately owned public safety and emergency response agencies.

Explanation of Program Costs

Programs for NDIT are laid out as IT Operational work and appropriations by line item (71,73,74,76,77, & 78) These programs will have a mixture of general funds and other funds.

IT Operations

General fund salaries and operating expenses for maintaining statewide e-government initiatives, enterprise communications and enterprise architecture initiatives. Salaries and operating expenses for maintaining statewide cybersecurity functions. These services are provided for state government, higher education, K-12, cities, political subs and boards or commissions.

Other fund appropriations in this program are people costs, software costs and the cost of the network and computing infrastructure. The demand for more bandwidth continues to grow as we expand the delivery of services via the e-government model and see an increasing move towards cloud based services. The industry continues to see year over year increases in software maintenance costs. In addition we are seeing a continued growth in the demand for managed storage services which will require additional hardware purchases. The core operations of NDIT provide computer hosting and support services, software development services and state-wide communications services. The costs for these services are tracked as an internal service fund. Accordingly, these services are funded through a process of defining and assessing a fair and equitable billing structure for services that provides for payback of the initial investments and ongoing operations. This is accomplished by determining the actual cost of providing a specific service and establishing a unit rate for that service. NDIT is committed to quality service in a timely manner for a reasonable cost.

Statewide Longitudinal Data System (11271)

The costs in this program consist of salaries to drive the Statewide Longitudinal Data System.

EduTech/K-12 Network (11273 & 11274)

The costs in the EduTech program (11273) include salaries and operating expenses to provide IT training, consulting, coaching and outreach to the PK-12 community, including educators, administrators, staff, students, and parents. In addition, this staff provides IT services, consulting and support for centralized e-mail hosting, identity management, Azure Active Directory, device management, and E-Rate for PK-12 schools. This staff also provides the hosting and support services for the statewide PowerSchool Student Information System which provides students and parents the capability to access grades and attendance along with other features needed to provide efficient school management.

The majority of costs in the K12 Network program (11274) cover the portion of circuit and infrastructure costs for K-12 schools and libraries that are not covered by reimbursements from the federal E-Rate program. It also includes salaries and operating expenses to directly support the K-12 customer base for network services.

Geographic Information System (11276)

The core of the State Geospatial Program is the GIS Hub which leverages the State's existing data, infrastructure, and geospatial expertise to share core geographic datasets to state agencies and the public. The State Geospatial Committee, consisting of 15 state agencies, enhances the GIS Hub by adding data and increasing awareness of the GIS Hub by promoting its use, value, and functionality.

A key component of the State Geospatial Program is the Parcel Program which continues to grow in usage of the data, with the average number of data requests exceeding 60,000 per day. The goal of the Parcel Program is to provide publicly available Statewide Parcel Dataset having a common schema with data aggregated from each county. Benefits include reduced or eliminated duplication of effort and foundational support of state programs and business processes.

Health Information Network (11277)

The ND Health Information Network (NDHIN) is the name of the state health information exchange. The appropriation in this program covers salaries and the operating expenses of NDHIN. The anticipated funding model for NDHIN is state funds, augmented by subscription fees paid by the provider and payer community.

This program is used to track expenditures for Health Information Technology (HIT) planning and coordination and for operating the NDHIN.

NDHIN goals are to coordinate HIT initiatives as noted in North Dakota Century Code 54-59-25, 54-59-26 and 54-59-27. This code established a Health Information Technology Advisory Committee (HITAC), to help implement a comprehensive system to manage health information. HITAC consists of representatives from the Governor's Office, ITD, Department of Health, and Department of Human Services, as well as stakeholders appointed by the Governor, who represent providers, consumers, and trade associations. NDHIN promotes i

Program Goals and Objectives

Program goals and objectives

As NDI readies itself for the future, our vision is a deliberate commitment to shape North Dakota's Technological landscape through the strategic pillars of Frictionless Experience, Provide Business Insights, Strengthen Operational Rhythm, Optimize Financial and Process Discipline, and a People-First Culture. This vision is a pledge to refine our identity and amplify our impact to our partners. In the years ahead, we foresee a paradigm shift where technology transcends its role as a support system to become an integral force propelling the state toward enabling our partners to provide the Best Government Experience.

Our future envisions a strategic partnership between IT and broader government goals.

Here's how we are navigating this journey:

Frictionless Experience: Recognizing the need to eliminate barriers for our partners, we prioritize creating a seamless and intuitive experience. This strategic pillar ensures that technology is not a hindrance but an enabler, allowing employees and citizens to interact with IT effortlessly.

Provide Business Insights: Our commitment to understanding the business goes beyond surface-level requirements. Through collaborative efforts and strategic analysis, we delve deep into the motivations and challenges of our partners. This pillar ensures that our IT initiatives align precisely with the expectations and strategic objectives of the organization.

Strengthen Operational Rhythm: This pillar ensures our operations are not just reactive responses but proactive contributions to positive change. It transforms IT from a service provider to a strategic partner with a synchronized and impactful operational rhythm.

Optimize Financial and Process Discipline: Ensuring cost efficiency and process optimization are paramount. This pillar guides us in continuously optimizing our operations without compromising quality. It ensures our financial and process disciplines are aligned with the broader organizational goals.

People First Culture: Building trust is at the core of our vision, and this pillar underscores the importance of a people-first culture. As we excel in meeting the needs of our business partners, we pave the way for increased satisfaction, fostering collaborative relationships. This pillar positions IT as a key enabler of the organization's success.

In essence, our dedication lies in forging enduring relationships and crafting an IT landscape that anticipates, adapts, and becomes a driving force for the organization's success. Central to this vision is the enablement of our partners, ensuring they have the tools and support needed to deliver the Best Government Experience. This isn't just a future vision; it's a commitment to redefining the very fabric of North Dakota's technological evolution.

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

112 Information Technology

Agency 112

Request explanation and justification (include any statutory authority)*: The State Interoperable Radio Network project will move into operations next biennium. This will require dedicated resources to support the roughly 140 tower sites across the state. Public safety agencies in 5 areas across the state have already successfully migrated to the Statewide Interoperable Radio Network (SIRN), and over the next three years the remaining agencies across the entire state will follow.

SIRN is a highly redundant, trunked radio network that provides the interoperability and redundancy required in modern public safety communications. SIRN also has the capability to leverage and integrate future technological advances in communications. In '25-27, the remaining entities will go live on a whole of State radio system for all first responders, providing them with a new, feature rich, and resilient communications network.

To date, NDI has not been able to secure significant human capital to support the system and have been utilizing largely existing resources. However, with us increasing the supported tower count from 40 to ~140 over the next biennium, the need for these resources will be critical for first responders. Original studies for this system provided estimates for the support and mentioned we would need between 21-86 people across both vendor and internal resources. NDI has created a staffing plan based on the updated needs and is requesting a small subset of new positions for the '25-'27 biennium based on anticipated needs in the '25-'27 biennium totaling 6 new positions for SIRN.

Section 37-17.3-12 and 57-40.6-02 are the two pieces of code that recover the ongoing operational fund.

Necessary resources for implementation (including FTE's)*: CF - New Position - DOT Engineering Tech IV,

CF - New Position - ITS Admin (DOT),

CF - New Position - Sr. Enterprise Service Desk (SIRN),

CF - New Position - Sr. Tier II Analyst (SIRN),

CF - New Positions (4) - Sr. Infrastructure Tech (SIRN),

Are resources being redirected or are they new or additional (including FTE's)*: 6 resources will be for overall SIRN support, 2 resources will be dedicated to DOT for support of roadside technology.

Who is served and impact of not funding*: The State's current public safety radio networks are comprised of approximately 900 public safety and other public sector agencies comprised of 20,000 users and devices and 22 Public Safety Answering Points ("PSAP", "Dispatch", or 9-1-1 Call Centers") distributed across all 53 counties and several state agencies. This includes city, county tribal and public safety radio networks.

Vendor Toolset Increases (Priority: 06)

112 Information Technology

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Cybersecurity will always be at the forefront of the work NDIT does. Maintain modern security toolsets is essential given the growing sophistication and frequency of cyber threats. As cybercriminals deploy more advanced techniques, such as ransomware, phishing, and state-sponsored attacks, the need for robust, cutting-edge security solutions has never been greater. Investing in enhanced cybersecurity tools helps NDIT protect sensitive data, prevent costly breaches, and comply with stringent regulatory requirements. The potential financial impact of a cyberattack—including downtime, data loss, reputational damage, and legal penalties—far outweighs the upfront cost of these tools. Moreover, cybersecurity tools that offer automation, real-time threat detection, and AI-driven analytics reduce response times, improve defense capabilities, and ultimately save costs by preventing more significant, disruptive incidents.

Necessary resources for implementation (including FTE's)*: Additional funding for multi-year contractual agreements that lock in costs.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: NDIT is responsible for the cybersecurity of all entities on the state network. Nearly all government services are hosted by NDIT for which North Dakota citizens entrust government to secure their data.

General	597,038	-	597,038	2.00	-	-	-	0.00
Special	6,697,132	-	6,697,132	23.00	3,469,060	-	3,469,060	11.00
Total	7,294,170	-	7,294,170	25.00	3,469,060	-	3,469,060	11.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The resources for this package are a result of agencies requesting additional application support and the capacity needs of NDIT to meet the IT project asks within the 2025-2027 budget.

Based on the Governor’s strategy sessions, the Statewide IT Plan, and working with OMB to understand agency decision packages, NDIT will need to increase capacity to meet the demand of future work. If the projects are not approved as decision packages, NDIT will not need the resources for capacity.

112 Information Technology

Agency 112

Necessary resources for implementation (including FTE's)*: CF - New Position - DOCR Expansion,

CF - New Position - Enterprise Architect,

CF - New Position - Network Engineer,

CF - New Position - Systems Administrator,

EA - New Position - Application Support,

EA - New Position - Business Analyst - DOCR,

EA - New Position - Low Code/No Code Support,

EA - New Position - Product Owners,

EA - New Position - Team Lead,

EA - New Positions (2) - Developer,

EA - New Positions (2) - PO/BA (Spaces),

EA - New Positions (4) - AppSupport(MyAvatar DOCR HHS),

GH - New Position - Project Coordinator,

GH - New Positions (2) - Budget Specialist III,

GH - New Positions (2) - Project Manager,

KW - New Positions (2) - Data & Insights Analyst,

MG - New Position - Security Analyst,

Are resources being redirected or are they new or additional (including FTE's)*: The resources will be new.

Who is served and impact of not funding*: NDIT serves all state agencies, counties, K12 schools and higher education institutions as well as some tribal nations. The impact of not funding this would have an adverse effect on the services NDIT provides and their ability to provide them at the current level.

112 Information Technology

Agency 112

Continuing Appropriation - Operating Fund (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	(99,168,477)	(3,312,875)	(102,481,352)	0.00	(95,855,602)	(3,312,875)	(99,168,477)	0.00
Total	(99,168,477)	(3,312,875)	(102,481,352)	0.00	(95,855,602)	(3,312,875)	(99,168,477)	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This package would create a continuing appropriation to cover costs for regular, routine and on-going services provided by NDIT. Agencies would continue to be billed for services based on NDIT's chargeback model and would request appropriation within agency budgets. This will reduce the overall state appropriation by eliminating the need to "double appropriate" the same IT expenses. This change would also give NDIT more flexibility to meet the needs of agencies mid-biennium as unplanned work arises.

Necessary resources for implementation (including FTE's)*: This Decision Package does not require additional resources.

Are resources being redirected or are they new or additional (including FTE's)*: This Decision Package does not require any changes to resources.

Who is served and impact of not funding*: Not funding this Decision Package would result in the continued practice of double appropriating funds needed to provide IT operational services to State agencies.

IT Administration Funding Changes (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	20,250,795	-	20,250,795	0.00	21,184,109	-	21,184,109	0.00
Special	(20,250,795)	-	(20,250,795)	0.00	(20,250,796)	-	(20,250,796)	0.00
Total	-	-	-	0.00	933,313	-	933,313	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

112 Information Technology

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Another adjustment NDIT will look to make to our chargeback model involves the administrative efforts of the department. The IT executive team, enterprise architects and back office staff are often engaged with a wide variety of customers from State, education and local jurisdictions. Staff are engaged with the Judicial and Legislative branches as well. This work is not easily tied to a specific service and benefits all. Transitioning these costs to general funds aligns with our approach to cybersecurity and business partners. It would result in a 6-8% reduction in service fees.

Necessary resources for implementation (including FTE's)*: No additional resources or FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE's)*: No redirected or additional resources or FTEs are needed for this request.

Who is served and impact of not funding*: NDIT serves all state agencies, counties, K12 schools and higher education institutions as well as some tribal nations. The impact of not funding this would leave the overhead costs within published service fees.

Restoration of 3% Reduction (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	7,463,596	-	7,463,596	0.00	-	-	-	0.00
Total	7,463,596	-	7,463,596	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCC 54-59 establishes NDIT as being responsible for a wide range of IT services for state agencies, K12, Higher Education and political subs. These services range from network access, desktop support, and hosting services to telecom and cyber security. To provide these services effectively, NDIT relies on numerous third party vendors for hardware, software and associated support.

This package reduces NDIT's spend on professional services for contract staff that augment our current service levels. Without necessary resources, NDIT service levels may suffer.

Necessary resources for implementation (including FTE's)*: General fund and special fund authority to meet vendor obligations for next biennium.

Are resources being redirected or are they new or additional (including FTE's)*: These resources were reduced from the base budget. If the continuing appropriation package passes, this package would not be needed.

112 Information Technology

Agency 112

Who is served and impact of not funding*: NDIR serves all state agencies, counties, K12 schools and higher education institutions as well as some tribal nations. The impact of not funding this would have an adverse effect on the services NDIR provides and their ability to provide them at the current level.

Inflationary Increases (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,841,715	-	2,841,715	0.00	2,841,715	-	2,841,715	0.00
Special	4,933,185	-	4,933,185	0.00	(1)	-	(1)	0.00
Total	7,774,900	-	7,774,900	0.00	2,841,715	-	2,841,715	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCC 54-59 establishes NDIR as being responsible for a wide range of IT services for state agencies, K12, Higher Education and political subs. These services range from network access, desktop support, and hosting services to telecom and cyber security. To provide these services effectively, NDIR relies on numerous third party vendors for hardware, software and associated support.

All of these vendors have increased the cost of their products anywhere from 8% - 20% in the current biennium and have indicated that such increase will continue annually over the next two years. NDIR has very limited bargaining power against these cost increases as switching technology solutions will often cost the state millions of dollars.

To maintain adequate service levels for the technologies deployed across the state, NDIR needs additional appropriation authority to cover the increases in vendor costs due to inflation nationwide.

The following is the Consumer Price Index (CPI) percent of change from the prior year:

Dec-19 2.3%

Dec-20 1.4%

Dec-21 7.0%

Dec-22 6.5%

Dec-23 3.4%

112 Information Technology

Necessary resources for implementation (including FTE's)*: Additional funding is needed for implementation of this package.

Are resources being redirected or are they new or additional (including FTE's)*: The resources would be additional for this package.

Who is served and impact of not funding*: NDIT serves all state agencies, counties, K12 schools and higher education institutions as well as some tribal nations. The impact of not funding this would have an adverse effect on the services NDIT provides and their ability to provide them at the current level.

Geospatial Program - Develop Roadmap (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	699,839	-	699,839	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	699,839	-	699,839	1.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The level of integrated use of geospatial technologies and data within State agencies existing workflows varies. A geospatial roadmap will help achieve greater consistency no matter the size of the agency and its focus. However, size of the agency is not always a determining factor; there are large agencies with little or no geospatial resources and experience. There is always room for more optimal use of geospatial technologies in those agencies that already use it.

The Development of the Geospatial Roadmap is necessary to position State Government’s ability to capitalize on using geospatial data and technology in making data-driven decisions in an environment of rapidly changing geospatial technology and very limited number of staff. Without a Geospatial Roadmap based upon the experience of the selected vendor and from State agency information from the needs assessment , we will not be able to capitalize and build upon the existing GIS Hub infrastructure to guide and meet the future needs of the state agencies.

This will consist of two phases. In Phase One an RFP will be used to select a vendor to conduct a state agency geospatial needs assessment and use that information to recommend a future state roadmap for enterprise geospatial across state government. This work will include the development of a strategic plan for how to achieve that future state and the business case that will be used in the 2027-2029 budget request. In Phase Two the recommendations and results of Phase One will begin to be implemented.

Necessary resources for implementation (including FTE's)*: Appropriation authority and 1 FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are new

112 Information Technology

Agency 112

Who is served and impact of not funding*: The State’s Geospatial Program, and its core component, the GIS Hub, is an integral part of NDI’s enterprise service offerings to all of State Government. In particular, the GIS Hub directly relates to NDI’s strategies of strengthening operational rhythm (having and maintaining a more robust system to meet the current and future needs of state agencies) and it sets the table to address growing and future needs addressed by the NDI Strategy of providing business insights - making data-driven decisions with geospatial data and workflows. In particular, the support for current and future geospatial data and workflow is critical for the long-term vision within NDI and across agencies.

EduTech Program Funding (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	391,793	20,000	411,793	0.00	391,793	20,000	411,793	0.00
Total	391,793	20,000	411,793	0.00	391,793	20,000	411,793	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The replacement of the current EduTech Training Application will reduce our technical debt by retiring a custom application that is no longer supported by any subject matter experts. It will improve security by eliminating unmonitored & unreviewed code and reduce operational friction by modernizing our business practices. Improving our processes and enhancing our capabilities will increase participation in training by ND K12 educators.

The current EduTech Training Application is unable to be extended or expanded to integrate with Active Directory, frequently requires manual alignment of training activity with user identities. It cannot process electronic payments, does not integrate with any learning management or content management systems, and is a significantly security concern.

Our training customers, primarily K12 teachers, will be able to more easily access and participate in courses increasing our training income while reducing software maintenance needs and vastly improving security. Our current system is completely unsupported and undergoes no regular security or code review. Thus our current system negatively impacts both our income potential and risks an expensive business interruption or security event.

Necessary resources for implementation (including FTE's)*: Appropriation authority is needed.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are new.

Who is served and impact of not funding*: Impacted groups are current, future, and former ND K12 educators, staff providing training services, NDI finance and accounting staff, and K12 educational leaders. A sufficiently advanced system may be able to be extended to other ND K12 outreach providers such as regional educational associations (REAs) and the Department of Public Instruction.

K-12 ClassLink (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	300,000	-	300,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	300,000	-	300,000	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This project will deploy additional ClassLink technologies across the K-12 environment which will dramatically improve how digital learning technologies are secured and managed. The solution enables a single-sign on approach that improves the security posture of a multitude of applications deployed across the K-12 community. How the schools manage those applications will be significantly simplified particularly in the manner of which security is provisioned and managed but also how rostering is managed across a multitude of solutions. Lastly, the product provides deep analytics surrounding the usage of the technologies that will enable the K-12 environment better manager software licensing but more importantly will provide much deeper insights into student engagement and learning throughout the various products and solutions.

Currently, 72% of the student count is accounted for within ClassLink. This funding will account for vendor cost increase and additional licenses to reach 80-85% utilization.

Necessary resources for implementation (including FTE's)*: Appropriation authority.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are new.

Who is served and impact of not funding*: The entire K-12 community will benefit including teachers, technologist, administrators, and K-12 policy and decision makers.

If funding is not obtained:

- K-12 community will not have visibility into the entirety of digital learning tools
- Risk of a cyber incident remains high due to complex and disparate authentication capabilities and methodologies
- Risk of over-spending on software licensing remains high

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation				
		General Fund	Federal Funds	Special Funds	Total	FTE	General Fund	Federal Funds	Special Funds	Total	FTE

Special	1,815,473	-	1,815,473	6.00	1	42,242	42,243	0.00
Total	45,273,956	300,000	45,573,956	8.00	1	10,842,242	10,842,243	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The State needs to start addressing the aging applications creating continuous tech debt. NDIT will be looking to create a sustainable fund for modernization and innovation efforts.

112 Information Technology

Agency 112

Modernization does not simply put a new wrapper on a current solution. It involves evaluating workflow process, looking for automation and artificial intelligence opportunities that can create digital transformation. Modernization for certain applications can remediate vulnerabilities that exist. Modernization can enable advancements in data infrastructure and architecture leading to better insight-driven decision making.

Legacy systems and outdated technology not only drain financial resources through high maintenance costs, but they also hinder innovation and productivity, increase cybersecurity vulnerabilities, and create barriers to integrating modern solutions. By actively addressing tech debt, NDIT can improve service delivery, reduce operational risks, and position the State for future growth, all while saving costs in the long run.

Necessary resources for implementation (including FTE's)*:

Request is for 8 FTE covering various modern skillsets and capacity for innovation, including cloud computing, modern development frameworks, and project management.

This request is for a sustainable fund to support internal and external professional services from third party vendors as solutions and work processes are modernized.

Are resources being redirected or are they new or additional (including FTE's)*: New Resources

Who is served and impact of not funding*: Ultimately, this will serve all state agencies as tech debt and resulting vulnerabilities, costs and strain on support of outdated technology will have an impact on services provided to agencies.

Start Date (MM/DD/YYYY): 10/1/2025

End Date (MM/DD/YYYY): 06/30/2030

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? Yes

Anticipated Benefits*: Legacy systems and outdated technology not only drain financial resources through high maintenance costs, but they also hinder innovation and productivity, increase cybersecurity vulnerabilities, and create barriers to integrating modern solutions. By actively addressing tech debt, NDIT can improve service delivery, reduce operational risks, and position the State for future growth, all while saving costs in the long run.

Project Risk*: Resourcing will be risk with each individual project within this program. Having business resources available to do requirements gathering and process review may be a challenge.

This effort also needs sustainability. Funding as one time money does not give the continuous resources needed to effectively reduce tech debt and would only create a start/stop pattern for improvement.

Issue/Solution*:

112 Information Technology

Agency 112

Since last biennium, we've made progress on people and process for the identification of technical debt and reducing exposure to workforce and financial risk on mainframe technologies.

Because technical debt will be a continual challenge over multiple biennium, NDIT will create a sustainable fund for modernization and innovation efforts. Modernization will include all components from the evaluation of workflow process, identification of automation and AI opportunities, and evaluation to encourage re-use opportunities across government. Through this approach and by addressing technical debt with modern platforms, we will minimize long-term operational expense and risk, while also maximizing experience for all stakeholders interacting within applications.

Statewide Data Strategy (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	5,171,749	9,300,000	14,471,749	4.00	3,630,640	9,300,000	12,930,640	2.00
Special	1,615,014	-	1,615,014	5.00	645,740	-	645,740	2.00
Total	6,786,762	9,300,000	16,086,762	9.00	4,276,379	9,300,000	13,576,379	4.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request will support the implementation of a statewide data strategy, which will establish a framework for how data is managed, governed, and used. The data strategy will support four key workstreams: implementation of a statewide data governance program; establishment of foundational technical capabilities and structures to support the current and future data needs of State Agencies; development of a data- and AI-literate workforce to address data skills requirements and gaps; and expansion of self-service analytic capabilities, interactive data visualization, data analytic/science services, and artificial intelligence (AI) capabilities.

Necessary resources for implementation (including FTE's)*: Request is for 9 FTE covering various skills sets for Cloud engineering, data architecture/management, metadata management, master data management, machine learning (ML) and AI engineering, and data science. This request will support professional services from third party vendors to implement the statewide data strategy, and also for a sustainable fund to support continued evolution of a modern data culture and platform.

Are resources being redirected or are they new or additional (including FTE's)*: Most resources will be new as the skill sets for data management, data strategy, and machine language are new.

Who is served and impact of not funding*: Ultimately this will serve all State Agencies and citizens of North Dakota. A statewide data strategy allows us to view citizens holistically, rather than a series of disconnected cases or services. By integrating data across agencies, we can foster better cross-agency collaboration, ultimately transforming how we serve the public, making government more efficient and effective and also more responsive to the needs of ND citizens.

Start Date (MM/DD/YYYY): 07/01/2025

112 Information Technology

End Date (MM/DD/YYYY): 06/30/2027

Replace existing application? No

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* Every day, we make decisions with data—in both our personal and professional lives. In many cases, we don’t even think about it, how we create and use data almost continuously. And throughout State Government, we HAVE the data to make smarter decisions, to be more efficient, to better serve our citizens and our communities. In fact, the existence of data isn’t the problem. We have a wealth of data, one might even say we’re drowning in data. Instead, the challenge we face isn’t a shortage of data, rather it’s that data is scattered—spread across different agencies in siloes, locked in outdated systems, and often underutilized.

Currently, most state agencies operate in silos, each with their own data systems, standards, and processes. This fragmentation not only hinders collaboration but also limits our ability to harness data for cross-agency insights. Additionally, the lack of standardized data governance practices exposes us to risks related to data privacy, security, and data quality.

Enter the need for a data strategy, so in the Fall of 2022, the Lighthouse Program was born. The program is an NDI-led, multi-year effort to establish a framework for how data is managed, governed and used. In simple terms, a data strategy a strategic plan for data. It applies intention to how we think about data, manage data and use data.

Project Risk:* Resources are generally a risk of every project.

There is also a risk that implementation of artificial intelligence solutions will outpace agency readiness from a data quality and governance perspective. Vendor solutions will continue expanding the use of these technologies in their solutions.

Issue/Solution:* Data is siloed within agencies, it is undocumented, so understanding what is available is sometimes impossible, historical knowledge is lost when staff retire/leave. There is currently no catalog/inventory listing of state data sets. By continual investment in this statewide strategy, we can start overcoming these challenges.

The interest in AI solutions and tools and the need to evaluate and invest in these tools is critical. NDI is continuing to partner with our vendor to identify and evaluate solid and meaningful AI use cases and to support the implementation of generative AI tools, like Microsoft Copilot and ChatGPT Enterprise. AI literacy is essential to these efforts, so we will also create AI learning paths and deliver prompt engineering training to Team ND. The strategic use of data is a prerequisite, a MUST, for the successful use of AI, now and in the future. Data must be AI-ready, and we have some maturing to do, but we can’t do it without continued funding and workforce resources.

Digital Experience (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Reinventing Government

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: A citizen portal for government services is essential for streamlining access to public resources, improving transparency, and enhancing the overall user experience for citizens. By offering a centralized digital platform, citizens can easily access a wide range of services, such as applying for permits, paying taxes, or checking the status of applications, all in one place. This reduces the need for in-person visits, long wait times, and redundant paperwork, making government interactions more efficient and convenient. Additionally, a well-designed portal promotes inclusivity by providing access to government services 24/7, increasing accessibility for individuals with varying schedules or mobility challenges. It also enables governments to deliver services more efficiently and cost-effectively, while offering a user-friendly experience that builds trust and satisfaction.

Necessary resources for implementation (including FTE's)*: Positions needed are an identity manager and two individuals to support the Gateway portal platform.

Are resources being redirected or are they new or additional (including FTE's)*: These will be new resources.

Who is served and impact of not funding*: This will allow the citizens of North Dakota to get access to government services in a consistent manner across multiple channels (in-person, mobile devices, web, etc.). Not only will this benefit citizens in finding government services, it will also benefit and raise government to the experience expected for the next generation of our citizens that aim for a much more intuitive, simple, and consistent experience across government.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Improving the digital experience for state citizens brings significant benefits, including greater convenience, efficiency, and engagement with government services. By creating more user-friendly and accessible digital platforms, citizens can easily access critical services, such as renewing licenses, paying taxes, or obtaining public records, without the need for physical visits or navigating complex processes. This enhances inclusivity, as digital services can be made available 24/7 and optimized for all devices, ensuring accessibility for people with different needs. Additionally, a better digital experience boosts trust and

112 Information Technology

Agency 112

satisfaction in government by reducing wait times, improving transparency, and allowing for more personalized, streamlined interactions with state agencies, ultimately leading to more efficient public service delivery.

Project Risk:* • Appropriate funding and resources to deliver a product that will deliver immediate value, creating efficiencies for constituents and agency staff.

- State agencies' time, commitment, and collaboration. This project will require collaboration across agencies to gain the most efficiencies. Lack of time, commitment, or willingness to collaborate will delay the product, create an inferior product that may be unusable, or unable to provide the desired efficiency results.

- Lack of dedicated IT resources. With no dedicated IT resources, staff will need to juggle between operations work and this project. This will likely result in schedule delays.

- Alignment across agencies of what the business and citizen gateway is, how it should look and how it should function. With no alignment, the project will likely stall and delivered project may provide little to no value for the citizens and businesses it was designed to help.

Issue/Solution:* This solution will allow the citizen to interact with the State through an omni-channel experience and providing their information only once. This not only includes digital interaction, but also mirrors the experience of coming into an office for an appointment.

The Gateway will be able to capture all the data on an application. It has the capability to do data verification of the application (routing only the data needed by that agency to make a determination), do compliance and fraud checks, email questions to the citizen (saving time for the citizen and case worker), disperse a payment, schedule an on-site visit, and create reporting. Throughout this entire process, the citizen will be able to track the status of there interaction across government.

Vulnerability Remediation (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	847,042	-	847,042	2.00	-	-	-	0.00
Special	3,774,921	150,000	3,924,921	3.00	2,892,960	150,000	3,042,960	0.00
Total	4,621,963	150,000	4,771,963	5.00	2,892,960	150,000	3,042,960	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Cybersecurity will always be at the forefront of the work NDIR does. NDIR will again present a package focused on reducing the State's risk posture through dedicated remediation efforts as well as tools to help prevent future vulnerabilities from being introduced to the State's environment through code releases to applications.

Continued improvement in Vulnerability Remediation, this will revolve around three areas:

- a. People - Add staffing to expedite remediation of vulnerabilities on hosted platforms, implementation of web application firewalls, and analysis of impacts of vulnerabilities across environments.
- b. Process – Process enhancements, using the data from our vendor's assessment to build out process enhancements, including risk acceptance.
- c. Technology – Procure technologies to aggregate risk data and prevent vulnerabilities from being exposed publicly across both our internal code development teams (SAST) as well mitigate web exposure of all hosted web platforms (WAF), safeguarding our citizen data.

The Static Analysis Security Testing tools will help drive security testing of developed systems earlier in the process, giving developers the ability to scan code and libraries while developing, instead of spending time on remediation post-development. This will save time and money in the long run as we will be starting with secure code and will cut down on the number of rewrites, updates, or post-mitigation of production systems and code.

The web application firewall will focus on mitigation and exposure of hosted web platforms, providing for an additional layer of web security to prevent against real-time attacks against hosted platforms. Not only will this be an additional safeguard for our citizen data, but will also decrease the urgency on both the internal workforce and our vendors as patches are developed and applied.

Necessary resources for implementation (including FTE's)*: Software tools, 5 staff members for dedicated work efforts to vulnerability remediation

Are resources being redirected or are they new or additional (including FTE's)*: New resources

Who is served and impact of not funding*: NDIR is responsible for the cybersecurity of all entities on the state network. Nearly all government services are hosted by NDIR for which North Dakota citizens entrust government to secure their data.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Replace existing application? No

Upgrade existing application? No

Development of new application? No

Anticipated Benefits*: A Web Application Firewall will provide three primary benefits to the state, its agencies, and citizens. First, it protects web applications by acting as a security guard or inspector and blocks common attacks before they occur. Second, when we discover zero days or emerging threats, WAF reduces downtime and

112 Information Technology

Agency 112

reduces schedule changes to ongoing development projects. Finally, WAF is the only technology that can offer a high level of protection against DDOS attacks that impact availability to key services and agencies such as HHS, Game and Fish, and SoS.

Project Risk:* Implementation requiring a longer than the planned deployment timeline.

Issue/Solution:* Currently, the team is working in a respond and detect mode. As an example, in just one event this last year NDIT as a whole spent more than 450 hours (10 weeks) of effort on remediation. This means that other core work NDIT needed to perform for agency's had to be placed on hold to ensure a material breach did not occur. The solution is to implement a Web Application Firewall (WAF). Implementation of a WAF would help protect from common attacks before the occur thus moving the state from a defensive to a preventative stance.

Health Information Technology Program Funding (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	6,389,359	-	6,389,359	0.00	6,389,359	-	6,389,359	0.00
Total	6,389,359	1,793,609	8,182,968	0.00	6,389,359	1,793,609	8,182,968	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority):* Funding is requested for NDHIN state personnel resources, technical infrastructure, and workforce support for the NDHIN state staff. The funding request is to provide funding necessary to continue NDHIN operations and upgrade the platform to provide additional data services requested by stakeholders. Completed interstate, interagency, and other HIE interfaces require continued funding for operations. For example, NDHIN participates in the Patient Centered Data Home and the e-Health Exchange hub, which allow providers to exchange information across a national network. Continued funding is needed for annual dues to continue participation in these exchanges. Additional funding is necessary to continue to add additional data feeds through additional interfaces with healthcare organizations to improve data available to participants. Additional funding is also needed to support modernization of information systems and connectivity.

NDHIN has been having discussions with ND Medicaid on a cost allocation methodology and has arrived at a cost allocation approved by federal CMS, however even with the current cost allocation of federal funds, NDHIN is not yet self-sustainable. Additional are necessary to ensure there is not a gap or discontinuation of the services that NDHIN provides to benefit citizens of North Dakota.

NDHIN is including in the budget ask funding to support the first phase of building towards a health data utility. The first phase would involve implementation of Orion Health's Lakehouse, which NDHIN can contribute data to the platform. During this phase, a copy of raw HL7 Messages, Continuity of Care Documents (CCDs) and Forms data would be loaded into a Data Lake Store in the North Dakota Unified Health Data platform. The data would be saved in a tabular format that means it can be queried. There would be an initial backload of historical data and from that date, feeds would be established to send copies directly to the platform. Once the

clinical data is available in tabular form, authorized users can query that data and create the datasets. Those datasets can then be deidentified, stored in the Data Lake Store, and made available to authorized personnel. At this point, authorized personnel can query the data in the deidentified dataset and use that data to create data visualizations and reports. Additional staffing and contractor staff time is needed to complete this work and also results in an increase in NDHIN's subscription as a service (SaaS) fee to Orion Health.

Necessary resources for implementation (including FTE's)*: Appropriation authority is needed.

Are resources being redirected or are they new or additional (including FTE's)*: A portion of the needed resources are new, however a portion was also one-time authority from the 2023-2025 biennium which was not needed, but will be in the 2025-2027 biennium.

Who is served and impact of not funding*: North Dakota Health Information Network (NDHIN) launched in 2010 and currently has signed Participation Agreements with all the large integrated delivery networks, critical access hospitals, and Federally Qualified Healthcare Clinics (FQHCs), as well as other types of providers. The number of signed agreements grew during the Expansion Project from 168 to over 300, currently representing over 400 locations/points of care in North Dakota. A network model, statewide HIE, NDHIN provides value through a secure online network for electronic health information exchange, a robust patient data set, and an increasing number of connections among North Dakota hospitals, providers, and other related entities. NDHIN has over 5,000 clinical users participating in the system. The master patient index now houses over 1.7 million unique patient records.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Replace existing application? No

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits*: Facilitation of information exchange empowers healthcare providers to improve the quality, safety, and efficiency of care. It can influence the way healthcare is planned, coordinated, and delivered. NDHIN is a tool that supports improved health outcomes, and reduced healthcare costs in North Dakota. Feedback from stakeholders has shown there is a desire to utilize NDHIN data to further improve the health of North Dakota citizens. Health Data Utilities are regional or statewide entities that combine, enhance, and exchange electronic health data across care and service settings for treatment, care coordination, quality improvement, health equity, and public and community health purposes. They serve as health equity infrastructure and enable specific, defined use cases with extra protections to ensure patient privacy and protection. In many states health data utilities are building upon existing HIE technical, organizational, and trust infrastructures.

Project Risk*: Resource availability, data and operational governance maturity, and changes to the federal funding models are potential risks.

Issue/Solution*: NDHIN is including in the budget ask funding to support the first phase of building towards a health data utility. The first phase would involve implementation of Orion Health's Lakehouse, which NDHIN can contribute data to the platform. During this phase, a copy of raw HL7 Messages, Continuity of Care Documents (CCDs) and Forms data would be loaded into a Data Lake Store in the North Dakota Unified Health Data platform. The data would be saved in a tabular format that means it can be queried. There would be an initial backload of historical data and from that date, feeds would be established to send copies directly to the platform. Once the clinical data is available in tabular form, authorized users can query that data and create the datasets. Those datasets can then be deidentified,

112 Information Technology

Agency 112

stored in the Data Lake Store, and made available to authorized personnel. At this point, authorized personnel can query the data in the deidentified dataset and use that data to create data visualizations and reports. Additional staffing and contractor staff time is needed to complete this work and also results in an increase in NDHIN's subscription as a service (SaaS) fee to Orion Health.

Data Center Infrastructure Upgrade (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	-	1,719,061	1,719,061	0.00	-	1,719,061	1,719,061	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As a result for the OMB maintenance in the Judicial Wing during the '23-'25 biennium, it was uncovered that the cooling loop for the primary State datacenter was susceptible to a single point of failure, posing a risk to all hosted platforms for the State. In order to minimize risk of highly impacting downtime to the State, this package will assist NDIT with updating the cooling system in the primary data center to ensure redundancy for the cooling system or alternatively assist with procuring alternative data center space with a vendor.

Necessary resources for implementation (including FTE's)*: Appropriation authority is needed to either upgrade current data center, or pursue a move of the secondary data center.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are new.

Who is served and impact of not funding*: NDIT serves all state agencies, counties, K12 schools and higher education institutions as well as some tribal nations. The impact of not funding this would have an adverse effect on the services NDIT provides and their ability to provide them at the current level.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? No

Development of new application? No

112 Information Technology

Agency 112

Anticipated Benefits:* As a result of the OMB maintenance in the Judicial Wing during the '23-'25 biennium, it was uncovered that the cooling loop for the primary State datacenter is susceptible to a single point of failure, posing a risk to all hosted platforms for the State. In order to minimize risk of long duration and high impact downtime to the State, this package will assist NDIT with updating the cooling system in the primary data center to ensure redundancy for the cooling system or alternatively assist with procuring alternative data center space with a vendor.

Project Risk:* Detailed costs and plans are unknown at the time of forming this package, but the risk is confirmed. Resource availability and key personnel retirements are an ongoing risk to the project as well as vendor availability and support to move key vendor provided hardware between locations.

Issue/Solution:* With this funding, NDIT would primarily plan to deprecate our secondary data center and procure space with a vendor to relocate hardware and increase resiliency. This would allow NDIT to only have to directly support 1 data center in the State. This would ultimately decrease long term workforce risk, while allowing more staff to focus on other backlogged work. If depreciation of our secondary data center would not be feasible in the time allotted, NDIT would upgrade the cooling system at the Capitol Complex with approved funding.

State Initiative:* Reinventing Government

Justification: This package would create a continuing appropriation to cover costs for regular, routine and on-going services provided by NDIT. Agencies would continue to be billed for services based on NDIT's chargeback model and would request appropriation within agency budgets. This will reduce the overall state appropriation by eliminating the need to "double appropriate" the same IT expenses. This change would also give NDIT more flexibility to meet the needs of agencies mid-biennium as unplanned work arises.

Emergency Cooling System for Central IT Room (Priority: 15)

Statutory Authority

North Dakota Century Code Chapter 54-10.

Agency Description

The North Dakota State Auditor’s Office (NDSAO) has been operating since North Dakota was first admitted to the Union in 1889. Throughout the years, the office has evolved to better serve the people of North Dakota. The NDSAO takes pride in their commitment to bring transparency to government and is dedicated to generating greater value for taxpayers.

The office is leading the way in providing independent and objective audits by following government auditing standards issued by the United States Government Accountability Office. The NDSAO works to ensure the proper use of public funds and improve the cost savings and effectiveness of government. This is achieved by performing audits of state agencies, boards, commissions, and local governments. These audits provide a roadmap to identify opportunities for improvement so agencies can better serve the taxpayers of our state.

Over 60 dedicated team members audit billions of state and federal dollars every year. The audits provided result in accurate and reliable information that clarify issues, provide guidance on corrective action for problems, and bring increased accountability to government programs.

Agency Mission Statement

We provide independent information to the citizens of North Dakota to inspire action.

Major Accomplishments

- 1 July 2024: Held the 3rd annual Audit Summit, a free virtual conference to provide training and resources to local governments across our state. Over 300 people attended.
- 2 Hired 34 interns through the NDSAO internship program, with 13 filling full-time positions after graduation.
- 3 Created an interactive dashboard utilizing Power BI on the NDSAO’s official website. The dashboard provides transparent and real-time insights into the financial status of local governments.
- 4 Converted a special funded independent public accounting firm (IPA) reviewer to general funds which will save local governments \$244,000 each biennium moving forward.
- 5 Awarded our annual Stewardship Award celebrating excellence in auditing to Morton County.
- 6 State Auditor elected to the 2023-2024 National State Auditors Association Executive Committee. The National Committee brings together state auditors, comptrollers, and treasurers from across the country to address government financial management issues.
- 7 The NDSAO’s Communications Director was recognized as Communicator of the Year by the International Association of Business Communicators - Great Plains Chapter. The chapter includes members across North Dakota, South Dakota, and Montana.
- 8 Spearheaded the University of Mary Careers Day Panel, helping encourage students to look at careers with the State of North Dakota.
- 9 Organized the Annual Food Drive Competition in which 12 state agencies participated. Over 13,000 food items were collected for people in need across the community.

Major Accomplishments

-
- 10 National Association of Government Communicators (NAGC) 2024 Blue Pencil Gold Screen Awards Grassroots Marketing Campaign - 3rd place. Other award winners included the United States Army, the Smithsonian Institution, and the U.S. Department of Education.
 - 11 Governor Burgum declared November 19th as Auditor Day in North Dakota.
-

Critical Issues

-
- 1 Ongoing recruitment of staff to fill positions during this unprecedented time when accounting graduates continue to drop and unemployment rates are around 2%.
 - 2 Education and awareness to local governments about government accounting requirements.
 - 3 The number of private firms conducting government audits continues to shrink as standards and requirements to complete government audits constantly change.
 - 4 Government Auditing Standards continue to change and require additional work. The 2024 Yellowbook focuses on quality management and following the updated standards is of top priority of the NDSAO.
 - 5 The dramatic rise in federal government spending and new federal programs has created additional single audit work for not only state agencies, but many local governments that previously did not meet the single audit threshold.
 - 6 Training opportunities to stay up-to-date on complex changing professional standards.
-

Performance Measures

- 1) Fulfill NDSAO's statutory requirements.
- 2) Improve performance objectives.
- 3) Quality financial audits on budget.
- 4) Expand training for staff and clients.
- 5) Improve relationships with stakeholders.

Program Statistical Data

State Government and University System Team: The team is responsible for conducting over 70 operational audits in accordance with performance auditing standards each biennium. The group also conducts the audit of the Annual Comprehensive Financial Report (ACFR) of the State of North Dakota and University System, and the Statewide Single Audit of federally funded programs.

Local Government Team: Each biennium the team performs 70 audits, 550 reviews of audit reports completed by independent CPA firms, and 1,150 reviews of small government annual reports. The SAO is currently in contact with nearly 1,300 clients.

Mineral Royalty Team: Audits and compliance reviews are performed in accordance with federal regulations and every state must adhere to the same standards followed by the Office of Natural Resource Revenue (ONRR). These standards include the Government Auditing Standards, the ONRR Audit Manual, and the ONRR

Compliance Review Manual. The team completes 100+ compliance reviews each biennium and royalties from federal lands account for \$350 million in revenue to the State.

Explanation of Program Costs

The NDSAO consists of four teams. 1) State Government and University System Team, 2) Local Government Team, 3) Mineral Royalty Team, and 4) Operations Team.

Across all program areas, salaries and benefits comprises 90% of the total appropriations. 7% of the total appropriations is for telecommunications, data processing, and rent expenses. The remaining 3% of total appropriations covers all other operating costs of the agency.

Program Goals and Objectives

State Government and University System Team: Our largest team, they are responsible for auditing state government and the 11 different public colleges and universities in North Dakota. They conduct financial, compliance, performance, and information system audits.

Local Government Team: The primary responsibilities of this team are to perform audits of large local governments and review annual financial reports of small local governments. They also conduct petition audits and provide non-auditing services such as review of financial statements.

Mineral Royalty Team: This team conducts compliance reviews and audits of federal royalty payments from oil, gas, and coal leases located within our state. They are fully funded by the federal government.

Operations Team: This team works to support all our office. The group includes specialists in accounting, quality assurance, administration, communications, and other specialists.

Total	219,988	-	219,988	0.00	219,988	-	219,988	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The State Auditor’s Office is grateful for the increase in salary dollars we were given last session that allowed us to retain our top talent. The equity increases and legislative increases were one aspect of the total rewards program that played a vital role in keeping our turnover rate to a minimum. We’re asking for the legislative increase (4%) to continue paying our staff at their current salaries so we can retain top talent.

Necessary resources for implementation (including FTE’s)*: Salary dollars.

117 Auditor

Agency 117

Are resources being redirected or are they new or additional (including FTE's)*: A 4% increase would equate to \$152,187 in additional general funds. We would simply need authority to expend \$47,561 in special funds and \$20,240 in federal funds for a total of \$219,988.

Who is served and impact of not funding*: The NDSAO takes pride in bringing transparency to government and we are dedicated to educating the citizens of our state. If our office is not competitive, we will lose our most important resource, our people.

Cost to Continue Services (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	2,698	-	2,698	0.00	2,698	-	2,698	0.00
General	79,855	50,200	130,055	0.00	79,855	50,200	130,055	0.00
Special	17,222	10,800	28,022	0.00	17,222	10,800	28,022	0.00
Total	99,775	61,000	160,775	0.00	99,775	61,000	160,775	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The State Auditor’s Office budget is 90% salaries and benefits of total appropriations. 7% of the total appropriations is for telecommunications, data processing, and rent expenses. The remaining 3% of total appropriations covers all other operating costs of the agency. This leaves very little flexibility when we need to find 3% savings. We’re asking for these additional funds to continue operating considering the required 26% increase of fees established by NDIT as well as the increase in capitol rent. This also includes an inflationary increase in professional development and travel costs, as well as state fleet increased costs to our agency for a total of \$135,775.

The second item we’re requesting funding for is a requirement by the U.S. Government Accountability Office government auditing standards called the Yellow Book. We are required to have a peer review done once every three years. A peer review is like a performance audit, where top-tier state auditor staff from across the country come to Bismarck and conduct a deep dive into our office processes and procedures to give assurance that the NDSAO is following proper government auditing standards. Our next peer review is scheduled for June 2026. Our most recent peer review was June 2023 and cost approximately \$20,000. The cost was covered in operating but it can no longer be covered with the general fund cuts. We do not pay these individuals a salary to be here, however we do pay their travel expenses and these auditors travel here from various locations across the country.

The final cost we’re requesting is related to our auditing software known as TeamMate. We’re migrating to TeamMate+, as TeamMate AM is being discontinued. We’re migrating beginning in January 2025. We have found some cost savings internally, such as reducing the number of employees who need TeamMate licenses and cleaning up data to save on storage costs. However, we will need to keep the current Teammate AM on the ITD servers through the summer of 2026 in order to migrate all data over that will need to be kept for records retention purposes. NDIT increased rates for servers from \$125 a month to \$2,000 a month, so the cost cannot be covered by previous appropriations. TeamMate AM will need to stay live and accessible to us until the transition from the old server to the new server can be finalized.

117 Auditor

Agency 117

Necessary resources for implementation (including FTE's)*: Additional operating dollars to continue essential functions of the office.

Are resources being redirected or are they new or additional (including FTE's)*: These would be new resources needed as we had to cut 3% to meet budget guidelines.

Who is served and impact of not funding*: Without being able to maintain these essential business expenses, the Auditor's Office would be unable to continue doing government auditing and the taxpayers would lose transparency of their governments across the state.

Security Assessment (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	585,000	-	585,000	0.00	195,000	-	195,000	0.00
Special	-	-	-	0.00	390,000	-	390,000	0.00
Total	585,000	-	585,000	0.00	585,000	-	585,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Every biennium the NDSAO contracts out a security assessment of the state of North Dakota, including Higher Education. This is a critical resource for the state because it checks if security protocols are effective against today's cybersecurity threats. Our office has been allocated \$150,000 in general funds and \$300,000 in special funds in past biennia to procure this assessment. Because of our limited flexibility in operating funds, this was removed from our budget to meet budget guidelines. We're asking that this critical assessment be added back to our budget, but the funding mechanism be \$585,000 in general funds.

Necessary resources for implementation (including FTE's)*: Additional line 11770 dollars to continue essential functions of the office.

Are resources being redirected or are they new or additional (including FTE's)*: These would be new resources needed as we had to cut 3% to meet budget guidelines.

Who is served and impact of not funding*: This report impacts all stakeholders and citizens who utilize government resources through NDI and the North Dakota University System. No funding would create substantial cybersecurity risk to the State. Reduced funding from the requested amount would minimize the scope of the assessment.

Conversion of Three Special Fund Positions to General Fund (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	619,268	-	619,268	0.00	412,845	-	412,845	0.00
Special	(619,268)	-	(619,268)	0.00	(412,845)	-	(412,845)	0.00
Total	-	-	-	0.00	-	-	-	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Our special funded team consists of two audit teams and one review team. The review team conducts basic or extended reviews of annual financial reports for local governments that have less than \$2,000,000 in annual receipts. We have an opportunity to reinvent state government by keeping down cost for those smaller local governments, while continuing to help them with their financial transparency.

We've found internal efficiencies within our office that have allowed us to convert a special funded employee to a general funded position. The person in that position reviews local government audits from private firms. By converting this position, we are eliminating the extra expense to local governments who are already paying for high dollar audits. We feel like more can be done to save local governments money in this area. If we were allowed to convert two positions to general fund dollars, it would eliminate the billing process for the review of these annual financial reports.

By doing this, our team could focus on helping the most critical local governments to become current in their financial transparency efforts, without the local government worrying about how they will pay our office. Some of these local governments are delinquent by 10+ years. A review fee of \$300 for each year could cost some small local governments their entire operating budget for a year. This would be a total cost of \$380,344 for the two positions that are currently serving this function. Additionally, if these positions are converted it would allow our staff more time to answer questions that local governments have regarding the review, which helps in the education process.

Converting one additional position to general funded due to the new 2024 Yellowbook standards has put an emphasis on quality management which has increased workload needs for the Quality Assurance team. This position would specialize in Single Audits and provide support to our entire office. The increase in federal spending has increased the number of Single Audits needed for local governments and the Statewide Single Audit. This position would ensure consistency across our agency and would create efficiencies in our audit, while maintaining the audit capacity of single audit requirements and the increased number of new federal programs.

Necessary resources for implementation (including FTE's)*: Three general funded FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources are being requested.

117 Auditor

Agency 117

Who is served and impact of not funding*: Small local governments with less than \$2,000,000 in annual receipts, 867 local governments, would be positively impacted. The cost savings would be estimated at \$427,411 for the next biennium. If not funded, we will need to continue to charge local governments for these review costs.

Local governments and state agencies requiring Single Audits will benefit from the specialized knowledge afforded by having a Single Audit Quality Assurance Specialist.

General Fund Temporary Salaries (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	114,064	-	114,064	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	114,064	-	114,064	0.00	-	-	-	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In an employee’s market, our team has created a low-risk, high reward internship program that serves as a talent pipeline for government auditors. This is critical for several reasons, considering accounting graduation rates are dropping dramatically, and private firms are offering six figure salaries. Since 2021, we’ve had 31 interns that resulted in 12 full-time employees. We have fully expended our \$100,000 in general fund temporary dollars with nearly 10 months left of the biennium. We’re requesting an additional \$100,000 in general fund temporary salaries to continue with this successful program.

Necessary resources for implementation (including FTE’s)*: Temporary salaries spending authority.

Are resources being redirected or are they new or additional (including FTE’s)*: Additional resources are being requested.

Who is served and impact of not funding*: Our internship program serves as a recruitment pipeline for our office, and because of the model we’ve established, it’s being replicated on a national level at other audit shops. With minimal turnover, the general fund (temporary salary fund) can help us keep interns churning in the event we have turnover. If the vacancy pool didn’t exist, and we had access to those salary dollars for positions not yet filled, we could possibly fund our internship program without additional costs, as this is what we have done in years past.

117 Auditor

Agency 117

Federal Fund FTE (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	104,202	3,000	107,202	1.00	112,886	3,000	115,886	1.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	104,202	3,000	107,202	1.00	112,886	3,000	115,886	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Mineral Royalty division of our office is fully funded by the federal government and is a function of the Office of Natural Resources Revenue (ONRR) within the Department of the Interior. They use compliance reviews to verify that the State of North Dakota and the federal government receive the correct lease royalty money from energy companies that extract minerals on federal land within our state. This team of five people conducts over 22% of ONRR’s yearly goal of compliance reviews alongside 13 other states and tribes. We’re requesting appropriation authority for an additional person to expand the natural gas compliance review function of this office. These salary funds would come from the federal government, we’re looking for appropriation authority for those salary and operating funds tied to one full-time person.

Necessary resources for implementation (including FTE’s)*: Appropriation authority for one federally funded FTE for half the biennium as the position is expected to be available in FY 2027.

Are resources being redirected or are they new or additional (including FTE’s)*: Additional appropriation authority is needed.

Who is served and impact of not funding*: This division ensures North Dakota is receiving correct royalty payments from oil companies. It directly impacts local governments across the state. Without this additional position, the state could lose out on additional revenue for the general fund and local governments.

Statutory Authority

ND Constitution Article V, Section 02; North Dakota Century Code Section 54-11.

Agency Description

The Office of State Treasurer serves as the custodian of all state funds. The agency is responsible for the cash management of the general fund as well as the investment services of special funds and numerous trust funds. The agency is also responsible for distributing accurate and timely tax distributions to over 500 political subdivisions across the state.

Agency Mission Statement

The mission of the Office of State Treasurer is to fulfill our constitutional and statutory responsibilities to assure sound financial oversight and transparency to all public funds, and to promote prudent practices in government.

Major Accomplishments

- 1 Completed first successful distribution to all qualifying political subdivisions in relation to multiple new distributions requiring the Office of State Treasurer to get in contact with over 408 political subdivisions
- 2 Enhanced agency website to continue providing information regarding specific distributions and other government funds based on feedback from users. Also provided for greater transparency of state dollars
- 3 Continued improvement of remote work policies and procedures to increase efficiencies, reduced downtime, and improve customer responsive.
- 4 Continued improvement of internal work policies and procedures to increase efficiencies and promote continued successful operation of the State Treasurer in the case of staff turnover. Completed a comprehensive internal onboarding document including IT support documents.
- 5 Provided analysis, data, and explanations of various tax distributions and state laws to legislators, employees of other state agencies, officials and employees of local political subdivisions and the public.
- 6 Maintained and strengthened the line of communication with financial officers through to the state government to address daily cash needs and expenditures of each agency. Worked directly with agencies to enhance cross agency processes, communication to political subdivisions regarding exemptions, and created internal documents to aid other state agency in relation to Office of State Treasurer daily operations. Worked with ND League of Cities to update the list of city auditors and treasurers and ND Association of Counties on collecting of SIRN fees.
- 7 Expanded cross-training for all staff and updated and tested newly implemented procedure manuals for each position. Thus, enhancing our backup capability during unexpected absence. This is essential for the success of a small, staffed agency. Completion of AI certification.
- 8 Updated Tax Distribution Outstanding Check (TDOC) system to accommodate the legislative changes made to the Oil & Gas Gross Production tax distribution along with several other distributions.
- 9 Provided legislative and distribution process review and assistance to state agencies. The Office of State Treasurer assists agencies in determining if funds qualify for interest allocation, determined funds should be invested with RIO instead of the Office of State Treasurer, and aids other departments in preparation of creating new tax distributions. The keen review of the Office of State Treasurer has discovered inaccuracies in current distributions prior to being paid. By being attentive to details and working with other sate agencies, we are improving internal workflows and external efficiencies.

Critical Issues

- 1 As the labor market remains tight and more and more entities in the private market are making flexible work arrangements the norm we, as an employer, need to ensure we are offering a total compensation and benefits plan to remain competitive and retain our highly skilled team members. This includes offering merit raises commensurate with the market, retaining our excellent state employee benefits, and continuing to provide for an excellent work/life balance
- 2 As minerals remain to be vital asset to the state, we must maintain and expand our use of technology to assist in the management of the revenue stemming from those minerals. Oil and gas taxes continue to be distributed by a very sophisticated formula and it is crucial we provide as much information as possible to our political subdivisions. Our agency must continue to stay ahead of technology necessary to properly distribute these funds, efficiently and effectively. Furthermore, it remains critical we provide timely, informative reports to those who bear the responsibility of distributing those funds beyond our office. We have worked to maintain and expand our online tax distribution system (TDOC). Moving forward we must ensure we can continue to improve this system to best perform the duties of this office and serve the agencies and political subdivisions of the state

Performance Measures

- The Office of State Treasurer provides a daily investment management service for the operating account of the State of North Dakota as well as numerous other trust funds and ag commodity groups.
- The agency is responsible for the distribution of over 1.5 million accounting, human service and payroll checks biennially.
- Daily, our agency manages over \$4 billion of state general and special funds.
- During FY 2024 the Office of State Treasurer performed direct deposit-electronic funds transfer for tax distributions of over \$1.2 billion to nearly 500 political subdivisions, which not only makes the money available to subdivisions in a timely manner, but also enhances government efficiency at both the state and local level.

Program Statistical Data

The Office of State Treasurer processes billions of dollars in receipts and income deposits for over 50 state agencies. We are responsible for the cash management of over \$4 billion in general and special funds. Our agency provides investment services for over 25 state agencies and/or trust funds in numerous individual investment accounts. The Office of State Treasurer distributes over \$1 billion annually in tax distributions to nearly 500 political subdivisions.

Explanation of Program Costs

Salary and wages are used to support seven (7) full-time employees.

Data processing costs are related to programs for tax revenue distribution to political subdivisions, on-line revenue reporting and remittance, batch printing of outstanding checks lists, bank canceled check reports, disk storage and records management fees. It also includes amounts related to the desktop support services provided by ITD for seven employees. Telephone costs support eight (8) telephone lines. Postage costs are for mailing of payroll and other checks to agencies outside of Bismarck and OST correspondence. Lease rental payments are made on the office copy machine. Dues and professional development costs include staff enhancement training via online and in-person learning along with annual national association dues for the treasurer. Operating fees cover service agreements on the scanners. Insurance covers Risk Management Fund contributions and Fire and Tornado Fund.

NDCC 57-62-02(5) requires the Office of State Treasurer to include in its biennial budget request funds for the purpose of reimbursing coal-producing counties for 30% of Coal Severance Tax funds paid to non-coal producing counties from coal-producing counties.

NDCC 57-06-17 requires the Office of State Treasurer to include in its biennial budget request funds for the purpose of payments in lieu of taxes to counties for carbon dioxide pipeline exemptions.

Program Goals and Objectives

To fulfill the constitutional and statutory responsibilities of the Office of State Treasurer in order to assure sound financial oversight and transparency to all public funds, and to promote prudent practices in government.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

120 Treasurer

Agency 120

Request explanation and justification (include any statutory authority)*: The Office of State Treasurer is requesting additional dollars for our salary line in order to create a more competitive market when needing to hire and increase current employees salaries to be more equitable for the workload increases and incentivize employee retention. We did not receive a significant target market equity dollars beyond the minimum 2% given to all agencies, in addition we did have dollars removed for the FTE funding pool equating to a net positive of less than \$1,000 additional dollars to cover salary increases and benefits.

Necessary resources for implementation (including FTE's)*: The Office of State Treasurer would need general fund dollars to implement

Are resources being redirected or are they new or additional (including FTE's)*: The additional funds would be used to bring our current team members salary up to a more equitable rate considering the years of experience and changes in market equity.

Who is served and impact of not funding*: The employees of the Office of State Treasurer in turn affecting all agencies and political subdivisions we serve in the state of North Dakota.

ITD Projects 25-27 Biennium (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	110,000	110,000	0.00	-	110,000	110,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	110,000	110,000	0.00	-	110,000	110,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: ITD projects in order to make the operations of the State Treasurer more efficient

Necessary resources for implementation (including FTE's)*: General fund dollars to support the operating expense along with Office of State Treasurer staff time of current 4 FTE's, computer programs and software, ITD hours to create and OST to test and implement

Are resources being redirected or are they new or additional (including FTE's)*: Funding would be additional, however in order to implement all changes we would be redirecting all resources that already exist within the Office of State Treasurer.

Who is served and impact of not funding*: The Office of the State Treasurer would be impacted along with the citizens of North Dakota as some of the items we feel would make processes easier, saving time, money, and frustration down the road.

120 Treasurer

Agency 120

The impact of the IT projects would greatly improve the internal operations of the Office of State Treasurer. It would make items more streamlined internally and externally for other agencies that use specific platforms. The ability to create uploads would reduce touchpoints which decreases the chance for error and saves a substantial amount of time.

ITD Continuing Costs Beyond OMB Adj. (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	7,000	-	7,000	0.00	7,000	-	7,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	7,000	-	7,000	0.00	7,000	-	7,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Requesting additional funds for continuing ITD operations beyond what was provided by OMB in our base budget for the 2025-2027 biennium. OMB apportioned an additional \$6,630 for NDIT rate adjustments. Per review of monthly bills and additional notes from ITD, ongoing costs are estimated to be higher.

Necessary resources for implementation (including FTE's)*: General fund dollars to support operating expense of the Office of State Treasurer

Are resources being redirected or are they new or additional (including FTE's)*: Funding would be additional, however in order to implement all changes we would be redirecting all resources that already exist within the Office of State Treasurer.

Who is served and impact of not funding*: Office of State Treasurer and all agencies and political subdivision served

Payment In Lieu of Taxes-Carbon Dioxide Pipeline Exemption (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,000,000	-	2,000,000	0.00	2,000,000	-	2,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	2,000,000	-	2,000,000	0.00	2,000,000	-	2,000,000	0.00

120 Treasurer

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Dollars requested to make payment per NDCC 57-06-17.2 which states "the state treasurer shall make the required payment to each county not later than March first of the following year.." For the 25-27 biennium, it is anticipated that additional pipelines will qualify. Currently this estimate is based on historical payments. We are waiting on the Tax Department for a more accurate estimate.

The dollars are currently estimated based on historical data and the possibility of a large carbon dioxide pipeline starting construction within the biennium. Currently as of 07-2024 in the 2023-2025 biennium, there is one pipeline that currently qualifies and one intended to qualify in the fall of 2024.

Necessary resources for implementation (including FTE's)*: General fund dollars to support operating expense along with staff time of current 2 FTE's, computer programs and software

Are resources being redirected or are they new or additional (including FTE's)*: Funding would be additional, however in order to implement all changes we would be redirecting all resources that already exist within the Office of State Treasurer

Who is served and impact of not funding*: Counties receive the payment and pass through the dollars to the appropriate recipient. Impact of not funding affects the county and pass through entity. The county has to abate the taxes since the companies are exempt.

Coal Severance Shortfall (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	4,000	-	4,000	0.00	4,000	-	4,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	4,000	-	4,000	0.00	4,000	-	4,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Requesting additional funding in order to make whole the dollars as calculated due to the county related to repayment of 30% of the loss related to Coal Severance for the Coal Severance Shortfall distribution as stated in NDCC 57-62-02(3)b(5). The amount paid to the county, city, and school districts has been allocated based on the dollar amount appropriated and last biennium we fell short, and we anticipate to fall short again this biennium.

120 Treasurer

Agency 120

Necessary resources for implementation (including FTE's)*: General fund dollars to support operating expense along with staff time of current 2 FTE's, computer programs and software

Are resources being redirected or are they new or additional (including FTE's)*: Funding would be additional, however in order to implement all changes we would be redirecting all resources that already exist within the Office of State Treasurer

Who is served and impact of not funding*: The county, cities, and school districts.

HB 1040 DC Plan Estimates (Priority: 06)

	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	5,224	-	5,224	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	5,224	-	5,224	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Requesting funds to be added to our salaries and benefits in case we end up having an employee leave and hire new under the 2025 DC plan. With the small budget, we don't have additional dollars to cover the possible max employer match.

Necessary resources for implementation (including FTE's)*: The Office of State Treasurer would require additional general fund dollars

Are resources being redirected or are they new or additional (including FTE's)*: Funding would be additional, however in order to implement all changes we would be redirecting all resources that already exist within the Office of State Treasurer

Who is served and impact of not funding*: The team member(s) of the Office of State Treasurer in turn affecting all agencies and political subdivisions we serve in the state of North Dakota.

Statutory Authority

ND Constitution Article V, Section 12, North Dakota Century Code Chapters and Sections 5-02, 12.1-32, 12.1-41, 12-60, 12-62, 12.1-34, 18-01, 18-13, 19-01, 19-03, 23-15-04, 32-12.2-03, 32-12.2-04, 43-31-14, 50-24.8, 51-04, 51-15, 51-28, 53-04.1-03, 53-06.1, 53-12.1, 54-6, 54-12, 57-36-02.

Agency Description

The Office of the Attorney General represents and defends the interest of the citizens of North Dakota by executing the responsibilities charged to the North Dakota Attorney General by the North Dakota Constitution, state statutes and administrative rules, North Dakota and federal case law, and common law. The Attorney General is the chief legal counsel and adviser to state government providing legal representation to all facets of state government, including the Governor, all departments of state government, and all state agencies, boards, and commissions. The office consists of 13 divisions: Administration, Bureau of Criminal Investigation, Civil Litigation, Consumer Protection and Antitrust, Crime Laboratory, Special Prosecution, Finance, Fire Marshal, Gaming, Information Technology and Criminal Justice Information Sharing, Lottery, Medicaid Fraud Control, and General Counsel.

Agency Mission Statement

The Attorney General’s office consists of dedicated professionals providing vital services necessary to ensure quality government in North Dakota. The office efficiently and impartially provides quality law enforcement, regulatory, investigatory, legal and informational services for the benefit of North Dakota’s citizens.

Major Accomplishments

-
- 1 conducted 1,943 criminal and drug investigations

 - 2 Obtained \$2.15 million in consumer refunds

 - 3 Collected \$5.47 million in unpaid employer tax and benefit contributions for Job Service ND

 - 4 Collected over \$2.2 million for violations relating to air and water pollution control, and solid waste and hazardous waste management.

 - 5 Recovered \$512,421 in fraudulent Medicaid billings

 - 6 Completed 177,405 criminal history record checks

 - 7 Completed 34 Attorney General opinions

 - 8 Provided general counsel to 87 state agencies, boards, and commissions.

Critical Issues

-
- 1 Attorney staffing levels and pay schedule - The current attorney pay schedule for the Attorney General’s office is significantly less than the attorney pay schedules for some other state agencies and even some political subdivisions, not to mention private law firms and businesses. For example, some counties pay entry-level attorneys \$5000-\$15,000 more annually than this office can pay them under its current budget. This significantly impairs recruitment and retention of legal talent to this office, which is responsible for providing legal services to the state. Increased workloads in solicitor general, civil litigation, general counsel and Medicaid fraud highlight the need for additional qualified attorneys.
-

Critical Issues

-
- 2 The Attorney General's office reviewed classified staff members' salaries based on the state's pay schedules established by the Office of Management and Budget. Some staff members, especially some administrative staff, are paid significantly below the midpoints of their relative classes' pay schedules. These staff members' supervisors were consulted on the reasons for their pay inequities and for input on the appropriate salaries based on the staff members' work and years of service.

 - 3 Cyber Crime and criminal investigator work demands - Demands on cyber crime and criminal investigators are increasing due to the complexity of cyber crime, criminal and narcotics investigations and the level of criminal organization in the state. The digital world has greatly increased the speed and complexity of the criminal organizations and allowed crimes to be committed (fraud, theft, intimidation, child luring, etc.) in seconds and across the state, country, and world. Criminal and narcotics cases have continued to become more complex with the need for increased training on criminal and cyber response.

 - 4 IT infrastructure and program needs - The office's BCI and Crime Lab divisions rely heavily on the expertise and skills of the office's IT Division to develop new programs, and maintain and support current and existing projects. It is essential that the IT Division receive the funding, staff, and other resources needed to ensure that critical existing programs function efficiently, that project funding deadlines can be met, and delays in development are kept at a minimum. Some of these systems BCI uses daily are outdated and/or ineffective and need immediate attention in order to ensure continued work productivity. Unfortunately, funding and staff to support and upgrade these systems is not readily available, and as a result, delays in upgrades and support are frequent due to the competing demands for limited IT resources.

 - 5 During the 2021 regular legislative session and the November 2021 special session, the legislature authorized equity increases for BCI agents and Crime Lab scientists. The equity increases were funded through the Attorney General refund fund. The refund fund is not able to sustain these increase because most settlements received during the 2021-23 biennium have been restricted for opioid treatment or reimbursements to consumers. The 2021 legislative assembly restored funding for operating expenses for BCI and IT/CJIS but changed the funding source from general fund to the AG refund fund. The refund fund cannot sustain the operating expenses because most settlements received during the 2021-23 biennium and estimated for the 2023-25 biennium are restricted for opioid treatment or reimbursements to consumers.
-

Performance Measures

Performance measures and results reporting are not currently utilized by this office. Services provided by each division are listed below.

Finance:

- Payment of office bills and payroll
- Office budget preparation, implementation, and management
- Office receptionist services, filing, and information processing
- Records and forms management
- Billing for legal, Indian Gaming and Fire Marshal services
- Purchasing and printing services for all office divisions
- Manage federal and other grants and subrecipients

AG Admin:

- Administrative assistance to other office divisions
- Support to the Attorney General and coordination of special projects
- General information and assistance to the general public
- Office representation on various boards and commissions
- Human resource administration services and public information services to other office divisions

MFCU - Medicaid Fraud Control Unit must substantially comply with the requirements contained in the performance standards of HHS-OIG and CMS in order to qualify for continuing federal grants. The performance standards require compliance with section 1903(q) of the Social Security Act, 42 CFR part 1007, 45 CFR part 92, 2 CFR part 225, and OIG policy.

BCI:

- Assisting local law enforcement agencies in investigating cyber-crime, homicides, organized crime, sexual assault, child abuse, human trafficking, arson, terrorism, polygraph, photography and photo-mapping services, digital enhancement services, and crime scene investigations
- Providing specialized crime response teams
- Coordinating intelligence services provided by the SLIC; providing analytical and intelligence services to municipal, county, state, tribal, and federal law enforcement entities; and serving as the intelligence node for the Mid-States Organized Crime Information Center
- Facilitating use of undercover personnel and confidential funds
- Providing special surveillance equipment, intelligence information, and training to local law enforcement agencies
- Dedicating staff to narcotics trafficking investigations through participation in federal task forces (consisting of federal task force officer designation) and 10 narcotics task forces of which BCI supervises 9
- Serving as coordinator for Internet Crimes Against Children (ICAC) in North Dakota; conducting forensic examinations of computers involved in criminal activity for state, local, tribal and federal law enforcement agencies
- Serving as law enforcement coordinator for the OAG Human Trafficking Task Force; conducting multi-jurisdictional investigations and collaborating with victim services for the wellbeing of all human trafficking victims
- Utilizing a case management system to document investigations and provide distribution to appropriate persons
- Utilizing a statewide criminal intelligence system to track tips and leads provided by law enforcement, public and other government entities

- Maintaining a statewide criminal history record information system, and providing this information to the federal criminal history database
- Maintaining and utilizing the National Crime Information Center (NCIC), Central Warrant Information System (CWIS), a Protection and Restraining Order system, and a Criminal History Automated Disposition (CHAD) system
- Maintaining and utilizing an ABIS for identification and criminal investigation purposes
- Providing criminal history record checks to criminal justice agencies and courts, numerous non-criminal justice requesters as permitted by NDCC 12-60-24, and to the general public
- Issuing and tracking concealed weapons licenses
- Coordinating the statewide 24/7 sobriety program
- Collecting and managing uniform crime report (UCR) data in order to provide statistical reports to criminal justice agencies, government agencies, and interested persons
- Providing law enforcement and corrections officers' training
- Providing staff for POST Board responsibilities including maintaining officer training records and issuance of peace officer licenses
- Maintaining a statewide sex offender and offenders against children registration system and a registered offenders' website for lifetime registrants and high-risk offenders
- Offering training to the general public, schools, businesses, and other agencies on a variety of law enforcement issues including drug awareness issues, internet safety and other criminal activity

CPAT:

- Investigating consumer complaints and violations of antitrust, consumer fraud, non profit corporation, transient merchant, data security breach, and do-not-call laws, etc., and taking legal action to obtain injunctive relief, civil penalties, restitution, and other equitable relief
- Investigation, participation, and prosecution referral of criminal violations
- Statewide consumer fraud and education presentations to the elderly, students, civic, and professional groups, etc., and providing consumer warnings
- Coordinating consumer

Program Statistical Data

Finance - This program provides administrative assistance to all of the Office of Attorney General's 13 divisions. This division supports 268 authorized FTEs, two of which are included in a continuing appropriation. In addition to managing state grant funds for criminal justice projects related to human trafficking, narcotics enforcement, and oil impact activities, this division administers up to \$13 million annually in federal grant funds.

AG Admin - This Division has four staff members including the Attorney General. It provides support services to the entire office including review of legal matters, administrative supervision, personnel administration, coordination with public and private sector entities on law enforcement enhancement projects (i.e., the Prescription Drug Take Back program), and provision of information to members of the public, including responses to media inquiries. The Division provides human resource services, including maintenance of office personnel files, preparation of reclassification requests, administration of evaluations, and support for supervisors in disciplinary, human resource administration, and hiring processes. The Division composes, or edits for final publication, the office's various publications, including: the office's Biennial Report, and reports relating to Fire Statistics, Crime & Homicide, and manuals providing guidance on Open Records & Open Meetings, and Concealed Weapons laws, and Lottery Links. The Division also composes or edits content on the office's website, <https://attorneygeneral.nd.gov>. The division responds to thousands of emails, calls and letters from the general public. In addition, Division members are responsible for composing and editing letters to constituents; position papers and correspondence to federal agencies and the Congressional Delegation on matters of interest to the legal and law enforcement communities; letters and other documents prepared in conjunction with the United States Attorney General; and materials for various public seminars and presentations.

BCI:

- 53 sworn agents opened 699 new cases in 2021. As of 5/18/22, 272 new cases were opened.
- In 2021, the ND/BCI Cyber Crime Unit (CCU) generated 429 forensic cases with 1,032 items resulting in 899 digital forensic examinations of across a total of 214,554 gigabytes of data.
- The multi-jurisdictional narcotics task forces initiated 1,232 new cases in 2021. As of May 2022 there are 407 cases.
- Methamphetamine related cases investigated by criminal investigators increased from 51% (174) of drug cases in 2020, to 58% (188) of drug cases in 2021. As of May 18th, 2022, there were 42 methamphetamine cases being investigated.
- Heroin and Opioid related cases investigated by criminal investigators resulted in a total of 107 cases in 2017, 64 cases in 2018, 76 cases in 2019, 142 cases in 2020 and 116 cases in 2021. As of May 2022, there were 31 heroin/opioid cases being investigated.
- In 2021, 68,366 criminal record checks were completed, an increase of 30 percent compared to 2020. As of May 2022, criminal history record information is maintained on approximately 216,447 persons.
- The Central Warrant Information System (CWIS) contains a total of 38,704 arrest warrants and 2,128 protection and disorderly conduct restraining orders.
- The ABIS, which North Dakota shares with Minnesota, contains fingerprint images on approximately 4.3 million incident records and continues to grow daily.
- In 2021, a total of 8,187 concealed weapons licenses were issued. This number does not include the denied applications that were processed. A total of 33,106 active licenses are currently held. There are 92 civilian and 50 law enforcement test administrators in North Dakota. In 2021, there was a total of 842 concealed weapons testing courses that occurred in North Dakota.
- As of May 2022, there were 1,601 registered sex offenders in North Dakota; 110 are offenders against children, 251 offenders registered as high, 658 registered as moderate, and 575 registered as low.

- Training and license records are maintained for approximately 2,190 peace officers from 127 law enforcement agencies in North Dakota. In addition, the POST Board maintains certification records for the over 750 instructors who teach the certified law enforcement training courses.

- Since 2007, the 24/7 program continues to be a successful deterrent for continued alcohol and drug abuse. As of January 2022, there were 1,430 participants currently being monitored in the 24/7 Sobriety Program.

- There are currently eleven statewide information systems being operated by the BCI. These systems include:

- Uniform Crime Reporting (UCR) - Incident Based and Summary Reporting - a statistical system that tracks crime in North Dakota

- Case Management System - an automated system to aid criminal investigators in generating and maintaining investigative case reports and criminal intelligence

- Offender Registration

Explanation of Program Costs

The Finance Division includes 14 employees in four sections: finance, payroll, and budget; grants management; licensing; and administrative operations. The division staff provide technical, budget, finance, payroll, records management, purchasing, reception, and other administrative services.

AG Admin - The salary and wages line item contains funding for four positions, including the Attorney General, and associated operating expenses.

MFCU - This program contains salaries and wages for 7 FTEs, including two attorneys, one of which is the Unit Director, two investigators that are also BCI agents, two auditors and one administrative support staff. The office maintains vehicles for 2 sworn personnel who are on call 24 hours a day. The office maintains all office and investigative files. The office also contains an evidence room that must meet specifications

The Consumer Protection and Antitrust Division staff consists of the Division director, 3 consumer investigators, 2 assistant attorneys general, 1 paralegal and 2 administrative assistants. This budget includes funding for the ongoing operation of the Division. The Division costs include salaries, travel, building rent, consumer education materials, office supplies, etc.

The Lottery's 2021-2023 biennium budget includes salaries and fringe benefits for FTEs, temporary draw operators and Lottery Advisory Commission members, and operating expenses. The Lottery has continuing appropriations for variable expenses of prizes, retailer commissions, on-line gaming system vendor fees, and Multi-State Lottery Association related game group dues which have a direct incremental relationship to sales and are unable to be predetermined. The budget request funds 8 FTE positions in the Lottery Division, 1 FTE position in the Information Technology Division, and 1 FTE position in the Finance and Administration Division. Also, the request funds 2 part-time draw operators and 5 members who serve on the Lottery Advisory Commission.

Crime Lab - The salary and wages expenses are for 28 forensic scientists, 1 evidence technician, 1 administrative assistant, and a director who log evidence and/or analyze and examine physical and toxicological evidence submitted by law enforcement and coroners. The staff members are responsible for the following: analyzing evidence, preparation of laboratory reports, certified documents, data collection, law enforcement training.

The BCI budget contains salaries and wages for 98 FTEs, including 59 sworn personnel, and 39 support personnel consisting of criminal intelligence analysts (6), administrative services (4), uniform crime reporting and statistics (1), offender registration (3), information processing (4), concealed weapons (4), criminal history (13), CJIS Systems Officers (3), and Peace Officer Standards and Training and 24/7 Sobriety Program (1). The salary for the director is also included. The office maintains vehicles for the 59 sworn personnel who are on call 24 hours a day, and several multi-purpose use vehicles for surveillance and crime scene response.

Funding for the Civil Litigation Division is based upon billings to general and special fund agencies for legal services provided. The salaries and wages line item provides for 9 assistant attorneys general, 4 administrative assistants, and 4 paralegals. Funding is also included for a cloud-based discovery program, telephone services, off-site space rent, licensure fees, and necessary training and travel for staff.

The Natural Resources and Native American Affairs division includes funding for 6 assistant attorneys general and 1 paralegal. Funding also includes tobacco diligent enforcement arbitration costs, a cloud-based discovery program, telephone services, off-site space rent, licensure fees, and necessary training and travel for staff.

The Solicitor General division includes funding for the solicitor general and the deputy solicitor general, as well as telephone services, off-site space rent, licensure fees, and necessary training and travel for staff.

The General Counsel division includes funding for 16 assistant attorneys general, 1 paralegal and 3 legal assistants. Funding is also included for telephone services, off-site space rent, licensure fees, and necessary training and travel for staff.

The Criminal Law division includes funding for 7 assistant attorneys general and 1 legal assistant as well as telephone services, off-site space rent, licensure fees, and necessary training and travel for staff.

The Gaming Division includes funding for 21 staff including the division director, two investigators, 2 audit technicians, 1 admin assistant, 13 auditors, and 1 training/communications specialist.

The Information Technology/CJIs Division includes 19 FTE positions and related operating expenses including computer equipment and network needs for all divisions of the NDOAG.

Program Goals and Objectives

The Finance Division provides internal administrative services and assistance to the divisions of the Office of Attorney General in a timely and cost effective manner. These support services include finance and budget, administrative operations, information processing, and employee payroll matters. This Division also administers several grants, which support a variety of office and local criminal justice projects across the state, including programs that address victims' services, demand reduction, and narcotics enforcement.

The Administrative Division provides legal, administrative, and human resource support services to the other office divisions, and informational services to citizens and other state agencies.

The Medicaid Fraud Control Unit's goals and objectives are as follows:

- To investigate and prosecute health care providers who defraud the ND Medicaid Program.
- To investigate and prosecute any provider who abuses, neglects or financially exploits a patient in any facility that accepts Medicaid funds.
- To support employees in such a manner as to create an excellent work product and passion and satisfaction for the employees.
- To meet and exceed all performance standards.
- To continue outreach activities throughout the State.

- To continue the work of beginning a brand-new Unit.
- To continue training staff with national level courses.
- To update the website to include FAQ and provide more public information.
- To evaluate and obtain/create a case management system.
- To hire the final Unit employee (auditor).

The Bureau of Criminal Investigation's goals and objectives are as follows:

- Assist local law enforcement agencies with general and specialized investigations including cyber-crime, homicide, sexual assault, human trafficking, organized crime, child abuse, arson, and terrorism
- Provide drug trafficking reduction support through participation in 10 narcotics task forces, including supervision of 9 of the task forces
- Maintain a statewide sex offender and offenders against children registration system and a registered offenders' website for lifetime registrants and high-risk offenders
- Maintain the statewide criminal history record information system and provide this information to the federal criminal history database
- Maintain the ABIS for identification and criminal investigation purposes
- Provide training for law enforcement and corrections officers, maintain officer training records, and issue peace officer licenses
- Provide training to children and the general public about the dangers of drugs and criminal activity
- Facilitate the 24/7 sobriety program
- As the Criminal Justice Information Services (CJIS) Systems Agency (CSA), BCI is responsible for planning and providing the necessary hardware, software, funding, quality assurance and training for complete access to all FBI CJIS data services for all authorized agencies within the state.
- The Concealed Weapons Licensing (CWL) Division is the only agency in the state of North Dakota that processes applications for a North Dakota Concealed Weapons License. NDBCI offers two concealed weapons licenses (Class 1 or Class 2).

The Consumer Protection and Antitrust Division objectives are as follows:

- Protect North Dakota consumers from misleading, deceptive, fraudulent, and unfair trade practices in connection with the sale or advertisement of goods or services by enforcing the state's antitrust, consumer fraud (including, among others, false advertising, unfair trade practices, home solicitation sales, pyramid, contest prize notices), do-not-call, consumer credit counseling services, transient merchant, charitable solicitations, nonprofit corporation, data security, and nonprofit corporation laws

125 Attorney General

Agency 125

- Initiate investigations and pursue legal actions for violations of laws enforced by the Division
- Educate consumers and law enforcement personnel on consumer fraud prevention and enforcement
- Coordinate investigations and legal actions with local, state, and federal law enforcement
- Mediate consumer complaints between consumers and businesses

The mission of the North Dakota Lottery is to maximize net proceeds for the benefit of the state by promoting entertaining games; providing quality customer service to retailers and players; achieving the highest standards of integrity, security, and accountability; and maintaining public trust.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The current attorney pay schedule for the Attorney General’s office is significantly less than the attorney pay schedules for some other state agencies and even some political subdivisions, not to mention private law firms and businesses. For example, some counties pay entry-level attorneys \$5000-\$15,000 more annually than this office can pay them under its current budget. Additionally, unlike in other state agencies, there is no tiering system for attorneys to work toward promotions in the Attorney General’s office. These factors significantly impair recruitment and retention of legal talent to this office, which is responsible for providing legal services to the state. To improve recruitment and retention, the office plans to adopt a slight increase to the attorney pay schedule and implement a tiering system to promote attorneys based on merit and achievement of specified goals.

The Attorney General’s office reviewed classified staff members’ salaries based on the state’s pay schedules established by the Office of Management and Budget. Some staff members, especially some administrative staff, are paid significantly below the midpoints of their relative classes’ pay schedules. These staff members’ supervisors were consulted on the reasons for their pay inequities and for input on the appropriate salaries based on the staff members’ work and years of service. The office plans to use this equity funding to increase salaries for the staff members whose salaries diverge the most from the appropriate salaries for them.

Necessary resources for implementation (including FTE's)*: Additional funding is necessary as follows:

Attorney equity 180,000 from the general fund

125 Attorney General

Agency 125

Staff equity 74,317 from the general fund; 16,775 from federal funds; and 20,685 from special funds.

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: Attorney equity - state agencies, boards and commissions. If funding is not awarded, the office will not be able to recruit and retain highly qualified legal talent.

Staff equity - Divisions within the Office of Attorney General, general public. If funding is not awarded, it would significantly impact the Office's ability to recruit and retain qualified staff.

Funding Source change (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During the 2019 and 2021 legislative sessions, the legislature authorized equity increases for attorneys and BCI agents. The equity increases were funded through the Attorney General refund fund. The refund fund is not able to sustain these increases because most settlements received during the 2021-23 and 20235-25 biennium and estimated settlements for the 2025-27 biennium are restricted for opioid treatment or reimbursements to consumers.

The 2021 legislative assembly restored funding for operating expenses for BCI and IT/CJIS but changed the funding source from general fund to the AG refund fund. The refund fund cannot sustain the operating expenses because most settlements received during the 2021-23 and 20235-25 biennium and estimated settlements for the 2025-27 biennium are restricted for opioid treatment or reimbursements to consumers.

Necessary resources for implementation (including FTE's)*: the resources necessary for this request include:

General Fund increase 2,744,134

Special Fund decrease (2,744,134)

Are resources being redirected or are they new or additional (including FTE's)*: the general fund increase will replace special fund authority.

125 Attorney General

Agency 125

Who is served and impact of not funding*: BCI, attorneys and IT/CJIS staff and operating. The AG refund fund will not be able to sustain the equity and operating increases provided by past legislative assemblies

IT system replacements, maintenance, rate increases (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Switch replacement - the existing network switches were purchased in May of 2017 (7 years old) and only support 10 GB connections. The IT division no longer has maintenance and support on those switches. It's critical to get these updated with current technology and get them under maintenance again so that the division can get support and updates from the vendor. These switches handle the communication between our servers and shared storage.

Octopus Deploy helps automate the deployment of our custom developed applications by interacting with the build server and deploying them consistently to dev, test, and production. Without it we cannot deploy any fixes, updates, changes or new systems to production environments. This is an increase to our current cost of the system.

Funding for an increase of the support and maintenance for the new E-Prosecutor system. The cost is higher then the JustWare system. JustWare will be discontinued when the contract expires in 2025. The current JustWare system is hosted at NDIT and OAG. The new E-prosecutor system will be cloud hosted. Due to the size of the system and databases needed to store the data/documents, hosting costs would increase significantly across all three platforms. The decision was made to host the new legal case management in the cloud and utilize the vendor for hosting support.

The current JustWare system is hosted at NDIT and OAG. The new E-prosecutor system will be cloud hosted. Due to the size of the system and databases needed to store the data/documents, hosting costs would increase significantly across all three platforms. The decision was made to host the new legal case management in the cloud and utilize the vendor for hosting support.

ND CJIS provides a jail management system for seven county jails in ND. The current jail management system is the Premier One system. This system will not be supported by Motorola upon our contract expiring in 2027. This funding would be to replace the jail management system for those county jails.

Costs have increased for SAVIN and P1 maintenance and hosting.

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*: additional

Who is served and impact of not funding*: All users of IT applications. If the Octopus Deploy is not funded, the office will not be able to continue to maintain, create or update any systems utilized by OAG divisions. If the network switches are not funded, all systems used by the OAG will be impacted.

Not funding the SAVIN maintenance and P1 maintenance and hosting increases will put the office in breach of our contract and risk losing the functions.

If the funding is not provided for cloud hosting, maintenance and support for E-Prosecutor, the office will have to terminate the contract and leave 33 of the 53 counties without a case management system as well as the OAG legal divisions. This will significantly impact the criminal and civil court processes across the state.

Printer and computer replacement; subscription and storage increases. (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request is for increased costs for current software or hardware currently used by various divisions of the OAG.

- ID printer- This is an increase of the high-capacity ID printer that is currently used by OAG.
- Computer replacement costs have increased. This cost includes the replacement costs for high-capacity laptops used by several BCI agents.
- The cost of replacing servers has increased. Funding is included in the base general budget for server replacements, but the costs have since increased. The increase covers four servers a biennium.
- Software subscriptions for various software utilized across the OAG have increased. The various subscriptions are for systems utilized in day-to-day work.

Necessary resources for implementation (including FTE's)*: Additional funding

125 Attorney General

Agency 125

Are resources being redirected or are they new or additional (including FTE's)*: additional

Who is served and impact of not funding*: All OAG divisions will be impacted if funding is not given.

Crime Lab supplies and maintenance agreements (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	592,000	-	592,000	0.00	192,000	400,000	592,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The costs of lab supplies are always increasing and have been observed up to approximately 15% over the past two years. This request is necessary to account for increased costs of consumables and supplies that the laboratory needs to operate on a daily basis.

Based on previous years' data, costs of maintenance agreements for the instruments and equipment at the laboratory are expected to increase on average approximately 15% for the next biennium. This funding will allow the laboratory to continue to maintain service agreements for the instruments and equipment to ensure timely and less expensive repairs and less down time within each unit.

Necessary resources for implementation (including FTE's)*: additional funds

Are resources being redirected or are they new or additional (including FTE's)*: additional

Who is served and impact of not funding*: BCI and state and local law enforcement agencies. Backlogs will occur if the crime lab has limited supplies for testing.

Crime lab equipment (Priority: 08)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This funding will be used to purchase additional equipment or instruments and replace instruments or equipment that are outdated and/or no longer covered under service contracts due to their age. Some of these equipment expenses are associated with general funds and some are federal funds.

- 2 GCMS instruments for the Forensic Chemistry unit - \$150,000 each (\$300,000 total) – General Funds
- 3 water purification units for the Toxicology unit and Latent Print unit- \$7,000 each (\$21,000 total) – General Funds
- 4 Alternate Light Sources for DNA unit - \$12,000 each (\$48,000 total) – Federal Funds
- 2 Thermal cyclers units for DNA unit - \$20,000 each (\$40,000 total) – Federal Funds
- 2 Hydrogen generators for the Toxicology unit - \$50,000 each (\$100,000 total) – Federal Funds
- 1 Temperature monitoring system for the entire laboratory - \$45,000– Federal Funds

Necessary resources for implementation (including FTE's)*: additional funds

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: BCI and ND law enforcement agencies across the state. If not funded, the lab will see larger backlogs in evidence testing.

Crime Lab evidence technician and quality assurance positions. (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	461,666	-	461,666	2.00	195,398	-	195,398	1.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	461,666	-	461,666	2.00	195,398	-	195,398	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Evidence Technician - This position is needed to have a second person available to receive evidence submissions from law enforcement and accommodate the laboratory's growing caseload. The laboratory currently has only one evidence technician and prior to 2017, the laboratory had 4 evidence technicians. The laboratory needs an additional evidence technician to manage the increased evidence submissions expected when the Firearms and Latent Print units are brought online. More than one evidence technician is also required to maintain the ability to receive evidence when the other technician is out of the office or unavailable.

Quality Assurance Manager - The duties of this position are currently being performed by a DNA analyst and not a full time Quality Assurance Manager. As the laboratory has grown in size by both the number of staff and the disciplines/services that the laboratory offers, there is a growing need for this position to be occupied by a full time Quality Assurance Manager. This position would take over performing the duties that the current part-time Quality Assurance Manager/DNA analyst has been performing which would allow that individual to focus on DNA casework duties for 100% of the time.

Necessary resources for implementation (including FTE's)*: Two FTE and funding from the general fund totaling 461,584 for salaries, benefits, and operating costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE and new funding

Who is served and impact of not funding*: Crime lab staff, BCI and state and local law enforcement. If not funded, the lab will see large backlogs in evidence testing.

Executive Staff Officer (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation

Is this a Large IT project? No

125 Attorney General

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The volume of inquiries, comments, and requests (including requests for open records) made to the office is increasing rapidly, and the office has a responsibility to respond to the general public and others in a transparent and thorough manner. The position would respond to inquiries, comments, and requests made to the office (including those made to the office via the general information email account) by state residents, state agencies, legislators, and others; respond to and track open records requests; track requests for Attorney General opinions and ensure timely opinions are issued; and assist with other tasks as assigned.

Necessary resources for implementation (including FTE's)*: FTE and funding

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: Divisions within the Office of Attorney General, state agencies, general public, Legislators. If not funded, there could be a delay in responses to inquiries, comments, and open record request

Medicaid Fraud Attorney (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	257,477	-	257,477	0.75	272,570	-	272,570	0.75
General	85,825	-	85,825	0.25	90,856	-	90,856	0.25
Special	-	-	-	0.00	-	-	-	0.00
Total	343,302	-	343,302	1.00	363,426	-	363,426	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The ND Medicaid Fraud Control Unit (Unit) is responsible for investigating provider-caused Medicaid billing fraud and, abuse, neglect, and exploitation. These are especially complex investigations and cases regularly leading to criminal prosecutions or civil settlements. Investigations often take several years to complete. The Unit’s attorneys are integrally involved in all stages of investigation and prosecution. This is unique to the Unit as traditional prosecution does not include such complex investigative participation. Additionally, our distinctive cases involve a disproportionately high level of research.

Currently, the MFCU has 1.5 attorneys. One attorney began work with the Unit this week on September 9, 2024, and the other .5 attorney is also the Unit’s director. At least half of the director/attorney’s time is spent on director duties. The director/attorney has been juggling the concurrent duties of starting a new Unit, learning how to develop fraud investigations, being involved in every investigative meeting and investigative phase, prosecuting all investigations, addressing every referral or complaint that has ever come to the Unit since its inception, and performing the usual and customary director duties.

125 Attorney General

Necessary resources for implementation (including FTE's)*: funding for 1 FTE and operating

Are resources being redirected or are they new or additional (including FTE's)*: new

Who is served and impact of not funding*: The people of ND, the Medicaid Fraud Control Unit, and the federal government are all served by having appropriate numbers of attorneys to investigate and initiate actions for Medicaid billing fraud. Additionally, a suitably staffed Unit can investigate and prosecute more of the numerous complaints the Unit receives regarding patient abuse and neglect. These actions not only curb fraud and protect vulnerable citizens but also help protect taxpayer money used for the Medicaid program. These actions serve to deter individuals from repeatedly defrauding the Medicaid program.

Operating cost increases (Priority: 12)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Office of Attorney General has seen operating costs increase significantly in several areas. This request is to provide funding to allow the divisions to continue to operate and provide necessary services:

Rent 89,845

Expert Witness fees 20,000

Travel 10,000

Motor fuel for agent vehicles 22,000

Supplies for agents 63,000

Necessary resources for implementation (including FTE's)*: total additional funding of 126,587 from the general fund; 24,270 from federal funds; and 53,988 from other funds.

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

125 Attorney General

Agency 125

Who is served and impact of not funding*: Divisions within the OAG and the state of North Dakota. Without this funding, divisions will be forced to cut operating in key areas.

Litigation Pool (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	1,000,000	1,000,000	0.00
Special	-	8,000,000	8,000,000	0.00	-	4,000,000	4,000,000	0.00
Total	-	8,000,000	8,000,000	0.00	-	5,000,000	5,000,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The litigation pool pays for litigation costs incurred by state agencies, boards, and commissions as needed; litigation to defend statutes passed by the legislative assembly; litigation on behalf of North Dakota against unlawful federal government overreach, litigation related to DAPL; and other litigation costs.

Necessary resources for implementation (including FTE's)*: This request will require \$8 million from gaming tax funds or a transfer of \$8 million from the strategic investment and improvements fund.

Are resources being redirected or are they new or additional (including FTE's)*: new funding - the litigation pool was considered onetime funding in the 2023-25 biennium.

Who is served and impact of not funding*: This request allows for the continued specialized legal expertise required to represent and defend the state against ongoing and new litigation relating to state and federal laws and regulations. Without this funding the Office of Attorney General will be unable to fulfill its duties under NDCC 54-12-01.

Finance Admin Assistant (Priority: 14)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The National Forensic Academy (NFA) is training that agents attend in Tennessee. The NFA is a specialized training focused on crime scene processing, evidence collection, and crime scene photography. When the agents complete the training, they will have receive 400 hours of specialized training. The need for this type of training for our agency is becoming more evident each day. Currently, 24 agents have attended and successfully completed this 10-week training in Tennessee. BCI sends two agents each year (\$25,000 x 2 = \$50,000). North Dakota is going through changes we have not seen before. NDBCI has been involved in murder for hires, body dumps, aggravated assaults, a higher number of officer involved shootings, and violent sexual assaults. While North Dakota has always had a small number of homicides each year, the manner and number of these deaths is increasing. BCI's goal is 60% of field agents NFA trained (approximately 38); BCI is currently at 37% of field agents NFA trained.

Necessary resources for implementation (including FTE's)*: additional funding

125 Attorney General

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: BCI staff. This funding will allow BCI agents to participate in high-level training.

Staff reclassification (Priority: 16)

125 Attorney General

Agency 125

Request explanation and justification (include any statutory authority)*: Since 2003, NDBCI has had the same amount of personnel working (4 total) in NDBCI’s Information Processing (IP) Division. IP Division carries a primary responsibility of typing, proof reading, entering, consolidating, and disseminating case reports. IP staff also has various collateral duties to include confidential buy fund, confidential informant tracking, statistics, record retention, and open records requests to name a few. Case reports are the “police report” generated by NDBCI field agents when they conduct any and all criminal and narcotics investigations across the State of ND. In 2003, NDBCI had approximately 32 field agents. As of 2024, NDBCI has 64 field agents. As the number of field agents increased, and the complexity of the criminal and narcotics investigations evolved over the past 20 years, NDBCI utilized technology to maintain a level of adequate report turn around. This technology included dictation, reporting systems, headphone dictation equipment, etc. NDBCI has worked to avoid asking for additional IP staff by utilizing technology and streamlined submission processes.

The addition of the numerous field agents, the expansion of open records requests and their immediate response time frames, coupled with the complexity of investigations (large narcotics, violent crimes against persons, and cybercrimes), NDBCI can no longer maintain an acceptable level of report turnaround. IP Division is now seeing a range of 150 to 200 reports awaiting work at any given time. This extended time frame affects the ability of the field agents to present the reports for prosecution to state’s attorney’s offices and federal prosecutors. The demand being placed on the IP staff (due to primary and collateral duties) has exceeded our abilities and technology. NDBCI needs the additional IP personnel to handle the amount of case reports being submitted due to increased field agent presence and services being rendered to police departments and sheriff’s offices.

With this foundation explained, NDBCI has expanded the footprint of cybercrime investigators in the State. The cyber crime division has expanded from a single agent in 2003 to a group of men and women totaling 12 today. These men and women consist of supervisors, Internet Crimes Against Children (ICAC) task force coordinators, forensic examiners, and victim witness advocates. This group is also primarily responsible for overseeing the ND Human Trafficking Task Force and the related state and federal initiatives and funds related to combatting these specific crimes. The cyber crime division of NDBCI is also driven by leads through the National Center for Missing and Exploited Children (NCMEC). These leads have increased significantly from just 2016 from 166 to 1570 in 2023. Unfortunately, 2024 is trending to pass the record number of 2023. The increase of cyber related crimes, the increase in cyber investigators, and the complexity of the cases (technical topics) require the expansion of IP to have a single IP person assigned solely to cybercrime. This IP person will be tasked with producing, creating, tracking, and disseminating cybercrime reports such affecting criminal investigations, narcotics investigations, and crimes against children to include luring by computer and possession of child pornography.

Necessary resources for implementation (including FTE’s)*: New FTE and operating

Are resources being redirected or are they new or additional (including FTE’s)*: New funding

Who is served and impact of not funding*: Slow or backlog of cybercrime reports to BCI agents, state’s attorney’s offices, federal prosecutors, criminal investigations, narcotics investigations, and crimes against children

SLIC Criminal Investigator (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	303,445	83,885	387,330	1.00	-	-	-	0.00

125 Attorney General

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota State and Local Intelligence Center (ND SLIC) is responsible for the collection, interpretation, dissemination, and retention of vital criminal investigative leads and intelligence. ND SLIC is tasked with communicating field intelligence to political subdivisions (police departments and sheriff’s offices) to ensure criminal actors are identified, disrupted, and dismantled. The ND SLIC need an NDBCI field agent to be able to conduct the communication and follow up on various areas of criminal activity to include the intelligence follow up, assistance, and guidance to smaller law enforcement agencies lacking investigative means. The leads will continue to be missed and not follow up on by various ND law enforcement agencies without this position. The intelligence and work provided by this agent will include criminal investigations, narcotics identification, cyber crime investigations, and security checks from internal and external threats.

This position will be tasked with becoming a member of the Federal Bureau of Investigation’s (FBI’s) Joint Terrorism Task Force initiative (JTTF). This agent will become a task force officer (TFO) with the FBI JTTF and work with the federal partner to identify threats to ND at numerous levels to include dangerous traveling actors, foreign actors in ND, and harmful “cell” operations inside our communities. This agent will be required to obtain a top secret clearance to be able to be briefed and assigned high level cases related to state and national security.

This position will also support the newly created Cass Clay Threat Assessment Threat Management Team (CCTATMT) which targets dangerous persons and groups in the eastern side of the state.

This position will be assigned investigatory law enforcement topics assigned to ND SLIC, follow up on suspicious activity reports, conduct intelligence gathering to fill a vacancy, such as undercover online information, liaison with federal agencies (TFO on JTTF), source management for NDBCI, help develop intelligence needs and work with agents to ensure needed information is being gathered and sent to ND SLICC, and carry an NDBCI caseload.

Necessary resources for implementation (including FTE’s)*: New FTE, operating and one-time operating and capital funds

Are resources being redirected or are they new or additional (including FTE’s)*: New funding

Who is served and impact of not funding*: Citizens, law enforcement agencies and political subdivisions in ND. If funding is not provided, there is further risk of crimes against children and other citizens of North Dakota going undetected.

IP Admin for Tribal and Field Agents and Sex Offender Registration (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	354,208	-	354,208	2.00	-	-	-	0.00

125 Attorney General

Agency 125

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: IP Admin for Tribal and Field Agents - The addition of the numerous field agents, the expansion of open records requests and their immediate response time frames, coupled with the complexity of investigations (large narcotics, violent crimes against persons, and cybercrimes), NDBCI can no longer maintain an acceptable level of report turnaround. IP Division is now seeing a range of 150 to 200 reports awaiting work at any given time. This extended time frame affects the ability of the field agents to present the reports for prosecution to state’s attorney’s offices and federal prosecutors. The demand being placed on the IP staff (due to primary and collateral duties) has exceeded our abilities and technology. NDBCI needs the additional IP personnel to handle the amount of case reports being submitted due to increased field agent presence and services being rendered to police departments and sheriff’s offices.

Sex Offender Registration Admin - The amount of convicted sex offenders, coupled with the increase in cyber investigations (nationwide) has led to an increase in the number of registered sex offenders residing in ND. The increased numbers of offenders has created mandatory areas of responsibility being created to fall behind with the unchanged level of personnel working in sex offender division.

Areas currently being missed and overlooked due to workload increases include: research areas for lifetime qualifiers; ongoing National Crime Information Center (NCIC) compliance, testing, and implementation; completing bluebooks (data on each offender) for SORAC review; research and verification of incoming cases; scanning physical bluebooks that already exist; and offender against children document research.

Necessary resources for implementation (including FTE’s)*: 2 new FTE and operating

Are resources being redirected or are they new or additional (including FTE’s)*: 2 new FTE and operating

Who is served and impact of not funding*: BCI, law enforcement agencies, Citizens of North Dakota

Discovery and open records software (Priority: 21)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: PACER and Westlaw charges have increased due to additional staff and increased cases. Quickbooks will help with the auditing of charitable organizations tax returns. Open source intelligence (OSINT) tool for BCI is the collection and analysis of data gathered from open sources (overt sources and publicly available information) to produce actionable intelligence.

125 Attorney General

Agency 125

Necessary resources for implementation (including FTE's)*: funding

Are resources being redirected or are they new or additional (including FTE's)*: additional funding/new funding

Who is served and impact of not funding*: The legal divisions in the OAG need the programs to efficiently perform legal research and access and file federal court cases electronically. Gaming division needs quickbooks to assist with the auditing of charitable organizations tax returns. If not provided, temp employees may be needed to do research and help with auditing charitable organizations.

Tobacco Compliance Auditor (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	239,716	-	239,716	1.00	-	-	-	0.00
Total	239,716	-	239,716	1.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: For purposes of diligent enforcement of our escrow statute at N.D.C.C. ch. 51-25 and our directory statute at N.D.C.C. ch. 51-25.1, it would be preferable if routine inspections focused on compliance with these laws occurred once every two or three years rather than once every five years. Additionally, it would be preferable for the state to have the capacity to conduct a near immediate inspection in response to any specific report of contraband at a specific retail location. Currently the Tax Department completes retail inspections of licensed tobacco retailers under the Tobacco Products Tax Law at N.D.C.C. ch. 57-36. The primary purpose of the inspections relate to checks on compliance with tax laws. In the course of those inspections, as a secondary purpose, the tax department's inspectors also reportedly do a check for any contraband cigarettes. The Tax Department completes inspections of retailers once every 5 years.

A transfer from the Tobacco Settlement Funds is requested for this position.

Necessary resources for implementation (including FTE's)*: One FTE and operating using Tobacco Settlement Funds

Are resources being redirected or are they new or additional (including FTE's)*: new funding

Who is served and impact of not funding*: One of the impacts of not receiving funding for a Tobacco auditor position could be that the Participating Manufacturers, parties to the Tobacco Master Settlement Agreement ("MSA"), would argue that the State's enforcement of the MSA is not diligent. If an arbitration panel was to agree with the Participating Manufacturers and determine the State was not diligent for a particular enforcement year, the State could lose a portion or all of its annual allocation of MSA settlement proceeds – up to roughly \$20 million.

125 Attorney General

Agency 125

Request explanation and justification (include any statutory authority)*: The state of ND has been plagued by the movement of illegal narcotics into the state of ND which directly affects the Tribal Nations inside of ND. These tribal nations are affected by drug trafficking organizations moving on to tribal lands and establishing drug distribution points. The lack of federal law enforcement on tribal lands is not a new issue to ND, but a very desperate reason for state response and action. The drugs being housed and trafficked through tribal nations is directly affecting all communities within the state. Several years ago, NDBCI was asked by tribal leadership on the Spirit Lake Nation to assist them with drug trafficking organizations (DTO's). The response to this request was for NDBCI to ask the state of ND to supply NDBCI with new field agents that would be assigned to combat drugs on tribal nations through local multi-jurisdictional drug task forces. NDBCI began the process of requesting Special Law Enforcement Commission (SLEC) designation from the Department of the Interior and the Bureau of Indian Affairs (BIA), that would grant NDBCI field agents with the full authority of BIA officers and investigators. The SLEC designation is granted through the United States Attorney's Office.

SLEC designation begins with a tribal resolution from the affected tribal nation allowing NDBCI to start the process of SLEC designation. Once the resolution is signed by the tribal nation, NDBCI agents receive training from the United States Attorney's Office in "Indian Country" laws. The NDBCI agents then go through an extensive BIA background. A Memorandum Of Understanding (MOU) is then created by BIA for NDBCI and the requesting tribal nation. The NDBCI agent is then given BIA credentials to enforce narcotics and criminal laws, affecting enrolled and non-enrolled persons alike.

NDBCI currently has SLEC designation with Spirit Lake Nation, the Turtle Mountain Band of Chippewa Indians, and the Mandan, Hidatsa, and Arikara Nation. NDBCI is continuing to work with the Standing Rock Sioux Tribe for their tribal resolution to be passed so the SLEC process can begin for their nation also.

During the 2023 (68th) Legislative Session, NDBCI requested (6) new field agent FTE to designate as "Tribal Agents" assigned to state run task multi-jurisdictional drug task forces to directly work with the tribal nation to target DTO activity. The (6) new FTE were paired for working and directly supporting the tribal nations outlined above. The reason for (6) FTE was to ensure the agents had (2) personnel available to work on drug investigations while ensuring agent safety during evidence gathering, drug transactions, work with confidential informants, drug and currency seizures, and extended surveillance. The "pair" of agents are necessary to ensure agent safety and for one agent to always be available for the tribal nation when needed (training, court, sick leave, vacation, etc.).

The 68th Legislative Session approved (3) or the requested (6) agent FTE's with the confirmation that NDBCI could come back to the 69th Legislative Session and ask for the additional three positions if and when needed. The (3) FTE's from the 68th Legislative Session are actively serving the tribal nations to include the creation of a new NDBCI run multi-jurisdictional drug task force in Rolla, ND. The partnerships and proactive field work in and around the tribal nations is making a large dent on the ability of DTOs to set up criminal activity on tribal nations and ultimately set up distribution or "safe" zones affecting all ND communities.

Necessary resources for implementation (including FTE's)*: 3 new FTE including operating, one-time operating and capital

Are resources being redirected or are they new or additional (including FTE's)*: 3 new FTE including operating, one-time operating and capital

Who is served and impact of not funding*: BCI, Tribes, Citizens of ND and ND law enforcement agencies across the state

Crime Lab Overtime (Priority: 28)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	130,000	-	130,000	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	130,000	-	130,000	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The crime lab overtime funding is federally funded on the DNA Capacity Enhancement for Backlog Reduction grant. This funding allows for DNA analysts to perform overtime work in order to reduce the backlog of DNA cases and decrease the turn-around time of reporting DNA cases at the laboratory.

Necessary resources for implementation (including FTE's)*: funding

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: BCI and ND law enforcement agencies across the state. If not funded, BCI and law enforcement agencies will continue to see the backlog in DNA cases and slow turn-around time of reporting DNA cases at the laboratory.

Restore 3 percent budget cuts required by the Governor's office (Priority: 29)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	892,118	-	892,118	0.00	-	-	-	0.00
Total	2,564,431	-	2,564,431	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request is to restore the 3 percent budget cuts from the general fund and special funds.

Necessary resources for implementation (including FTE's)*: restore funding

125 Attorney General

Agency 125

Are resources being redirected or are they new or additional (including FTE's)*: restored

Who is served and impact of not funding*: The Office of Attorney General serves state and local law enforcement, citizens, and other state agencies. if this funding is not restored, the office will need to reduce operating costs in several key areas which may affect services provided to the above mentined.

Network switch replacement (Priority: 4)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	125-1011	12550	693000	10	2	16,000	-	32,000	-	32,000	-	32,000
Total					-	-	-	-	32,000	-	32,000	-	32,000

State Initiative:* Technology Investment

Justification: The existing network switches were purchased in May of 2017 (7 years old) and only support 10 GB connections. We no longer have maintenance and support on those switches. It's critical to get these updated with current technology and get them under maintenance again so that we can get support and updates from the vendor. These switches handle the communication between our servers and shared storage.

Jail management system replacement (Priority: 4)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	125-1030	12578	693000	10	1	650,000	-	650,000	-	650,000	-	650,000
Total					-	-	-	-	650,000	-	650,000	-	650,000

State Initiative:* Technology Investment

Justification: ND CJIS provides a jail management system for seven county jails in ND. The current jail management system is the Premier One system. This system will not be supported by Motorola upon the contract expiring in 2027. This funding would be to replace the jail management system for those county jails.

Currently the jail management system is provided to the counties at no cost. If this system is not funded then the counties will be required to purchase their own system. The jail management system we will provide will automatically provide data back to the Premier One Records management system. The RMS system is used by approximately seventy law enforcement agencies state wide. By not providing the funding, important safety information will not longer be shared among the agencies regarding the offenders booked into jail. Currently the information is shared between the jails, PD and SO's.

SAVIN Statewide Automated Victim Information and Notification System (Priority: 5)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	1,500,000	-	1,500,000	-	1,500,000

State Initiative:* Technology Investment

Justification: The ND Statewide Automated Victim Information and Notification system (SAVIN) is currently powered by the VINE system owned by Equifax. Equifax acquired the company known as Appriss approximately two years ago. The current company’s culture and support of the SAVIN system is to the point that it places victims of crime at risk. There are continuous open tickets where information is provided late or inaccurately or information is missed completely. The time it takes to address the open tickets is at times months and on several occasions years. The company has changed the priority of trying to provide the right information to collecting as much data as possible to help support that other products they own and sell. Due to the inaccuracies of the system, victims and criminal justice personnel question the validity and accuracy of the system

ID printer and Server costs (Priority: 6)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Statutory Authority

North Dakota Century Code Chapters 5-01, 5-02, 5-03, 57-01, and 57-02.

Agency Description

The North Dakota Office of State Tax Commissioner is dedicated to fostering trust, transparency, and accountability in the tax administration of the state. Our agency ensures the fair and efficient collection of state taxes, providing critical resources for public services while upholding the highest standards of integrity and professionalism.

Our objective is to support taxpayers with clear guidance and exceptional customer service, promoting voluntary compliance through education and outreach. We strive to create a tax system that is equitable and responsive to the needs of North Dakota's residents and businesses, ultimately contributing to the state's economic growth and well-being. Team Tax is organized into six specialized divisions, each focused on key aspects of our mission:

Commissioners Division

This division oversees the comprehensive administration and operations of the Office of State Tax Commissioner. It serves as the epicenter for communication, public information, and human resources.

Fiscal Management Division

The financial cornerstone of the agency, handling revenue accounting, research, accounts payable, payroll, asset management, purchasing, and budgeting.

Information Management and Technology Division

Spearheading our technological initiatives, this division safeguards taxpayer data and meticulously manages mail and processing operations.

Legal Division

Serves as general counsel to the Commissioner, providing expert legal advice. This division ensures compliance with tax laws, offers litigation services, and supports the State Board of Equalization (SBOE) with exceptional counsel.

Tax Administration Division

Dedicated to taxpayer education and compliance, this division administers an array of tax programs including individual and corporate income, sales and use, special taxes, oil & gas, motor fuel, alcohol, cigarette & tobacco taxes, and the collection of delinquent taxes.

Property Tax Division

This division oversees property and utility taxes, coal taxes, and several tax credit programs, including the Homestead Tax Credit, Renter Refund program, Disabled Veterans Property Tax Credit program, and the Primary Residence Credit (PRC). This team also provides exemplary administrative and technical support to the SBOE.

Agency Mission Statement

The mission of the Office of State Tax Commissioner is to fairly and effectively administer the tax laws of North Dakota.

Major Accomplishments

- 1 Digital Transformation & Automated Processes and Procedures The agency continues to update processes and works to enhance citizen experience through digital transformation utilizing GenTax (internal) and ND Taxpayer Access Point (NDTAP) (external) tax administration systems. Taxpayers are able to electronically file tax returns, make electronic payments in NDTAP and interact with an AI assistant to answer questions at any time day or night. The agency has successfully transitioned Sales Tax account holders to electronic filing of monthly/quarterly/annual returns. Currently, approximately 47,000 registered accounts file electronically. The agency has further enhanced the unclaimed/uncashed check process and transitioned the taxpayer request for to an electronic process through NDTAP resulting in a streamlined process for payment reissuance to taxpayers and reduction of manual process to reduce the amount of taxpayer dollars transferred to unclaimed property. The agency will fully utilize the one-time funding to support the agency's digital transformation by implementing additional tax types fully digital into GenTax allowing taxpayers electronic filing for Telecommunications, Coal Conversion, Coal Severance, Electronic Generation, Airline, Airport Property, Motor Vehicle Excise, Motor Vehicle Rental Surcharge, City Motor Vehicle, and Provider Assessment.
 - 2 Primary Residence Tax Credit Program The Primary Residence Tax Credit (PRC) was established during the 2023 Legislative Session under House Bill 1158 for the tax years ending 2024 & 2025. The agency implemented a user friendly and efficient online application through GenTax, that provided real-time validation for 138,124 applicants. The marketing efforts of the agency included providing program brochures to counties to include in property tax statements mailings that provided explanation of the tax credit, application process, and application deadlines. The Marketing efforts of the program also included television and radio ads and targeted mailings in areas of less than expected applications. The agency received a 99% approval rating of the process on surveys conducted at the completion of the application process.
 - 3 Fraud Prevention & Data Security The agency partners with the IRS, tax industry, and other stakeholders to ensure that all confidential information is kept secure. The most recent audit conducted by the IRS in 2022 had no critical findings. The next agency audit is scheduled for 2025. The agency utilizes fraud detection and prevention tactics in systems to identify and investigate potential fraud activities. Because fraud threats and activity are constantly changing the agency places a high priority on data security and fraud prevention.
 - 4 Staff Recruitment, Retention and Agency Culture The agency is focused on retaining top talent and being a workplace that supports professional growth and development, values employee engagement, and works to be an employer of choice. The 2023 Gallup Employee Engagement Survey reflected; an overall Employee Engagement mean score increase from a 3.77 to 3.91. The agency recruitment efforts focus on finding the right fit for the culture and the work we do and provides training and professional growth opportunities to all team members. As a result of agency efforts turnover has decreased and retention has increased. The agency is better positioned at this time with fewer open positions than in prior years.
-

Critical Issues

- 1 Employee Recruitment, Retention, and Compensation The agency makes customer service a top priority. In order to provide exceptional customer service to taxpayers, we must recruit and retain talented team members. Agency employees must have a thorough knowledge of many different tax types. The Office of State Tax Commissioner received equity dollars in the 2023-2025 biennium but continues to have critical positions that are still below market. This scenario continues to put various positions at risk from a recruitment and retention standpoint. Tax knowledge is a specialized skillset within these position types, subsequently placing a premium on retaining experienced team members. The continued risk of losing team members to positions of a similar nature with higher salaries, lessens our ability to build and retain knowledge long-term which is critical for success. It is important that salaries and benefit packages remain competitive to retain high quality tax expertise. Retaining experienced team members allows them to serve as mentors to new team members which in turn prepares them to become mentors to future generations to serve the taxpayers of North Dakota. Retirements and turnover have created additional training needs. Therefore, it is important that funding for ongoing educational opportunities be available to broaden knowledge and create opportunities for succession planning. As the primary revenue collection agency for North Dakota, it is important that we remain adequately staffed to: Timely delivery of exceptional customer service. Process returns in a timely manner to avoid state liability for interest due on refunds. Conduct appropriate audits and compliance activities to educate taxpayers and ensure compliance with North Dakota tax laws. Retaining qualified and experienced team members is critical. Fewer team members has resulted in the absorption of essential job duties to remaining team members. Current biennium staffing levels require reallocating resources from audit and compliance to processing amended returns, issuing refunds, discovery efforts, updating guidelines, and responding to taxpayer inquiries. This reallocation of staff resources further diminishes revenue potential and puts pressure on our mission of maintaining fairness among taxpayers. It has negative impacts on the state's general fund as it means reductions in the number of audits and compliance checks that can be conducted. Technology changes needed to create better citizen experiences is also impacting employee capacity and repurposing skills needed to perform these duties. Digital transformation continues to create new opportunities for professional growth for team members, as we further implement the shift from paper to electronic filing, and subsequently repurpose existing resources to address present-day taxpayer needs. As part of that transformation, additional compensation is necessary to effectively recognize and address the new, required skillset. With the taxation of internet sales, the need for discovery has also increased which impacts the workload of existing team members.
 - 2 Digital Transformation and IT Costs Approximately 74% of the agency's operational costs consists of IT/Technology costs for GenTax, North Dakota Information Technology (NDIT) provided services. software and IT service providers. GenTax support is the "nerve center" of the agency along with Taxpayer Access Point (NDTAP) that allows taxpayers to interact with the agency, file electronically, and protect the data of the agency. GenTax was utilized in the Primary Residence Credit application process and data validations. The complexity and depth of GenTax requires ongoing support from FAST Enterprises (FAST) to maintain GenTax and NDTAP and to ensure we stay current with new technology, tools, and security protocols. The GenTax maintenance support is 54% of the agency's operating budget. In addition to GenTax costs, the IT fees paid to NDIT are 17% of the agency's operating budget to support the digital future of the agency. The remaining 3% is software costs to support the agency.
 - 3 Safeguarding Data and Fraud Protection Safeguarding data is an important piece of the IT infrastructure. With most taxpayers filing electronically, the agency must safeguard its physical documents as well as the IT systems where taxpayer data is stored. In addition, the increase in identity theft and fraud demand that the agency be proactive in continuing to find new ways to protect data. Safeguarding data is an investment in taxpayer trust, as a breach of security would result in damages that would far exceed any costs of implementing additional safety measures. It is critical to have adequate staff dedicated to developing new fraud detection programs, updating business rules necessary to combat the ever-changing fraudulent activities, and researching new ways to prevent identity theft and fraud for the taxpayers of North Dakota. Services provided by FAST Enterprises are also a critical component of this effort as they provide security updates to help respond to the latest fraud attacks.
 - 4 New/Changed Tax Types The potential addition of new tax types or changes to existing types creates two critical issues: 1) the need for additional staff to administer 2) technology enhancements or customizations to GenTax that wouldn't be covered under our maintenance contract and would need appropriated dollars to support the implementation and administration of any new tax types. (ie. marijuana, changes to oil taxation, etc.).
-

Performance Measures

Homestead Property Tax Credit

The results of the Homestead Property Tax Credit program are measured by the number of qualifying applicants and dollars expended. Dollars expended are limited by statutory homestead maximum taxable value reductions for various income levels and a maximum renter's refund of \$400.

Disabled Veterans Property Tax Credit

The results of the Disabled Veterans Property tax credit program are measured by the number of qualifying applicants and dollars expended. Dollars expended are limited by the statutory maximum reduction of \$8,100 taxable value of the disabled veteran's homestead. The credit is limited to the percentage of the veteran's disability rating for service-connected disabilities as certified by the Department of Veterans Affairs for the purpose of applying for a property tax exemption.

Primary Residence Property Tax Credit

The results of the Primary Residence Property Tax Credit program are measured by the number of qualifying applicants and dollars expended, not to exceed the maximum credit of \$500 per household.

Program Statistical Data

Homestead Property Tax Credit

Payments for 2022 credits made in Fiscal Year (FY) 2023: 8,214 applicants qualified for credit for a total of \$7,425,515 (to counties and state medical center). Payments for 2022 renter's refund credits made in FY 2023: 2,162 applicants qualified for the refund program for a total of \$662,569.

Payments for 2023 credits made in FY 2024: 14,229 applicants qualified for credit for a total of \$19,523,578 (to counties and state medical center). Payments for 2023 renter's refund credits made in FY 2024: 2,394 applicants qualified for the refund program for a total of \$743,638.

Disabled Veterans Property Tax Credit

Payments for 2022 credits made in FY 2023: 5,513 disabled veterans qualified for credit for a total of \$8,324,663 (to counties and state medical center).

Payments for 2023 credits made in FY 2024: 5,960 disabled veterans qualified for credit for a total of \$9,318,894 (to counties and state medical center).

Primary Residence Property Tax Credit

Payments for the tax year ending in 2024 to be made in FY2025 are estimated for 134,933 eligible applicants resulting in projected payments to counties of \$67,466,500. The participation rate in the program for eligible homes was 92.31%. IT programing and marketing costs are estimated to be \$901,000 for the 2023-2025 biennium.

Explanation of Program Costs

The Office of State Tax Commissioner has 117 authorized Full Time Employees (FTEs) responsible for the administration of State of North Dakota tax laws.

The Salaries & Wages appropriations are used to recruit and retain customer service focused team members that educate taxpayers, assist taxpayers, and enhance compliance with the tax laws of the state.

The Operating appropriations are used in the day-to-day operations of the agency in support of taxpayer education and compliance with state tax laws.

Homestead Property Tax Credit

The Homestead Property Tax Credit program appropriations consist of reimbursement payments to counties for taxes & special assessment installments and direct payments for the Renter's Refund program for qualified taxpayers. Responsibilities for the program administration include certifying homestead tax credits for reimbursement to the State Treasurer for reimbursement to each county and certifying and paying each qualifying Renter's Refund application. The appropriation does not include any salary or operating costs of the agency in support of the program.

The original appropriation for the 2023-2025 biennium was \$18,900,000, increased by HB 1158 to \$72,400,000. The budget request for the 2025-2027 biennium is \$48,000,000.

Disabled Veterans Property Tax Credit

The Disabled Veterans Property Tax Credit program appropriations consist of reimbursement payments to counties for taxes for qualified taxpayers. Responsibilities for the program administration include certifying disabled veterans tax credits to the State Treasurer for reimbursement to each county. The appropriation does not include any salary or operating costs of the agency in support of the program.

The appropriation for the 2023-2025 biennium for the program was \$18,745,000. The budget request for the 2025-27 biennium is \$22,000,000.

Primary Residence Property Tax Credit

The Primary Residence Property Tax Credit program appropriations consist of reimbursement payments to counties for property taxes for qualified taxpayers. Responsibilities for the program administration include collecting taxpayer applications, verifying qualified applications, providing a list of qualified applicants to counties, certifying the Primary Residence property tax credits to the State Treasurer for reimbursement to each county.

The appropriation for the 2023-2025 biennium for the program was \$103,225, for state reimbursements and \$1,500,000 one-time funding for operating expenses related to information technology and advertising costs of the program. The budget request for the 2025-2027 biennium is \$77,500,000 for reimbursement payments to counties and does not include any salary or operating costs in support of the program.

Program Goals and Objectives

Homestead Property Tax Credit

The goal of the Homestead Property Tax Credit program is to ensure that all North Dakota residents who qualify for the program are made aware of it and receive the benefits to which they are entitled. The objectives are to assist elderly and disabled persons by reducing the property taxes and special assessments on homeowners' homesteads, and by refunding a portion of the rent paid by elderly and disabled persons who rent living quarters.

Disabled Veterans Property Tax Credit

The goal of the Disabled Veterans Property Tax Credit program is to ensure that all North Dakota disabled veterans who qualify for the program are made aware of it and receive the benefits to which they are entitled. The objectives are to assist disabled veterans or their un-remarried surviving spouses by reducing the property taxes on their homesteads.

Primary Residence Tax Credit

The goal of the Primary Residence Tax Credit program is to ensure that all North Dakota residents who qualify for the program are made aware of it and receive the benefits to which they are entitled. The objectives are to assist qualified residents by reducing the property taxes on homeowners' primary residence.

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Maintenance support for GenTax is included in the base budget at the 2023-2025 biennium’s rate of \$4.4 M for Level III maintenance support, less the 3% reduction. The base funding does not include planned service increases that are part of the maintenance contract with the software provider.

The total request for funding for the 2025-2027 biennium is \$1,200,000. This includes \$750,000 to reinstate 3% overall budget reduction and \$450,000 continues support at Level III for the 2025-2027 biennium. The total cost of GenTax for the 2025-2027 \$4,850,000.

Necessary resources for implementation (including FTE’s)*: Additional funding to support the agency.

127 Tax Commissioner

Agency 127

Are resources being redirected or are they new or additional (including FTE's)*: Funding requested supports and enhances the current tax administration efforts and support software at current service levels.

Who is served and impact of not funding*: Process improvements and efficiencies, stakeholder modernizations, improvement of citizen experience, and inefficiencies in tax administration.

NDIT Cost Increase and Additional Services (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	455,190	-	455,190	0.00	455,190	-	455,190	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	455,190	-	455,190	0.00	455,190	-	455,190	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The agency is heavily dependent on technology as a result of efficiency driven efforts to encourage taxpayers to file electronically.

The agency utilizes technology and phone services provided by NDIT with those costs making up 17% of the 2023-2025 biennium operating costs. NDIT has increased rates resulting in a 31% increase for current services utilized.

The total request for the 2025-2027 biennium for NDIT provided services is \$455,190 and covers existing technology services where the rates have increased and adding two additional servers to support digital transformation.

\$53,759 to restore the 3% reduction.

\$332,671 funding to cover the costs increases from NDIT services not provided in the base budget.

\$68,760 for two additional servers provided by NDIT due to increased digital filings resulting in the need for increased computing resources to increase server capacity and enhanced efficiency.

Necessary resources for implementation (including FTE's)*: Additional funding to support the agency.

Are resources being redirected or are they new or additional (including FTE's)*: This is new funding that will be paid to NDIT.

127 Tax Commissioner

Agency 127

Who is served and impact of not funding*: Taxpayers and agency staff both utilized the technology services provided by NDI electronically, via phone, and in person visits to the agency. Not providing the funding will limit the digital transformation and reduce the efficiency of staff.

Salary Equity (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	511,800	-	511,800	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	511,800	-	511,800	0.00	-	-	-	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to support equity increases for critical positions that are at retention risk and present hiring challenges due to competitive disadvantages within state government. The specialized knowledge needed to administer the state's taxes and the ability to retain this knowledge and attract strong candidates to positions is critical to tax administration. The equity package from the 2023-2025 biennium was impactful to the agency staff, however the agency still lags behind agencies in compensation rates. The request for salary dollars to address equity for the 2025-2027 biennium is \$511,800.

Necessary resources for implementation (including FTE's)*: Additional funding for positions that have a high rate of competition within state government and private sector.

Are resources being redirected or are they new or additional (including FTE's)*: New salary funding.

Who is served and impact of not funding*: Allows the Office of State Tax Commissioner to compete to retain employees and seek quality candidates to lead tax administration efforts.

Capitol Rent Increase (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	37,330	-	37,330	0.00	37,330	-	37,330	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	37,330	-	37,330	0.00	37,330	-	37,330	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: With the implementation of the rent model in the 2023-2025 biennium the agency pays rent to Office of Management and Budget (OMB) for the space occupied in the Capitol tower. The total estimated rent to be paid to OMB for the 2025-2027 biennium is \$651,984. The funding request to reinstate the 3% reduction and increased rent rates for the 2025-2027 biennium paid to OMB is \$37,330.

\$20,910 to restore 3% reduction for Capitol tower rent paid to OMB

\$16,420 to cover 2.6% rent rate increases for Capitol tower rent paid to OMB for 2025-2027 biennium that was not included in the base budget.

Necessary resources for implementation (including FTE's)*: Rent increase paid to OMB for office and storage space in Capitol tower.

Are resources being redirected or are they new or additional (including FTE's)*: New due to 3% reduction and price per square foot increase in rent

Who is served and impact of not funding*: Allows the Office of State Tax Commissioner to serve taxpayers that visit the agency at the Capitol and team members of the agency.

Statutory Authority

North Dakota Century Code Sections 12-59, 37-19.1, 28-32-31, 40-51.2, 40-47-01.1, 54-57-03, and 61-03-22.

Agency Description

The Office of Administrative Hearings (OAH) is an executive branch agency that provides independent administrative law judges to preside over state and local administrative hearings and related proceedings. Hearings are conducted under authority from the Administrative Agencies Practices Act (North Dakota Century Code Chapter 28-32), North Dakota Century Code Chapter 54-57, specific agency statutes, agency procedural rules, and the Uniform Rules of Administrative Procedure for Adjudicative Proceedings (ND Admin. Code article 98-02).

Agency Mission Statement

To resolve administrative disputes through holding fair and impartial hearings and issuing reasoned and timely decisions.

Major Accomplishments

- 1 Continued active participation in national administrative law judge and hearing officer organizations, including the National Association of Hearing Officials, the National Association of Administrative Law Judiciary, and the Central Panel Directors Conference.
- 2 Worked with WSI to jointly report case processing statistical information to the legislative management and state advisory council each quarter.

Critical Issues

- 1 The scope of OAH jurisdiction (expansion of jurisdiction), i.e., whether independent ALJs should be required for other state agencies besides those now under OAH jurisdiction, continues to be an issue. Legislation has been introduced in the Legislative Assembly over the years to require some exempt agencies to use OAH. A successful initiated measure in 2008 required Workforce Safety and Insurance (WSI) to use OAH. Legislation has been passed to expand OAH jurisdiction for some local entities. OAH is not proposing any legislation for expansion of jurisdiction; however, OAH needs to continue to be concerned about whether voluntary agency users will continue to use OAH.
- 2 A continuing critical issue is whether OAH ALJs should issue final decisions for more agency hearings. OAH now issues final decisions for approximately 50.0 percent of its hearings
- 3 The third critical issue is whether parties to administrative hearings ought to be able to disqualify a designated ALJ or hearing officer once without showing cause for disqualification.

Performance Measures

OAH performance measures are case processing guidelines, measuring the length of time to “process” various components of administrative proceedings and have been implemented for all agencies for which OAH conducts hearings. Although performance measures for conducting administrative hearings are a helpful management tool, because of the inherent variability in hearings, they should be considered as guidelines and not strict performance measures. See 2021-2023 Office of Administrative Hearings Biennial Report for the most recent OAH ALJ performance data.

Performance measures were implemented in 2007 for all agencies for which OAH conducts hearings. WSI performance measures were put into place on August 1, 2008.

Program Statistical Data

OAH has provided administrative law judges for over 100 government agencies and entities since 1991. To preside over this caseload, OAH uses three permanent, full-time ALJs and four contract ALJs on an as-needed basis.

Since 2019, OAH has averaged 426 requests per year, and is currently on pace to reach 475+ requests for the 2024 calendar year, having received 251 requests through June 2024. The breakdowns are as follows:

- 2019 – 482;
- 2020 – 432;
- 2021 – 364;
- 2022 – 404;
- 2023 – 446; and
- 2024 – through June 30, 2024 - 251.

Requests from WSI have been decreasing in recent years, with 105 to 110 cases expected for 2024. Department of Health and Human Services requests have been rising since 2021, with an anticipated 340 to 360 cases for 2024. In previous years, the Public Service Commission remained steady at 10 to 20 cases per year. 2024 has seen a decline in PSC requests, with an estimated 5 to 10 cases expected for the year.

Explanation of Program Costs

OAH has one cost center for providing hearing officer services to its client agencies with permanent, full-time ALJs and contract ALJs. Contract ALJs are used to provide services on an as-needed basis, primarily to WSI.

Program Goals and Objectives

OAH has only one major program, to provide administrative hearings. The agency's mission, goals, and functions are carried out in this program, which includes ALJ and related support services as well as administration, finance and budget, information systems, personnel, and payroll matters.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: OAH has been advised by NDIT it will need to utilize a dedicated application server for our mission-critical application on the next update, to occur before fall of 2025.

Necessary resources for implementation (including FTE's)*: Dedicated application server, provided and managed by NDIT. Expected cost of \$453 per month.

Are resources being redirected or are they new or additional (including FTE's)*: New - OAH is currently using a shared application server.

Who is served and impact of not funding*: OAH serves North Dakota by providing administrative hearings and related services to its citizens, businesses, and other entities, as required by law. Not funding the increase would impact timely provision of the required services.

Statutory Authority

ND Constitution, Article IV and North Dakota Century Code Chapters 54-03, 54-03.1, and 54-03.2.

Agency Description

The Legislative Assembly is the policymaking branch of state government. The Legislative Assembly meets for organization and orientation purposes during the month of December in the even-numbered years and convenes each odd-numbered year for the regular session which may not exceed 80 days during the biennium.

Agency Mission Statement

The Legislative Assembly's primary goal is to determine policies for the operation of state and local government by making the laws of the state. The Legislative Assembly appropriates funds for the operation of state government and enacts legislation to carry out the policies it establishes. The Legislative Assembly is a bicameral body consisting of the Senate and House of Representatives. There are 47 senators and 94 representatives. Through its interim, special, and standing committees, the Legislative Assembly reviews, debates, and determines legislation encompassing all aspects of government.

Major Accomplishments

- 1 Performed constitutional responsibilities within limited amount of time in an effective manner to meet the needs and expectations of the people of North Dakota.
-

Critical Issues

- 1 None.
-

Performance Measures

Performance measures have not been established.

Program Statistical Data

The 68th Legislative Assembly met beginning in January 2023 for 75 legislative days and 119 calendar days.

Explanation of Program Costs

Salaries and wages:

- The budget request is based on a five legislative day organizational session and a 77 legislative day 2027 Legislative Assembly.
- Salaries for legislators are included at \$226 per day during the legislative session, a \$13 per day increase based on a 3 percent increase the first year and a 3 percent increase for the second year of the 2025-27 biennium.
- Monthly compensation of \$610 per month for the first year of the biennium and \$628 per month for the second year of the biennium based on a 3 percent increase the first year and a 3 percent increase for the second year of the 2025-27 biennium.

150 Legislative Assembly

Agency 150

- Health insurance coverage for 133 legislators is included.

Operating expenses:

- Lodging for legislators during the 2027 regular session is included at \$2,079 per month, a \$227 increase from the \$1,852 budgeted amount during the 2023-25 biennium.
- Travel is provided to and from the organizational session and for 18 round trips per legislator during the regular session.
- Funding to maintain and operate legislative computer systems is included.

NCSL:

- The increase in North Dakota's share of NCSL dues is \$23,102, for total dues of \$306,172 for the 2025-27 biennium.

Program Goals and Objectives

The Legislative Assembly's objective is to determine policy and make laws for state and local government, to define crimes and punishments, to create and control state agencies, to tax and spend, to provide for public services, to regulate the affairs of local governments, to regulate many facets of business relations and property rights, and to provide for the licensing of numerous professionals.

Statutory Authority

The principal statutory language authorizing the responsibilities and functions of the Legislative Council is contained in North Dakota Century Code Chapter 54-35. Statutory authority relating to the organizational session of the Legislative Assembly is located in Chapter 54-03.1. Additional statutory references to the Legislative Council are located in numerous places in the North Dakota Century Code.

Agency Description

The Legislative Management consists of 17 legislators. The committee oversees the interim activities of the legislative branch, conducts studies, monitors activities of the other branches of government, provides oversight of matters of interest to the legislative branch, makes arrangements for legislative sessions, and recommends legislation to the Legislative Assembly. The Legislative Council, consisting of a group of professional and clerical staff, provides administrative, research, analysis, drafting, and technical support services for the legislative branch.

Agency Mission Statement

The Legislative Management is to oversee activities of the legislative branch when the Legislative Assembly is not in session, to fulfill its statutory mandates, and to assist the Legislative Assembly in performing its constitutional responsibilities. The Legislative Council is a group of professional and clerical staff working to meet the research, analysis, and drafting needs of the Legislative Assembly and Legislative Management through its general and administrative division, legal division, fiscal division, and information technology division.

Performance Measures

The Legislative Council has not developed formalized performance measure data.

Program Statistical Data

General and Administrative Services - The administrative services division of the Legislative Council provides administrative, library research, clerical, and other technical support services to the other divisions of the Legislative Council and the Legislative Assembly.

Legal Services - The legal services division consists of the Legal Division Director, Code Revisor, and attorney positions. The legal services division provides legal research, bill drafting, and legal advice for legislators, legislative committees, and other members of the Legislative Council staff.

Fiscal Services - The fiscal services division consists of the Legislative Budget Analyst and Auditor, Assistant Legislative Budget Analyst and Auditor, and fiscal analysts. The fiscal services division provides analyses, research, and other information regarding governmental finance and fiscal policies and processes for legislators, legislative committees, and other members of the Legislative Council staff.

IT Services - The IT services division of the Legislative Council provides information technology services to the other divisions of the Legislative Council and the Legislative Assembly.

Explanation of Program Costs

General and Administrative Services - The salaries and wages for 32 FTE positions; travel expenses for administrative committees and other travel of legislators and staff; information technology expenses for the operation and development of legislative computer systems; and contract costs for professional services to aid committee studies.

Legal Services - The salaries and wages for 10 FTE attorney positions and interim committee meeting costs.

Fiscal Services - The salaries and wages for 9 FTE fiscal positions and interim committee meeting costs.

IT Services - The salaries and wages for 19 FTE information technology positions.

Program Goals and Objectives

General and Administrative Services - The administrative services division approves payments necessary to finance the Legislative Assembly operation and the operation of the Legislative Council; provides research and library resources to the Legislative Assembly and to the Legislative Council staff; provides the necessary clerical services for the staff to prepare its research, analyses, and bill drafting documents; provides overall management supervision for the division itself and other divisions of the Legislative Council; and makes the administrative preparations for each biennial legislative session.

Legal Services - The goals and objectives of the legal services division include to draft accurately and completely, on a timely basis, all legislation requested by members of the Legislative Assembly, its standing committees, and interim committees of the Legislative Management; provide thoroughly researched memoranda in response to legislative requests for legal research; provide legal advice to persons and organizations in the legislative branch; ensure that the statutes of North Dakota are current and constantly revised as necessity dictates; oversee the publication of the North Dakota Century Code, Session Laws, and Administrative Code; courteously and competently handle requests for interpretation of legislative intent.

Fiscal Services - The goals and objectives of the fiscal division are to provide the Legislative Assembly the assistance it needs to fulfill its responsibilities to appropriate sufficient funds for the operation of state government and to provide by law for the protection and efficient use of public funds and other assets and resources of the state.

IT Services - The IT division provides the necessary information technology systems to the Legislative Assembly and the Legislative Council, upgrades those systems, and develops new systems.

Statutory Authority

ND Constitution, Article 6, Judicial Branch, Sections 1-13, Chapters 27-02, 27-03, 27-04, 27-05, 27-05.2, 27-06, 27-17, 27-20, 27-20, 27-23, North Dakota Century Code; North Dakota Rules of Disciplinary Procedure.

Agency Description

The North Dakota judicial system is comprised of the Supreme Court, district courts, municipal courts and the intermediate court of appeals, when convened. The juvenile court is a division of the district court. These courts provide the forum for the resolution of litigation in an orderly, timely manner.

The North Dakota Supreme Court is the highest court for the State of North Dakota. It has two major types of responsibilities -- adjudicative and administrative. It is primarily an appellate court with jurisdiction to hear appeals from decisions of the district courts. The Court also has original jurisdiction authority and can issue such original and remedial writs as are necessary. In its administrative capacity, the Court is responsible for ensuring the efficient and effective operation of all courts in the state, maintaining high standards of judicial conduct, supervising the legal profession and promulgating procedural rules.

District Courts are the state trial courts of general jurisdiction. Among the types of cases they hear are civil, criminal, domestic relations, small claims, and probate. District Courts also serve as the Juvenile Courts in the state with original jurisdiction over any minor who is alleged to be delinquent, or deprived. In some districts, judicial referees have been appointed to preside over juvenile, child support enforcement and domestic relations proceedings, other than contested divorces. District Courts are also the appellate courts of first instance for appeals from the decisions of many administrative agencies and for criminal convictions in Municipal Courts. There are 55 District Court Judges in North Dakota.

Agency Mission Statement

The mission of the North Dakota judicial system is to provide the people, through an independent judiciary, equal access to fair and timely resolution of disputes under law.

Major Accomplishments

- 10 Mandated use of electronic filing.
0

- 10 Provided web-based access to court records.
1

- 10 Implemented rules to expedite appeals of termination of parental rights cases.
2

- 10 Revised the rules of criminal procedures.
3

- 10 Mandated greater use of alternative dispute resolution in district court.
4

- 10 Implemented mediation process in Supreme Court.
5

Major Accomplishments

10 Collected fines/fees through state tax intercept.
6

10 Implemented self-help center for litigants.
7

10 Implemented ethics training for interpreters.
8

10 Expanded interactive television
9

11 Expanded digital audio recording.
0

11 Implemented web payment system.
1

11 Implemented paper on demand filing system.
2

11 Implemented expedited pre-filing mediation for custody and visitation issues.
3

11 Implemented streamlined Supreme Court procedures.
4

11 Expanded access to interpreter services through technology updates.
5

11 Improved public access to Supreme Court records.
6

11 Improved juror service through expansion of the 1 day/1 trial term of service.
7

11 Expanded online self-help resources.
8

11 Implemented dashboards to improve judicial and staff efficiency.
9

12 Implemented text messaging for criminal court hearings.
0

Critical Issues

10 Developing strategies for delivering judicial services given the changing demographics of the state.
0

Critical Issues

10 Utilizing technology to deliver judicial services more efficiently.

1

Performance Measures

The Supreme Court Docket System (SCDS) is used to provide management information for all Supreme Court cases.

A Unified Court Information Management System (Odyssey), Juvenile Case Management System (JCMS) and a Jury Management System are all information systems which provide information for managing district court operations.

The judiciary is constantly monitoring its performance regarding delivering judicial services. Some of these performance measures include --

Civil, criminal and juvenile docket currency standards; Jury yield and juror utilization statistics; staffing standards; and case data entry time standards.

Program Statistical Data

Supreme Court:

Total case filings were 390 in 2023 as compared to 366 in 2022.

Total civil cases filed were 259 in 2023 as compared to 255 in 2022 (civil matters accounted for 66 percent of the total caseload).

Family-related appeals remained consistent at 62 cases as compared to 63 in 2022. Juvenile and post-conviction relief appeals increased 30 percent and 14 percent, respectively, as compared to 2022.

Total criminal cases filed were 131 in 2023 as compared to 111 in 2022 (criminal matters accounted for 34 percent of the total caseload).

Matters involving drugs and driving under the influence decreased 6 percent as compared to 2022. Matters involving sex related offenses increased 15 percent as compared to 2022.

Oral argument was scheduled in 237 cases. Approximately 47 percent of those arguments were waived, in whole or in part as compared to 30 percent in 2022.

The Justices authored 249 majority opinions, which is a 9 percent decrease from 2022. An additional 39 separate concurrences and/or dissents were written.

In 2023, 26 percent of cases included at least one self-represented party.

District Court:

Total district court filings were 154,074 in 2023 as compared to 141,514 in 2022.

Civil filings increased by 4,101 or 14.3 percent in 2023 with total case filings of 32,770.

180 Judicial Branch

Agency 180

Total criminal filings increased by 4.2 percent from 2022 to 2023 with 27,070 cases filed compared to 25,977. Felony filing increased by 6.5 percent, misdemeanors increased by 3.8 percent and infractions increased by 0.3 percent. Misdemeanors made up 62 percent of total criminal filings, felonies 28 percent and infractions 10 percent.

Administrative traffic filings increased by 7,505 (8.8 percent) from 2022. These cases make up 60 percent of the overall caseload; however, they require little judicial involvement. The processing time required impacts court clerk personnel almost exclusively.

Total referrals to juvenile court were 5,998 in 2023 compared to 5,749 in 2022.

Judicial Conduct Commission and Disciplinary Board:

The Disciplinary Board System provides information to assist with tracking disciplinary measures against attorneys. In 2023 there were 155 new complaints filed against attorneys, which is a 48 percent increase from 2022.

The Judicial Conduct Commission was established in 1975 to receive, evaluate and investigate complaints against any judge in the state. In 2023 there were 42 new complaints filed against judges. Of this amount 32 were against 17 District Court Judges, 2 were against 2 Municipal Judges, 2 were against 2 Judicial Referees, 5 was against 5 Supreme Court Justices and 1 was against 1 U.S. Magistrate.

Explanation of Program Costs

The requested funds are necessary for the operation of the Supreme Court, district courts and Judicial Conduct Commission and Disciplinary Board.

Program Goals and Objectives

The Supreme Court is the highest court of the state. It has general supervisory and administrative authority over all other courts. This authority covers all judges and every court in the state and all officers serving the courts.

The district court is a trial court where cases are heard for the first time. There are eight judicial districts, and they have original jurisdiction in all cases, both civil and criminal. The district courts also have original jurisdiction over juvenile matters. The district courts also hear appeals and transfer cases from municipal courts.

The Judicial Conduct Commission and Disciplinary Board investigates and addresses complaints against judges and attorneys.

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The budget provides for updates and maintenance for a number of critical software operating systems for the the courts, including C-Track and Odyssey. Other software systems used include Manage Engine, Zoom, jury management, antivirus, juvenile case management and disaster recovery. In addition, a significant amount of IT equipment is necessary including interpreter equipment, scanners, assisted hearing devices, credit card terminals, speakers, microphones and digital recording. There has been significant increases in the cost of hardware, software and maintenance agreements. The budget also reflects increases in data processing charges assessed by NDIT.

Necessary resources for implementation (including FTE's)*: No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested. The Office of Management and Budget provided for a base budget adjustment of \$423,416 for court system IT rate increases. This rate increase adjustment is not reflected in this decision package.

Who is served and impact of not funding*: The information technology funding is necessary for the operations of the Judicial Branch.

Rural Attorney Recruitment Program (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	36,000	-	36,000	0.00	36,000	-	36,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	36,000	-	36,000	0.00	36,000	-	36,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Adds funding for the Supreme Court contribution to the rural attorney recruitment program pursuant to NDCC Section 27-02.2-06. An attorney agreeing to practice in rural counties or municipalities is eligible to receive an incentive payment of \$45,000 to be paid in five equal annual installments. The county or municipality served by the attorney is to pay 35 percent, the ND State Bar Foundation is to pay 15 percent and the Supreme Court is responsible for the balance. The 2023 Legislative Assembly increased the number of attorneys who may participate in the program at any one time from four to eight. The funding request is to account for the additional attorney participating in the program.

Necessary resources for implementation (including FTE's)*: No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: The current budget includes funding for four program participants. The request is to fund four additional participants.

Who is served and impact of not funding*: Program serves rural communities.

Justices and judges salary increase (Priority: 20)

Is this a Large IT project? No

180 Judicial Branch

Agency 180

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The salaries of the Supreme Court justices and district court judges is provided for in NDCC Sections 27-02-02 and 27-05-03. The proposal would increase the salaries to the national average for justices and judges. The increase would equate to approximately a 7.7 percent increase for district court judges and presiding judges. The Supreme Court justices increase would be approximately 11.1 percent and the increase for the Chief Justice would be 12.1 percent. The proposal provides for the entire increase in the first year of the biennium and does not include an increase for the second year of the biennium.

Necessary resources for implementation (including FTE's)*: No new FTEs are requested.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested for the increase.

Who is served and impact of not funding*: The judicial officers of the ND court system.

Pay plan adjustment of 3 percent (Priority: 21)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The proposal adds the following 12.5 District Court FTEs:

0.5 FTE juvenile court administrative assistant in Unit 1 (make current 0.5 FTE a FTE);

1 FTE juvenile court officer in Unit 2;

1 FTE juvenile court administrative assistant in Unit 2;

1 FTE district court administrative assistant in Unit 3;

1 FTE deputy unit court administrator in Unit 4;

1 FTE juvenile court officer in Unit 4;

1 FTE juvenile court administrative assistant in Unit 4;

2 FTE programmer analysts in shared services;

2 FTE network analysts in shared services;

1 FTE technology coordinator in shared services;

1 FTE staff attorney for the self-help center in shared services.

The proposal includes the following 2.5 FTE Supreme Court FTEs:

180 Judicial Branch

Agency 180

1 FTE staff attorney in administration;

1 FTE deputy Supreme Court clerk;

0.5 FTE administrative assistant in SC clerk's office (make current 0.5 FTE a FTE).

The decision package request for the creation of the Office of Guardianship and Conservatorship includes an additional 5 FTEs; court navigator program includes 1 FTE and ALP program includes 1 FTE.

Necessary resources for implementation (including FTE's)*: A total of 22 new FTE positions are requested for the ND court system.

Are resources being redirected or are they new or additional (including FTE's)*: New funding is requested.

Who is served and impact of not funding*: The citizens of North Dakota who utilize the court system.

Family Mediation Program (Priority: 23)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increases funding for family mediation program. The budget request for mediators is \$1,520,200 or an increase of \$138,200 as compared to the current biennium. Mediators are paid \$220 per hour and generally are not to exceed 6 hours per case. The budget increase reflects an increase in demand for services.

Necessary resources for implementation (including FTE's)*: Additional funding for contracted mediators. No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources are necessary.

Who is served and impact of not funding*: The mediation program is designed to minimize family conflicts, encourage shared decision-making, and support healthy relationships and communication among family members by trying to resolve custody and visitation disputes through mediation.

180 Judicial Branch

Agency 180

Guardian ad litem program (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	935,768	-	935,768	0.00	935,768	-	935,768	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	935,768	-	935,768	0.00	935,768	-	935,768	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority): The courts system contracts with Youthworks to administer the program. Youthworks has a number of temporary employees serving as guardians ad litem. However, Youthworks has had difficulty maintaining the necessary staffing to provide services. The budget increase would allow Youthworks to hire full-time positions to serve as guardians ad litem to avoid the heavy turnover. In addition, the request would allow for services to include post judgment monitoring. The total 2025-27 budget for guardian ad litem services is \$2,345,768.

Necessary resources for implementation (including FTE's): No new FTES are requested.

Are resources being redirected or are they new or additional (including FTE's): Additional resources are necessary.

Who is served and impact of not funding: Guardians ad litem are used in child abuse and neglected cases, termination of parental rights cases, and juvenile guardianship cases. They serve as the eyes and ears of the court while also advocating for the best interest of the child. A guardian ad litem is appointed when the case is opened and they stay on until there is a disposition of the allegations. There are many entities that may be involved in providing post judgment services to the child and family. By adding post judgment monitoring, the guardian ad litem ensures that these services are provided and monitors the well-being of the child in case things are not going well.

New treatment courts (Priority: 26)

	2023-25 Agency Request				2023-25 Executive Recommendation

Total	1,494,628	-	1,494,628	5.00	1,578,572	-	1,578,572	5.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Request to fund the Office of Guardianship and Conservatorship (OGC) as a division under the Supreme Court to administer the programs assigned by state law or the Supreme Court. A separate bill has been introduced to create the OGC. The intent of the bill is to consolidate state guardianship and conservatorship funding and responsibilities under one entity.

The request includes the following 5 new FTEs:

1 FTE Director;

1 FTE administrative assistant;

1 FTE program manager;

180 Judicial Branch

Agency 180

1 FTE accountant analyst;

1 FTE paralegal.

Necessary resources for implementation (including FTE's)*: The request includes 5 new FTE positions and related operating expenses for the OGC. The request includes \$107,520 for office space rental for the OGC.

Are resources being redirected or are they new or additional (including FTE's)*: The current Supreme Court base budget includes funding for 2 FTE positions and an operating budget of \$67,265 under the guardianship monitoring program. The request is to add the base budget of the guardianship monitoring program to the request for the OGC and create a new division (OGC) under the court system budget.

Who is served and impact of not funding*: The citizens of North Dakota who utilize guardianship and conservatorship services. The appointment of guardians helps to reduce hospital and nursing home costs as individuals can be released sooner under the supervision of a guardian.

Court Navigator program (Priority: 35)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Allied Legal Professional (ALP) programs provide a practical and innovative solution to the growing access to justice problem. An ALP is a relatively new tier of legal professionals authorized to provide legal advice and services in specific areas of law under certain conditions, without the need to obtain a law degree or pass the traditional bar exam. The ALP staff attorney would assist in developing an exam, licensing, scope of representation, discipline and other ethical guidelines for ALPs.

Necessary resources for implementation (including FTE's)*: 1 FTE staff attorney for ALP program development.

Are resources being redirected or are they new or additional (including FTE's)*: New funding is requested.

Who is served and impact of not funding*: Citizens of North Dakota.

Juvenile court officer, clerk and staff attorney workload studies (Priority: 37)

AI software for clerk filings (Priority:)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	180-8800	18250	693000	7	1	1,250,000	-	1,250,000	-	1,250,000	-	1,250,000
Total					-	-	-	-	1,250,000	-	1,250,000	-	1,250,000

State Initiative:* Technology Investment

Justification: To file documents with the ND court system, a user will file/submit via software for "File and Serve". This then sends the documents to the appropriate Clerk of Courts office for review and possibly filing the documents into the correct case. The courts are attempting to use artificial intelligence to learn and automate the process to review, scan and file documents into the corresponding case within the case management system. Use of this software is anticipated to automate a manual process while increasing the timeliness of filings while allowing the clerks to handle the problem filings.

Problem solving court case management system (Priority:)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	180-8800	18250	693000	7	1	780,000	-	780,000	-	780,000	-	780,000
Total					-	-	-	-	780,000	-	780,000	-	780,000

State Initiative:* Technology Investment

Justification: The ND courts system does not currently use a case management system for problem-solving courts which are non-traditional court processes that focus on specific type of offenses or groups like drug use, domestic violence or veterans. Instead records are held by probation or court coordinators and are stored in software such as Word or Excel, on paper, or within a general case management system. The proposed solution is to obtain a single case management system for use by personnel involved with the problem-solving courts.

180 Judicial Branch

Agency 180

Digital evidence management system (Priority:)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	180-8800	18250	693000	7	1	980,000	-	980,000	-	980,000	-	980,000
Total					-	-	-	-	980,000	-	980,000	-	980,000

State Initiative:* Technology Investment

Justification: The ND court system does not currently use a digital evidence management system. Instead the court receives digital evidence through various methods, including CDs, flash drives and external drives. The digital images, videos, or documents are in a variety of formats, some of which are proprietary. All of this data and the devices need to be stored, managed, cataloged and eventually retrieved. The current storing, retrieval, publication and sharing of the digital evidence is not efficient which the courts are looking to remedy. Also the courts have seen the increase of digital information over the years, thus the courts is trying to prepare for an even greater influx of data in the future by implementing a system to handle the process.

Research and secure access to court records system (Priority:)

Total					-	-	-	-	960,000	-	960,000	-	960,000

State Initiative:* Technology Investment

Justification: The ND courts system currently has a software system for both public and restricted access to enable the public and non-court personnel to search court records. The software also gives the ability to the public to pay fines and fees. This software can be defined as a legacy system and will be depreciated by the vendor soon. The court wants to continue to provide public access to court records so will need to obtain and implement a replacement software system.

Statutory Authority

North Dakota Century Code Chapter 54-61.

Agency Description

The North Dakota Commission on Legal Counsel for Indigents is an executive branch agency that consist of a statutorily created board of seven persons appointed from various entities serving staggered terms. The agency is responsible for constitutionally and statutorily mandated services to individuals in the state who financially qualify for indigent defense services in accordance with eligibility requirements. The Commission utilizes six regional public defender offices and private attorneys with contracts to provide services.

Agency Mission Statement

The mission of the North Dakota Commission on Legal Counsel for Indigents is to provide high quality, professional, and effective legal representation to eligible clients, consistent with the guarantees of the constitutions of the United States and North Dakota, and applicable North Dakota statutes and rules, at reasonable cost to the community.

Major Accomplishments

- 1 Handled a record number of 16,671 case assignments in FY' 2024. We switched to annual and sometimes even shorter-term contracts to try and adjust to the fluctuation in case assignment demands between different judicial districts.
- 2 We have continued to work with Pre-Trial services and other government entities to expand services to clients under existing state programs. This is an attempt to implement a holistic form of representation which all research shows reduce recidivism.
- 3 Have reallocated FTE positions based upon need in trying to combat continued recruitment and retention issues. We have additionally established public defender recruitment days at the University of North Dakota and University of South Dakota School of Law to recruit young attorneys to be to work for the agency.
- 4 Continue to provide training to all contract and full-time public defender attorneys at very little cost.

Critical Issues

- 1 We continue to struggle to recruit and retain qualified attorneys to provide full time public defense services. We were given equity increases last session, however, before we even received the funds several counties adjusted their pay and we fell further behind our counterparts in prosecutor offices. Additionally, we continue to struggle regarding resource parity with prosecutor offices. Where they have investigators in law enforcement and at least one has hired an on-staff investigator, our request for three FTE investigators last session was reduced to one.
- 2 We have been on the verge of not having enough attorneys to handle the workload several times through out the year. We did receive an increase to contractor compensation, but the increase has not been enough to retain qualified private law firms to provide contract services. As more and more contractors leave indigent defense contracts, our full-time attorneys have had to pick up the workload. The concern of burnout exacerbating the situation is real.

Performance Measures

The Commission oversees the administrative office and evaluates the Executive Director, who, in turn, evaluates staff of the administrative office and supervising attorneys of the public defender offices (after the Supervising Attorney performs his/her evaluations of the office staff). Attorneys for the agency must meet standards provided in the Rules of Professional Conduct and State Bar Association of North Dakota.

Attorneys contracted with our agency must meet the Minimum Performance Standards as adopted by our agency, as well as standards provided in the Rules of Professional Conduct and State Bar Association of North Dakota. Attorneys contracted with our agency must provide to us updated proof of malpractice insurance as well as any disciplinary complaints. They also must maintain their license to practice law and stay current in their case reporting duties.

Program Statistical Data

The contract attorneys in North Dakota are assigned roughly 2/3 of our total cases in a year's time. The full time public defenders handle the remaining 1/3 of the cases. We assign approximately 16,500 cases a year throughout the state of North Dakota, with the majority of those cases being criminal cases, next followed by juvenile court assignments.

Explanation of Program Costs

The majority of costs for our program include fees for hourly contract attorneys (who handle conflict cases), monthly fees paid to contract attorneys, and salaries and benefits for the agency's 41 full-time employees and about 3 temporary employees. Other significant costs would include the administrative costs of running the offices, IT costs, case related travel for attorneys, and support services (such as medical experts, private investigators, and mental evaluations when necessary for adequate defense of the case). We also have costs for statutorily mandated training.

Program Goals and Objectives

The goal of our program is to provide quality licensed counsel for indigent persons who qualify for counsel in accordance with adopted agency standards and policies. (We utilize the Federal Poverty Guidelines in our indigency determinations). If a person earns more than 125% of the Federal Poverty Guidelines, then he or she will most likely not qualify for appointed counsel. (There are some extenuating factors to consider). Our goal is to have our attorneys meet performance guidelines and rules of professional responsibility in their legal representation of their client to insure that the client is adequately represented in the court system. We also require our attorneys to attend relevant trainings to improve upon their skills.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: 1) REINSTATE THE 3% REDUCTION: Total Increase to Biennium Budget Cost \$ 643,040

188 Legal Counsel for Indigents

Agency 188

The Commission has prepared the budget according to Governor Burgum’s requirement of a 3% budget reduction. However, in so doing, we are setting the state up for expensive litigation.

By reducing funding, that means there will be fewer contract attorneys to cover cases in the state. In FY '24, the Commission handled 16,673 case assignments. In FY '23, the Commission handled 16,252. This is an increase of 421 assignments. This proposed cut comes when our attorneys, who are already short staffed because of historic underfunding compared to prosecutors, have taken record high cases. Across the country public defense systems are facing litigation for underfunding indigent defense and thinking fewer attorneys can handle more. (See Maine, Oregon and Wisconsin as recent examples).

In addition to current litigation concerns, new workload standards for public defenders was released last summer. Our agency at current staffing and budget levels is not able to meet these work load standards. A 3% cut will put us further out of touch with these standards.

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*: It would be new funding to restore the budget cut.

Who is served and impact of not funding*: The people of North Dakota who are constitutionally guaranteed the right to counsel. If this is not restored, there is concern we will not have enough attorneys to provide an attorney each time the court determines they are indigent and there is a right to counsel. This is exactly what has led to waiting lists for counsel in other states. Those states have in turn faced litigation for failing to meet a constitutional mandate.

FUND THE AGENCY TO IMPLEMENT THE COMMISSION’S COMPENSATION STRATEGY (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	805,000	-	805,000	0.00	805,000	-	805,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	805,000	-	805,000	0.00	805,000	-	805,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission has always sought resource parity with prosecutors in North Dakota. This has NEVER been funded or achieved. This employee compensation request still does not get us to where counties are, but it gets us closer to other like government agencies. The Commission is one of the few executive branch agencies employing many attorneys who are handcuffed by the classified employment structure. This allows us to be unable to compete with the Attorney General, who can consistently move the pay of the Assistant AG, the Legislature who just awarded significant pay increases to Legislative Council employees in the special session, and the Judicial branch who is able to pay based upon longevity and performance.

188 Legal Counsel for Indigents

Agency 188

The proposed compensation strategy moves the Commission in line with the Judicial Branch as our positions more closely align with their positions than any other branch or agency. We understand the Courts compensation schedule may change making them once again high than the Commission. However, this strategy at least gets us close. Right now we are not able to compete at all for talent and our turnover suggests the same.

Last session we did receive TME funds and some other equity funding, but as soon as we received it we fell further behind prosecutors. County commissions have continued to adjust compensation on a monthly basis, whereas we are stuck trying to predict the market two years in advance.

The American Bar Association’s 10 principles of a Public Defense Delivery system demand the “compensation for lawyers working for public defense providers should be comparable to other publicly funded lawyers. Full time public defender salaries and benefits should be no less than the salaries and benefits for full-time prosecutors.” This is not occurring in North Dakota. Funding this decision package moves us in the right direction.

Necessary resources for implementation (including FTE’s)*: Funding

Are resources being redirected or are they new or additional (including FTE’s)*: New Resources

Who is served and impact of not funding*: The people of North Dakota who are constitutionally guaranteed the right to counsel. Similar to the first decision package, if we are not given funds to be able to compete for talent, we simply will not be able to recruit or retain qualified attorneys to provide constitutionally mandated services. We have found lump sums in one time equity increases will not work. Thus, we have developed an employee compensation schedule similar to the Judicial Branch which will allow us to at least compete with other state government agencies and branches.

3) SET A MOVING RATE OF THE FEDERAL GOVERNMENT CONTRACT RATE AND FUND ACCORDINGLY (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	5,255,134	-	5,255,134	0.00	1,500,000	-	1,500,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	5,255,134	-	5,255,134	0.00	1,500,000	-	1,500,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Last session, the legislature funded the Commission to increase the contract rate from \$75 per hour to \$80 per hour. This was the first increase contract public defense providers had seen in years. However, the increase was not in line with what other government programs pay contract attorneys. Further, we continue to fall further behind municipalities and the federal government. The only way to ensure fairness in the public defense system is to set a benchmark amount of the federal CJA rate and include that in the budget going forward. After studying this issue for a large majority of

188 Legal Counsel for Indigents

Agency 188

this last interim, The Commission voted to submit a budget request to fund the contractor rate at 60% of the Federal CJA rate. The rate for 2024 for Non-Capital cases is \$172 per hour. 60% of that rate is 103.20. We rounded the number to \$103 per hour and that is what we used in preparing budget.

However, as we saw in FY '24, the number can vary greatly depending on number of case assignments. We have no way of anticipating the number of cases. Therefore, we simply used the number expended during a set period of time in FY '24 and extrapolated to the cost of a biennium.

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*: Additional Funding

Who is served and impact of not funding*: The people of North Dakota who are constitutionally guaranteed the right to counsel. We need to be able to recruit and retain private law firms to serve as independent contractors to provide constitutional mandated services. Although the percentages vary from year to year, contractors account for almost 2/3 of the annual caseload. Further, there is an existing statutory requirement 50% of the caseload must be covered by contractors.

Add Private Investigators (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	905,300	-	905,300	5.00	389,608	-	389,608	2.00
Special	-	-	-	0.00	-	-	-	0.00
Total	905,300	-	905,300	5.00	389,608	-	389,608	2.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the last legislative session, we asked for three investigators to start an investigation section of our public defense agency. The Legislature funded us for one lead investigator. To the best of our knowledge, we were the last state-run public defense agency to have an investigator on staff.

The American Bar Association (ABA) 10 Principles of a Public Defense Delivery System says “public defenders should have the assistance of investigators, social workers, mitigation specialists, exerts and other professionals necessary to meet public defense needs.” In preparation for this budget, I spoke with each office, and it is abundantly clear, there is a not enough investigators in the private market willing to take our reduced rate to meet our need. The only way we can provide constitutionally mandated effective representation is to have investigators on staff.

We have had our lead investigator on staff for nearly a year, and the returns have been as expected. The attorneys in that office have praised the ability to have an investigator assist in interviewing clients, reviewing discovery looking for defenses, locating and interviewing witnesses, preparing for trial, taking photos, etc. We

188 Legal Counsel for Indigents

Agency 188

need an investigator in each office given the attorney rules of professional conduct conflict rules associated with non-lawyer legal assistants. With only one investigator on staff, he has been tasked with covering the entire state and taking cases in Dickinson, Bismarck, Minot and Fargo.

Necessary resources for implementation (including FTE's)*: Funding for 5 additional FTE.

Are resources being redirected or are they new or additional (including FTE's)*: The funding for the FTE would be new resources.

Who is served and impact of not funding*: The people of North Dakota who are constitutionally guaranteed the right to counsel. Along with the mandate to provide an attorney, is the constitutional mandate to provide effective representation. If it is not funded, this continues to expose the state to potential claims of underperforming on our constitutional mandates.

Statutory Authority

ND Constitution Article IV, Section 13 and Article X, Section 26; North Dakota Century Code Chapters, 15-39.1, 21-10 and 54-52.5

Agency Description

The Retirement and Investment Office (RIO) administers two programs: the investment program overseen by the State Investment Board (SIB); and the retirement program for ND educators overseen by the Teachers’ Fund for Retirement Board (TFFR). RIO’s mission has continued to evolve since its creation by the 1989 Legislative Assembly. Originally the agency was formed merely to gain economic efficiencies by capturing the administrative and investment cost savings in combining the management of the SIB investment program and the TFFR retirement program. The SIB and TFFR board are both fiduciary Boards; and both board members and agency staff have fiduciary obligations related to the programs. Both programs have experienced robust growth within the preceding decade. The investment program has grown to approximately \$22 billion in assets under management on behalf of more than 30 client funds; and the retirement program serves over 25,000 members with more than 200 Kindergarten through 12 grade employers within the state. Both the investment and retirement programs are currently undertaking transformational initiatives: an in-state investment initiative for the investment program and a pension system modernization project in the retirement program. Our governing boards are respectively reviewing and pursuing governance changes to support continued program growth.

Agency Mission Statement

To provide prudent and transparent investment services for our client funds and support North Dakota public school educators with responsible benefit administration.

Major Accomplishments

- 1 Nearing completion of multi-year TFFR Pension Administration System Modernization Project with anticipated go-live in the fourth quarter of calendar year 2024.
- 2 Completion of agency wide compensation study and creation of incentive compensation plan for investment related positions.
- 3 Procurement of new investment program software solution to facilitate the internal investment initiative.
- 4 Hosted multiple interns across the agency including the first ever investment focused intern within the investment program.
- 5 Entered into an internal audit co-sourcing relationship to enhance the internal audit capabilities alongside the agency evolution.
- 6 Developed and implemented a formal new board member onboarding program to educate new board members as they assume their roles on SIB and TFFR.
- 7 Enhancement our agency-wide communications and outreach plan.

Critical Issues

- 1 The future uncertainty to ND’s state budget as the oil industry experience changes and the evolving mission of the Legacy Fund requires increasing the innovation and agility of the investment program.
- 2 The landscape of the K through 12 education environment has changed and the retirement program must be responsive to help support demands on employers resulting from teacher shortages.
- 3 The strategic plan for the agency focuses on transitioning from a “business as usual” reaction mode to an “innovative and agile” proactive mode; which requires prioritizing communication, infrastructure, organizational culture, talent management, and technology enables processes.

Critical Issues

-
- 4 The investment program is implementing alternative program structures such as the benefits of internalizing some investment operations to further support investment returns, mitigate risk, and achieve greater economies of scale for client funds.
 - 5 The retirement program continues to undergo a pension administration system modernization project which will transform the member and employer experience, improve risk management efforts, program compliance, and provide a better return on investment of staffing.
-

Performance Measures

TFFR

The TFFR Board collaborated with its actuarial consultant to create an annual Plan Management Policy Review and Scoring system that helps to evaluate the health of the plan and support the TFFR Board in its fulfillment of its fiduciary obligations. The most recent score based on the July 1, 2023 actuarial valuation ranks the TFFR plan at a 9 out of 14 (with 14 being the best), indicating the plan is well positioned to meet its funding objectives over time. The score increased from a 6 out of 14 based on the July 1, 2022 actuarial valuation. Member and employer customer satisfaction is measured through various program evaluations and ranked 3.7 on a 4.0 scale in 2024. As part of the TFFR "Pioneer" Project, the agency is identifying additional guidelines to measure future performance.

SIB

SIB Governance and SIB Client Investment Policies state the following:

- 1. SIB clients should receive investment returns consistent with their written investment policies and market variables, in a cost effective manner and under the Prudent Investor Rule;
- 2. Potential SIB clients have access to information regarding the investment services provided by the SIB; and
- 3. The client's fund rate of return, net of fees and expenses, should be compared to the client's policy benchmark over a minimum evaluation period of 5 years (in addition to other risk related performance metrics).

The following table summarized the results of our four largest SIB clients for the 5-years ended March 31, 2024, noting the SIB oversees the investment management of 26 different client portfolios including the Legacy Fund, TFFR, PERS and WSI (Workforce Safety & Insurance).

Five-Years Ended March 31, 2024

	Legacy	TFFR	PERS	WSI
Actual Net Investment Return	7.31%	8.37%	8.07%	3.96%
Policy Benchmark Return	6.28%	7.54%	7.28%	3.19%
Net Excess Return Above Benchmark	1.03%	0.83%	0.78%	0.77%

The SIB's ability to earn above benchmark returns is conservatively estimated to have generated over \$375 million of incremental income for our SIB clients over the last 5-years (e.g. SIB client investments of \$15 billion x 0.50% of "Net Excess Return" = \$75 million/year x 5 years).

Monthly financial statements and investment performance reports are prepared and distributed for each of the 31 funds. This involves monitoring and reporting activities on over 40 outside money manager organizations and more 140 investment portfolio accounts at the SIB's master custodian bank.

Total gross costs, including administrative, money manager, custodian, and consultant fees, and excluding performance related fees for the year ended June 30, 2023, were \$71.8 million or 38 basis points of total average assets under management. Total fees including performance related fees were 43 basis points. All investment program costs are paid out of assets of the funds participating in the SIB's program.

Program Statistical Data

TFFR

(Data is as of 6/30/2023.)

The Teachers' Fund for Retirement (TFFR) has more than 11,700 active, over 3,700 inactive and over 9,600 retirees and beneficiaries. The 9,600+ retirees and beneficiaries receive monthly retirement, disability and survivor benefits from TFFR totaling over \$260 million annually. The Fund also distributes over 200 refund and rollover payments totaling approximately \$7.9 million, annually.

There are 204 employers (school districts, counties and other state entities) that report retirement contributions to TFFR on a monthly basis. The Fund deposits the daily collections in the Bank of North Dakota. The member and employer contributions average \$16.5 million per month or nearly \$198 million per year.

TFFR processed approximately 350 new retirements, nearly 1,000 new membership enrollments, and 198 deceased members in fiscal year 2023. Annually, nearly 600 teachers and administrators participated in TFFR outreach programs and educational sessions. The program continues to explore options to increase participation through the use of virtual and digital formats. Attendance levels are rebounding after lower than expected years post pandemic.

Annual statements of account are sent to non-retired members and retired members. Approximately 9,700 1099R tax forms are prepared and distributed by TFFR to the annuitants and members who withdraw their account balance each year. An annual financial report is prepared each year.

SIB

Total assets under management has nearly tripled since June 30, 2013; from \$7.45 billion to over \$22 billion as of May 31, 2024.

Monthly financial statements and investment performance reports are prepared and distributed for each of the 31 funds. This involves monitoring and reporting activities on over 40 outside money manager organizations and a total of over 140 investment portfolio accounts at the SIB's master custodian bank.

Explanation of Program Costs

TFFR

190 Retirement and Investment

Agency 190

The Retirement and Investment Office (RIO) serves two important program boards: the State Investment Board (SIB) and the Teachers' Fund for Retirement (TFFR) Board. The TFFR Board is responsible for the TFFR retirement program. TFFR is a qualified defined benefit public pension plan for North Dakota public school teachers and administrators.

This request is all special funds. Funding for administration of the TFFR Pension Plan comes from member and employer contributions and investment earnings.

1. Salary represents funding for 11.15 FTE responsible for administering the TFFR retirement program, the same as the previous biennium.
2. The operating funds are to administer the TFFR retirement program. Significant object code expenditures are NDIT data processing, IT contracts, building rent, staff and board travel and professional development. New costs associated with the TFFR "Pioneer" Project are included in a decision package including the second year of biennial hosting and ongoing cost associated with the software solution.
3. Historically, contingency funds were requested in case of unexpected budget shortfall, generally related to turnover of executive staff and the need to perform an executive search. No contingency funds are included in the base budget request for 2025-2027, though a contingency funding request is included as part of a decision package request.

SIB

The Retirement and Investment Office (RIO) serves two important program boards: the State Investment Board (SIB) and the Teachers' Fund for Retirement (TFFR) Board. The SIB is responsible for oversight of over \$22 billion of investments for 31 different client funds including TFFR and PERS within the more than \$7 billion Pension Pool and WSI in the \$3 billion Insurance Pool in addition to more than \$10 billion in the Legacy Fund. This request is all special funds. Funding for administration of the SIB Investment Program comes directly from investment clients' invested assets (both statutory and contracted).

1. Salary represents funding for 22.85 FTE, which provide all the accounting, financial and administrative support and investment performance services for the funds under management including the new FTE approved during the 2023 legislative session.
2. The operating funds are needed to administer the SIB investment program. Significant resources have been allocated to the in-state investment initiative and management of the Legacy Fund as a result of H.B. 1425 and H.B. 1380 (2021 Legislative Session). Significant expenditures also include building rent, staff and board travel and education, and NDIT data processing.
3. Historically contingency funds were requested in case of unexpected budget shortfall, generally related to turnover of executive staff and the need to perform an executive search. No contingency funds are included in the base budget request for 2023-25, though a contingency funding request is included as part of a decision package request.

Program Goals and Objectives

TFFR

The mission of TFFR, a trust fund, is to administer a comprehensive retirement program that provides North Dakota public educators with a foundation for retirement security.

- The TFFR Board reaffirmed its commitment to evolving governance to respond to program growth by establishing a Governance and Policy Review committee that is tasked with reviewing program policies and public policy affecting statutes and administrative rules to make recommendations to the full Board for making policy or requesting changes from the Legislature.
- The TFFR program is currently in Phase 3 of 3 of a multi-year large IT Pension Administration Modernization Project (TFFR “Pioneer” Project) that will provide a better ROI for the agency and improve the member and employer experience with TFFR while aligning with state-wide initiatives to better utilize technology enabled processes.
- TFFR plan is designed to provide lifetime normal retirement benefits, disability benefits, and death benefits for ND public school educators and certain state teachers. It provides ND educators with a financial foundation for the future that includes a secure and stable retirement. This is possible due to TFFR’s plan design, professional plan management, strong investment performance, and outstanding customer service.
- The TFFR plan is an important feature in the recruitment and retention of high quality teachers and administrators in North Dakota, and not lose these quality individuals to out of state programs.
- TFFR provides retirement benefits services to more than 11,700 active teachers and administrators, over 3,700 inactive members, and more than 9,600 retired educators and beneficiaries. Licensed staff from 204 employers participate in the plan.

TFFR investment and funding goals

- Improve the Plan’s funding status to protect and sustain current and future benefits.
- Minimize the employee and employer contributions needed to fund the Plan over the long term.
- Avoid substantial volatility in required contribution rates and fluctuations in the Plan’s funding status.

TFFR Service Goals

- Create and implement an enhanced Outreach and Communication Plan for our members, employers, and other stakeholder groups related to the program in general and the TFFR “Pioneer” Project specifically.
- Administer accurate, efficient, and responsive pension benefits program.
- Deliver high quality, friendly service to members and employers.

Strategic Investment Plan

- Expand upon our organizational commitment to the importance of continuing board education and strong board governance to create and maintain an innovative and agile investment program.
- Enhance understanding of our core goals and beliefs while enhancing overall transparency.

- Remain steadfast in our commitment to the prudent use of active investment management.
- Expand awareness to downside risk management which is essential to achieving our long term investment goals.
- Given actual and projected growth of SIB client assets and the heightened public awareness of the Legacy Fund, align our investment platforms to promote greater clarity and efficiency in reporting and implementing client investment policies.
- Expand RIO's influence and ability to create positive and sustainable change by building deeper relationships with existing clients, organizations and legislative leaders.
- Enhance community outreach to build upon public awareness and confidence.
- Develop concise presentations which highlight our overall risk, return and cost control framework including our progress towards attaining our long-term goals.
- Continue to implement an in-state investment initiative and provide education and outreach efforts consistent with the roll-out of that initiative.
- Encourage employee participation in staff meetings, offer team members more opportunities to impact RIO's change initiatives and improve the office environment for staff and clients.
- Enhance our internal control environment by improving use of proven risk management solutions relating to fraud risk assessments, investment risk management and overall enterprise risk management.
- A robust risk management framework serves as a foundation to support a sound internal control environment and lessen downside risks.
- Broaden stakeholder awareness of the challenges faced in estimating Legacy Fund earnings for future budget planning.
- Evaluate and expand the efficient use of technology in our investment program activities including risk management, compliance monitoring, client satisfaction surveys, website design and communications.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During the 2023 Legislative Session, NDRIO received approval to move forward with its internal investment initiative. The proposal required five investment professionals, one operations professional and one administrative staff to manage approximately \$3 billion of assets internally. Implementing this proposal can lower the net costs for RIO investments by \$6 million per year and create opportunities for better liquidity

190 Retirement and Investment

Agency 190

management and rebalancing that may result in up to another \$10 million in savings per year. The net costs and opportunities grow with assets under management and with the amount of assets managed internally.

Generally investment management costs fall within the scope of continuing appropriation authority granted by the legislature in NDCC 21-10-06.2; however because this proposal involves cost savings achieved by internalizing investment operations through additional permanent FTE's and infrastructure it falls within the scope of NDCC 54-52.5-03.

Necessary resources for implementation (including FTE's)*: Due to the complexity of this plan RIO only asked for a salary budget for one year of the 2023-2025 biennium for these additional staff as we understood it would take significant time to develop the plan and stand up all the necessary processes and procedures to effectively implement.

Although one year's worth of salaries and benefits for these positions are included in our base budget, in order to continue the plan into the 2025-2027 biennium, appropriation for the salaries and wages for the second year is required.

Are resources being redirected or are they new or additional (including FTE's)*: This phased in proposal seeks to create a foundation to internalize additional investment functions in future biennium's. This initial proposal seeks to achieve cost savings by moving approximately \$3 billion in AUM to internal management, however, future costs savings may be achieved in future biennium's with up to 50% of AUM moved to internal management. The net after cost estimated benefits of going to a greater portion of internal investment management and to a more sophisticated investment process is estimated at \$45 million per year as the result of lower fees (the savings is net after the cost of the additional FTE's and infrastructure) if up to 50% of the assets are managed internally. The decrease would be recognized within continuing appropriation expenses. The change to more internal investment would require more FTEs currently paid out of appropriated expenses.

Who is served and impact of not funding*: All RIO client funds under management will benefit from the associated cost savings achieved by implementing some internal investment management of assets. At the present rate of growth for the program the impact of maintaining the current investment management structure results in failure to leverage client assets and achieve benefits from the scale of the program.

Information Technology Hosting and Support (Priority: 02)

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

190 Retirement and Investment

Agency 190

Request explanation and justification (include any statutory authority)*: During the 2023-25 biennium, RIO is in the final stages of implementing a new pension administration system for the Teachers’ Fund For Retirement (TFFR). Knowing that the system would not go live until the second year of the biennium, only one year of hosting fees was requested during the 2023 legislative session. This approved amount is included in our base budget and will carry over to 2025-2027 however, we are asking for the second year’s hosting costs in order to run the new system for the entire biennium.

Additionally, as a unified agency, RIO is reliant on significant support from NDIR professionals. Currently, we are utilizing two dedicated NDIR staff to assist in all needed technology processes for the agency. This need will continue into the 2025-2027 biennium as the new pension system will continue its roll out along with significant increases in technology demands from our investment program as it continues its internal investment roll out. Along with other NDIR rate increases, we have been notified this application support agreement rate will be increased significantly as well.

Furthermore, as the visibility of the Legacy Fund and other funds under RIO’s purview increase, we are also asking for modest increases in our communications software and equipment budget to assist our Communications and Outreach Director more efficiently and effectively communicate the specifics of RIO’s activities to the public, legislators, and all other interested parties.

Necessary resources for implementation (including FTE’s)*: Resources necessary for this decision package include the needed appropriation authority for the above mentioned activities. No additional FTEs are included in this request as current staff and application support team are in place to administer the activities.

Are resources being redirected or are they new or additional (including FTE’s)*: Current resources will be used to administer the activities listed above. Additional funding is being requested to support these current resources as they will be live for the entire 2025-2027 biennium rather than just for part of the current biennium.

Who is served and impact of not funding*: The more than 25,000 members in the Teacher Fund for Retirement are served by this project as well as the more than 200 K through 12 employers throughout the state that contribute to the fund and employ members of the fund. This project has modernized an antiquated pension administration system that not only required significant manual operations to maintain but fails to provide a welcoming user experience for both member and employer. In the event this optional package is not funded, the Retirement Investment Office would not be able to continue using the new pension administration system, which would not allow RIO to fulfill its statutory responsibility to successfully administer the TFFR plan and would cause the nearly 10,000 beneficiaries to lose access to the system and their respective benefit payments.

If additional NDIR application support costs are not approved, RIO would lose vital software and application support provided by these personnel. This would cause significant implementation struggles with both the pension administration system as well as the internal investment program. For TFFR, a similar impact to not funding the continued hosting costs would result if we were unable to procure the needed support for the system. Additionally, all RIO client funds under management will benefit from the associated cost savings achieved by implementing some internal investment management of assets. A reduction in application support availability would significantly hinder the effectiveness of this program.

Cost to continue human resources/intern funding (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation

190 Retirement and Investment

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDRIO was able to identify significant savings throughout its operating budget in an attempt meet the 3% base budget reduction. However, this 3% reduction is in addition to a cost to continue amount within the salary and benefits appropriations which would equate to an additional 1.2%.

In order to partially fund this reduction, NDRIO reduced the appropriation available for its internship program by \$24,000. This left funding for just two interns during the upcoming biennium. This request is for an additional \$24,000 in appropriation to allow for up to three additional interns (5 total) during the 2025-2027 biennium.

Additionally, NDRIO has historically been able to recognize salary and benefit budget savings through team members who receive health care coverage via family members working with the State of North Dakota and, as such, the cost of their health insurance benefits is currently included as a reduction in the Salaries - Other line in NDRIO's base budget. Beginning this biennium, two of the three will no longer be covered via other means and will have their health insurance premiums be paid through NDRIO. This request includes an additional \$118,302 to offset the cost to continue salary increases throughout the agency.

Necessary resources for implementation (including FTE's)*: Resources necessary for this optional request package are limited to the appropriation authority. NDRIO is currently housing an investment intern so all needed infrastructure is in place to transition into a new intern.

Are resources being redirected or are they new or additional (including FTE's)*: Currently, resources are not being required for either of these requests. For the internship funding, NDRIO has elected not to fill one of its available internships due to capacity constraints on the supervisory team and one additional internship was not filled due to an unsuccessful recruitment of candidates.

For the health insurance benefits that currently being paid by different agencies, as RIO begins paying those amounts during this current biennium, those resources will come from a rollup of vacant and unused salary appropriation.

Who is served and impact of not funding*: Dedicated resources are needed to continue to offer internship opportunities across the agency. Reduced funding for the internship program would negatively impact the program and reduce the opportunities available for college students to experience work within state government.

Incremental Agency Evolution/Retirement Education (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

Total	708,542	-	708,542	2.00	462,193	-	462,193	1.00

State Initiative:* Workforce

190 Retirement and Investment

Agency 190

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As RIO makes significant enhancements to both the retirement and investment sides of the agency, additional resources are needed to efficiently and effectively carryout its strategic plan. As part of the internal investment initiative discussion, it was communicated that the internalizing of assets would increase the burden on RIO's internal audit division. As such, we are requesting an additional internal audit position to assist with the compliance needs brought on by this additional activity.

Additionally, as the significance and visibility of the Legacy Fund and other areas of the agency continue to grow, RIO's strategic plan includes an increase and improvement in communication to all stakeholders. This plan includes the addition of a multi-media specialist to support our current communications and outreach director in their endeavor to efficiently and effectively communicate RIO activity through all appropriate channels.

Another part of RIO's strategic plan includes additional education in both the investment and retirement communities. In September of 2024, RIO will be hosting its first investment symposium to provide investment education not only to its client funds but also members of the legislature, other state agencies, and the public at large. On the retirement side, RIO is planning a communication overhaul with all of its TFFR stakeholders to coincide with the roll out of the new pension administration software. This will include significant communication to assess satisfaction rates as well as the needs and asks of all TFFR members.

Finally, we are also requesting contingency dollars be added to our budget in the event RIO would be required to conduct one or more executive searches during the biennium. During previous biennia, the agency has lost its top two managers in both the retirement and investment programs within a short time period. While turnover of these positions is not planned in the short term, prudence requires preparing for what has not been an unusual need.

Necessary resources for implementation (including FTE's)*: This request includes the addition of two new FTE. One multimedia specialist and one internal auditor along with all of the related IT, training, and supplies needs to support said positions. With some reconfiguration, current office space is sufficient to house these additional positions within the facility RIO currently occupies. Additionally RIO is requesting funding to support the continuation of the investment symposium through the 2025-2027 biennium as well as the funding needed to effectively survey TFFR stakeholders.

Are resources being redirected or are they new or additional (including FTE's)*: These would be new resources allocated to support new strategic duties necessitated by the enhancements RIO has been making during the 2023-2025 biennium.

Who is served and impact of not funding*: All RIO client funds under management will benefit from the associated cost savings achieved by implementing some internal investment management of assets. Compliance and oversight of this new plan will be beyond the capacity of our current internal audit staff and not funding would require the continuation of significant outsourcing to handle these tasks at a potentially higher price point.

The more than 25,000 members in the Teacher Fund for Retirement are also served by this project as well as the more than 200 K through 12 employers throughout the state that contribute to the fund and employ members of the fund. The additional retirement education RIO plans to facilitate will impact not only the current, but future members of TFFR.

190 Retirement and Investment

Agency 190

Internal Investment 2.0 (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	3,190,380	-	3,190,380	8.00	-	-	-	0.00
Total	3,190,380	-	3,190,380	8.00	-	-	-	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As part of the 2023 legislative session, RIO was authorized to begin the first phase of an internal investment program. That first phase was to bring up to 15% of its assets under management in-house and authorized the hiring of 7 additional FTE to facilitate. Due to the complexity of the plan, that initial phase is currently being finalized with the intent to begin internal investment of assets before the end of calendar year 2024.

Phase 2 of the internal investment plan would advance the program and bring in an additional 15% of assets in-house (30% total). There is an opportunity to continue creating significant benefits from the scale advantages of the growth of over \$22 billion in assets under management. A typical public fund with similar assets under management as RIO has more internal investment management which creates the opportunity of better investment returns while decreasing costs from the advantages of more internal management versus money placed with external managers. Expansion of the plan into phase two would provide RIO with the opportunity to move into more advanced fund management and increase the benefits to each of its client funds.

Generally investment management costs fall within the scope of continuing appropriation authority granted by the legislature in NDCC 21-10-06.2; however because this proposal involves cost savings achieved by internalizing investment operations through additional permanent FTE's and infrastructure it falls within the scope of NDCC 54-52.5-03.

Necessary resources for implementation (including FTE's)*: In order to expand into phase 2 of the internal investment program, RIO would need an additional 5 investment professionals along with 3 additional fiscal operations professionals to prudently manage and account for the absorption of these additional assets into the program. Additionally, RIO would require the operating, data processing, rent, and other necessary expenses related to onboarding and employing additional team members.

Are resources being redirected or are they new or additional (including FTE's)*: This phased in proposal seeks to expand upon the foundation of internalizing investment functions that has begun in the current biennium. This proposal seeks to achieve cost savings by moving approximately another \$3 billion in AUM to internal management. The net after cost estimated benefits of going to a greater portion of internal investment management and to a more sophisticated investment process is significant as the result of lower fees (the savings is net after the cost of the additional FTE's and infrastructure). The decrease would be recognized within continuing appropriation expenses. The change to more internal investment would require more FTEs currently paid out of appropriated expenses.

Who is served and impact of not funding*: All RIO client funds under management can benefit from the associated cost savings achieved by implementing additional internal investment management of assets. At the present rate of growth for the program the impact of maintaining the current investment management structure results in failure to leverage client assets and achieve benefits from the scale of the program.

Agency Description

The Public Employees Retirement System is the administrator of several employee benefit plans for state employees and employees of participating political subdivisions. The plans include the following:

- Six Defined Benefit Retirement Plans
- Defined Contribution Retirement Plan
- Deferred Compensation Plan
- Retiree Health Insurance Credit Plan
- Group Health Insurance Plan
- Group Life Insurance Plan
- Voluntary Insurance Products (dental and vision plans)
- Employee Assistance Program
- Pretax Benefits Program (FlexComp)

Agency Mission Statement

The mission of the Agency is to champion the health and financial security of our members by providing comprehensive, innovative retirement and insurance benefit solutions through collaboration and personalized support.

Major Accomplishments

-
- 1 In the process of transitioning away from a Defined Benefit retirement plan to a Defined Contribution Retirement Plan.

 - 2 Updated our business system to accommodate Federal W-4P requirement changes

 - 3 Implemented contribution increases in our Public Safety Plans to ADEC rates

 - 4 Analyzed Federal requirements for the passage of Secure 2.0

 - 5 Renewed our Medicare Part D contract with the incumbent provider

 - 6 Went out to bid for our Life Insurance provider and selected the incumbent provider with enhanced benefits at a reduced premium

Major Accomplishments

- 7 Renewed our Dental contract with the incumbent provider
- 8 Renewed our Health plan contract with the incumbent provider
- 9 Transitioned record keepers for our Deferred Compensation and Defined Contribution Plans.
- 10 Upgraded the servers that our business system resides on
- 11 Converted historical microfiche records into an electronic format
- 12 Implemented a sealed envelope policy in our office
- 13 Began an initiative to embed forms into correspondence generated by staff
- 14 Developed a process to allow temporary employees the ability to enroll in health insurance electronically
- 15 Developed a process to allow employers do an electronic ACA certification of temporary employees

Critical Issues

- 1 Impact of federal legislation on state and local government pension plans, requiring plan modifications to remain in compliance
- 2 Maintain a sufficient rate of return on investments so current contribution rates for our retirement plans remain stable
- 3 For closed retirement plans such as Job Service, RHIC, and the Main Plan, examine strategies to ensure the flow of assets meets the required benefit payments over the remaining years of the plan
- 4 Continue to increase participation in the deferred compensation plan
- 5 Impact of federal legislation on employer sponsored health plans requiring plan modifications to remain in compliance
- 6 Health plan placement and funding arrangement
- 7 Maintain an affordable health insurance plan in an environment of rising health care costs
- 8 Maintain our business application system (PERSLink)
- 9 Ability to enhance technology and maintain it at a level that allows us to continue providing services to our members in an efficient manner
- 10 As the scope of programs PERS administers expands, the ability to maintain a prudent level of financial oversight
- 11 Allocating resources to process improvement and issue resolution while still maintaining day to day operations
- 12 Maintaining a low level of staff turnover
- 13 Succession planning

Performance Measures

Agency Performance Measures:

NDPERS is audited annually by an independent audit firm. The agency has always received a clean, unqualified financial audit opinion. NDPERS has been awarded the Certificate of Achievement for Excellence in Financial Reporting by the Government Finance Officers Association (GFOA) for our annual comprehensive financial report (ACFR). The Certificate of Achievement is the highest form of recognition in the area of governmental accounting and financial reporting. The agency has prepared a ACFR and received this award for the last twenty-seven consecutive years.

We also perform electronic surveys of our membership on a weekly basis. After contacting our office, participants are provided with a 4 question survey if they have an email on file with our office. These surveys measure the courtesy and promptness of our employees, as well as the accuracy and ease of materials received from our office.

Program Performance Measures:

Defined Benefit/Hybrid Retirement Plans. One of the goals of the agency is to provide benefit plans that are competitive and affordable. The agency measures this by comparing the plans administered by NDPERS to other public retirement systems, using a Public Fund Survey prepared by a national organization. This comparison shows that our retirement plans provide a competitive level of benefits. A combination of benefit reductions, the receipt of funds from the earnings of the Legacy Fund, and a commitment to the Legislature to pay off the unfunded liability using a closed 30 year amortization period have put this plan back on the path to full-funding.

Defined Contribution Plan: As of January 1, 2025, the Defined Contribution Plan will become the primary retirement plan for public employees. The agency is not only committed to ensuring a smooth transition, but also to ensuring public employees have a competitive retirement plan to properly attract and retain public employees.

Health Insurance Plan. One of the goals of the agency is to provide benefit plans that are competitive and affordable. The agency measures this by comparing the health plan administered by NDPERS to other health plans, using various national surveys. This comparison shows that our health plan provides a competitive level of benefits at less than average costs. The agency also monitors performance measures relating to customer service, claims processing, call center response times, etc. to ensure performance of the carrier is acceptable.

Program Statistical Data

RETIREMENT:

Participation in the PERS retirement programs continue to increase. Since last biennium, there was an 1.3% increase in the number of participants in the defined benefit plan and a 1.2% increase in the number of political subdivisions who participate in the defined benefit plan.

Agency 192

Political Subdivisions: Not eligible for this program

FLEXCOMP:

There has been a decrease in participation in the medical spending account, a slight increase in the dependent care spending accounts resulting in a decrease to the annual salary reductions. Following are statistics on participation in the FlexComp program.

Medical Spending accounts: 2,177

Dependent Care accounts: 411

State Agencies: 101

Political Subdivisions: Not eligible for this program

Annual salary reductions exceed \$5.54 million per year

Explanation of Program Costs

NDPERS is submitting a 97% base budget that includes a 5% reduction in FTE, to meet the guidelines proposed by the Governor. In addition to the 3% reduction request, the Governor is not funding the cost to continue the 4% legislative salary increases effective July 1, 2024, the cost to continue the 1% employer contribution into the Defined Benefit Plan that was effective January 1, 2024, nor is he fully funding the inflationary increases that agencies will experience with NDIT.

The NDPERS Staff did a thorough analysis of the services provided by the agency to see if any could be reduced (or eliminated) to reduce spending. Unfortunately, Staff feels we are still three to four years away from recognizing efficiencies in our business system to realize the savings for the 2025-2027 biennium. The NDPERS Board has determined the following reductions would be necessary to comply with a 97% base budget requirement.

- Reduce the number of deferred compensation plan investment provider companies from nine down to one, the NDPERS' Companion Plan.
- Eliminate 2.0 FTE

The salaries and benefits line-item accounts for approximately 77% of the budget request for the agency and includes funding for 38.5 FTE. Funding was included for one temporary position.

Operating expenses account for 21% of the budget request. Information technology costs account for over 70% of the operating expense line item. The agency's IT costs are a combination of fees paid to a software vendor to support the agency's PERSLink system, as well as fees paid to ITD for hosting, desktop support, disaster recovery, network and email access, document storage in FileNet and telecommunications. Postage, printing, office rent and operating fees and services represent 22% of the operating line item. The benefits programs administered by the agency serve over 40,000 active and retired members and over 475 employer groups, therefore, communication is a substantial portion of the printing and postage expenses.

The contingency line-item accounts for 2% of the budget request.

All programs administered by the agency are funded through special funds.

Program Goals and Objectives

Defined Benefit/Hybrid Retirement Plan:

- Enable career employees to care for themselves and their dependents at retirement and to provide a plan that will reduce personnel turnover and encourage career employment to high grade men and women.
- Establish a mechanism to insure that career employees can care for themselves and their dependents in retirement by maintaining the purchasing power of current retirement benefits.
- Improve the desirability of state and political subdivision employment by developing more options on how a member could access, contribute to, supplement, and draw their retirement funds.
- Ensure that members will be better able to care for themselves and their dependents in retirement and to improve the desirability of state and political subdivision employment by providing incentives and rewards to members who engage in supplemental retirement savings.
- Maintain adequate funding of these plans for the future, especially the Main Plan, as this is now a closed plan to new hires that enrolled in the plan after January 1, 2025.

Defined Contribution Retirement Plan:

- Provide a defined contribution retirement plan for state employees that offers a diversified set of investment options, including annuity options, to ensure adequate retirement savings for use in their retirement years.
- Provide information to each eligible employee in a timely manner.
- Establish investment guidelines for the funds and review their performance on a regular basis.
- Provide the members the opportunity for investment education through multiple channels such as on-site counseling, call centers and web access.

Deferred Compensation Plan:

- Provide a supplemental retirement plan that offers a diversified set of investment options that will allow employees to augment their retirement benefits.
- Establish investment guidelines for the Companion Plan funds and review their performance on a regular basis.
- Provide the members the opportunity for investment education through multiple channels such as on-site counseling, call centers and web access.
- To encourage and enroll all members who are eligible to participate in the plan.

Retiree Health Insurance Credit Program:

- Maintain adequate funding of this plan for the future, as this is now a closed plan to new hires that enrolled in the plan after January 1, 2020.

GROUP INSURANCE:

Life Insurance:

- Provide for a single, understandable and non-discriminatory life insurance plan to members at affordable premiums.
- Supplement the existing life insurance program with other programs.
- Have a premium structure that is the lowest and best available.

Health Insurance:

- Provide understandable options at affordable premiums which protect public employees and their families from excessive medical expense.
- Promote positive competition through PERS or group purchasing initiatives with providers who emphasize and practice the principles of continuous quality improvement.
- Develop and maintain an information database on quality and costs.
- Provide information and assistance in community, legislative and national matters related to health care services.
- Consider modifications and improvements to the benefit plan design that can be accomplished within the constraints of available funding.
- Encourage healthy lifestyles and preventative attitudes in an effective and cost-efficient manner.
- To encourage our participating employers to sponsor wellness programs.

Voluntary Insurance Plans (Dental, Vision):

- Provide state employees and retirees access to affordable dental and vision premiums that also provide for a reasonable level of coverage.

Employee Assistance Program:

- Provide state employees access to an EAP that effectively responds to employee's needs as well as the needs of the employer.

FLEXCOMP:

- Administer a program that allows state employees to elect to reduce their salaries to pay for qualified insurance premiums, medical expenses and dependent care expenses on a pretax basis.
- Remain budget neutral – ensure the employer FICA savings cover the expenses of administering the program.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In addition to the 3% reduced budget, the Governor did not include funding to continue the 4% Legislatively approved increase for staff, nor did it include funding to maintain the additional 1% contribution to the Main Plan that was included in HB 1040. In order to fund our existing staff salaries ongoing basis, an additional \$138,067 will be needed to maintain our existing staffing levels (assuming no staff are eliminated as a result of the budget reduction proposal). The Governor did fully fund the staffing levels that were part of the FTE pool passed during last session

Staff is projecting our NDIR costs to go up 17%, or roughly \$95,667 next biennium. This includes NDIR providing telephone services, hosting services, desktop support, and data storage/maintenance. The Governor did include funding for some of this increase (\$64,617), but not the entire package for what our agency utilizes. An additional \$31,050 will be needed to fully offset the NDIR increases next biennium.

Sagitec, who owns and develops our internal operating system is also experiencing cost pressures to keep and maintain their development staff. To utilize the software and continue our core development team (which includes one Business Analyst and three Developers), inflationary increases total \$203,233. Sagitec's projected hourly development rate is \$93.36, as compared to NDIR's projected base development rate of \$120.75 - \$145 an hour.

Finally, WSI has notified us that rent will be going up \$1 per square foot next biennium, or \$12,000 total.

In total we are looking to increase our operating budget by \$246,289 to maintain our day-to-day operations (9.93% for a two-year period).

Necessary resources for implementation (including FTE's)*: Appropriation Authority

Are resources being redirected or are they new or additional (including FTE's)*:

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: One accounting FTE. This FTE would be used as an “Employer Support Specialist,” and would be a dedicated representative to onboard new authorized agents (the individual responsible for accurate and timely payroll reporting for our employer base). We believe given the critical deadlines within HB 1040 for new hires, that having a dedicated liaison to support our employer base is critical to the long-term success of the Defined Contribution Plan.

One benefit enrollment FTE. The leanest division we currently have is our Enrollment Division, and they are the ones most impacted by the changes within HB 1040. Given the fact that elections and employer matchings will now vary by participant, having proper depth in our enrollment division is another component we view as being critical for the long-term success of the Defined Contribution plan.

Necessary resources for implementation (including FTE’s)*: 2.0 FTE authority and appropriation authority

Are resources being redirected or are they new or additional (including FTE’s)*:

Who is served and impact of not funding*:

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Our Board is trying to make a significant push to automate our business system through the Business Process Management upgrade that took place last biennium. In order to make significant progress, we are requesting both a project manager and two additional developers with Sagitec to meet these needs. We envision the full automation taking 4-5 years to fully complete, and to redesign all 158 workflows in our agency. This request is the appropriated cost to add 3 additional staff at Sagitec.

Necessary resources for implementation (including FTE's)*: Appropriation Authority

Are resources being redirected or are they new or additional (including FTE's)*:

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Board is seeking approval for \$155,848 to be considered to recognize the one staff member that is significantly below where they should be compared to other ND state team members, the ongoing funding to add two additional Board members that was

not funded last session, a part-time intern in the agency, and lastly the workload shifts that have taken place on the Executive Management team with the permanent appointment of the Executive Director

Necessary resources for implementation (including FTE's)*: Appropriation Authority

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*:

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: If the PERS Health Insurance Plan and/or pharmacy benefits were to be awarded on a self-funded basis, the administrative efforts would substantially increase in addition to PERS' accountability for the plan. Today, most of the administrative and financial/operational risk resides with Sanford Health Plan. However, on a self-funded basis that would become the Board's responsibility.

If we also carve out the PBM benefit and we end up with a bid that is self-insured/transparent on the pharmacy side we also feel like we'll need to add a Pharmacist or Pharmacist Technician to our team as well.

These FTE requests are being submitted on a contingent basis, and are only needed if the contract is awarded on a self-insured basis.

Necessary resources for implementation (including FTE's)*: 5.0 FTE and appropriation authority

Are resources being redirected or are they new or additional (including FTE's)*:

Statutory Authority

North Dakota Constitution Article XIV

NDCC 54-66

Agency Description

The North Dakota Ethics Commission was created by passage of initiated measure 1 in 2018 which created Article XIV of the North Dakota Constitution.

The Commission consists of five members appointed by consensus agreement of the Governor and the Senate Majority and Senate Minority Leaders. The Ethics Commission also has three state employees an Executive Director, General Counsel, and an Operations Administrator.

The Constitution tasks the Commission with developing rules related to transparency, elections, lobbying, and corruption. The Constitution also tasks the Commission with investigating alleged violations of Article XIV of the Constitution, rules adopted by the Commission as well as related state laws. The Commission works to ensure an open, ethical and accountable government through a fair and consistent complaint process as well as public education.

Agency Mission Statement

The mission of the North Dakota Ethics Commission is to strengthen the confidence of the citizens of North Dakota in their Government by ensuring and promoting transparency and accountability.

Major Accomplishments

-
- 1 Adoption of Conflict-of-Interest rules in October 2022

 - 2 Additional funds appropriated by the Legislative Assembly in 2023.

 - 3 Addition of 2 FTEs to Commission staff in September 2023.

 - 4 Improved public communication and transparency about Commission activity through the creation of social media, website improvement, development of contact lists, and a newsletter.

 - 5 Developed working relationships with other state agencies.

 - 6 Providing relevant and helpful education to the public and the regulated community through the Commission's newly created webinar series as well as in person speaking engagements.

 - 7 Developed internal operating procedures, creating benchmarks and guidelines for staff to follow in multiple areas.

 - 8 Issued three advisory opinions to provide guidance on ethics rules.

 - 9 Established physical presence in the capitol building.

Critical Issues

-
- 1 Education: Developing informative content that is effectively communicated to stakeholders in multiple formats.
-

Critical Issues

-
- 2 Rules Adoption: Adoption of enforceable rules related to transparency, corruption, elections, and lobbying aimed at increasing transparency in state government.

 - 3 Preventing unethical conduct that may weaken the public's trust in government or meaningfully addressing past conduct to ensure non-recidivism.

 - 4 Acquisition of IT solutions to manage the Commission's case load, filings, and communications.

Performance Measures

Improved processes for open communication and feedback from citizens.

Educated citizens promoting transparency and awareness of Commission's jurisdiction, activities, and responsibilities.

Creation of a more positive and transparent government culture.

Increased citizen trust in government.

Program Statistical Data

Complaints: 65 Complaints received as of 7/12/2024. 23 of these complaints were filed in 2024. Of the 66 total complaints, 29 are pending, 25 were dismissed as non-jurisdictional, 7 were dismissed as insufficient to state a claim, 2 were dismissed as they were filed by non-residents, 2 complaints have been resolved through informal resolution, and 1 complaint was withdrawn.

Education & Outreach: Since 2023, Commission staff has administered 28 separate training sessions with public entities/groups to educate individuals on the mission of the Commission, ethics rules, and Commission processes. The Commission started a Webinar Series entitled Dakota Dilemmas in the spring of 2024 to reach an even broader audience.

Meeting Notices: 348 public meeting notices received since January 2021.

Advisory Opinions: The Commission has issued 3 advisory opinions based upon requests made to the Commission by public officials, lobbyists, and candidates for office.

Quasi-Judicial Bias Disclosure Forms: 33 (All were filed after September 2022)

Conflict of Interest Disclosure Forms: 12 (this number does not include conflict of interest disclosure made by the legislature)

Explanation of Program Costs

Salary and benefits for three FTEs and five Commissioners.

Operational costs to support personnel and operations to carry out the mandate of ND Constitution Article XIV, including adopting rules and investigating allegations.

Operational costs to support the Commission's education initiative to improve transparency in government and manage ethical concerns.

Program Goals and Objectives

To fulfill its constitutional duties and meet its mission, the Commission has adopted five (5) strategic initiatives. These strategic initiatives collectively integrate to create an overarching plan which can be practically implemented to enable the Commission to ensure and promote transparency and accountability.

- (1) Education & Outreach: Provide tailored education and practical training on Commission adopted rules, Article XIV of the North Dakota Constitution, and N.D.C.C. ch. 54-66 to all individuals subject to the rules and as well as the residents of North Dakota.
- (2) Relationships & Communication: Establish open lines of communications with individuals subject to Commission oversight and the public through various mediums and communication channels.
- (3) Rules Review & Creation: Conduct a thorough review of potential rules for adoption by the Commission and align North Dakota governmental ethics laws and rules with up-to-date caselaw developments.
- (4) Positive Work Culture: Welcome and provide high quality internal training to new staff and commission members. And, implement strategies that promote creativity, empowerment, engagement, and value in Commission staff and members.
- (5) Meaningful Enforcement: Encourage consistent application of rules related to transparency, corruption, elections, and lobbying.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Intern Salaries:

Beginning legislative session 2025, the Commission will host an intern to assist in the Commission's legislative work as well as provide a UND law student an opportunity to learn about North Dakota legislative process and North Dakota government functions. For the 2025 legislative session, the Ethics Commission will receive funds through OMB's Internship Program to cover 75% of the salary costs.

As the Commission moves forward, internship will be a critical component of the Commission's workforce as the Commission has minimal staff (3) and an increasing workload. The Commission plans to offer both a summer and legislative internship experience for law students. The Commission is requesting funds to support those internships in the amount of \$28,484 in salaries and benefits (FICA).

Overtime Compensation:

With the addition of an operations administrator position in 2023, the Commission is required to comply with the Fair Labor Standards Act (FLSA), which requires the operations administrator be paid compensation for overtime. The Commission adopted an Overtime Compensation Policy in accordance with the FLSA which will require funds of \$4,778 for overtime hours during the 2025-2027 biennium.

Commissioner Salaries:

The Commission is requesting additional funds to cover salaries for Commissioners. This increase is for two reasons: (1) The Commission is holding regular monthly meetings as well as special meetings, and (2) the rate of compensation for Commissioners under N.D.C.C. 54-66-04 and 54-35-10 will be increasing during the next biennium.

The Commission's 2023-2025 budget includes \$27,290 for commissioner salaries. This calculation includes compensation for regular meetings only. However, since September 2022, the Commission held 19 special meetings. Prior to September 2022, the Commission only held 2 special meetings. Funds of \$7,428 cover commissioner salaries and benefits (FICA) for 12 additional special meetings per biennium, which is better aligned to the data from the previous 3 years.

Pursuant to N.D.C.C. § 54-66-04, Commissioners are entitled to compensation for each day necessarily spent conducting commission business in the amount provided for members of the legislative management under N.D.C.C. § 54-35-10. The compensation in N.D.C.C. § 54-35-10 will likely be increasing based upon historical data. Funds of \$2,713 cover commissioner salary increases for 24 regular meetings.

Necessary resources for implementation (including FTE's)*: Additional general funds of \$43,403. The Commission has identified a total additional requirement of \$43,403 as discussed above, with \$28,484 in salaries and benefits (FICA) for summer and legislative session interns, \$7,428 for commissioner salaries and benefits (FICA) for 12 additional special meetings per biennium, \$2,713 in commissioner salary increases for 24 regular meetings, and \$4,778 in overtime hours for the operations administrator.

Are resources being redirected or are they new or additional (including FTE's)*: For the current biennium, the Commission utilized temporary salary funds to cover additional commissioner salaries, internship salaries, and overtime compensation. The Commission also supported the legislative internship costs by applying for and receiving grant funds through OMB.

Temporary salary funds from 2023-2025 biennium are redistributed to cover permanent salaries for 2025-2027 biennium as the Commission needed additional funds to hire and retain qualified, highly-skilled individuals for both the operations administrator and general counsel positions as well as the legislative raise for the general counsel position, which was not included in the 2023-2025 budget.

195 Ethics Commission

Agency 195

Who is served and impact of not funding*: The additional funds support the Commission’s fundamental operations and its ability to meet its constitutional obligations. Without funding, the Commission cannot meet its minimal operational needs or its constitutional duties.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission has identified an additional \$20,208 in salaries and \$4,226 in fringe benefits to cover a salary increase for the operations administrator as a result of workload increases. In mid-2024, the Commission’s executive assistant position was reclassified from grade 104 to grade 105 based upon a review of the job description and additional job duties performed. Based upon that review, HRMS reclassified the position, and the Commission assigned a new title – Operations Administrator. At that time, a pay increase did not happen because of limited agency funds. The operations administrator received a small workload increase in September 2024, when the position had been filled for 1 year. However, this workload increase was insufficient to account for the proportion of workload increase that occurred since 2023. In 2025-2027 biennium, the Commission anticipates a sufficient workload increase to this position’s salary.

The Commission has identified an additional \$6,762 in salaries and \$1,346 in fringe benefits to cover a salary increase for the executive director as a result of workload increases. The executive director position now oversees two full-time team members and leads the Commission’s educational initiative.

Necessary resources for implementation (including FTE’s)*: Additional general funds of \$32,542.

Are resources being redirected or are they new or additional (including FTE’s)*: This is additional new funding for our biennial budget.

Who is served and impact of not funding*: The additional funds support the Commission’s fundamental operations and its ability to meet its constitutional obligations. Without funding, the Commission cannot meet its minimal operational needs or its constitutional duties.

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: With the addition of a general counsel position, the Commission was required to procure a legal research subscription. The Commission’s Westlaw subscription for the 2025-2027 costs \$7,251.

There are also additional IT costs associated with hosting interns in the Commission’s office in the amount of \$3,007.

The Commission expects Commissioner turnover during the next biennium. Since one of the commissioners currently does not use a state computer, we need to account for a new computer for a new commissioner. The desktop support service laptop fee for an additional laptop is \$2,700. This laptop fee only applies when the Commission adds a hardware user, not when there is a change of commissioners.

The cost of JotForm software will be paid by agencies during the 2025-2027 biennium instead of paid by NDIT. The cost for JotForm is \$2,088.

In addition, the Commission has a shortage of \$4,105 for projected IT costs. The Commission’s projected estimate for IT services is \$4,105 more than the estimate received from NDIT and OMB.

Necessary resources for implementation (including FTE’s)*: Additional general funds of \$19,151. The Commission has identified a total additional requirement of \$19,151 as explained above with \$7,251 for Westlaw, \$3,007 for intern IT costs, \$2,700 for laptop fees for a new commissioner as our previous commissioner did not use a state laptop, \$2,088 for JotForm as IT will be passing the monthly fee onto agencies, and \$4,105 in projected shortage IT costs.

Are resources being redirected or are they new or additional (including FTE’s)*: This is new funding for our biennial budget.

Who is served and impact of not funding*: The additional funds support the Commission’s fundamental operations and its ability to meet its constitutional obligations. Without funding, the Commission cannot meet its minimal operational needs or its constitutional duties.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Administrative agencies that adopt rules are doing so based upon legislative directive. The authority for administrative agencies to adopt rules stems from legislative authority. This is distinct from the Ethics Commission – the Commission’s rulemaking authority is directed from the constitution – not the legislative assembly.

The funding to support rules to be adopted by administrative agencies is included in the agency’s budget because the direction is coming from the legislature. Therefore, by the time the agency is presenting rules for adoption to the Administrative Rules Committee, the funding is already available for the administrative agency to implement the rule(s). For the Ethics Commission, its rules are adopted pursuant to its independent, constitutional authority. To date, the only funding for rules adoption included in Commission budgets are the costs associated with publication of the notices for rule-making.

Previous Commission-adopted rules did not require additional funds to implement and enforce. However, the same will not be the case for the rule being considered by the Commission or future rules the Commission may consider. Rules currently under consideration will require additional professional services as well as IT solutions. Therefore, Commission is requesting \$50,000 in funds to implement Commission adopted rules. The funds should be used for rule implementation only.

Necessary resources for implementation (including FTE’s)*: Additional general funds of \$50,000. The Commission has identified a total requirement of \$50,000 as explained above.

Are resources being redirected or are they new or additional (including FTE’s)*: This is new funding for our biennial budget.

Who is served and impact of not funding*: The additional funds support the Commission’s fundamental operations and its ability to meet its constitutional obligations. Without funding, the Commission cannot meet its minimal operational needs or its constitutional duties.

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The education administrator will develop educational materials/curriculum in light of the Ethics Commission’s educational goals to help stakeholders better understand the role of the Ethics Commission. This position will develop methods and tools to effectively communicate Ethics Commission’s educational goals.

The Ethics Commission was established pursuant to Article XIV of the North Dakota Constitution for the purpose of strengthening the confidence of the people of North Dakota in their Government and supporting open, ethical, and accountable government. To meet that constitutional directive and best support an open, ethical, and accountable government in North Dakota, individuals (including citizens, state employees, and those who lobby in the State) need to be knowledgeable about the ethical rules in place in North Dakota’s Constitution, statutes, and administrative rules.

This FTE will develop and implement the Commission’s educational initiative aimed at: (1) educating citizens of North Dakota so they can be knowledgeable about the role of the Ethics Commission, (2) effectively communicating with the citizens of North Dakota so they can understand how the ethical rules in the Constitution, statutes, and administrative rules function, and (3) training individuals subject to the Ethics Commission’s oversight how to fully comply with the rules. This role is critical to the Ethics Commission’s role in supporting an open, ethical, and accountable government. Our request includes funding for four trips to various locations around the state.

An Educational Administrator is also critic as legislative turn-over increases and tenure shortens with the passage of Article XV (Term Limits) of the North Dakota Constitution. There will be a high demand to provide comprehensive education about ethics rules and issues, how to manage potential conflicts of interest, and proactively addressing concerns or issues.

Necessary resources for implementation (including FTE’s)*: \$278,922 in general funds which includes salary costs of \$184,320, benefits of \$78,312, IT costs of \$10,979, office equipment and furniture costs of \$2,599, and travel costs of \$2,712.

Are resources being redirected or are they new or additional (including FTE’s)*: This requirement is for a new FTE as well as the funding.

Who is served and impact of not funding*: This position will serve the entire population of the State of North Dakota, including the regulated community, state employees, and the public. The North Dakota Ethics Commission must educate the citizens of North Dakota regarding its rules and clarify the uncertainty about the

195 Ethics Commission

Agency 195

Commission’s jurisdiction. Without adequate education and training along with transparency, the Commission cannot successfully carry out its mission as mandated by ND Constitution Article XIV.

We serve all citizens of North Dakota. Without additional funding we cannot adequately train and educate citizens and public officials within the state. Moreover, not funding this position most significantly impacts those regulated by the Ethics Commission as they lack guidance, access to uniform interpretation of the rules, and educational materials to use when faced with ethical dilemmas.

Case Management System (Priority: 06)

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission has had a steady increase of filings since the end of 2022. As the Commission adopts new rules, filings will increase as individuals comply with the Commission’s rules. Currently, Commission staff manage filings, documents received, and its investigations through SharePoint with manual entry and manual tracking. This process is inefficient and prone to human error. Whereas this process could be automated for managed through a software platform, allowing our team to focus on customer contacts.

After a review of state procurement contract 38 and discussions with other ethics commissions, we believe initial costs of \$135,000 plus a \$30,000 annual maintenance/support fee is a worst-case scenario cost to procure and maintain a case management system. There is currently an RFP for a state contract for case/licensee management for boards and commissions. We will not have the costs pursuant to this new state contract until after July 15, 2024. This amount may be modified prior to or during legislative session.

Necessary resources for implementation (including FTE’s)*: \$195,000 in general funds. This amount includes one-time funding of \$135,000 to procure a case and file management system, with an ongoing appropriation of \$60,000/biennium for maintenance and support.

Are resources being redirected or are they new or additional (including FTE’s)*: This is additional new funding for our biennial budget.

Who is served and impact of not funding*: The additional funds support the Commission’s fundamental operations and its ability to meet its constitutional obligations. Without funding, the Commission cannot meet its minimal operational needs or its constitutional duties.

Total	50,000	-	50,000	0.00	50,000	-	50,000	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission has spent an average of approximately \$4,500/month for professional services since May 2023. Extrapolating those monthly costs over 24 months in the next biennium equates to approximately \$108,000 in professional services fees for the next biennium.

The amount included in the base budget is \$70,000, so there is a need for additional funds. Since there is also the possibility the Commission could be involved in litigation, we rounded up to \$120,000 less the \$70,000 included in the base budget.

Necessary resources for implementation (including FTE's)*: Additional funding of \$50,000.

Are resources being redirected or are they new or additional (including FTE's)*: This is additional new funding for our biennial budget.

Who is served and impact of not funding*: The additional funds support the Commission's fundamental operations and its ability to meet its constitutional obligations. Without funding, the Commission cannot meet its minimal operational needs or its constitutional duties.

Increased Travel Costs (Priority: 08)

State Initiative:* Reinventing Government

195 Ethics Commission

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission has been holding most of its monthly meetings as well as special meetings via Teams since Spring of 2020. Although, under the circumstances it has worked well, the Commission would like to increase regular monthly meetings to an in-person meeting at least twice a year.

The Commission is a member of the Council on Government Ethics Laws (COGEL) which holds an annual convention each year. This provides our Commissioners with best practices by networking with colleagues throughout the United States. The Commission’s goal is to send at least two Commissioners or staff to this event each year of the biennium.

Necessary resources for implementation (including FTE’s)*: Additional general funds of \$7,760. The current base budget contains \$22,016 in general funds for travel. The Commission has identified a requirement of \$29,776 as explained above with \$18,172 for 8 in-person regular meetings (one per quarter) and biennial COGEL convention costs of \$11,604. This is an increase in base budget of \$7,760.

Are resources being redirected or are they new or additional (including FTE’s)*: This is additional new funding for our biennial budget.

Who is served and impact of not funding*: The increase travel costs allow the Commission to meet in-person more often. While online meetings are convenient and cost-effective, it is beneficial to both the Commissioners and the citizens of North Dakota to hold in-person meetings. Conversations related to complex legal issues and proposed rules are more easily navigated with the decision-makers in one room. Moreover, the accessibility of the Commissioners for the public as well as the regulated community increases when they are present at the capitol.

Moreover, travel costs for the COGEL conference supports Commission staff, allowing them to interact with the staff of the other ethics commissions from across the country. This is particularly important as the Commission is still new and developing rules. Past attendance has resulted in internal policy changes, new ideas to approach ethical challenges, and developing relationships with other commissions which are similarly situated.

Statutory Authority

North Dakota Century Code Title 15.1, Sections 25-06-02.1, 25-07-01.1, 54-24-01, 23-09-4-01 through 08, 57-64, 12-60-24 and 54-59-17.

Agency Description

The Superintendent of Public Instructions is responsible for enforcing state laws and federal regulations pertaining to public schools and related programs. These duties include:

- Supervise the provision of elementary and secondary education; approve schools; schools; approve school construction; implement a uniform system of school district accounting, budgeting, and reporting; and administer school district aid and transportation.
- Administer statewide school approval, provide guidance relating to home education, and implement principal and teacher evaluations.
- Develop course content standards and assessments.
- Direct school district annexation, reorganization, and dissolution efforts.
- Draft, implement, and communicate administrative rules.
- Administer state and federal programs identified in state law.
- Chair the board of the nominating committee for the state Board of Higher Education and provide administrative support to the Board of Public School Education as a non-voting member.
- Serve on the Board of University and School Lands, the K-12 Education Coordination Council, the Education Standards and Practices Board, the Children’s Cabinet, the Commission on Juvenile Justice, and the Teachers’ Fund for Retirement.
- Supervise the ND School for the Deaf/Resource Center for Deaf and Hard of Hearing, ND Vision Services/School for the Blind, the ND State Library, and the ND Center for Distance Education.
- Develop teacher contracts and personnel policies needed for the administration of state-supported schools (NDS/D/RCDHH and NDVS/SB).
- Implement and administer the Choice Ready Scholarship program.
- Establish common goals to align and coordinate educational efforts that support the work of the joint board, professional development, early childhood education, and the implementation of high school graduation requirements.
- Provide technical and professional support to Local Education Agencies.
- Build relationships, cultivate opportunity, and inspire growth.

•Work to see that all students graduation Choice Ready with the knowledge, skills, and disposition to be successful.

Agency Mission Statement

DPI will partner with schools and communities to provide a statewide system of excellent service and support to ensure a healthy school environment that fosters student success.

Major Accomplishments

- 1 Choice Ready Framework Progress: The Choice Ready framework has seen tremendous growth, with the percentage of students graduating Choice Ready increasing from 21% in 2018 to 71% in 2024. The NDDPI aims to reach 100% by the end of the biennium, ensuring that students are prepared for college, careers, or the military.
- 2 ND A+ Comprehensive Assessment System: The rollout of the ND A+ Comprehensive Assessment System combines Summative, Interim and Formative assessments based on ND Math, Reading, Writing and Science standards. It has streamlined how schools measure student performance and progress. This system aligns with the state's educational goals by providing schools with detailed insights into student learning outcomes, which are critical for improving academic support and interventions.
- 3 ND First: The ND First initiative, authorized by SB2254 (approved during the 2023 Legislature), has focused on supporting chronically low-performing schools with the tools, resources, and professional development they need to drive continuous improvement and innovation. This program emphasizes accountability, support for underperforming schools, and targeted strategies to improve outcomes, especially in underserved communities.
- 4 Science of Reading: NDDPI has prioritized the Science of Reading initiative since the first legislation to require it was approved in 2021. These improve literacy outcomes for North Dakota students. By providing professional development and adopting evidence-based reading instruction, teachers are better equipped to teach fundamental reading skills, ensuring that students achieve higher proficiency in literacy, which is a foundational skill for all learning.
- 5 Greater Math Initiative: The Greater Math program is using federal ESSER funding (pandemic relief) to address the growing need for improved math instruction in North Dakota schools. This initiative provides targeted support to teachers, promotes effective math teaching strategies, and equips students with critical math skills to meet higher academic standards.
- 6 Computer Science and Cybersecurity Graduation Requirement: NDDPI introduced a new graduation requirement for computer science and cybersecurity, with schools now integrating these subjects at all grade levels. This positions North Dakota students at the forefront of technological proficiency and prepares them for future careers in a digital economy.
- 7 Apprenticeship Programs for Teachers and Principals: The NDDPI has launched registered apprenticeship programs to improve training for principals and address the severe teacher shortage in North Dakota. These programs provide a pathway for aspiring educators to gain practical experience and certification, helping to mitigate staffing challenges.
- 8 Student Mental Health Initiatives: To address the mental health challenges faced by students, particularly the impact of social media on student well-being, the NDDPI has been partnering with NDHHS to expand mental health services in our students.
- 9 Next Education Workforce Model: The department is exploring innovative staffing solutions, such as the Arizona State University's Next Education Workforce model. This approach seeks to improve student learning by diversifying the expertise available to students through new team-based teaching methods.
- 10 Be Legendary School Board Training: The ND Be Legendary School Board Leadership Institute has been a key initiative to strengthen governance and leadership in schools. This program ensures that school board members are equipped with the knowledge and tools needed to effectively oversee school operations, make data-driven decisions, and support student achievement. Nearly 30% of school boards in North Dakota have received support.
- 11 Emphasis on Personalized Competency-Based Learning: NDDPI continues to advocate for personalized, competency-based learning, allowing students to progress based on mastery rather than seat time. This approach provides a more tailored and effective educational experience for students across the state

Major Accomplishments

12 STARS/SLDS Update, a/k/a Data Modernization Project: The NDDPI Data Modernization Project is a transformative initiative aimed at improving the quality, accessibility, and usability of education-related data across the state. By upgrading the department's data infrastructure, the project seeks to provide immediate, accurate information that supports educators, administrators, and policymakers in making informed decisions to improve student outcomes. The modernization effort focuses on streamlining data collection and reporting processes, ensuring interoperability across systems, and integrating advanced data analytics tools. These enhancements will empower schools to better monitor student performance, address disparities, and personalize instruction. It prioritizes data security and privacy, safeguarding student information while maximizing the effectiveness of educational programs. Through this initiative, NDDPI is reinforcing its commitment to innovation, accountability, and the continuous improvement of North Dakota's education system.

Performance Measures

By the 2029-30 school year, all students graduating high school with the traditional diploma will graduate Choice Ready. The Choice Ready rate will increase 5.4% each school year for 10 years to match the traditional graduation rate.

- By the 2025-26 school year, the percentage of students who are proficient or above on the NDSA reading subdomains will double from the 2020-21 school year.
- By the 2025-26 school year, the percentage of students who meet expected learning gains in ELA and math will increase by 10 percentage points.
- Reduce the number of students in Novice and Partially Proficient for Native American and Low-Income students by 25% each year for 5 years.
- By the 2025-26 school year, the statewide behavioral engagement score will be 150 points.

Program Statistical Data

See Statistical Information attachment

Explanation of Program Costs

- Budget funds 86.25 FTEs
- Administration of 49 Federal programs
- Provides funding for the operations of the K-12 Education Coordination Council and 3 members of the State Board of Public School Education
- Provides technical assistance to teachers and administrators for State and Federal programs
- Develop and align all standards and student assessments, early childhood through high school graduation.
- Link children at risk of failing to meet the state's challenging content and achievement standards with support services designed to address specific needs.
- Advocate for the resources necessary to implement a system that focuses on student achievement and well-being.

201 Public Instruction

Agency 201

- Enhance before- and after-school programs to provide students with opportunities to improve their academic performance, integrate service projects with classroom learning, and offer educational development opportunities to eligible students and their families.
- Ensure success for students with disabilities.
- Provide Adult Education and Literacy programs for individuals over the compulsory attendance age of 16 who lack high school equivalency skills, workplace readiness skills, and EL skills to New American adults.
- Provide nutritious foods to children and low-income households and nutrition education to caregivers and food service personnel.
- Provide prevention information and resources that increase safety, health, and well-being of all students and teachers.
- Provide liaison services to Regional Education Service Agencies.
- Design professional development systems and instructional supports to assist all North Dakota teachers in improving classroom instruction.
- Ensure a valid and reliable system for data collection, verification, analysis, and reporting.

Program Goals and Objectives

- Support for safe and healthy behaviors
- Career awareness, exploration, and development
- Quality education personnel
- Quality student-center instruction

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The state accreditation contract amount has not been renegotiated for a few years. We also would like to include services the vendor has been providing to districts at an additional charge to the districts. We would like this to be a true state wide contract.

Necessary resources for implementation (including FTE's)*: Current personnel would negotiate and monitor the services provided.

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Without accreditation the quality instruction provided to our students may drastically decrease.

Employee Salary Increase (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	627,580	-	627,580	0.00	-	-	-	0.00
General	394,172	-	394,172	0.00	-	-	-	0.00
Special	1,745	-	1,745	0.00	-	-	-	0.00
Total	1,023,497	-	1,023,497	0.00	-	-	-	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As part of our salary review, we compared NDDPI salaries to salary data from the 2022-2023 school year for both statewide and nearby school district positions. It is important to note that this data is two years old, and it is highly likely that local school districts have since increased their compensation, further widening the gap between DPI and district salaries. The following comparisons highlight this disparity:

- DPI Program Administrators manage statewide education programs and currently earn an average salary of \$287 per day. This is below market by the following:
 - o Statewide teacher average daily salary (\$309.12): 7.71 %
 - o Bismarck teacher average daily salary (\$343.34): 19.63%
 - o Mandan teacher average daily salary (\$331.10): 15.37%
- DPI Directors who provide senior leadership to DPI in their respective offices and with their respective staff average a salary of \$410.25 per day. This is below market by the following:
 - o Statewide Administrator average daily salary (\$492.35): 20.01%
 - o Statewide Assistant Principal average daily salary (\$485.48): 18.34%
 - o Statewide Principal average daily salary (\$479.90): 16.98%
 - o Bismarck/Mandan Assistant Principal average daily salary (\$511.51): 24.68%
 - o Bismarck/Mandan Principal average daily salary (\$587.23): 43.14%

The fact that this data is from the 2022-2023 school year means that the gap we are experiencing now is likely even greater, as school districts have had the opportunity to adjust salaries upward to account for inflation and other market forces.

In addition to these external salary gaps, DPI's internal salary structure also lags behind other state agencies. Our agency's compa ratio—which measures the relationship between actual salaries and the market midpoint—is 95.96%, while the state average compa ratio is 98.16%. This puts DPI further behind the average compensation levels within the state, limiting our ability to offer competitive salaries compared other state entities.

This disparity not only affects our ability to recruit highly qualified individuals but also impacts retention and morale among current employees.

To address this inequity and ensure that DPI remains competitive in the State of ND labor market, we are proposing an option salary package. This proposal aims to lessen the gap between DPI compensation with that of the local school districts and state averages, recognizing the critical importance of attracting and retaining individuals capable of supporting the educational field across the state. By doing so, we can ensure that the agency continues to operate at a high level and deliver on its mission for North Dakota.

201 Public Instruction

Agency 201

Necessary resources for implementation (including FTE's)*: Existing staff

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Quality employees may choose to leave for higher paying jobs.

ND FIRST Implementation (Priority: 04)

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: 15.1-02-23. Intervention for chronically low-performing schools - Report.

1. As used in this section, unless context otherwise requires:

a. "Chronically low-performing district" means a school district for which auditing and monitoring has revealed a consistent mishandling of processes, reporting, or funds resulting in inadequate educational services for the school district's students and has had chronically low-performing schools within the school district.

b. "Chronically low-performing school" means a school identified by the state for comprehensive support and improvement in accordance with the Every Student Succeeds Act [Pub. L. 114-95; 114 Stat. 1177; 20 U.S.C. 28 et seq.] for more than

one cycle.

c. "Inadequate educational services" include a lack of annual progress in academic achievement, student engagement, resource allocation, teacher effectiveness, chronic absenteeism, and persistent subgroup opportunity gaps.

2. The superintendent of public instruction shall intervene directly when a public school is a chronically low-performing school and when a school district is a chronically low-performing school district. The superintendent of public instruction shall conduct an assessment and a review of past interventions of a chronically low-performing school or school district to identify areas of insufficient performance and develop an improvement plan. An improvement plan under this section may include a directive from the superintendent of public instruction requiring:

a. Funds to be held in escrow for the school or school district or spent as designated by the superintendent of public instruction.

b. Changes to curriculum, training, instruction, assessment, or the school calendar in the school or school district.

c. Reassignment or hiring of school or school district staff to fill roles associated with school or school district needs.

3. A memorandum of understanding must be entered between the department of public instruction and a chronically low-performing school or school district.

4. A chronically low-performing school or school district shall complete a school board leadership program as required by the department of public instruction.

201 Public Instruction

5. The superintendent of public instruction shall report annually to the state board of public school education, the education standing committees of the legislative assembly during a legislative session, and an interim committee of the legislative management when the legislative assembly is not in a legislative session regarding the implementation of this section.

Necessary resources for implementation (including FTE's)*: This law was created by the 68th Legislative Assembly. DPI does not have the resources to carry this out and would need to contract for third parties to provide services to the school districts.

Are resources being redirected or are they new or additional (including FTE's)*: New contracted services

Who is served and impact of not funding*: Violation of state law as well as students continuously being underserved by low-performing schools.

ND Native American Essential Understandings (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	300,000	-	300,000	0.00	-	300,000	300,000	0.00

State Initiative*: Tribal Partnerships

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The NDNAEU Statewide Initiative’s ongoing development aims to foster deeper understanding among North Dakotans from diverse cultural backgrounds.

In the spring of 2015, the North Dakota Department of Public Instruction collaborated with tribal Elders from across the state to create the North Dakota Native American Essential Understandings (NDNAEU). These Understandings aim to guide both Native and non-Native students’ learning. Similar frameworks exist in other states, with more planning to adopt them. Many tribal Elders have contributed to these Understandings, and they are expected to provide further opportunities for Elders and Educational Leaders to incorporate vital tribal stories, songs, and cultural perspectives into North Dakota classrooms.

Necessary resources for implementation (including FTE's)*: Existing personnel will handle grant

201 Public Instruction

Agency 201

Are resources being redirected or are they new or additional (including FTE's)*: Existing personnel will be used.

Who is served and impact of not funding*: All ND students

Summer EBT Administration (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	150,000	-	150,000	0.00	150,000	-	150,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	150,000	-	150,000	0.00	150,000	-	150,000	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Summer Electronic Benefits Transfer Program, or SUN Bucks provides food assistance to households with school-age children who are eligible for free or reduced-priced school meals during the summer, when they don't have access to meals at school. The benefit is \$120 per eligible school-aged child. Each eligible child will receive a Summer EBT card loaded with SUN Bucks (SUN Bucks) benefits.

This program is a partnership between the North Dakota Department of Health and Human Services, the North Dakota Department of Public Instruction, and the USDA, Food and Nutrition Services. However, DPI became the prime administrator of this program without receiving any administration funds. This request is for that funding.

Necessary resources for implementation (including FTE's)*: Existing Child Nutrition personnel administer this program.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected,

Who is served and impact of not funding*: Children

School Food Processing Program Increases (Priority: 10)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This program allow school districts to participate in state negotiated contracts for value-added USDA to products for their meal programs. We have offered this program for many years and it continues to grow in use. This increase will cover increased use as well increased costs. This program is paid for with special funds collected from the districts. DPI does not retain any funds from the districts for administrative costs.

Necessary resources for implementation (including FTE's)*: This program already exists and does not need any additional resources other than the spending authority increase.

Are resources being redirected or are they new or additional (including FTE's)*: Existing personnel.

Who is served and impact of not funding*: School districts benefit by having lower costs versus them negotiating contracts on their own. This translates to lower cost of meals paid for by citizens.

ND History and Tribal Textbook Printing (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? Yes

201 Public Instruction

Agency 201

Request explanation and justification (include any statutory authority)*: The funding will be used to defray the costs of production (including design, copyediting, proofreading, printing, shipping, and distribution) of the five-book series on the History and Culture of Indigenous peoples in North Dakota and the accompanying book, Journey to Understanding.

Books Included

This covers the North Dakota Tribal History & Culture Guides used in the North Dakota Studies program. These were previously published by NDDPI and have been revised in cooperation with the Indigenous Education Coalition and the North Dakota Tribal College System. NDDPI has the right to distribute these books in original and revised forms. The titles are as follows:

- History and Culture of the Mandan, Hidatsa, Sahnish (Arikara)
- History and Culture of the Turtle Mountain Band of Chippewa
- History and Culture of the Standing Rock Oyate
- History and Culture of the Mni Wakan Oyate (Spirit Lake Nation)
- History and Culture of the Sisseton Wahpeton Oyate
- Journey to Understanding – An Introduction to North Dakota Tribes

Necessary resources for implementation (including FTE's)*: Existing personnel would create contract.

Are resources being redirected or are they new or additional (including FTE's)*: No new resources needed.

Who is served and impact of not funding*: Provide textbooks for every ND school

Federal Comprehensive Literacy Grant (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	28,350,000	-	28,350,000	0.00	28,350,000	-	28,350,000	0.00
General	-	-	-	0.00	-	-	-	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

201 Public Instruction

Agency 201

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In September 2024, DPI was awarded its third Comprehensive Literacy State Development grant from USED. The grant will lead to measurable literacy improvements for ND’s learners of all ages. This agenda builds on the state’s progress in literacy to date and emphasizes alignment to the ND PK-12 Strategic Vision initiatives. This plan fully illustrates its commitment to achieve the goals of statewide implementation and scale of literacy outcomes for disadvantaged children. This is a five year grant. The Emergency Commission and the Interim Legislative Budget Section approved the first year of the grant. This request is for years 2 and 3 and projected carryover from year 1.

Necessary resources for implementation (including FTE’s)*: The first CLSD grant has ended and the second will end in the 25-26 biennium. Existing FTE will be used for this third grant.

Are resources being redirected or are they new or additional (including FTE’s)*: None

Who is served and impact of not funding*: Not funding will return the funds to the federal government.

USED MOEquity Finding (Priority: 14)

Total				-	-	1,500,000	-	1,500,000	-	1,500,000

State Initiative:* Transforming Education

Explanation / Justification: The focus of the Be Legendary School Board Leadership Institute and Framework is to align the behavior of board members individually and boards collectively with proven, research-based behaviors that improve student outcomes. The training is based on six critical pillars to transform school board performance:

201 Public Instruction

Agency 201

1. Adopting Student Outcome Goals
2. Adopting Goal Progress Measures
3. Adopting Guardrails
4. Monitoring Student Outcomes
5. Structuring for Success
6. Active Teamwork and Advocacy

This past legislative session, the legislature funded the goal to train all 168 North Dakota school boards.

2023-2025 Participation:

- Be Legendary School Board Leadership Institute
 - o 30% of school boards have participated in, or are in the process of participating in, the Be Legendary School Board Leadership Institute certification.
 - o 280+ school board members and educational leaders have completed the two-day training and received certification.
- Be Legendary School Board Leadership Implementation
 - o 63% of boards who participated in the two-day institute chose to continue with the implementation.
 - o 30% of boards have completed one year of implementation, with scores ranging from 69-76 on the 100-point framework.
 - o 15 boards have completed six months or more of implementation.
 - o 5 boards have just started implementation.

Outcomes:

201 Public Instruction

When a board reaches a score of 80, that is when history and research prove that student outcomes dramatically begin to change within a district. This usually occurs in year two of implementation.

Adult Education - IET Grants (Priority: 5)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	201- 7000	20165	-	500,000	-	500,000	-	500,000	-
Total				-	500,000	-	500,000	-	500,000	-

State Initiative:* Workforce

Explanation / Justification: Integrated Education and Training (IET) is a program model that combines adult education and occupational training to help adults gain the skills and credentials they need for careers. IET programs can be offered by a variety of organizations, including higher education institutions, nonprofits, or partnerships between organizations.

IET programs typically include the following components: adult education and literacy activities, workforce preparation activities, and workforce training.

IET programs often use a team teaching approach, with one instructor specializing in basic skills and adult learning, and another with expertise in the relevant industry or occupation. IET programs can help participants attain both secondary and postsecondary credentials, and may also offer support services to help them reach their goals.

IET programs must meet the requirements set out in WIOA and the regulations established by the Department of Education. They should also support the plans of local and state workforce development boards.

Indians into STEM (Priority: 8)

State Initiative:* Transforming Education

Explanation / Justification: INSTEM's mission is to increase awareness and interest in STEM careers among ND Native American students in grades 6-12 while also providing them with the opportunity to live and study on a college campus to improve self-efficacy in STEM academic content and future higher education enrollment. INSTEM began in 2018 as a pilot project; Valley City State University hosts it and is free to students.

Statutory Authority

NDCC Ch. 15-19: Distance Education

Agency Description

In the 1930s, T.W. Thordarson envisioned a correspondence high school to ensure that students and adults unable to attend a physical high school could still receive a quality education. With the support of the Farmers' Union, Thordarson presented this vision to the state legislative assembly. North Dakota became a pioneer in education by becoming the first state to allocate a special appropriation for a correspondence high school, establishing the Department of Correspondence Study in 1935.

Over the years, through various name changes and organizational transitions, the North Dakota Center for Distance Education (NDCDE) has continued to uphold this pioneering spirit. Today, under the Department of Public Instruction, NDCDE serves as the state's virtual school, offering educational access solutions through asynchronous, self-paced, online K-12 education. Our comprehensive curriculum is available year-round, meeting all the requirements of NDCC 15.1-21-01 and 15.1-21-02, and includes a wide variety of electives, career and technical education courses (CTE), credit recovery, and dual credit opportunities.

Primarily serving North Dakota public school districts, NDCDE supplements local education by providing access to courses not available locally, accommodating students' schedules, and offering alternative delivery modalities. Our funding comes from a combination of a general fund appropriation and tuition fees, demonstrating fiscal prudence and efficiency. We employ 30.8 FTEs and nearly 70 temporary employees, mainly teachers, to deliver our services to over 4% of North Dakota students in the 2023-24 school year.

NDCDE remains committed to the principles and values that have guided us since our inception: ensuring that every student in North Dakota has access to quality education, regardless of their circumstances.

Agency Mission Statement

The Center for Distance Education's (CDE) mission is to provide virtual education to support North Dakota's K-12 schools. It offers all students access to extensive educational opportunities, allowing them to achieve their personal goals and reach their full potential. CDE is innovative and quality-focused in its approach to educational delivery and its scope of services to foster the strength of North Dakota's future.

Major Accomplishments

- 1 **Competency-Based Education** During the 2023-24 school year, NDCDE made significant progress in transitioning to a competency-based education (CBE) framework, aligning 25% of its courses with state priority standards and setting a goal of 70% alignment by June 2025. By Fall 2026, NDCDE aims to fully implement CBE, ensuring personalized, proficiency-based instruction that allows students to progress at their own pace. For more information see the Major Accomplishments Report and NDCDE 2023-24 Innovation Waiver (attached).
- 2 **Record Enrollments & Stakeholder Satisfaction** In response to House Bill 1376 (2023), NDCDE has experienced significant enrollment growth, with a nearly 49% increase from the last fiscal year and over an 11% increase from the height of the pandemic. To accommodate this demand, NDCDE expanded its teaching staff by adding 14 new full and part-time temporary teachers during the 2023-24 fiscal year and finalizing the hiring of 3 additional teachers and 4 staff positions for the upcoming school year. Stakeholder surveys revealed that 87% of respondents were satisfied with their overall experience at NDCDE, and 81.5% rated the quality of instruction as excellent to good. Detailed survey results and parent testimonials are included in the attached Virtual School Choice Report and more information on these accomplishments are outlined in the Major Accomplishments Report (also attached).

Major Accomplishments

-
- 3 **Enhanced Financial Oversight and Strategic Budget Management at NDCDE** With NDCDE's transition under the North Dakota Department of Public Instruction (ND DPI) following HB 1156 (2023), we have embraced enhanced financial oversight responsibilities, aligning our resources with organizational needs. Nearly 40% of our budget, over \$4.5 million for the 2023-25 biennium, comes from tuition revenue, with a strategic adjustment leading to a 37% increase in our baseline course price and projected revenue of \$6.4 million for the biennium. To manage expenditures, we have implemented policies for workload management and optimized our teaching staff structure, hiring 8 full-time temporary teachers for better stability. Detailed financial strategies and salary benchmarking efforts are included in the attached 2024-25 Merit Increase Infographic and more information on these accomplishments are outlined in the attached Major Accomplishments Report.
-
- 4 **Organizational Restructuring and Visioning at NDCDE** NDCDE has undertaken significant organizational restructuring and strategic visioning to enhance its operational efficiency, increase employee engagement, and transition under the North Dakota Department of Public Instruction (ND DPI). Key initiatives include developing the CDE Playbook and Cognia Strategy Map, restructuring roles and decision-making processes, fostering a data-informed culture, phasing out unsustainable programs, and improving organizational communication. These measures have positioned NDCDE as a forward-thinking virtual education leader committed to continuous improvement and responsiveness to legislative changes and stakeholder expectations. Key accomplishments under our strategic plan include revising job descriptions, establishing strategic partnerships, progressing towards competency-based education (CBE), and implementing professional development for teachers. Data-driven initiatives have been crucial, using performance data for evaluations, strategic planning, and refining student surveys. The attached 2024-25 Cognia Strategy Map and organizational charts highlight these changes, while the 2022 and 2024 comparison charts show our structural evolution. Our Major Accomplishment Report (attached) describes these achievements in more detail.
-
- 5 **Serving as a Statewide Leader in Computer Science and Cybersecurity Education** In 2023, the North Dakota legislature enacted HB 1398, mandating cybersecurity and computer science education for all students, and entrusted NDCDE with leading this initiative. In response, NDCDE added nine new courses, hired a full-time temporary teacher for middle and high school classes, and communicated proactively with North Dakota schools. These efforts have yielded impressive results, with high school computer course enrollments surging by 343% to 126 students. While demand at the elementary and middle school levels has been lower, we anticipate growth as awareness and interest increase. The attached Technology Courses and Integration Plan provide detailed information on our offerings and implementation strategy, and our Major Accomplishments Report highlights these achievements in more detail.
-

Critical Issues

-
- 1 **Rapid Growth Under HB 1376** In response to House Bill 1376 (2023), which empowers parents and students to enroll in virtual courses at their discretion, with local districts covering the costs, NDCDE has experienced remarkable enrollment growth. The legislation, aptly referred to as "virtual school choice," has driven a nearly 49% increase in NDCDE enrollment from the last fiscal year and an over 11% rise from the height of the pandemic. This substantial surge underscores the escalating demand for our virtual education offerings. The positive impacts of this legislation extend beyond mere numbers. It has broadened the accessibility of our extensive course catalog to students who previously could not afford our courses, thereby enhancing educational options, particularly in rural areas. This inclusive approach is vital for ensuring educational equity and choice across North Dakota. Moreover, the virtual school choice law has enabled NDCDE to achieve record revenue levels, an outcome unforeseen during the 2023 legislative session. This financial boon has been channeled into various critical areas:
- **Curricular Costs:** Increased student enrollment necessitates additional expenditures on per-student licensing fees for our curriculum.
 - **Transaction Fees:** A higher volume of course purchases has led to increased credit card fees.
 - **Technology Investments:** We've expanded our technology infrastructure, including per-user licenses in core operational systems and the acquisition of laptops for new instructional staff.
 - **Instructional Expansion:** To meet the rising demand, NDCDE has hired 14 new temporary teachers and devoted over 49,000 hours to instruction. Looking ahead to fall 2024, NDCDE will seek Emergency Commission permission to spend beyond the \$4.5 million allocated in special funds during the 2023 session. This request will not include the need for any additional general fund dollars but rather the authority to spend more of the record tuition revenue generated, reflecting our agency's robust financial health. We anticipate the continuation of the virtual school choice law and, accordingly, will seek increased special spending authority to support ongoing expansion. By securing additional tuition-generated spending authority, NDCDE will continue to provide high-quality, accessible education to all students across North Dakota, ensuring that we meet the evolving educational needs of our communities.
-

Critical Issues

-
- 2 Addressing Aging Equipment Needs During the pandemic, the North Dakota Center for Distance Education (NDCDE) swiftly expanded its operations to meet the increased demand for virtual education statewide and to shift to 100% remote work. This expansion required hiring 35 additional adjuncts, representing a 74.5% increase in part-time staff, to manage the surge in enrollments. To maintain fiscal responsibility and stay within budget parameters, NDCDE initially purchased lower-end laptops for these new employees. However, these laptops are now aging rapidly, with processors unable to meet the current instructional demands, such as creating student feedback videos and conducting regular virtual meetings with students and colleagues. This year, with an increase in revenue, NDCDE has allocated additional resources beyond its initial budget to the IT Department to begin replacing outdated equipment. However, we anticipate the need to phase out approximately 75% of existing laptops within the next two years. This transition, along with our need to sustain pandemic levels of staffing to address growth and the need to keep pace with innovation in areas like virtual reality, requires increasing our computer equipment line by over 130% for the 23-25 biennium and asking for additional special spending authority to ensure our staff has the necessary tools to maintain high educational standards. We deem this increase essential to ensure our educators have reliable and efficient technology, which is crucial for delivering quality education to our students.
-
- 3 Addressing Statewide Teacher Shortages North Dakota schools continue to face significant teacher shortages, often turning to NDCDE for interim instructional support when vacancies cannot be filled. In these instances, NDCDE adapts its asynchronous delivery model to provide hybrid virtual instruction. Our teachers engage in live instructional sessions a few times per week, with students in classrooms equipped with laptops and supported by a paraprofessional to assist with technical and instructional troubleshooting. In addition, our teachers offer these students the same individualized support they would receive in our regular, asynchronous courses. Through this experience, NDCDE has identified several budgetary impacts of the hybrid delivery model. Our teachers have had to modify pre-purchased curricula, originally designed for individual learning, to create lesson plans and activities suitable for group instruction. This adjustment has required us to allocate additional workload credits to teachers serving in a hybrid capacity. Moreover, our teachers invest considerable time coordinating with classroom paraprofessionals and reporting on student progress and challenges to NDCDE and school district administrators. These efforts aim to optimize learning outcomes but result in significant additional work. During the 2023-24 school year, all NDCDE teachers who provided hybrid instruction received overload pay (FTEs) or overtime (adjuncts) due to these increased responsibilities. With teacher shortages expected to persist into the next biennium, NDCDE recommends establishing a new FTE position, .5 admin/.5 teaching, to serve as our Hybrid Learning Coordinator. This position will be responsible for:
- Researching and training our teachers and school district paraprofessionals in best practices for hybrid delivery.
 - Coordinating learning and monitoring student progress with schools and parents during the hybrid delivery process.
 - Assisting teachers in adjusting our curriculum for hybrid delivery.
 - Teaching in the staff member's content area, with a specific focus on hybrid delivery; NDCDE will seek a teacher with multi-content licensure to increase the likelihood that the individual would be able to help fill a shortage area.
- Additionally, our budget includes a request for general funds earmarked to cover instructional overload, ensuring our teachers are adequately compensated for their extra efforts related to demands such as hybrid instruction. By investing in the Hybrid Learning Coordinator position and allocating funds for instructional overload, we can ensure that our teachers are well-equipped to meet the needs of our schools and students, as the state continues to seek a long-term strategic response to teacher shortages.
-
- 4 NDCDE Office Space With the majority of NDCDE staff working remotely, there are questions regarding the necessity of our dedicated office space, which totals 7,325 square feet. Currently, five staff members regularly use the Fargo office, and two others use it intermittently to prepare equipment for mailing to employees. Additionally, we need a secure location for housing technology equipment and maintaining hard copies of personnel and finance records. The office includes five vacant offices, a reception area, a conference room, and two unused common spaces. In our efforts to maximize space utilization, NDCDE has diligently sought opportunities to share office space with other state or local government agencies. We have explored moving into the EduTech offices, among other options. Although no arrangements have been finalized, we have identified the School for the Blind and the School for the Deaf as potential partners. These schools currently share a small office in Fargo, leased through spring 2025, and have expressed interest in occupying our empty offices and sharing the lease. Cost savings from this potential arrangement could be reallocated to travel expenses, with the majority of the NDCDE workforce now remote and the need to meet in person periodically for planning purposes. By pursuing this collaborative approach, NDCDE aims to ensure efficient use of state resources while continuing to meet our operational needs.
-

Critical Issues

- 5 Administrative and Technology Salaries As highlighted in our major accomplishments, the generous equity package allocated by the legislature, along with the appropriation for merit increases, has enabled us to raise pay for our teachers to market-competitive rates. While the salaries for our administrative and technology staff have improved, they remain below market standards, and nearly all our staff (83%) remain below the median grade for their salary range. On the operations and administrative side of our virtual school, employee salaries are significantly below market rates for both the education and technology sectors. This disparity is poised to create compression issues across the agency, potentially diminishing the positive impact of the 2023 equity increase. Furthermore, this salary gap threatens our ability to retain our highly dynamic leadership team in the long term. NDCDE has not presented a decision package on this matter but strongly advocates for another round of equity funding to assist with remedying these disparities.
-

Performance Measures

The program uses the following as performance measures:

1. Student information is accurate in Genius regarding diploma program status
2. Student has up-to-date transcripts within Genius/SharePoint
3. Guidance Team Member works with the student to create course plan
4. Guidance Team Member works with student throughout time in the program to develop plans for after high school
5. Any optional diploma student must have signed recognition in the file

NDCDE continues to meet these operational goals. With a new dean of students overseeing this program, additional funding requested for homeschool students to take courses through NDCDE, and our move to competency-based education, we intend to set goals for this program related to enrollment growth, student support and student outcomes for the next biennium.

Program Statistical Data

In the 2023-24 academic year, the NDCDE Diploma Program saw 45 new students enter the program, with 41 from North Dakota and 4 from out of state. The program achieved a significant milestone with 40 students graduating, including 37 from North Dakota, marking the second-largest graduating class since the 2017-18 school year. This represents an increase from the 38 graduates in the previous year. On average, each student took 15 classes, consistent with the previous year's average. The average GPA of graduates was 3.30, slightly up from 3.29 in the previous year. Notably, 43% of students completing the program exit form plan to attend a 4-year university.

The program's success is highlighted by student testimonials praising the accessibility, comprehensive nature, and supportive communication provided by the NDCDE Diploma Program. Detailed statistics and student feedback are included in the attached NDCDE Diploma Program Stats Report.

Explanation of Program Costs

NDCDE offers a comprehensive K-12 curriculum along with a dedicated diploma program designed for homeschooled students seeking verification of their learning from an accredited institution, particularly for college admission purposes.

This diploma program allows homeschooled students to enroll in the same high-quality courses as North Dakota students who take our courses on a supplementary basis. As a result, NDCDE has been able to operate this program with minimal additional resources, managed under the Counseling Department Budget.

Sustainability and enrollment growth has been challenging due to the financial barriers faced by homeschooled students, who must self-pay for their courses (as HB 1376 does not apply to this group). This year, those barriers were heightened by our tuition increase. To address this issue, we have included highlights from the program to demonstrate its benefits to North Dakota students and have proposed a decision package with our budget request. This package aims to cover tuition for homeschool students enrolling in NDCDE courses, which we believe will increase growth and accessibility of our diploma program.

Program Goals and Objectives

The NDCDE diploma program has the following general goals:

1. Help students have a successful experience at NDCDE and eventually earn a diploma
2. Ensure a safe learning environment for students

NDCDE collects data on graduation rates to help measure the first goal and conducts program exit surveys to evaluate the second goal. We aim to refine the program goals and objectives in addition to the performance measures for the next biennium as described in more detail below under the performance measure section.

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As outlined in our major accomplishments (MA-02) and our critical issues (CA-01), NDCDE has experienced rapid growth as a result of the virtual school choice legislation (HB 1376) passed in the 2023 session. Due to these increases in enrollment and changes to our tuition costs, NDCDE will exceed its revenue projections by at least \$1.8 million this biennium (see major accomplishment MA-03). These enrollment increases necessitate seeking Emergency Commission approval this fall to spend more of our earnings to cover temporary teacher salaries. Looking forward to the new biennium, we anticipate continued record enrollments, forecasting 27,000 enrollments for the 23-25 biennium—a 6% increase from our projected enrollments for the 23-25 biennium as we enter its second year. Our enrollments are variable and unpredictable because students can sign up for NDCDE courses year-round. As word spreads about the option for students to take our classes for free by registering through their North Dakota school district and with our new internal efforts to coordinate with schools by hiring a dean of students, we anticipate reaching our 27,000-enrollment goal. This increase necessitates the use of revenue generated

204 Center for Distance Education

Agency 204

through enrollment to cover adjunct salaries and operational expenses. Therefore, we are requesting to spend the tuition revenue we earn over the next biennium, currently estimated at \$6,663,000.

In addition to this growth, as outlined in major accomplishment MA-01 and critical issues CA-02 and 03, internal quality improvement initiatives, the need to upgrade technology equipment, and external demands due to statewide teacher shortages necessitate using our increased tuition revenue to bolster mission-critical initiatives. Specifically, we have earmarked a portion of our projected revenue to cover overload when our teachers are teaching hybrid courses to assist school districts with teacher shortages (CA-03). Funds are designated within our technology equipment line for replacing laptops and purchasing new technology to keep pace with innovation. Additionally, we have allocated funding in our professional services budget to cover consultation costs for upgrading our student information system to report on student proficiency in course standards (MA-01).

Necessary resources for implementation (including FTE's)*: Additional FTEs needed to support NDCDE's growth are outlined in separate decision packages. The spending authority requested in this package will primarily be used to allocate more instructional hours to our adjuncts to help cover increased enrollments, cover overload for hybrid teaching, pay consulting fees for our student information system competency-based education upgrade (a one-time expenditure), curricular licensing fees that increase with growth, additional funds to cover credit card transaction fees consonant with sales volume, computer equipment upgrades, and funds to support an annual planning retreat in Fargo for our full-time employees as part of our quality improvement efforts.

Are resources being redirected or are they new or additional (including FTE's)*: The professional services line was reduced in our base budget but increased overall with the bulk now proposed to be covered with our special spending authority. The remainder of the spending will be new, driven by growth, efforts to improve our services, and addressing school district teacher shortages.

Who is served and impact of not funding*: This increase in NDCDE's spending authority will have no impact on the general fund. It will enable us to meet increased enrollment demands due to virtual school choice legislation, allowing NDCDE to continue delivering high-quality education to North Dakota students and maintaining high stakeholder satisfaction as achieved in the 2023-25 biennium and as summarized in major accomplishment MA-02.

DA2: Additional FTEs (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Due to NDCDE's growth, we have hired 12 temporary full-time teachers and staff this year. We intend to keep most of these positions on temporary status to determine over the next biennium if our growth will be sustained and, generally, have accounted for

these temporary salaries in our base budget. Upon careful review of our staffing needs, we have identified only 2.2 FTEs that are critical to operations or carrying out initiatives and are positions that we need to be sustained with general funds based on our enrollment projections for the next biennium. The rationale for each is described in detail below:

Enrollment and Office Support Specialist: This full-time temporary position was created in July 2024 due to the need to hire an administrative assistant to process incoming enrollments and adjustments to them, answer phones, monitor teacher enrollment capacity, and assist with basic accounting functions such as recording deposits and posting payments in our online billing system. The NDCDE human resources director has performed these tasks for the last few years but with our growth needs to dedicate 100% of her time to human resources duties. This temporary full-time position was filled in July 2024, and we are now asking to convert it to an FTE and move it under our general fund appropriation. A full job description is attached. To further support the need for this position, enrollment trend data are included as an attachment.

.2 FTE and Increase to Salary for Position Number 00029450: In response to growth and the number of new NDCDE initiatives contingent on our IT team, in Fall 2024, we used a vacated .8 FTE to create a new systems administrator supervisor position and are currently advertising to fill it. The .8 FTE position was vacated by a staff member in June 2024 who moved into an open full FTE position. We find that filling an .8 FTE position is difficult, with most employees wanting 100% full-time work, significantly extending the timeframe for recruiting and hiring for this salary line each time it comes open. While we hope to find a candidate for the .8 FTE position, we are asking for an additional .2 to be added to it and the salary line to be increased with general funds to reflect the position's current advertised grade of a 206. The job description is attached, and while currently written for a .8 FTE, additional hours would be added to allow more coverage of the duties listed in it, particularly during afternoons and evenings when the majority of our teachers and students are engaged in their NDCDE courses. To further justify the need for this position, data is attached showing the increase in help desk tickets during the 2023-24 fiscal year when NDCDE experienced significant enrollment growth.

Hybrid Learning Coordinator: The full justification for this position is highlighted in critical issue CA-03 and relates to requests made of NDCDE in response to statewide teacher shortages. To summarize, North Dakota schools face significant teacher shortages, leading to reliance on NDCDE for interim instructional support through a hybrid virtual model. This approach includes live instructional sessions, supplemented by asynchronous learning, and supported by classroom paraprofessionals. Adapting to this model has increased teacher workloads as they coordinate with paraprofessionals, adjust curricula, and monitor student progress. To address these challenges, NDCDE proposes a new Hybrid Learning Coordinator position. This role will research and train on the best hybrid delivery practices, coordinate learning and progress monitoring, assist in hybrid delivery curriculum adjustments, and teach in shortage areas. By establishing this position, we can better support our teachers, allowing them to focus more on instruction and less on the administrative tasks associated with hybrid delivery, ultimately enhancing educational outcomes for our students. A job description for this position is attached.

Necessary resources for implementation (including FTE's)*: The positions tab outlines the costs of these 2.2 positions, which include salary and benefits. These are the only foreseeable expenditures associated with this decision package.

Are resources being redirected or are they new or additional (including FTE's)*: The FTT position is currently funded by our special spending authority in our base budget. Under this decision package request, it would be instead covered by general funds. Cost savings under our special spending authority will likely be used for adjunct instructional hours in lieu of capping out-of-state enrollments should our enrollments exceed our projections in the next biennium. The .2 and hybrid learning coordinator positions are new general fund requests.

Who is served and impact of not funding*: Two of these positions will help NDCDE directly respond to growth and the demand placed on our support offices to respond to the business side of our operations, helping the organization serve students more efficiently while helping prevent employee burnout, with members of our administrative team currently wearing many hats to keep up with the demands placed on services such as course enrollments and help desk tickets. By supporting these critical positions, we can ensure NDCDE's continued ability to meet the educational needs of our students and support our staff effectively.

DA3: Military Pathway and Homeschool Tuition Programs (Priority: 03)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Tuition Assistance Programs Introduction

NDCDE is seeking legislative appropriation to support two new programs with tuition assistance components: the Virtual Military Pathway Program and a tuition assistance program for homeschooled students. These initiatives aim to provide equitable access to quality education, address current disparities, and prepare students for future academic and career success. By funding these programs, North Dakota will ensure that all students, regardless of their schooling background, have the opportunity to benefit from educational programming that may otherwise be unavailable or cost-prohibitive to them.

Virtual Military Pathway Program

Program Overview: The Virtual Military Pathway Program is designed to prepare students for careers in military service and fulfill requirements under the North Dakota Choice-Ready Framework. This program will provide structured, high-quality courses that enhance students’ knowledge and skills in military-related areas and is based on the Arkansas Military Service and Security Pathway, a program delivered by a state virtual school developed with significant input from the National Guard on curricular standards and content. NDCDE intends to receive this input from the North Dakota National Guard to ensure its programming aligns with our state’s military needs.

Similar to the Arkansas program, the objectives for the NDCDE military pathway program will be as follows:

Support LEARNS Act Priorities:

The program aligns with the LEARNS Act by promoting civic responsibility, career readiness, and personal development. It supports the state’s commitment to fostering a well-informed and skilled citizenry.

Enhance Knowledge and Awareness:

Students will gain a deep understanding of military structures and career options, receive ASVAB test preparation, and complete a physical fitness readiness course.

Address Workforce Needs:

The program addresses critical workforce needs in the military and national security sectors by preparing students for careers in these fields. It ensures that North Dakota has a pipeline of qualified individuals ready to serve in these essential roles.

NDCDE is building the framework for the program now and anticipates developing the first two courses in the pathway during the 2024-25 school year. It aims to ensure that courses fulfill either a CTE elective or core high school educational requirement to allow students to progress toward fulfilling North Dakota high school graduation requirements while also completing the military pathway.

NDCDE is seeking funding to cover curricular development and instructional costs for 25 students participating in the program in 2025-26 and 25 more in 2026-27. Eligibility standards will be developed in consultation with the North Dakota National Guard.

Homeschool Tuition Assistance Program

Program Overview: Under 2023 HB 1376, North Dakota public school students can attend NDCDE courses with costs covered by their schools, but homeschool students are excluded. This program addresses this inequity by providing tuition assistance for homeschooled students. More specifically, in 2025-26, NDCDE aims to offer up to 50 homeschool students the option to take up to 10 classes at no cost and would expand to 50 additional students in 2026-27.

Objectives:

Equitable Access to Education:

Homeschool students in North Dakota currently face financial barriers to accessing NDCDE's comprehensive K-12 curriculum and diploma program. This appropriation would level the playing field, giving these students the same access to quality education and the ability to verify their learning through an accredited institution, which is crucial for college matriculation and career readiness.

Support Educational Goals:

NDCDE's diploma program is designed to help students achieve academic success and prepare for higher education or career opportunities. By covering tuition costs, the state would be investing in the educational advancement of homeschooled students, ensuring they receive the same high-quality education as their public school counterparts.

Income-Based Assistance:

Assistance will be based on income eligibility standards similar to those used under the North Dakota Student Financial Assistance Program established in NDCC Ch. 15-62.4. Adopting these standards ensures that the assistance is directed toward families who need it the most, maximizing the impact of the funds.

NDCDE is seeking funding to cover curricular licensing fees and instructional expenses for students participating in this program based on a projection of 1500 enrollments (50 students taking 10 classes in year one and 100 students taking 10 courses in year two).

Necessary resources for implementation (including FTE's)*: The combined legislative appropriation request for the Virtual Military Pathway Program and the Homeschool Tuition Assistance Program amounts to approximately \$513,000 over two years. The largest expense will be the cost of instruction, equal to 6600 hours based on the

204 Center for Distance Education

Agency 204

number of projected enrollments in these programs, and the cost of curriculum review and development, 2000 additional instructor hours. The second largest expense is curricular licensing fees for courses NDCDE purchases from a vendor and customizes in-house, which require NDCDE to pay a per-user licensing fee. NDCDE has also built software and consultation costs into this budget to cover anticipated expenses associated with building and/or enhancing vendor-purchased curriculum and a small budget for advertising these new programs.

Are resources being redirected or are they new or additional (including FTE's)*: The majority of the expenses included in the budgets for these programs build on costs included in the NDCDE base budget. The only new items that may be included in this decision package may be software purchased to help build or enhance military pathway curricula.

Who is served and impact of not funding*: These initiatives will ensure that all North Dakota students have access to high-quality educational resources, regardless of their schooling background. By investing in these programs, the state will promote educational equity, support workforce development, and prepare students for future success.

Large IT Project Summary

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota Center for Distance Education (NDCDE) is seeking funding to potentially upgrade or replace its current Learning Management System (LMS). This request is based on the ongoing LMS Needs Assessment project, which aims to evaluate the

strengths, weaknesses, and areas for improvement of the existing system. The objective is to ensure our LMS meets the evolving needs of our organization, enhancing teaching and learning experiences.

The NDCDE's LMS is integral to delivering high-quality education to students remotely. With rapid advancements in educational technology and the changing needs of our students and staff, it is essential to assess and potentially upgrade our LMS to maintain and enhance our educational standards. A modern, efficient LMS will support our strategic goals by improving operational efficiency, educational delivery, and aligning technology with our organizational vision and help ensure that the organization can continue to work with the highest quality vendors who produce curriculum compatible with our LMS and that NDCDE can integrate the latest technology into the online learning experience such as real-time tutoring and predictive analytics-based student academic risk detection tools.

Necessary resources for implementation (including FTE's)*: NDCDE will need a one-time general fund appropriation to cover the cost of purchasing a new LMS. Based on initial estimates, this cost will be around \$350,000. It will then have new ongoing costs due to increased licensing fees per user under a new LMS. As NDCDE completes its needs assessment and moves into the procurement process, this number could change based on NDCDE's specific needs.

Are resources being redirected or are they new or additional (including FTE's)*: NDCDE currently pays a per-student licensing fee for its LMS, which is a cost that will continue to be part of our base budget regardless of the LMS we use. New one-time spending is needed for the initial purchase of an LMS and then additional sustained dollars are needed to cover the increased licensing fees per user with a new LMS.

Who is served and impact of not funding*: Beneficiaries of this upgrade include the following:

Students: Enhanced learning experiences through improved user interfaces, accessibility features, and interactive tools.

Teachers and Staff: Streamlined workflows, better resource management, and effective communication tools.

NDCDE: Alignment with strategic goals, improved productivity, and data-driven decision-making capabilities.

Other stakeholders: One CTE Center and several driver's education instructors use our LMS to house their curricular content. They will benefit from the upgrade for the same reasons that a new LMS will help our students and teachers.

The LMS Needs Assessment project is critical to maintaining and enhancing the quality of education provided by the NDCDE. NDCDE is currently thoroughly evaluating our current system and identifying areas for improvement, so that we can ensure our educational technology infrastructure supports our strategic goals and meets the needs of our students and staff. We request the legislature's support in funding this initiative to secure our agency's robust and future-ready LMS.

Start Date (MM/DD/YYYY): 07/01/2024

End Date (MM/DD/YYYY): 12/31/2025

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* Enhanced Educational Delivery: Improved tools and functionalities will facilitate better instructional delivery and student engagement.

Increased Efficiency: Streamlined administrative and instructional processes will reduce time and effort spent on technical issues.

Improved User Experience: A more intuitive and user-friendly LMS will enhance satisfaction and usability for both students and staff.

Data-Driven Decisions: Enhanced analytics and reporting capabilities will support better decision-making and educational outcomes.

Project Risk:* The primary risk is the potential misalignment between the new LMS capabilities and our agency’s specific needs. As shown in the attachment labeled NDCDE ecosystem, NDCDE has a complex technology ecosystem necessary to operate our virtual school. This is why NDCDE is currently engaged in an in-depth needs assessment (see LMS Needs Assessment Review Plan attachment), ensuring that if a new LMS is recommended, it will integrate well with our ecosystem. If a new LMS is needed, NDCDE will need to reprioritize projects to ensure that staff can oversee the transition to this new system in a timely manner.

Issue/Solution:* As already identified, the biggest potential issue is identifying an LMS that works within our technology ecosystem, which is already underway and is an issue overcome by in-depth vetting by our instructional technology committee. The second hurdle to overcome will be finding a vendor with the LMS technology tailored to our needs and willing to work through the alternative procurement, state contracting, and state security audit process--hurdles we commonly experience when purchasing technology and curriculum for our agency.

**Special Funds Agency Summary
Independent Study Operating**

	2021-23	2023-25
Beginning Fund Balance	-	913,566
Revenues and Net Transfers	7,013,566	6,588,000

Statutory Authority

ND Constitution Article VIII, Section 6; North Dakota Century Code Chapter 15-10.

Agency Description

The North Dakota State Board of Higher Education (SBHE), established in 1939 by the voters of North Dakota, is the governing body for the state's 11 publicly funded institutions which comprise the North Dakota University System (NDUS). The SBHE carries out its constitutional responsibilities through a comprehensive set of policies. The Chancellor serves as the NDUS' chief executive officer. The Chancellor and the system office staff support the SBHE in developing public policy for the NDUS, in advocating on its behalf, and fostering shared leadership throughout the system.

Agency Mission Statement

The mission of the NDUS is to enhance economic growth, social vitality, and quality of life for North Dakota through the discovery, sharing, and application of knowledge. The Chancellor's Office supports the SBHE in developing public policy for the governance of the NDUS and in advocating on behalf of the System.

Major Accomplishments

- 1 Developed strategic initiatives through Envision 2035, wherein nine study groups focused on the long-term future of their topical areas to create a plan for higher education to meet the needs of both students and North Dakota's workforce in the next decade.
- 2 Funded at \$6.8 million, the ND Career Builders Scholarship & Loan Repayment Program has produced 435 ND workers in in-demand occupations since inception. There have been 171 unique private sector donors committing to the required match, totaling \$2.4 million. This program boasts a retention rate near 90 percent. Eighty-seven percent of scholarship recipients are currently either in a qualifying program that leads to an in-demand occupation or currently working in an in-demand occupation within North Dakota. Eighty-nine percent of loan repayment recipients are currently working in in-demand occupations within North Dakota.
- 3 Nineteen percent increase in appropriation for state financial aid programs, including a 25 percent increase to the need-based State Grant.
- 4 Challenge Grant funded at \$20M. The Challenge Grant was established by the state legislature to match private donations made to state college foundations.
- 5 Since July 2021, the SBHE Academic and Student Affairs Committee has approved 210 new academic programs for NDUS institutions, with 142 of these being in-demand certificate programs.
- 6 In April 2023, the North Dakota University System (NDUS) saw an increase in student retention rates for the 2023 school year. Systemwide, retention was at 75%, rebounding to match pre-pandemic levels in 2018 and 2020.
- 7 Meeting a strategic priority for the SBHE, 19 percent of students systemwide transferred in 2023 from one NDUS institution to another institution within the NDUS to complete or continue their studies within North Dakota.
- 8 In 2022, the University System's student loan indebtedness was lower than the national average.
- 9 Dakota Digital Academy reported that 69 cyber science programs are currently being offered among NDUS institutions with more being added next year.
- 10 A record number of 5,240 high school students enrolled in NDUS college courses for the Fall 2023 semester.
- 11 The NDUS experienced its highest systemwide graduation rate at 57 percent, which is an 8 percent increase over the past decade. NDUS 2-year colleges had a combined graduation rate of 48 percent while the 4-year universities had a 61 percent combined graduation rate. Both of those were higher than the national averages for public institutions, which were 31 percent for 2-year colleges and 59 percent for 4-year universities.

Major Accomplishments

- 12 Implemented digital literacy graduation requirements of all associate and baccalaureate-level applicants entering the fall semester of 2024.
- 13 Legislative funds supporting shared services were used to host the 2024 Statewide OER Conference. Distributed a total of \$111,500 to institutions during 2023 to support OER expansion.
- 14 The U.S. National Science Foundation awarded a \$15 million grant to a team led by North Dakota State University and several other partners, including the North Dakota Tribal College System. The grant has the potential of totaling \$160 million over 10 years.
- 15 The NDUS is part of a regional clean energy project that received a federal funding award for up to \$925 million. The University of North Dakota will partner with the Heartland Hydrogen Hub to produce low-carbon hydrogen, decarbonize regional supply chains, and create clean energy jobs across Minnesota, Montana, North Dakota, South Dakota, and Wisconsin.
- 16 NDInsights continues to be the state's official source for information about public education. This is a collaborative project with the state's ND Information Technology Department and the Department of Public Instruction.
- 17 NDUS Institutions and Core Technology Services of the NDUS completed a 9-month ERP market analysis on the present ERP system called PeopleSoft (finance system, human capital management system, and student information system). The analysis included a consultant-led "Current State" assessment, open discussions/interviews with other universities and higher education systems that have or are in the process of implementing an ERP change, and vendor value assessments designed to evaluate and communicate the benefits and value that a specific software solution can bring to NDUS. The ERP Market Analysis Governance committee agreed that NDUS should modernize its ERP and transfer to the cloud by 2035. The recommendation was made to both the Chancellor's Cabinet and the SBHE. The recommendation was included in Envision 2035.
- 18 Designed a NDUS AI Policy Assistant designed to help NDUS students, faculty, and staff find relevant Policy.
- 19 NDUS institutions during the 2022-2023 academic year issued \$131.9 million to students in scholarships, grants, and waivers.

Critical Issues

- 1 Understanding and adapting to the AI/intelligent machine transformation that is reshaping teaching and learning.
- 2 Maintain and manage both digital and physical infrastructure.
- 3 Meeting student course delivery needs by implementing a dynamic enrollment environment.
- 4 Maintaining and increasing enrollment and retention through new programs and educational pathways.
- 5 Addressing challenges in talent recruitment and retention for faculty and staff in changing inflationary conditions.
- 6 Continuing to address the near- and long-term workforce needs of the state.
- 7 Furthering development and access to IT capabilities to maximize student success and system-wide collaboration.
- 8 Sustaining and increasing efforts to consolidate IT systems and business services that are cost effective and provide value.
- 9 Responding to behavioral health needs of the students to promote vibrant, healthy campuses with increased retention and graduation rates.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the SBHE's vision and strategic plan. These data systems, including Dashboards, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more.

Program Statistical Data

SYSTEM GOVERNANCE:

The NDUS Office Provides advice to the SBHE and campuses on system policy development and administration, including institutional missions, program offerings, student affairs, personnel and fiscal operations, budget development, computing, capital construction, financial aid, and all other administrative and academic functions; acts as representatives of the NDUS to governmental bodies and the general public and monitors legal issues applicable to higher education. Core Technology Services implements, maintains, and improves over 50 consolidated technical solutions used by all NDUS institutions and administers student and system grant programs.

CAPITAL BOND PAYMENTS:

This appropriation provides payments for ND general obligation bond indebtedness for the campuses. Outstanding bond indebtedness for the 2025-27 biennium is \$6.6 million principal and \$7.4 million interest on the 2020 bond issues. Bond maturity dates do not exceed 12/1/2040.

EPSCOR [Established Program to Stimulate Competitive Research]:

The effectiveness of the ND EPSCOR development plan is best indicated by the ability of EPSCOR-supported researchers to compete for external awards:

1. The 2021-23 general fund investment of \$5.686M ND EPSCOR [via NDUS] has resulted in \$15.104M to date in extramural principal investigator grants.
2. Over the life of ND EPSCOR, 1985-2023, the state's investment of \$74.9M has resulted in over \$465.9M in merit-based extramural grants—a 6.42:1 Return on Investment.*
3. ND EPSCOR has provided research opportunities for 4,332 K-12 students, 1,076 post-secondary students, and 649 faculty since 2014. Many of the students report that these "hands-on" experiences made them more "job ready," as well as more competitive for positions after graduation.
4. Six federal agencies have EPSCOR funding programs available for faculty: NSF, NIH (via the sister IDeA program), NASA, USDA, DOE, and DoD. *To maintain consistency from prior years reporting, ROI is reported as the amount of new funding received from external sources divided by the investment by legislature.

STUDENT MENTAL HEALTH INITIATIVE:

Mental Health First Aid (MHFA) program has trained five facilitators and provides an average of 10-15 MHFA trainings each year for students, faculty, and staff. Telemental health services are provided to all students through our partner Northern Prairie Community Clinic in Grand Forks. Crisis intervention on each NDUS institution is available through a Behavioral Intervention Team. A standing contract with FirstLink (211/988) provides after-hours crisis prevention for the institutions. Internship opportunities to counselors and supervision costs for newly licensed counselors is provided.

Substance Misuse Prevention and Outreach has an online education module called Electronic CHECKUP TO GO (eCHUG), an evidence based, best practice tool to address alcohol misuse. A biennial systemwide survey assesses students' use and perceptions regarding alcohol, tobacco, and other drugs; mental health, sexual assault; and general health and well-being.

Sexual Assault Prevention and Outreach provides training to all Title IX staff regarding trauma-informed investigation strategies and how to best provide outreach and mental health resources to those impacted by sexual assault.

NURING CONSORTIUM:

The nursing consortium funding supports 13 universities in North Dakota. Among the 13 universities there are 381 practical nursing students, 1634 registered nursing students, and 54 certified registered nurse anesthetists.

STUDENT FINANCIAL AID:

NDUS administers the state grant, scholarship, and loan repayment programs by collecting and processing applicant data, evaluating eligibility, awarding recipients, and issuing payment for all programs covered under the student financial aid programs. Records are maintained according to retention guidelines. Additionally, the NDUS Office of Financial Aid provides training to high school and post-secondary personnel on the program rules and procedures and responds to all inquiries on the state student aid programs, and markets the ND Career Builders program to employers. See attached "Student Financial Aid Statistical Data Attachment".

VETERANS ASSISTANCE PROGRAM:

Over the four most recent biennia, the VET program has directly assisted 636 ND veterans to prepare for and manage the ongoing challenges of college through the NDSU and UND VET program sites. Of those, 72% have completed or are still actively pursuing an undergraduate or graduate degree (as of Feb 2024). See attached "Veterans Assistance Program Statistical Data".

Explanation of Program Costs**SYSTEM GOVERNANCE:**

NDUS Office budget supports the state funded salaries, operating and equipment expenses. The salary budget includes the operating expenses and per diem reimbursement for State Board of Higher Education members. The 2025-27 base budget request totals \$10,314,421, of which salaries and benefits comprise \$9,199,678, or 89.2%. The 2025-27 request supports 25 FTE. Travel, dues and professional development, professional services, and specific ongoing projects, including accountability surveys and reports are the major components of the 2025-27 \$1,114,743 operating expense budget. The 2025-27 budget request includes additional base budget requests of \$319,003 to restore the 3% budget reduction; \$319,003 for inflation increases; \$273,180 Financial Aid system licensing and maintenance; and \$143,000 for an Internal Audit Software.

CAPITAL BOND PAYMENTS:

Base funding of \$10,261,375 is included in the budget request for capital bond payments, which was provided by the Industrial Commission and is the actual payments scheduled for the 2025-27 biennium.

CORE TECHNOLOGY SERVICES (CTS):

The total 2025-27 base budget request for CTS equals \$70,833,307. General fund is \$45,968,235 and \$24,865,072 is from special funds. The budget supports salaries and fringe benefits support for 143.83 FTE. Other special fund sources include: ConnectND fees; charges to campuses and non-NDUS entities for IT services; and charges to ODIN libraries for maintenance and enhancement of ODIN and access to electronic databases and subscriptions. The 2025-27 budget request includes additional base budget request of \$1,421,698 to restore the 3% budget reduction, \$1,421,698 for inflation increases, \$3,000,000 for Artificial Intelligence and Machine Learning, \$5,146,200 for NDIT Security Solutions that support the NDUS, and \$1,100,000 for Financial Aid Enhancement/Title IV Course Auditor software.

SHARED CAMPUS SERVICES:

The 2025-27 base budget request for NDUS Shared Campus Services is \$800,000, this funding provides \$600,000 for membership dues for the Western Interstate Commission for Higher Education (WICHE) and the Midwestern Higher Education Compact (MHEC) with remaining funds to campuses for open educational resources and other shared services. The 2025-27 budget request includes an additional base budget request of \$200,000 to continue the support of share services between institutions.

EPSCOR:

The 2025-27 general fund base request is \$5,685,750 for the EPSCOR Program and \$342,000 for the NASA EPSCOR Program, which is unchanged from current funding level. Accessing the federal EPSCOR funds requires a cash match from the state and appropriate human infrastructure in place to oversee all the administrative, education and workforce, and outreach requirements of the federal awards. UND and NDSU receive the federal funds directly and the federal funds are not included in the NDUS Office budget request.

STUDENT MENTAL HEALTH (SMH) INITIATIVE: The 2025-27 general fund base request is \$284,400. This funding is used to provide the NDUS institutions SMH Services. The budget priorities for SMH is the Mental Health First Aid (MHFA) program, providing 211/988 after hours crisis prevention, funding internship opportunities, substance misuse prevention and outreach, responding to federal compliance, and sexual assault prevention, training for staff, and outreach.

NURSING CONSORTIUM:

Since 2009, the Nursing Education Consortium has received funding to support high virtual simulation technology across all nursing programs in ND. This support has been instrumental to increasing student's ability to practice critical nursing skills. The total 2025-27 base budget request is \$1,356,000. The 2025-27 budget request includes an additional base budget request of \$2,049,000 to expand the support of the Nursing Education Consortium through additional simulation equipment and operational costs.

STUDENT FINANCIAL AID PROGRAMS:

The ND Student Financial Assistance Program (State Grant) projection indicates a shortage in base funding of \$1,000,000 and \$1,000,000 to allow non-ND high school graduates to qualify for the scholarship if they are ND residents. The Professional Student Exchange Program (PSEP) projection indicates a shortage in base funding of \$1,500,000. The Dual-Credit Scholarship Program requests one-time funds be continued in the amount of \$1,500,000.

Program and amounts are Student Financial Assistance Program \$31,917,306; ND Scholars Program \$1,807,115; ND Academic, CTE and ND Scholarships \$17,216,749, Native American Scholarship \$1,000,000; Dual Credit Tuition Scholarship \$1,500,000, Professional Student Exchange Program (PSEP) \$5,199,342; Education Incentive Program \$260,000; and Tribal College Assistance Grant \$1,400,000. See "Student Financial Aid Program Cost Details" in attachments.

VETERANS ASSISTANCE PROGRAM:

The 25-27 biennium base budget request totals \$454,875.

Program Goals and Objectives

SYSTEM GOVERNANCE:

The SBHE is responsible for the overall management and control of the institutions and entities of the North Dakota University System. The System Governance appropriation program provides funding for the expenses/operations of the SBHE and System Office functions needed to carry out the SBHE's constitutional and

statutory responsibilities to include approval of new programs, state authorization and renewal, cost saving initiatives, the administration of surveys and data collection, and coordinated statewide training.

CAPITAL BOND PAYMENTS:

To provide payments for ND general obligation bond indebtedness for state bonded capital projects on the campuses of the NDUS.

CORE TECHNOLOGY SERVICES (CTS):

CTS delivers technology-based resources and services to NDUS institutions, students, faculty, and staff. CTS implements, maintains, and improves over 50 consolidated technical solutions used by all NDUS institutions. These solutions include student information systems, learning management systems, comprehensive human capital management systems, comprehensive financial management systems, and information security systems. CTS goals and objectives are to support North Dakota University System infrastructure needs, improve NDUS information technology-enabled business processes and services, and improve and enhance NDUS student learning and user's focus.

EPSCOR:

EPSCOR's (Established Program to Stimulate Competitive Research) purpose is to improve research in states that have historically fared poorly in their efforts to attain federal funding. Funded through federal-state-private sector partnerships, ND EPSCOR manages a comprehensive research development plan that involves Infrastructure Improvement Programs, Science Outreach and Recruitment Programs, Technology Transfer and Commercialization Programs, and Tribal Colleges Programs.

ND EPSCoR has been able to develop, implement and administer programming to increase STEM literacy and broadens research capacity in ND. Partnering with STEM stakeholders ND EPSCoR works to expand scientific discovery, innovation, learning, and knowledge-based prosperity for ND. Forty-five unique STEM lessons plans have been developed and are available for use by ND educators on the ND EPSCoR website and more than 4,000 students have been impacted by these lesson plans. The Students in Technology Transfer and Research Program (STARR) supports ND companies provide internship opportunities for college students by providing funds to help cover the cost of wages. During the summer of 2023, 26 ND college students interned at companies throughout ND. Support was provided to institutions in ND for equipment purchases, support for undergraduate research opportunities and enhancement of research competitiveness and sustainability in alignment with institutional strategic goals. The most recent public numbers (in FY 22) putting UND at \$147.7M and NDSU at \$174.9M. Reduction in state cash commitment would result in ineligibility for applying for federal funds and the reduction of a number of key infrastructure programs. Additional details can be found at <https://www.ndepscor.ndus.edu/>.

STUDENT MENTAL HEALTH INITIATIVE:

The Mental Health Task Force (MHTF) is a sub-committee of the Student Affairs Council and identified areas that the System Office can provide support, including, after hours crisis intervention and emergency services, education and training, support for Behavioral Intervention Teams (BITs), and psychiatric/medication management services.

NURING CONSORTIUM:

The nursing consortium was established to support nursing programs in North Dakota to advance nursing programs at all universities across the state with funding provided for simulator equipment and adequate faculty.

STUDENT FINANCIAL AID PROGRAMS:

North Dakota's student financial aid programs include Student Financial Assistance Grant (ND State Grant), ND Scholars Program, ND Academic, CTE, and ND Scholarships, Native American Scholarship, Dual Credit Tuition Scholarship, Skilled Workforce Scholarship and Skilled Workforce Loan Repayment (ND Career Builders), Professional Student Exchange Program (PSEP), Tribal College Assistance Grant, Education Incentive Program

See attached "Student Financial Aid Program Details" for additional requirements of each program.

MINNESOTA RECIPROCITY:

The reciprocity program with Minnesota (MN) allows ND resident students to take advantage of academic programs at MN state institutions at the MN resident rate. The rate is based on the program of instruction at the institution attended.

VETERANS ASSISTANCE PROGRAM:

The Veterans Educational Training (VET) was support by the 63rd Legislative Assembly through HB1289. Funds were appropriated to the NDUS to assist veterans who are enrolled or are in the process of enrolling at institutions in this state or an institution located in an adjacent state with a ND course exchange program.

215 University System

Agency 215

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each entity. A proposed 3% budget reduction would lead to staff layoffs alongside cuts to vendor contracts necessary to maintain quality services to institutions. Reducing staff, faculty, and academic programs would diminish the mission and ability to provide the needed workforce for North Dakota.

Our entities rely on base funding to plan and make strategic decisions for future services provided to institutions and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Our System has dedicated staff, whose expertise and commitment provide success in our System excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: No new FTE's, necessary to maintain current staff.

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: SBHE, Institutions, and students.

As described above.

Student Financial Aid System - M&O (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	273,180	-	273,180	0.00	273,180	-	273,180	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	273,180	-	273,180	0.00	273,180	-	273,180	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: A solution has been procured and contracted for off the shelf software that will be utilized by the NDUS Office and the NDUS institutions and anticipated to go live in early August 2024. An annual cost of \$273,180 is expected. The 68th Legislative Assembly

215 University System

Agency 215

provided one year of the annual maintenance and operating costs for the 2023-25 biennium with the expected development of FY24 not needing maintenance and operating costs. For the 2025-27 biennium, there will be two years of \$273,180 necessary to maintain and operate the software solution.

Necessary resources for implementation (including FTE's)*: The cost to maintain and operate the system is expected to be \$273,180 annually.

Are resources being redirected or are they new or additional (including FTE's)*: New, no additional FTE's.

Who is served and impact of not funding*: 12,000 eligible financial aid recipients and all North Dakota public, private and tribal institutions, CTS, and NDUSO.

NDUSO does not have adequate operating funding to cover the additional cost and would need to stop using the \$1.6M implemented system.

North Dakota State Grant (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The number of eligible students continues to increase because of a higher number of high school graduates resulting in the need to increase the appropriation.

Necessary resources for implementation (including FTE's)*: An additional \$1,000,000 to support the growth in eligible students.

Are resources being redirected or are they new or additional (including FTE's)*: Additional, no additional FTE's.

Who is served and impact of not funding*: Eligible students attending North Dakota institutions. NDUS would be required to pay the scholarships as the students are entitled to the scholarship by century code. The NDUS would request a deficiency appropriation to cover the deficit.

215 University System

Agency 215

Inflation Factor Increase (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	1,740,701	-	1,740,701	0.00	-	-	-	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to assist with increasing costs for utilities, IT, vendor contracts, and other costs to deliver services to the institutions assisting them in providing education to students.

Necessary resources for implementation (including FTE's)*: No new FTE's – to assist with increases in operating costs.

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: Institutions and students.

Increased costs could impact student tuition and fee charges.

NDIT Security Solutions (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	5,146,200	-	5,146,200	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	5,146,200	-	5,146,200	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

215 University System

Agency 215

Request explanation and justification (include any statutory authority)*: NDIT informed CTS the cost to continue to provide the NDUS with NDIT Security Solutions an additional \$5,146,200 per biennium. The additional costs are related to Cortex XDR Pro endpoints (increase \$2,104,800), 100TB Cortex Data Lake (increase \$1,577,400), and additional firewall licensing charges (increase \$1,464,000).

The cost to convert from NDIT to CTS's own would be enormous and require migrating out of 25 firewalls into new firewalls, reinstalling software on 21,000 endpoints, retraining staff, loss of threat hunting services, etc.

The funding could be included in NDIT's budget versus NDUS.

Necessary resources for implementation (including FTE's)*: An additional \$5,146,200 for increased NDIT Security Solutions. No new FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources.

Who is served and impact of not funding*: NDUS's 11 institutions, NDUSO, CTS.

Not funding our current detection and response solution can leave NDUS vulnerable to sophisticated cyberattacks and increase the time it takes to detect and respond to threats. Additionally, it can lead to higher operational costs and a greater risk of data breaches.

Dakota Digital Academy (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	450,000	-	450,000	0.00	-	450,000	450,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	450,000	-	450,000	0.00	-	450,000	450,000	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Dakota Digital Academy was formed to provide access to quality education and training to assist citizens, businesses and government agencies in North Dakota engage with and adapt to the changing demands and opportunities associated with the rapid digitization of our economy and society.

Expertise in computing and cyber sciences is of extremely high importance and demand in literally all private and public sector organizations and enterprises in North Dakota and beyond. Digitization of the economy and the special need for cybersecurity expertise produces workforce needs in the primary sectors of the economy, including energy, agriculture, government, services, health, transportation and medicine. The Dakota Digital Academy (DDA) was founded in the fall of 2020 to meet these needs. A priority of the DDA is to serve learners and job seekers who are unemployed, who wish to upgrade their skills while on the job; reinvent

their career; or who want to get a start in a technology career. Because the DDA spans all 11 institutions in the university system, expertise and capacity throughout the system is greatly leveraged.

The DDA is continuing to pivot its focus on the significant growth in artificial intelligence tools and systems. The use of AI for developing curriculum, tutoring students and streamlining operational/administrative functions is exploding. The DDA has responded with faculty development opportunities and grants. The DDA will continue to work in these areas while also focusing on how AI compute and storage resources can be harnessed for the NDUS, K12, state government, and private businesses in North Dakota.

Necessary resources for implementation (including FTE's)*: Funding of \$450,000 to continue providing accessible computing and cyber science education in North Dakota. No additional FTE's.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, no additional FTE's.

Who is served and impact of not funding*: North Dakota citizens and businesses.

High Demand Workforce Development (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	-	3,000,000	3,000,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Each North Dakota University System (NDUS) institution plays a pivotal role in maximizing the impact of advanced technologies, notably artificial intelligence and machine learning, across academic and administrative domains. As the technological landscape evolves, the competition for technical talent is intense, not only with larger academic institutions but also with the private sector.

In this competitive environment, it is essential for NDUS institutions to adopt multifaceted strategies to meet their distinctive workforce requirements. These strategies encompass the integration of student workers, who bring fresh perspectives and energy; apprentices, who combine learning with hands-on experience; internships, which foster industry connections and practical skills; and consultants, who provide specialized expertise on demand.

By leveraging these diverse workforce solutions, NDUS institutions can cultivate a robust, adaptable, and future-ready technical team. This approach not only addresses immediate staffing needs but also contributes to a sustainable talent pipeline, ensuring that NDUS keeps pace with educational and technological advancements.

215 University System

Agency 215

Acceptable uses of Funding:

- Student, part-time, full-time, and contracted employee salary and benefits directly related to high demand workforce needs.
- When talent is not available, contracting services is acceptable.

BSC, CTS, MiSU, NDSCS will receive \$300,000 each

DCB, DSU, LRSC, MaSU, VCSU, and WSC will receive \$150,000 each

NDSU and UND will receive \$450,000 each

Necessary resources for implementation (including FTE's)*: Additional staff for institutions and CTS (unknown number of FTE) or contracted services for high-demand workforce needs within institutions/CTS.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, additional FTE's.

Who is served and impact of not funding*: NDUS's 11 institutions, CTS, students

Ability for NDUS to fill high demand workforce positions.

Artificial Intelligence (AI) and Machine Learning (ML) (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,000,000	2,000,000	3,000,000	4.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,000,000	2,000,000	3,000,000	4.00	-	-	-	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Artificial Intelligence (AI) and Machine Learning (ML) will transform the institutions of the North Dakota University System (NDUS) by enabling personalized learning experiences and operational efficiencies. AI-driven systems can tailor educational content to meet individual student needs, adapting in real-time to their learning pace and style. This personalization enhances student engagement and improves learning outcomes. ML algorithms can analyze vast amounts of educational data, providing insights that help educators and institutions make informed decisions about

215 University System

Agency 215

curriculum development and student support services. Furthermore, AI and ML are essential for research, powering complex simulations and data analysis tasks that push the boundaries of academic inquiry.

The effective, consolidated use of AI and ML functionality will be pivotal in helping all NDUS institutions to be adaptive, responsive, and innovative leaders in the higher education sector. It is imperative that a system approach is used to ensure availability and impact at all eleven institutions.

Acceptable Use of Funding:

- Systems and services that directly relate to supporting the academic and administrative use of AI and ML functionality at all NDUS Institutions.
- Additional system level staffing to support AI and ML uses at all institutions.

Necessary resources for implementation (including FTE's)*: Resources of \$3,000,000 for increased academic/administrative systems and System Support Staff.

Are resources being redirected or are they new or additional (including FTE's)*: Academic and Administrative Systems: \$2,000,000

System Support Staff: \$1,000,000 (4 FTE)

Who is served and impact of not funding*: NDUS's 11 institutions, NDUSO, CTS

Potential of NDUS falling behind the nation in utilizing AI/ML capabilities.

Planned Obsolescence of Technical Infrastructure ñ Core IT Infrastructure (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,600,000	-	2,600,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	2,600,000	-	2,600,000	0.00	-	-	-	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Ongoing and planned investments in technical infrastructure such as network, compute, storage and classroom resources are crucial for institutions of the North Dakota University System (NDUS) to maintain a competitive edge and support the growing demands of education and research. In addition, effective information security is required in each of these areas and should be systematically addressed.

215 University System

Agency 215

Network infrastructure ensures reliable and fast connectivity, which is essential for accessing online resources, facilitating distance learning, and enabling collaboration across the globe. Computer resources provide the necessary capacity to deliver efficient administrative and academic systems that support the emerging needs of students, faculty and staff. Lastly, storage solutions are vital for securely managing the vast amounts of data generated by students and faculty, ensuring data integrity and availability.

Continuous investment in these areas at NDUS institutions is critical to support daily operations and leverage advanced AI/ML resources to support an environment conducive to learning, research, and the overall mission of the university.

Acceptable Uses of Funding:

- Network, Compute, and Storage Systems
- Information Security Systems
- Technology to Support Hybrid Classrooms
- Allocation based on institution approximate square footage.

Institutional Amounts:

BSC \$122,500

DCB \$36,000

DSU \$142,500

LRSC \$39,500

MaSU \$98,500

MiSU \$173,500

NDSCS \$200,500

NDSU \$744,500

UND \$911,500

VCSU \$77,500

WSC \$53,500

215 University System

Agency 215

Necessary resources for implementation (including FTE's)*: No new FTE's, all funds will be passed to NDUS institutions.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, no additional FTE's.

Who is served and impact of not funding*: NDUS's 11 institutions and students.

As stated above.

Nursing Education Consortium (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,049,000	-	2,049,000	0.00	-	1,100,000	1,100,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	2,049,000	-	2,049,000	0.00	-	1,100,000	1,100,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Nursing program simulation hours have increased by 420% between 2017 and 2022. Approximately 73% of ND pre-licensure program includes simulation as part of total clinical hours. In ND 91% of programs identified funding as the predominant barrier to increasing the use of simulation. The initial purchase price of one high-fidelity simulator ranges between \$65,000-\$85,000 and more advanced, highly realistic simulators can cost up to \$250,000 each. Additional funding is necessary to assist the nursing programs throughout ND to maintain and expand simulation equipment and training for instructors.

Necessary resources for implementation (including FTE's)*: An additional \$2,049,000 for increased simulation equipment and instructor training. No new FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources.

Who is served and impact of not funding*: Students, ND Institutions, Healthcare workforce.

ND nursing programs will have outdated equipment and faculty with little to no training on simulation equipment. Will create higher demand for onsite (hospital, clinics, etc.) nursing practicum hours in onsite locations, which are not available due to limited capacity.

Internal Audit Software (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	83,000	60,000	143,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	83,000	60,000	143,000	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Audit Software will fundamentally improve daily operations and increase the strategic value of the Internal Audit department, within NDUSO and can also be utilized by Internal Auditors at NDSU and UND. Based on testimonies from the users, Audit Software cut about 20% from the budgeted audit hours, allowing the small staff of internal auditors at NDUS to produce more valuable audits and process/internal control improvement consultant services.

Currently, NDUS Internal Audit uses TEAMS, Excel, and Word. The software would be a one resource point containing enterprise risk management, IT risk management, integrated audit and control management, auditing workpapers, audit responses, tracking audit find process from issuance to implemented changes/closure.

Necessary resources for implementation (including FTE's)*: One-time funding of \$60,000 for implementation of software and \$83,000 of base funding for ongoing software licensing.

Are resources being redirected or are they new or additional (including FTE's)*: New, no additional FTE's.

Who is served and impact of not funding*: 11 NDUS institutions, NDUSO, CTS.

Internal audit functions throughout NDUSO will continue manual processes that take more time.

North Dakota State Grant - remove ND HS Graduate requirement (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,000,000	-	1,000,000	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	1,000,000	-	1,000,000	0.00	-	-	-	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Eliminate ND High School graduation requirement from the State Grant criteria. The change allows ND residents who didn't graduate from ND high school the opportunity to access the State Grant program to attend ND institutions. This provides ND financial aid to reduce the cost of attendance to ND residents looking to upskill to fill the in demand workforce needs of ND.

Necessary resources for implementation (including FTE's)*: An additional \$1,000,000 to support removing the ND high school graduate requirement for the ND State Grant scholarship program.

Are resources being redirected or are they new or additional (including FTE's)*: New, no additional FTE's.

Who is served and impact of not funding*: Potential students who are ND residents but did not graduate from a ND high school.

Increase Shared Services (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	200,000	-	200,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	200,000	-	200,000	0.00	-	-	-	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request an increase in Shared Services. This line item provides funding for Open Education Resources (OER), Institution wide subscription to labor market data, ND WICHE dues, and MHEC dues. During the 2021-23 biennium the line item was increased by \$300,000 to cover WICHE and MHEC dues. WICHE and MHEC dues for the 2025-27 biennium are anticipated to be \$600,000. The Lightcast subscription is used

215 University System

Agency 215

systemwide for labor market analysis for establishing new programs and supporting existing programs (biennial cost approximately \$110,000). Looking to increase the shared services line to continue OER development and support institutions in other potential shared services where needed.

Necessary resources for implementation (including FTE's)*: Additional \$200,000 in resources.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources, no additional FTE's.

Who is served and impact of not funding*: 11 NDUS institutions, NDUSO, CTS.

OERs and other necessary shared services will need to continue to decrease as WICHE, MHEC, and Lightcast costs continue to increase year after year.

Dual Credit Scholarship (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,500,000	-	1,500,000	0.00	-	1,500,000	1,500,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,500,000	-	1,500,000	0.00	-	1,500,000	1,500,000	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Continue the same level of funding for the dual credit scholarship as the 2023-25 biennium to the 2025-27 biennium.

Necessary resources for implementation (including FTE's)*: Provide \$1,500,000 to support the dual credit scholarship

Are resources being redirected or are they new or additional (including FTE's)*: Continued, no additional FTE's.

Who is served and impact of not funding*: Eligible students attending North Dakota institutions.

Professional Exchange Program (PSEP) (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
General	1,500,000	-	1,500,000	0.00	-	1,500,000	1,500,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,500,000	-	1,500,000	0.00	-	1,500,000	1,500,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: To continue to fund the same number of slots (7 dentistry, 8 optometry and 12 veterinary medicine) plus returning students, an increase will be required of \$1.5M. This increase will support awards in the 2025-27 biennium, depending on program usage and tuition increases, additional appropriation in 2027-29 and beyond will be required.

Necessary resources for implementation (including FTE's)*: An additional \$1,500,000 to continue support of the same number of eligible students each year.

Are resources being redirected or are they new or additional (including FTE's)*: Additional, no additional FTE's.

Who is served and impact of not funding*: Eligible students attending institutions participating in the Professional Exchange Program. NDUS would need to reduce the number of slots in dentistry, optometry, and veterinary medicine.

Increase Special Fund Authority for System Governance (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	249,047	-	249,047	0.00	249,047	-	249,047	0.00
Total	249,047	-	249,047	0.00	249,047	-	249,047	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During the 2023 Legislative session the System Governance line was reduced to (\$64,262) in special fund authority as a result of the Legislature funding the Internal Audit and Compliance functions with general funds. However, System Governance pays for services

215 University System

Agency 215

that will benefit multiple NDUS entities in order to receive bulk pricing on services. Those items are billed back to the NDUS entities to pay a prorated share. System Governance needs special fund authority for these instances.

Necessary resources for implementation (including FTE's)*: No new resources or FTE.

Are resources being redirected or are they new or additional (including FTE's)*: No.

Who is served and impact of not funding*: NDUS entities.

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation				
		General Fund	Federal Funds	Special Funds	Total	FTE	General Fund	Federal Funds	Special Funds	Total	FTE
		1,100,000	-	-	1,100,000	1.00	900,000	-	-	900,000	0.00
11	Financial Aid Enhancement/Title IV Course Auditor	1,100,000	-	-	1,100,000	1.00	900,000	-	-	900,000	0.00

Financial Aid Enhancement/Title IV Course Auditor (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	200,000	900,000	1,100,000	1.00	-	900,000	900,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	200,000	900,000	1,100,000	1.00	-	900,000	900,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Federal Title IV Regulation limits federal financial aid eligibility to coursework that applies toward a student's degree. Campus Solutions, the current institutional processing system, does not support a solution for institutions to meet this federal regulation. A request for consideration of a third-party bolt-on product to accomplish this is being sought.

215 University System

Agency 215

To be eligible for Title IV funds, a student must be a regular student as defined in 34 CFR 600.2 of the Institutional Eligibility regulations. A regular student is defined as: "A person who is enrolled or accepted for enrollment at an institution for the purpose of obtaining a degree, certificate, or other recognized educational credential offered by that institution." Therefore, the school cannot award federal Title IV aid for credit hours/course work that will not count towards the completion of that student's degree program requirements (or otherwise result in a degree, certificate, or credential).

Necessary resources for implementation (including FTE's)*: One-time funding of \$900,000 for implementation of software and \$200,000 of base funding for ongoing software licensing and 1 FTE to maintain the software.

Are resources being redirected or are they new or additional (including FTE's)*: New resources and 1 new FTE.

Who is served and impact of not funding*: NDUS's 11 institutions, CTS, students.

Potential for federal financial aid being used on non-degree courses putting the federal financial aid program at risk for the offending institution for all students.

Start Date (MM/DD/YYYY): 7/1/2025

End Date (MM/DD/YYYY): 7/1/2026

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits*: Will ensure verified compliance with Title IV requirements

Project Risk*: Not implementing a system would continue to risk federal Title IV funds being spent on courses that do not meet degree completion as there is not a systematic way to verify all courses are degree seeking.

Issue/Solution*: Implement bolt on software solution to Higher Education PeopleSoft Campus Solutions that will verify all courses are degree seeking and eligible for Title IV funding.

Statutory Authority

ND Constitution Article IX, North Dakota Century Code Chapters 15-01 through 15-09, 15-68, 38-09, 38-11, 47.30.1, 61-33 and Sections 48-10-02 Sections 57-02.3-05, 57-62-02 through 57-62-06. ND Constitution Article X Section 21, North Dakota Century Code Sections 15.1-36-02 and 15.1-36-03.

Agency Description

The primary role of the Board of University and School Lands and the Department of Trust Lands is to manage the 13 permanent trust funds under its control, to preserve the purchasing power of the trusts and to maintain stable distributions to trust beneficiaries. Those beneficiaries include local school districts, various colleges and universities, and other institutions in North Dakota. Revenues are generated through the prudent management of trust assets, consisting of approximately 706,600 surface acres, 2.6 million mineral acres, and \$6.8 billion of assets (loans, marketable securities, and cash equivalents) as of June 30, 2023. The surface acres major source of income comes from grazing and agricultural leases, with significant revenue also generated from rights-of-way, surface damage agreements, and construction aggregate mining. The mineral acres are offered for oil, gas, coal, gravel, and scoria leasing with significant revenue generated from bonus and royalty payments.

The Department also manages five additional trusts/funds: Capitol Building Fund, Strategic Investment and Improvements Fund, Coal Development Trust Fund, Indian Cultural Education Trust, and Theodore Roosevelt Presidential Library Fund. These trusts/funds had total assets of \$1.9 billion as of June 30, 2023.

The Department also administers North Dakota's Unclaimed Property Program. In this role the Department collects "unclaimed property" (uncashed checks, unused bank accounts, etc.), and processes owners' claims. This property is held in permanent trust for the owners to claim, but the revenue from the investment of the property benefits the Common Schools Trust Fund.

Additionally, the Department operates the Energy Infrastructure and Impact Office, which provides financial support to political subdivisions that are affected by energy development in the state through the oil and gas impact grand fund. Assistance is provided through both the oil and gas impact grant program and the coal impact loan program. As of June 30, 2023, there was no funding remaining for distribution, and no additional funding was provided by the 68th Legislative Assembly. As of June 30, 2023, the Department is managing four (4) coal impact loans totaling \$8.26 million.

Agency Mission Statement

Under the direction of the Board of University and School Lands, the Department of Trust Lands is to manage the land, minerals, and financial assets of the trusts in a way that balances the current needs of trust beneficiaries with those of future generations.

The mission of the Energy Infrastructure and Impact Office is to help build new infrastructure and reduce the impacts that energy development has on political subdivisions.

The Unclaimed Property Division mission is to act as custodian of unclaimed property surrendered by various business and government entities, working to reunite that property with the rightful owner or heirs.

Major Accomplishments

- 1 During the 2021-23 biennium the Department generated record breaking oil & gas royalties totaling nearly \$1 billion.
- 2 Extensive buildout of our investment program for a more diversified, sophisticated portfolio.
- 3 Successful completion of the ordinary high water mark acreage adjustment project on-time and under budget.
- 4 New minerals system went live January 2023.
- 5 Contract awarded and work has begun on build out of new customer web portal.
- 6 Achieved numerous royalty settlements totaling tens of millions of dollars.
- 7 Success in reducing litigation so we can focus more on our mission.
- 8 Record unclaimed property receipts and payouts.
- 9 Unclaimed Property Division reached a milestone of \$100 million dollars returned to owners since its inception.
- 10 Unclaimed Property Division joined a nationwide effort to facilitate state collection of unclaimed private sector retirement plan checks to overcome ERISA pre-emption of state laws called SURCH (States Unclaimed Retirement Clearing House).

Critical Issues

- 1 Proper resources to effectively and efficiently manage growing revenues and investment portfolio.
- 2 Diversify revenue streams.
- 3 Improve unclaimed property holder compliance.
- 4 Continually enhance systems and use of technology to better serve constituents and create efficiencies.

Performance Measures

Performance within the Department of Trust Lands is measured by its continued ability to manage the assets of 13 permanent trusts and five other funds under its control; to preserve their purchasing power; and to create intergenerational equity.

Program Statistical Data

- As of June 30, 2023, the total value of Land Board assets (excluding surface & mineral rights) reached a record high of \$8.65 billion.
- Common Schools Trust Fund K-12 distributions increased \$79 million (+19%) from FY 21-23 \$421 million to FY 23-25 \$500 million.
- Common Schools Trust Fund balance increased \$560 million (+10%) from FY 22 \$5.66 billion to FY 23 \$6.22 billion.
- Combined other permanent funds balance increased \$29 million (+9%) from FY 22 \$316 million to FY 23 \$345 million.
- Biennial investment income increased \$84 million (+31%) from \$272 million FY 19-21 to \$357 million FY 21-23.
- As of June 30, 2023, the Department managed over 8,300 oil & gas leases and owned an interest in approximately 49% of the 17,787 producing wells in North Dakota.

- Annual oil & gas royalty revenues increased \$25 million (+5%) from FY 22 \$483 million to a record-breaking FY 23 \$508 million.
- As of June 30, 2023, the Department managed over 4,400 surface leases that generated \$19.8 million in rental income during the 2021-23 biennium.
- The Department negotiated and entered into 234 rights-of-way and/or surface damage agreements during the 2021-23 biennium generating over \$9 million in revenue.
- During the 2021-23 biennium, the Unclaimed Property Division received 7,047 holder reports totaling \$35,964,058 and processed 31,927 claims resulting in \$16,447,455 being returned to rightful owners.

Explanation of Program Costs

The Board manages trust assets to ensure they maintain their integrity and grow to provide long-term financial support to beneficiaries and designated purposes. Fund balances have grown based on a combination of market-based rents paid by farmers and ranchers, consistent investment returns, and robust production of trust and sovereign minerals. Mineral royalty income, agricultural rents, and easement revenues are invested to provide income and growth that will benefit education now and for future generations. The Board, with guidance from the Department of Trust Lands, manage 13 permanent education trusts: Common Schools, North Dakota State University, School for the Blind, School for the Deaf, State Hospital, Ellendale State College*, Valley City State University, Mayville State University, Youth Correctional Center, State College of Science, School of Mines (UND), Veterans Home and University of North Dakota.

* Dickinson State University, Minot State University, Dakota College at Bottineau, Veterans Home, School for the Blind, State Hospital, and the State College of Science are current beneficiaries of this trust.

Distributions from the Common Schools Trust Fund (CSTF) are based upon the growth in value of the trusts' financial assets over time, rather than on the amount of interest and income earned by each trust during the year. Biennial distributions from the permanent trust funds must be 10% of the five-year average value of trust assets, excluding the value of lands and minerals. Equal amounts are distributed during each year of the biennium. With the substantial growth in trust assets over the past 10 years, distributions to beneficiaries have significantly increased.

In addition, Department employees oversee management of the following funds: Indian Cultural Education Trust, Capitol Building Fund, Strategic Investments and Improvements Fund (SIIF), Coal Development Trust Fund and Theodore Roosevelt Presidential Library Fund.

The management of assets falls within the Minerals Management, Surface Management, Revenue Compliance, Investments, Accounting and Unclaimed Property Divisions.

The Minerals Management Division is responsible for leasing and managing 2.6 million mineral acres including oil, gas, coal, and other subsurface minerals. The division is responsible for the leasing of minerals acres and the maintenance of all records and requests pertaining to mineral ownership and leasing activity. The division tracks and interprets business transactions by lessees; assignments by depth, formation, wellbore, or value; requests for pooling agreements; lease and title interpretation; royalty; authorization for participation in production; overrides; and analysis of drilling and production data necessary to hold a producing lease.

The Surface Management Division is responsible for leasing and managing 706,600 surface acres held in trust for various schools and institutions. The major source of income generated from these lands comes from agricultural leases, with grazing being the predominant land use. Significant revenue is also generated from rights-of-way, salt-water disposal, and gravel and scoria mining.

The Revenue Compliance Division is responsible for developing and implementing procedures to ensure the timely and accurate accounting of all royalties, bonuses, rents, and other revenues received by the Department. The division is also responsible for developing, implementing, and monitoring the managerial and system controls used by the Department to detect and prevent the misappropriation of trust assets and revenues.

The Investment Division is responsible for directing, implementing, coordinating, and monitoring all aspects of the Land Board's investment program. Outside of monitoring funds and investment managers, the division administers the cash flows and obligations of the Permanent Trust Funds, Coal Development Trust Fund, Capitol Building Fund, and the Strategic Investment and Improvements Fund.

The Accounting Division is responsible for fulfilling the agency's constitutional, statutory laws and rules, and governmental accounting standard board requirements for budgeting, accounting practices, payroll, financial data management, investments, calculating distributions for beneficiaries, and safeguarding over \$8.3 billion in assets of 19 different trusts and funds plus two additional departments (Energy Infrastructure & Impact Office and Unclaimed Property Division).

The Unclaimed Property Division administers and enforces the Uniform Unclaimed Property Act (currently N.D.C.C. ch. 47-30.2). The program's objectives are to reunite lost and abandoned property with its rightful owner and to safeguard this property from being used for personal gain by non-owners.

Program Goals and Objectives

Communication – To Cultivate positive relationships, facilitating the open exchange of ideas, opinions, and information. To focus on the impacts to our communities through the engagement of strategic and coordinated activities that aligns the agency mission and the needs of our constituents.

Service to Others - To listen and respond effectively to our customers and colleagues to provide professional and efficient services.

Leadership and Teamwork - To encourage and motivate each other to innovate, grow and accomplish goals through collaboration and corporation across the Department.

Transparency - To be open, honest, upfront, and visible in our actions.

Trust - Promote high-trust culture that supports a rewarding, healthy.

Enhance Management of Assets – Honor the fiduciary duty to protect and promote the management of assets to provide for perpetual disbursements through strategic growth.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This position will leverage Land Board assets to create new revenue streams by tapping into the various growing industries in North Dakota such as carbon capture/storage, soil carbon markets, rare earth minerals, wind, solar, etc.. Currently, 97% of revenues generated by Land Board surface and mineral rights come from oil & gas royalties, which are projected to begin declining in the early 2030's. For sustainable trust distributions well into the future, we need to start diversifying our revenue streams. This is an investment to start building a Diversified Revenues Division with the goal of achieving 10% non-oil & gas royalty revenues by 2035.

Necessary resources for implementation (including FTE's)*: Ongoing salary & benefits, and overhead costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

226 Trust Lands

Agency 226

Who is served and impact of not funding*: This position will help secure long-term funding for North Dakota K-12 public education and the various other state institutions that receive distributions from permanent trusts that the Department manages such as universities, Veterans Home, Schools for the Blind and Deaf, etc.. Not funding this position will impact the long-term sustainability of trust distributions to those entities and their critical programs.

IT Data Processing (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	100,000	-	100,000	0.00	100,000	-	100,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Due to larger than anticipated IT services and data storage related to our Microsoft Dynamics Land Management and Financial Management systems.

Necessary resources for implementation (including FTE's)*: We have the necessary resources to implement.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding to cover additional IT costs.

Who is served and impact of not funding*: This funding is to maintain core systems and data storage needs.

New FTE - Unclaimed Property Auditor (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	274,900	3,000	277,900	1.00	-	-	-	0.00

State Initiative:* Other

226 Trust Lands

Agency 226

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This position will fill a critical gap in auditing North Dakota centric businesses to ensure compliance with unclaimed property laws. Currently unclaimed property audits are done by contracted third party auditors that focus on large multi-state businesses, missing many North Dakota focused companies that have large operations in the state. This position will promote compliance from those businesses, resulting in millions more in unclaimed property being returned to rightful owners.

Necessary resources for implementation (including FTE's)*: Ongoing salary & benefits, and overhead costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: This position will help return millions of dollars more in unclaimed property to rightful North Dakota citizen owners. Not funding this position will result in lower holder compliance rates, leaving millions of dollars sitting dormant on the books of businesses instead of circulating in North Dakota's economy through its citizens.

Rental and Lease Expenditures (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

Total	50,000	-	50,000	0.00	50,000	-	50,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional funding for rental includes the office building rental which has a formulaic increase from the department's growing revenues and the storage unit rental for the department's vehicle equipment projected to increase due to inflationary pressures.

Necessary resources for implementation (including FTE's)*: We have the necessary resources to implement.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding to cover increased costs.

Who is served and impact of not funding*: This funding is to maintain our office building and vehicle equipment storage needs.

Statutory Authority

North Dakota Century Code Chapter 15-10-01.

Agency Description

As North Dakota's Polytechnic Institution, Bismarck State College provides industry-responsive education to individuals seeking skills for employment or professional growth. BSC collaborates with business and industry leaders to develop curriculum and program pathways that impact the emerging economy. The purpose of BSC is to provide a hands-on, educational environment of the highest caliber at a reasonable cost; to maintain a warm and wholesome social atmosphere; to provide opportunities for advanced knowledge, improved skills, high ideals and ethical standards; and to make learning an enjoyable, rewarding and valuable experience. Students may 1) complete training in a career-technical program to begin, change or advance their career; 2) earn college credits for transfer to a four-year institution; 3) upskill through workforce training or; 4) take non-credit courses in subjects of personal interest or to keep professional skills current and relevant. The college also recognizes the importance of promoting applied research, economic development, public service and cultural awareness. The service areas include the immediate, contiguous geographical region for most programs, and statewide, regional or nationwide areas for select, unique programs. The goal of the college is to connect talent to opportunity and create an avenue for employees and employers to be successful together.

Agency Mission Statement

MISSION:

As North Dakota's polytechnic institution, Bismarck State College focuses on student success through the delivery of affordable, flexible, high-quality, experiential learning enhanced by public-private partnerships.

VISION:

Bismarck State College will be a leader in polytechnic education, improving lives and building sustainable communities.

VALUES:

Student Success: We value all students and provide them with the support to achieve their goals.

Teamwork: We value collaboration in the pursuit of common goals.

Partnerships: We value interconnected and mutually beneficial relationships with local, state, national, and international stakeholders.

Inclusion: We value authentic engagement with diverse people, beliefs, and ideas.

Integrity: We value ethical and reliable practices.

Major Accomplishments

- 1 Strategic Enrollment Plan BSC's new strategic goals (Student Success, Linking Talent to Opportunity, Fiscal Stability and Communication), plus our new mission, vision, and values statements, created the foundation upon which BSC could better fulfill its polytechnic mission. Simultaneously to revising the strategic plan, BSC began making sweeping operational changes. The first of which was the creation of a strategic enrollment master plan (SEMP). The SEMP examined the student enrollment cycle from the time they first express interest in BSC all the way through graduation or transfer. The SEMP created strategies to help students be more successful in each stage of their journey with the College. And the SEMP created working groups of leaders from across the College to focus on optimizing the student experience that would lead to greater student success through increases in enrollments, retention, and graduation. BSC also set credit hour production goals to help various departments across campus focus on student success through a common metric.
- 2 In the summer of 2022, BSC launched a strategic goal of achieving 90,000 credit hours by the year 2027. While headcount enrollment is important, credit hour production is the economic engine that drives the institution. Credit hours create cashflows in the current semester and generate downstream cashflows from legislative appropriations via the funding formula. The 90X27 plan created credit hour goals for each semester (fall, spring, and summer) through the end of the strategic plan. The blue line in the chart below presents actual and projected results based on 2022- 2023 and 2023-2024 actuals at census. BSC anticipates achieving 90X27 one year earlier than originally planned and is on track to generate over 100,000 credit hours by the year 2027—a 35.5% increase over 2021-2022 results. Headcount growth has exceeded each of the previous semesters from Fall 2022 to Spring 2024. Spring 2023 headcount was higher than Fall 2022, Fall 2023 was higher than Spring 2023, and Spring 2024 was higher still. Until the Spring 2023, BSC spring semester headcounts were consistently lower than fall of the same academic year—which is the case for almost all of higher education. BSC's headcount growth in four consecutive semesters Fall 2022 to Fall 2022 to Spring 2024 is remarkable.
- 3 While 90X27 helped generate additional cashflows, costs of both academics and operations needed to be addressed. BSC implemented a unit cost model that examined the revenue and the expenses of academic operations based on the number of instructional hours delivered. Instructional hours are the number of hours faculty spend in the classroom versus credit hours, which are the number of credits earned. For example, an English class is typically 3 credits. That yields 48 instructional hours over a 16-week semester (3 hours per week for 16 weeks). A chemistry lab is 1 credit per semester and meets for 2 hours, thus 32 instructional hours. Yet, the institution only charges 1 credit for 32 hours in a chemistry lab versus 3 credits for 48 instructional hours in English. BSC calculated the tuition revenue and costs for each academic discipline by instructional hour. Unit cost measures productivity per hour of instruction. The goal of unit cost is not to have all disciplines with positive results but to allow academic managers to assess the relative financial success of their operational changes. Some disciplines will always cost more to deliver than the tuition revenue they generate. BSC generates approximately 90,000 instructional hours each year. Saving \$1 in unit cost liberates \$90,000 in budget dollars that can be reinvested in the College. BSC has experienced three consecutive years of declining Unit Cost, resulting in more than \$1.5M that's been reinvested into the College. BSC has been able to give three separate \$1,000 employee bonuses and brought employee salaries to market competitive levels. Unit cost savings are driven by several factors, one of which is low enrollment sections. BSC has had three consecutive years of unit cost reduction while at the same time increasing student headcount and credit hour production. In spring 2024, BSC headcount was up 6.8% and credit hour production was up 8.3%. This has all been achieved by maintaining the 3rd lowest single credit tuition rate in the NDUS. BSC also increased the number of student employees to support our polytechnic mission of hands-on experiential learning directly on campus.
- 4 In 2020, approximately 40% of the course sections offered by BSC had less than 10 students. Low-enrollment sections are costly, particularly if taught by a full-time faculty member, because there isn't enough tuition to cover the section costs. BSC reduced low-enrollment sections to approximately 20% of our scheduled sections, contributing to improved unit costs. It is impractical to eliminate low-enrollment sections completely, as students may need courses to graduate that are low-enrollment. Understanding the number of students enrolled in sections is one metric that helps academic managers gauge the vitality of their disciplines and programs.
- 5 The North Dakota Special Session in October 2023 authorized BSC to bond up to \$40 million in revenue bonds for a new athletic facility. The BSC Student Government Association passed a resolution in May 2023 to increase mandatory fees to pay for the bonds. The students voted in September 2023 and overwhelmingly approved the increase with an 83% approval rate. BSC received permission from the State Board of Higher Education in December 2023. BSC is currently worked with Piper Sandler as the mutual advisor and Arntson Stewart Wegner PC as the bond attorney. BSC closed the bond sale on August 8, 2024.

Major Accomplishments

-
- 6 N.D.C.C.15-10-73 has streamlined and enhanced the Bismarck State College (BSC) policy and procedure process. BSC has completed the review of every policy and procedure with direct input from faculty and staff. The new process allows for input at BSC's Campus Council level, which has representatives from across BSC's departments and includes representatives from Faculty Senate and Staff Senate. After Campus Council's input and review, it is approved by administration and the president. BSC has fully adopted N.D.C.C 15-10-73 into our administrative operations
 - 7 BSC received an additional \$9,960,000 to fund BSC's polytechnic project. Construction of this building is currently on time and under budget for a scheduled completion date of December 2024. BSC received an additional \$35 million in ARPA funds to construct the facility as well as the authorization to use the State's Capital Tier funding to complete the project. The project budget is \$47,152,359.
-

Critical Issues

-
- 1 BSC is currently implementing its polytechnic mission for new programming to create economic development for the state and region by creating a strategic focus on healthcare, agriculture, energy, cyber and defense, and manufacturing and automation. BSC would appreciate support in funding for the cost of new programs and applied learning, which is based on pathways determined by BSC's BILT model. The one-time funding is anticipated to fund the start-up costs of the following new programs that are in the process of implementation: Bachelor of Applied Science Finance - Active Program Mechatronics Engineering Technology - Active Program Management - Under investigation/development Nursing - Under investigation/development Clinical Exercise and Sports Studies - Under investigation/development Health Administration - Under investigation/development Behavioral Sciences - Under investigation/development Associates of Applied Science Respiratory Therapy - Under investigation/development Electrician Technology – Under investigation/development Heavy Equipment Operations – Active Program Land Surveying Technology – Active Program Civil Engineering Technology – Active Program Dental Hygiene – Under investigation/development Dental Assisting – Under investigation/development Artificial Intelligence and Machine Learning – Active Program Certificates Print and Digital Publications – Active Program Digital Broadcasting – Active Program Business End User Security – Active Program Software Analysis – Active Program Security Operations – Active Program Digital Forensics and Incident Response – Active Program IT and Cybersecurity Governance – Active Program Additive Manufacturing – Active Program Dialysis Technician – Active Program Unmanned Aerial Systems – Active Program Medical Assistant – Active Program Land Surveying Technology – Active Program Civil Engineering Technology – Active Program Geospatial Technology – Active Program Artificial Intelligence and Machine Learning – Active Program Foundations in Emerging Technologies – Active Program Business Fundamentals – Under investigation/development Computer Applications – Under investigation/development Insurance – Under investigation/development Secure Web Programming – Under investigation/development Web Programming Foundations – Under investigation/development Automation – Under investigation/development Dental Career Exploration – Under investigation/development
 - 2 In June 2023, BSC implemented market equity increases as required by OMB based on the BSC market salary review project. In July 2023, BSC implemented an average 6% pay raise for all benefitted employees. Turnover rates have started to decrease, and we are seeing an increase in better-qualified applicants for our open job positions. We attribute this change in trend to the market salary review project BSC began in 2021 and subsequent salary increases over the last biennium. Overall, we have had fewer vacant positions, and that stability has positively impacted our employees. However, we continue to struggle with filling technical faculty positions, such as cybersecurity, agriculture, and energy, where we compete with industry for employees. Industry salaries are much higher.
 - 3 As BSC continues to build relationships and respond to workforce talent needs related to high-cost, high-demand occupations, BSC struggles to continue to cover the appropriation lag that exist from the point of new program expenses are occurring to when state appropriations are received. At some point, BSC may reach the point where we will need to delay growth.
-

Critical Issues

-
- 4 BSC would appreciate support to fund and develop new programs, K12 pathways, and economic development. BSC requires additional start-up funds to advance its polytechnic mission programming further due to the lag in the state funding formula. With the current funding formula, BSC experiences a 4-year delay in receiving funding for the credit hour production. As a result, those funds aren't available for high-priority occupation program start-up such as high-tech equipment, program and curriculum development, instructional staff, recruitment, retention, and student support services. This request is not due to offsetting declining enrollment at BSC, but is requested to support BSC's enrollment growth to respond to workforce and economic development needs. College education in high school has a positive effect on economic development for North Dakota, accelerating students into the workforce. High school students can earn college credentials that are industry-recognized allowing them to begin in a high-demand occupation. This will aid in the reduction of the acute workforce shortage. It also provides students a lower cost for the education. BSC has projected \$10 million in savings to family and taxpayers for the FY24 academic year. The OWED will establish workforce-relevant training and education solutions for the energy, agricultural, cyber, and defense sectors. The OWED will create pathways for new student pipelines, including non-traditional students with some college but no degree, rural, and underserved communities. New initiatives to drive new economic development in the North Dakota economy will require additional state resources to leverage federal and private dollars.
-
- 5 BSC has funded and fully implemented a mental health counselor for two years at a total of \$180,017, which is greater than the \$156,583 designated for behavioral health initiatives.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

The instructional services include activities of all persons appointed to teaching positions of the college. These activities consist of regular classroom instruction in credit and non-credit courses, instruction to off-campus groups and distance learning, participation in departmental and college academic governance, and participation in other scholarly activities. Instructional and academic support includes the clerical, technical, and office support provided to the instructional programs, including materials used in the classroom.

Academic support services include library services and the resource and reference materials traditional to library operations, IVN, (which networks postsecondary institutions in North Dakota) and interactive television (which networks surrounding secondary schools). Current and accessible instructional equipment is provided to students, faculty, and staff.

Student services includes registration and student records, career advising and placement, admissions and financial assistance, academic and personal counseling and advising, and academic support services and disability support services. It also provides student activities, intramurals, and housing services.

Institutional support includes administrative leadership, executive management, planning for all institutional functions, fiscal operations, information systems support, general administration, human resources and payroll services, purchasing support, campus mail service, public affairs, institutional research, institutional effectiveness, and college advancement activities.

Facilities services include: building maintenance and operation, custodial services, utilities management, landscape and grounds care. Other essential services include: traffic/safety/security, facilities planning and solid waste disposal. Services and projects related to plant improvements include: new construction, completion of major improvements such as remodeling buildings, construction and repair of streets, sidewalks and parking areas. Also, services in the area of modifications/additions to buildings, boilers, utility, lines, etc., to become energy efficient and to classrooms and other areas to be handicap accessible.

Bismarck State College provides a variety of academic and career pathways to further our mission and meet the needs of our students and partners. BSC offers stackable certificates, embedded industry recognized credentials, and degree program in 102 different areas. Bismarck State College (BSC) leverages public private partnerships (P3s) to grow programs in five pillar areas: energy, cybersecurity, manufacturing automation, agriculture, and healthcare along with integrating Industry 4.0 standards.

The College's new polytechnic mission is attracting a record number of new students. The College has experienced two consecutive years of enrollment growth, while many colleges nationwide have experienced declining enrollment.

First-year freshman headcount was 2,433 students in Fall 2023 compared to 1,937 students in Fall 2020, representing an increase of approximately 26%. Spring freshman headcount was 2,295 students in Spring 2024 compared to 1,568 students in Spring 2021, representing an increase of approximately 46%. The College has the largest freshman class of any North Dakota Higher Education institution. The College's freshmen enrollment for Spring 2024 was greater than all four North Dakota four-year public universities combined.

The College's enrollment of Dual Credit students, those earning high school and college credit simultaneously while still in high school, was 1,460 students in Spring 2024 compared to 649 students in Spring 2022, representing an increase of approximately 125%. Dual Credit students create a pipeline of students who typically take more credits and pay more fees after graduating high school. Conversions from

Dual Credit students to full-time freshmen increased by 113%, from 182 students in Fall 2022 to 387 students in Fall 2023. Dual Credit students who become full-time students also take 40% more credits in their freshman year.

The College expects these positive enrollment trends to continue into the Fall 2024 semester. As of June 3, 2024, the number of enrollment credit hours has increased by 2,885 credit hours, or 14.2%, between Fall 2023 and Fall 2024. Within this overall increase, non-degree seeking and high school dual credit hours increased by 269 hours, or 19.34%; Current & Emerging Technologies credit hours increased 612 hours, or 9.03%; Humanities, Arts and Sciences credit hours increased by 1,272 credit hours, or 14.77%; and Automation, Energy and Advanced Technologies credit hours increased by 732 credit hours, or 20.66%. Additionally, the College's headcount increased by 91 students, or 4.86%.

BSC is located on the northwestern edge of Bismarck, on a hilltop near the east bank of the Missouri River. The vantage point provides a beautiful view of the river,

Explanation of Program Costs

Program costs for Bismarck State College include costs of salaries and benefits for staff and faculty, curriculum development, operating expenses for instructional and support functions and facilities upkeep and maintenance expense. Major operating costs include the cost of library materials and resources, instructional supplies, faculty and staff training and development, the local computer network, computer and telecommunications infrastructure for the campus, costs of marketing BSC's course offerings and class times.

Program Goals and Objectives

Student success is ensuring students have the academic and career pathways and support needed to achieve their educational goals. As North Dakota's Polytechnic Institution, BSC offers students of all ages multiple academic and career pathways into the workforce or further education. Our stackable certificates, embedded industry recognized credentials, associates and baccalaureate degrees allow students to customize their programs speeding their way into high-demand high-priority occupations. This model aligns with SBHE's goals of offering affordable education when, where, and how students need it. Ensuring our programs are affordable is a key element in driving our fiscal stability.

Fiscal stability is about efficiently serving our students and public and private partners. BSC has a double bottom line: we have a mission bottom line and fiscal bottom line. Both bottom lines need to balance and complement one another. Over emphasizing mission leads to fiscal bankruptcy. Similarly, only focusing on fiscal matters leads to mission bankruptcy. Taken together, student success and fiscal stability allows BSC to link talent with opportunity.

Linking talent with opportunity is our third strategic goal. It means BSC offers the academic and Career pathways that prepare workforce ready graduates. The College is connected to our and public and private partnerships through CTE advisory boards and our new Business and Industry Leadership Teams (BILT). BSC has BILT teams that provide overall direction and feedback in healthcare, agriculture, cybersecurity, manufacturing and automation, and energy related disciplines. Also, our K-12 partnerships allow students to graduate from high school with associates degrees.

Communication is our fourth strategic goal. Creating student success, being fiscally stable, and linking talent with opportunity requires BSC to communicate with all our stakeholders more efficiently and effectively. Staying connected with our students, our employees, our partners, and our communities allows us to execute our mission as North Dakota's Polytechnic Institution.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

227 Bismarck State College

Agency 227

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

Inflation Increase (Priority: 02)

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to assist with increasing costs for utilities, IT, vendor contracts, temporary staff/faculty, and other costs to deliver education to students.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: No new FTE.

Who is served and impact of not funding*: Students attending the institution.

Statutory Authority

North Dakota Century Code Chapter 15-10-01.1.

Agency Description

Lake Region State College (LRSC) is a student-centered, open access, comprehensive community college within the North Dakota University System. The college provides quality academic education, career and technical training, workforce training, educational outreach opportunities, and life-long learning. LRSC serves approximately 3,000 students each year through on-campus and distance delivery. LRSC is proud to collaborate with other NDUS institutions and participates in statewide articulation agreements in early childhood education and nursing. LRSC is also a member of the Dakota Nursing Program with Bismarck State College, Dakota College at Bottineau, and Williston State College, the Dakota Precision Agriculture Consortium with Dakota College at Bottineau and Williston State College, and the Northern Information Technology Consortium with Dakota College at Bottineau, Minot State University, Turtle Mountain Community College, and Williston State College. In addition, LRSC has numerous program articulation agreements with Mayville State University, Minot State University, University of North Dakota, and Valley City State University to provide seamless transfer between associate’s and bachelor’s degree options. and an Associate of Applied Science in Law Enforcement through innovative computer-based training and e-learning technology. LRSC, in cooperation with local law enforcement agencies, offers its Peace Office Training program in Devils Lake, Grand Forks, and West Fargo. LRSC also offers its Nursing program in Grand Forks, Mayville, and a mobility program in Jamestown.

Agency Mission Statement

We enhance lives and community vitality through quality education.

Major Accomplishments

-
- 1 Upgraded windows and air conditioning in the North & South Residence Halls.

 - 2 Have 23 students enrolled with 22 Apprenticeship Agreements. In 2023, the U.S. Department of Labor added LRSC as one of the organizations serving as Apprenticeship Ambassadors to help the department promote and support Registered Apprenticeship opportunities nationwide.

 - 3 Received \$446,419 grant from the ND Department of Commerce, Division of Community Services for FY25-FY27. The initiative is to be a training facility for wind technicians obtaining Global Wind Organizations safety standards. It will benefit our academic students, but also provide Train ND with a revenue stream for Wind companies such as Vestas to upskill their employees.

 - 4 Practical Nurse education has expanded to Jamestown ND.

 - 5 Practical Nursing Program recently was ranked as one of the best nursing programs in the Midwest. According to NursingProcess.org, LRSC came in at number 7 and was the highest-ranked program in the Dakotas and Minnesota.

 - 6 The Aspen Institute named Lake Region State College as one of the 150 institutions eligible to compete for the \$1 million Aspen Prize for Community College Excellence, the nation’s signature recognition of high achievement and performance among two-year colleges.

 - 7 Started men’s and women’s hockey programs in the Fall of 2023.

 - 8 Community Paramedicine certificate started summer 2023. The new community care model allowing EMTs and Paramedics the opportunity to expand their role in the community.

 - 9 In 2023, LRSC watched five students walk across the state and earn their associate degree while still in high school. The plan of action to arrive at this accomplishment was similar for all five: online courses along with dual credit courses that were offered face to face in their high school. Students also filled summers with additional courses to make it to the needed credit total.
-

Major Accomplishments

-
- 10 Endowments continue to flourish thanks to the ND Challenge Match program.

 - 11 In 2022, LRSC started up an E-Sports Club Team sponsored by Student Senate. In December of 2022, they walked away national champions in the Open Plus category.

 - 12 A student at LRSC was named the ND 2024 New Century Transfer Scholar. Over 2,200 students from more than 1,300 college campuses nationwide were nominated. Only one New Century Transfer Scholar is selected from each state.

 - 13 Enrollment continues to grow as the college works to return to pre-pandemic numbers.

Critical Issues

-
- 1 While the COVID-19 pandemic challenges are mostly behind us, the lagging effect of lower enrollment will affect LRSC for one more biennium (affecting appropriations). The college continues to be entrepreneurial in its outreach efforts to ensure adequate enrollment to sustain the college infrastructure and basic services. Strategic planning is a high priority and a key component to our plan is to expand LRSC's presence in Grand Forks. LRSC began to offer dual credit courses in the Grand Forks Public School System in the fall of 2010 and has continued to expand. However, as NDSU pursues Dual Credit in Cass County, that will set the wheels in motion for UND to offer Dual Credit in Grand Forks. That could mean a reduction of over 1,300 credits for LRSC. LRSC rented space across the street from the Altru Hospital and offered its Nursing program for the first time in Grand Forks in the Fall of 2014. In July of 2025 and new collaboration with Altru, the new location for Nursing will be in the newly renovated Altru Rehab building. LRSC established its Launch program on the campus of UND in the fall of 2009 and continues to prepare underprepared students who wish to transfer to UND. LRSC's Launch program has been a successful component for increased student retention. Our ultimate goal is to provide vocational and technical training opportunities in Grand Forks and stem the tide of ND residents attending MN institutions for training. The personnel needed to respond to programmatic and administrative needs of ND continues to be a challenge because of funding limitations. Much of the institution's growth in programmatic opportunities provided to ND citizens has been the result of LRSC's innovation and effective use of non-appropriated funding to explore new venues and modes of delivery.

 - 2 The wind turbine is twelve years old. There has been extensive down time which is affecting finances in three directions. 1. Increased maintenance, 2. increased utility costs, 3. decreased revenue for energy that is sold. Revenues have decreased 7 out of 10 years. At the same time, utilities have increased 9 out of 10 years and we will have the \$434,000 annual payments for 3 more years. A new problem area with the turbine is getting insurance coverage. It is hard to find a company that wants to cover one turbine which also drives up the rates.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more.

Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

Licensure exams and certification are used by some career and technical education programs for assessment of student learning and to provide students with professional and educational advancement opportunities. Students in the Automotive Technology, Fitness Trainer Technician, Marketing, Information Technology, Precision Agriculture, and Wind Energy Technician programs can choose to take industry certification exams.

The Licensed Practice Nurse, Associate Degree Nurse, and Peace Officer Training programs prepare students to sit for national exams that are required for employment in the industry. For the Licensed Practical Nursing program, graduates take the NCLEX-PN. The first-time pass rate goal is at or above 80%. The reported pass rate for 2022-2023 was 100%, 2021-2022 was 100%, and 2020-2021 was 100%. For the Associate of Nurse Degree program, graduates take the NCLEX-RN. The first-time pass rate goal is at or above 80%. The reported pass rate for 2022-2023 was 96%, 2021-2022 was 89%, and 2020-2021 was 79%. For the Peace Officer Training program, graduates take the ND POST Licensing Exam. The reported pass rate for 2022-2023 was 100%, 2021-2022 was 100%, and 2020-2021 was 98%.

Placement rates represent the percentage of total career and technical education program graduates who obtain employment in their field of study or who are seeking additional education. The data is collected six months after the end of the academic year to allow students time to obtain employment. The 2020-2021 placement rate for all students graduating with a career and technical education credential was 97%.

The persistence rate is the percentage of students enrolled in the fall semester who are either enrolled in the subsequent spring semester or graduate before the subsequent spring semester. The 2022-2023 persistence rate was 81%, 2021-2022 was 82%, and 2020-2021 was 80%. The retention rate is the percentage of students enrolled in the fall semester who are either enrolled in the subsequent fall semester or graduate before the subsequent fall semester. The 2022-2023 retention rate was 65%, 2021-2022 was 66%, and 2020-2021 was 65%. The graduation rate is the percentage of students enrolled in the fall semester who complete a program within three years. The 2020 graduation rate was 51%, 2019 was 45%, and 2018 was 50%.

Explanation of Program Costs

The program costs of LRSC include expenses associated with instructional support and the delivery of instructional services, physical plant (Facilities Upkeep and Maintenance) operational expenditures, and the academic, institutional and student support systems needed to operate a comprehensive community college.

Program Goals and Objectives

The main objectives of Lake Region State College are threefold:

- 1) To provide affordable, high quality instruction in curricular areas approved by the Board of Higher Education,
- 2) To provide access to community and state-wide educational services at the collegiate level and
- 3) To provide an atmosphere of scholarly activity wherever its services are delivered.

In addition to the instructional services provided to carry out its objectives, the college maintains other support services required to meet the needs of all students and student groups, to provide leadership and direction, and to coordinate all institutional affairs and operating guidelines in compliance with the policies and regulations established by the Board of Higher Education, the State of North Dakota, and the federal government.

Physical facilities are planned and maintained to create an operating environment conducive to learning through the most economical means possible.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

228 Lake Region State College

Agency 228

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: The Master Plan addresses roofing, parking and electrical in the Deferred Maintenance Priority Repairs area. These are all critical items to the smooth daily operation of the campus. This capital project would bring all LRSC rooftops up to date, re-surface the parking and roadways, and upgrade the voltage system to work with Otter Tail’s upgrade. LRSC has been addressing the roofing and parking areas as we are able, but the costs far outweigh LRSC’s budget.

1. Roof Restoration - The roofing project includes restoration of 29 roofs. The roofing project in 2012 carried a 15-year warranty which ends in 2027. Roof restoration saves approximately 30% on capital projects if the restoration is done prior to roofs needing to be replaced. This superior membrane performance over low-cost replacement membranes more than doubles the waterproofing. It is a seamless roof system with increased puncture resistance. Sustaining these restorations can be done at 50% of the cost of the original restoration and avoids future roof replacements.

In 2024, LRSC is replacing one roof that was not done in 2012 and restoring some small areas that are more urgent. This has a price tag of \$626,000 and will be funded out of Tier funding and match.

2. Parking, Curb & Gutter - The parking lot and road portion of this project was approved in the 21-23 Legislature, but without funding. In the 23-25 Legislative session, they approved using the remainder of the Tier III funding without match. The Tier III funding for the 21-23 and 23-25 legislature were approved to replace the Gearbox of the Wind Turbine without match and the remainder could be used for parking (approximately \$431,508). The \$431,508 is enabling LRSC to do 3 of the 11 sections. In addition to that, small maintenance has been done as budget allowed but without the funding of the project, the problem has exacerbated.

The parking lot project has grown from the original request of \$250,000 to \$1.61 million. After the \$431,508 that Tier III will cover summer 2024, there is still another \$1.179 million in work to be done.

The current parking has been deteriorating. Large potholes have developed and we are not able to maintain the parking and roads. The asphalt will eventually all have to be replaced.

Numerous community activities and agriculture meetings are held at the Curtis and Annette Hofstad Agriculture Center. Also, in the fall of 2024, LRSC will partner with the Devils Lake high School to offer dual credit Ag classes. Currently, customers and students are parking in non-parking areas and destroying those landscape areas. Additional parking in these areas would help tremendously with protection of the area and service to our customers. The cost for that parking is \$1,248 million.

North Hall Parking Lot currently has 54 parking spaces plus 3 for the Adult Learning Center and 2 handicapped spaces. The hall is a 96-bed facility. We would plan to add 16 spaces which would help tremendously. Currently, students are parking on the grass, etc. The addition of this parking would cost an additional \$100,093.

3. Voltage Project – The voltage project will enhance the electrical distribution system and keep it current. Otter Tail Power Company will be upgrading the electrical distribution system within the city of Devils Lake. The distribution voltage will be upgraded from 4,160 V to 12,500 V. This work will take place in 2027. Otter Tail will be replacing all single-voltage transformers with dual-voltage transformers. There will also be several infrastructure improvements. All customer-owned equipment will need to adhere to Otter Tail Power Company’s existing and new voltage requirements prior to the completion date. Because the college owns its own electrical system and metering, the college will need to make the necessary changes to adhere to the new dual voltage requirement. Ottetail’s original recommendation was that the following transformers would need replacement: 1-75 kVA transformer, 1 – 150 kVA transformer, 1 – 300 kVA transformer, and 3 – 500 kVA transformers. As a savings, after careful consideration with an electrical engineer and agreement by Ottetail, we would intercept the feed to the campus metering and pull cables back to a new 3,000 kVA-4160/12470 primary to 4160 secondary transformer. From the new transformer, we would refeed the campus metering.

Statutory Authority

North Dakota Century Code 15-10-01.1.

Agency Description

Williston State College (WSC) is a comprehensive community college serving northwest North Dakota and beyond with Associate of Arts, Associate of Science, Associate of Applied Science, certificate education in academic transfer, and vocational education, as well as Workforce Training as a service to regional employers.

Agency Mission Statement

"Where the People Make the Difference"

Major Accomplishments

- 1 Healthcare Training Facility scheduled to be completed in November 2025. This will be a 42,000 sq ft two story, state-of-the-art facility that will allow our Nursing and Massage Therapy programs to expand. Additionally, it will allow WSC to add up to 12 new healthcare related programs. It will also allow WSC to partner with 4 year institutions for bachelor completion programs. As of this writing, 100% of the funds needed to construct this building have been procured. A sponsorship and naming rights campaign targeted at area businesses and organizations has started and will afford WSC additional funds for operational purposes.
- 2 WSC will be adding up to a dozen new healthcare related programs. These programs will be created as certificate and/or associate-level programs for the college. Additionally, WSC will be partnering with 4 year institutions from the NDUS to allow for bachelor level completion in person at Williston State College. Some of the programs currently being developed are: Certified Medical Assistant, Phlebotomy, Health Information Management, Billing and Coding, Administrative Professional Assistant, Paramedics, Emergency Medical Services, Digital Sonography, Behavioral Health, just to name a few. WSC is also partnering with the new CTE centers in Watford City and Williston to develop dual-credit opportunities for high school students to transfer to WSC. Williston State College is also partnering with medical facilities in Watford City and Sidney, MT to deliver nursing training to those communities using their hospitals for the training sites.
- 3 WSC will be adding Men's and Women's Cross Country to the menu of athletics for NJCAA starting Fall of 2025. With Williston High School having one of the largest, and most successful cross country programs in the state, and Watford City having a competitive program, these will feed nicely into developing large teams for the college.

Critical Issues

- 1 Succession Planning: A major factor contributing to the need for succession planning is the continued trend of staff turnover due to energy industry companies in North Dakota and employees leaving WSC for better regional wages. With continued turnover in management and staff, it is apparent that there is a need to continue to "cross-train" staff members, division directors, and members within the WSC Executive Cabinet. Employee turnover creates a gap of institutional knowledge, productivity and compliance with Federal, State and NDUS policies. This can be mitigated by an expansion of training within departments, automated processes and incentive compensations for retention. In addition, shared oversight and job duties can help bridge the gap while a new or incumbent employee is learning the new job and its responsibilities. WSC is understaffed in a few critical support areas, namely in academic advising and business office operations. This issue is primarily affecting the staff side of the institution, not the faculty. Some of the external factors contributing to this are lack of affordable housing, general cost of living is higher in Williston than the rest of the state.

Critical Issues

- 2 Financial Stability: WSC hit an all time low in headcount numbers in the Fall of 2019. Since then, numbers have slowly started to recover through active outreach and an enhanced marketing campaign. For WSC to reach a comfortable level of student headcount in financial terms, the college must be north of 1,100 headcount per semester. For the Fall of 2024, the college is pacing growth that would allow it to exceed the 1,100 headcount for the first time in 4 years. Large Scale Self-Funded Projects: In this category, WSC has 3 large cash outflows that strain the financial health of the college. 1) A P3/Remodel project was completed in 2019 with no funding source to make the annual payments that average over \$400,000 per year. This payment has approximately 20 years remaining. 2) Due to the transient nature of the residence of Williston due to the oil and gas industry, it is paramount for WSC to have security to protect the campus. As a result, WSC is expending over \$300,000 per year to hire an external security firm. Over the next year, WSC will be attempting to bring security internally to save on this expenditure. 3) In 2014, WSC built a new dormitory using the sale of bonds to finance the construction. These payments average approximately mid \$300,000 with 16 years to repayment. Thankfully, the occupancy of the dormitory has been running over 90% for the past few years.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

WSC serves a student population of approximately 970 per semester with full time equivalent student enrollment for Fall 2023 at 657.85 and Spring 2024 at 647.73. The Fall 2023 increased 1.79% from Fall 2022 and the Spring 2024 increased 2.87% from Spring 2023. Credit enrollment is estimated at 690.78 FTE for each year of the 2025-27 biennium.

Explanation of Program Costs

Program costs consist of salaries, benefits, operating, equipment, capital improvement, extraordinary repair, and major capital project expenses for Williston State College. The expenditures fall into the functions of instruction, support services, and facilities, upkeep, and maintenance. The budget is planned around campus and State Board of Higher Education strategic plans.

Program Goals and Objectives

WSC strives to provide high quality instruction in curricular areas approved by the North Dakota Board of Higher Education. The College provides community, regional, and statewide educational services at the local, online and collegiate level, while also providing an atmosphere that promotes regional growth, scholarly activity and economic diversity and development. As a steward of public funds and resources, WSC provides the support, leadership, and direction needed to manage and maintain the College academically, economically, and physically to the benefit of students, taxpayers, and patrons in northwest North Dakota.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

229 Williston State College

Agency 229

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

Inflation Factor increase (Priority: 02)

Statutory Authority

ND Constitution Articles VIII and IX; North Dakota Century Code Sections 15-11 and 15-22.

Agency Description

The University of North Dakota is the chief opportunity engine for North Dakota and UND students. Founded in 1883, six years before North Dakota was granted statehood, UND is among the nation’s premier regional public research universities and is at an exciting point in its 135-year history. Classified as a “Doctoral University: Higher Research Activity” institution by the Carnegie Foundation for the Advancement of Teaching, UND is characterized by a solid foundation of the liberal arts, high quality students and faculty, a diverse curriculum, a widely recognized program of graduate education and research, law and medical schools praised for quality and innovation, rich cultural resources, and an outstanding record of alumni support. Its major academic divisions include Arts and Sciences, Aerospace Sciences, Business and Public Administration, Education and Human Development, Engineering and Mines, Nursing and Professional Disciplines, Medicine and Health Sciences, Law, Extended Learning and the School of Graduate Studies. Long a provider of distance education, UND is expanding their robust online presence.

Agency Mission Statement

Our mission is to provide exceptional educational experiences that enrich the lives of North Dakotans and the global community through excellence in teaching, innovative research, and meaningful engagement. UND’s vision is to inspire a sense of wonder, a love of discovery, and a commitment to serve.

Major Accomplishments

-
- 1 We have seen record student retention. Our year-over-year retention of first year students pegged at 83%, which is the highest retention rate in the state since the NDUS began keeping records in 1990. Our fall-to-spring retention topped 94%, an all-time high for the campus.

 - 2 Enrollment continues its steady growth bucking national trends. UND’s official 2023 tally of 14,172 students was a 2.13 percent increase over last year and represents the University’s fourth-straight year of total enrollment growth. It is expected we will realize an increase of 400 new first-time freshmen this fall.

 - 3 Successfully recruited a new Vice President for Research and Economic Development, Scott Snyder, Vice President of Student Affairs, Art Malloy, and Vice President for Finance and Operations, Karla Mongeon-Stewart in addition to new academic deans Shelbie Witte, College of Education and Human Development, Maridee Shogren, College of Nursing, Rebecca Bichel, Libraries and Information Resources, and Brian Pappas, School of Law

 - 4 UND launched its new strategic plan UND LEADS, which created a new mission and vision statement for the University and goals around Learning, Equity, Affinity, Discovery and Service.

 - 5 The UND Foundation launched the public phase of the Forever UND campaign in October 2023, with a goal of raising \$500 million. As of May of 2024, \$412 million of goal has already been raised.

 - 6 The health and wellness of our students has been a primary focus throughout the last two years. We expanded the number of behavioral health counselors thanks to legislative appropriation and grew the number of students participating in peer support programs, such as the Green Bandana project and the Odegard colleges UNDUpLift program.

 - 7 Opened two new residence halls, new McVey and West, in fall of 2023. The building project was done through a P3 partnership agreement with Johnson Controls.

 - 8 Total dollars in research funding have continued to grow at exponential levels over the past four years. The last year-to-year growth was from \$147 million in FY 22 to \$182 million in FY23.

Major Accomplishments

- 9 UND has developed and launched new degree programs to meet the workforce needs of the State of North Dakota such as journalism, aerospace engineering, Indigenous health, biomedical engineering, and music therapy.

- 10 UND has put an emphasis on national and international scholarships for students. We saw an increase in 2023 to 22 students, including UND’s first ever prestigious Marshall Scholar recipient, Sydney Menne.

- 11 UND conducted a study on equity in pay across all UND positions with the assistance of Huron. Implementation of recommendations will be ongoing, with initial action on equity and market recommendations occurring for FY25.

- 12 This fall, UND Athletics will complete two donor funded projects – the Nodak Insurance Company Sports Performance Center and Albrecht Field, a new softball stadium on campus. In addition, the Athletic Offices will be located on the first two floors of Memorial Village I, one of two public-private partnership developments for mixed use buildings.

- 13 Our College of Engineering and Mines Research institute is leading a partnership to research the extraction of rare earth materials from coal. The initial funding was \$8 million.

- 14 UND is leading the conversation on Artificial Intelligence and how the future of education, workforce, national defense, and economic development will be shaped by it. This includes hiring eight new AI and Data Science faculty positions.

- 15 UND continues to work on the master plan to right size the campus and reduce deferred maintenance expenses. We recently razed the Walsh complex of four residence halls, to continue to reduce deferred maintenance costs.

- 16 This fall UND will complete the full renovation of Merrifield Hall focused on flexible tech-enabled classrooms and committed to accessibility with new ADA-compliant features. UND will also cut the ribbon on the National Security Corridor in Harrington Hall, which includes a new Nanofoundary.

Critical Issues

- 1 Continuing to address mental health and wellness issues among students, faculty and staff.

- 2 Addressing the concerns around inflation, cost control and other threats to financial stability.

- 3 Attracting and retaining to talent for faculty and staff.

- 4 Outdated and legacy technological systems, so support for high-speed computing infrastructure needed.

- 5 Maintaining consistent enrollment numbers in national/regional competitive markets.

- 6 Continued support to research and development for economic diversity.

- 7 Flexibility to enhance technology and infrastructure to meet needs of a research university.

- 8 Responsive to student needs in educational delivery methods.

- 9 Addressing the emergent financial needs of our students, such as food insecurity, housing, etc.

- 10 Managing the construction of the 42nd street underpass and its effect on the golf course.

- 11 With a new governor and term limits in the North Dakota legislature, we need increase efforts to educate and maintain strong relationships with all.

- 12 The effect of Artificial Intelligence and digitization on all aspects of the University.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid, and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

The University of North Dakota in addition to the above has developed and continues to use the following to aid in performance measurement:

1) Financial Accountability

- a. Monthly model statements (variance reports) reflecting year over year as well as budget versus actual performance for all funding sources, with stop light indicators. Triannual budget meetings with all units to discuss strategic and financial performance and planning and to relate financials with operating activities/decisions.
- b. Continued enhanced student credit hour projection including a broader campus involvement
- c. Inclusive strategic investment planning, awarding, and reporting
- d. Broadening the awareness of university financials across the institution via presentations, townhalls, committee reports, alumni retreats
- e. Active review of tuition revenue to plan comparison for real time decision making

2) External Benchmark Vendors

- a. Helio-Campus
 - i. Continued Administrative effort monitoring
 - ii. Internal effort and cost trends (FTE, salary spending, etc.)
- b. Market Pay
 - i. Manage internal pay equity
 - ii. Manage multiple salary surveys for better analysis and improve efficiency

c. Pay Equity Study for all employees

i. Completed study and making adjustments as necessary with on-going work to create staff job architecture including building a work dimensions guide and job profiles.

ii. Pay philosophy established and level setting compensation review ongoing

Program Statistical Data

UND at a Glance

UND enrolls more than 14,172 students in nine colleges: College of Arts & Sciences, Nistler College of Business & Public Administration, College of Education & Human Development, College of Engineering & Mines, College of Nursing & Professional Disciplines, School of Graduate Studies, John D. Odegard School of Aerospace Sciences, School of Law, and School of Medicine & Health Sciences.

UND offers a total of 222 fields of study, including 89 undergraduate majors, 78 undergraduate minors, 56 master's programs, 35 doctoral programs, two professional programs (medicine and law), and a specialist diploma program in educational leadership.

The University also has a growing distance learning program that offers more than 72 online degree programs (40 graduate and 32 undergraduate).

UND's diverse student body represents all 50 states and more than 99 countries.

UND has approximately 260 registered student organizations, strong fraternities and sororities, a nationally recognized residence hall system, engaged campus student leaders, and strong cultural centers, including an American Indian Student Services Center.

Close to 522 American Indian students are enrolled at UND; they utilize approximately 30 programs and organizations specifically designed to meet the academic, social and support needs of underserved populations. The number of students and the number and strength of programs combine to make UND one of the top schools in the nation for educating American Indian students.

A top-to-bottom renovation and expansion has established Wilkerson Commons as the region's premier student dining facility. In addition to expanded dining options, Wilkerson serves students with a wide range of settings to enhance gathering, recreation, study and fellowship.

The School of Medicine & Health Sciences, Robin Hall and Collaborative Energy Complex address the future of health care education, unmanned aircraft systems (UAS) development, and energy, respectively.

UND's John D. Odegard School of Aerospace Sciences and the College of Engineering & Mines have been especially involved in UAS research, education, and service, and UND's UAS Research Compliance Committee is the first in the nation to examine protocols, privacy, and other concerns.

The University is an anchor of the Red River Valley Research Corridor. Prominent facilities in this endeavor include the Ina Mae Rude Entrepreneur Center, the Norman Skalicky Technology Incubator and the Tech Accelerator Building.

On the other end of the campus, the internationally recognized Energy & Environmental Research Center (EERC) features state-of-the-art facilities on 15 acres and employs about 210 scientists, engineers, and support staff. The EERC is one of the world's leading developers of cleaner, more efficient energy technologies as well as environmental technologies to protect and clean our air, water, and soil.

UND has an international reputation for research and scholarship, notably in the health sciences, energy, and autonomous systems. In FY 23, UND reported \$182 million in research expenditures in the NSF HERD Survey – \$131 million of this was external funding of which \$66 million was from federal sources, \$47 million state, and \$18 million private. "

Explanation of Program Costs

Program costs consist of salaries and fringe benefits, operating and equipment. A special line item is included for capital assets.

Program Goals and Objectives

The UND LEADS Strategic Plan is the result of 11 months work by thousands of people across campus, alumni around the nation and our Grand Forks community. UND LEADS unveiled in 2023 does not have an end point. It's five core values: Learning, Equity, Affinity, Discovery and Service, are the foundation for UND for years to come. This plan focuses on the ultimate outcome of an exemplary public research university fulfilled by UND's collective vision to inspire a sense of wonder, a love of discovery, and a commitment to serve.

LEARNING: encourage a lifelong sense of wonder by providing educational experiences essential for living intellectually curious, personally fulfilling, and socially responsible lives.

EQUITY: enhance pathways to higher education and establish supportive learning structures that help all people realize their full potential. Embrace the evolving diversity of perspectives, peoples, and ideas as a core strength.

AFFINITY: foster a sense of belonging and a campus culture that celebrates the unique ways we connect and contribute to UND.

DISCOVERY: advance research, creative activity, and scholarship through our spirit of inquiry and our desire to better understand the world around us.

SERVICE: engage in collaborations that serve the evolving needs of our people, tribal nations, the state of North Dakota, and our global community

Progress on the plan can be found here: <https://und.edu/about/strategic-plan/index.html>

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: "The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs and operational budget reductions alongside cuts to academic programs and/or the need to increase tuition revenue. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent."

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This project leverages appropriations received of \$57.4M during the 2022 legislative session that funded Phase 1 in conjunction with UND Alumni fundraising, achieving a total Phase 1 project of \$82M. This same legislative session provided for a legislative intent that the 25-27 biennium fund \$55.64M Phase 2 for UND – STEM. When combined with the UND Alumni fundraising effort a total Phase 2 project will total \$79.5M. In accordance with UND’s master plan, the combined Phase 1 and 2 of the UND STEM project repurposes the soon to be vacated and demolished Hyslop Sports Center site adjacent to UND’s science buildings and the College of Engineering. This allows for the establishment of a unified, interdisciplinary, multi-faceted STEM &

National Security Corridor District. This will integrate Science, Technology, Engineering and Math academic spaces with much needed research, training and educational spaces. This collaborative endeavor between the College of Arts & Science and the College of Engineering & Mines promotes a greater collaborative and interprofessional education, putting STEM education and research related to national security at the forefront of academic enterprise across the region.

Necessary resources for implementation (including FTE's)*: Unsure at this time. As far as FTE, Mathematics, Physics & Astrophysics and Mechanical Engineering will be growing, however the FTE numbers have not been established.

Are resources being redirected or are they new or additional (including FTE's)*: Phase 2 includes the following departments, all will have redirected existing personnel to the new spaces.

- a. Mathematics
- b. Physics & Astrophysics
- c. Mechanical Engineering

Who is served and impact of not funding*: If not funded the departments noted above are omitted from the collaborative relationship mentioned in question #1, along with their respective research initiatives.

High Performance Computing NTN - UND/NDSU (Priority: 04)

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Research computing infrastructure is essential for research across disciplines. NDSU's CCAST and UND's CRC offer vital infrastructure supporting solutions to North Dakota's major challenges, including agricultural and oil production improvements, as well as economic growth. The attachment outlines requests from each of the research institutions needing help to support research computing.

Both institutions share two common operating needs: (1) additional computational capacity to support artificial intelligence used in research and (2) stable, robust high-performance data storage. The requested amounts are critical to support the world-class AI equipment and high performance data storage that far exceeds that of non-scientific computing.

The requested labor resources fall into three main categories of effort: (1) training for researchers and workforce development, (2) research facilitation, and (3) operations and technical work.

Each institution has a different mission, and quite different disciplines and research programs will benefit.

UND's:

- 1) Rural Health and Human Health
- 2) Energy and Sustainability
- 3) National Security-Space
- 4) Autonomous Systems
- 5) Computational and Data Research

Necessary resources for implementation (including FTE's)*: All necessary resources are already in place within the Computational Research Center (CRC) at UND to implement this effort. The planned effort involves an expansion of the staffing in the CRC and increased computational resource management beyond current levels in support of the new AI mission on campus. Details on both the increased staffing and increased computational resources are described below.

Are resources being redirected or are they new or additional (including FTE's)*: This effort aims to expand existing capability to serve more users and provide more complete support for computational research to the UND community. Thus, no resources are expected to be redirected. Rather, these new resources will fall under the organization of the CRC to accomplish this expansion of services. Again, details of the additional FTE's associated with this effort are included in attachment.

Who is served and impact of not funding*: Artificial Intelligence (AI) will have significant positive and negative impacts on society, and North Dakota's research institutions have an obligation to our state's residents to implement policies and research programs whose outcomes mitigate the negative effects of AI while encouraging the growth of an AI literate workforce and economic growth within the state. The mission of the UND Computational Research Center (CRC) is to provide research computing services to the UND community of investigators, whether in the form of High-Performance Computing (aka supercomputing), Big Data, Information Visualization, Advanced Manufacturing (aka 3D Printing), or AI. However, in the last 2-3 years, the change brought about by AI applications has not only demonstrated that the technology will be the most impactful going forward, but it has also demonstrated that this change will be fast-paced and challenging to master. Because of this, UND CRC requests that 50% of the proposed funding request be allocated toward research computing operations, to include costs related to staff training as well as additional computing hardware, storage hardware, and software licensing associated with these systems. The remaining 50% of the proposed funding will be allocated toward salary & fringe costs used to augment existing personnel with additional FTEs with the goal of expanding the amount of staff support provided by CRC to the UND research community, as well as the types of support services as related to growing areas of AI, to include Machine Learning, Virtual Reality, and Digital Twin technologies.

Statutory Authority

ND Constitution Articles VIII and IX; North Dakota Century Code Chapter 15-52.

Agency Description

The University of North Dakota School of Medicine and Health Sciences (SMHS) is recognized nationally as one of the outstanding community-based medical schools in the country and is a model for high-quality educational programs, efficiently delivered, with an emphasis on primary care. In addition to medical student and resident education, the SMHS provides educational opportunities for a wide variety of biomedical researchers and allied health service professionals including biomedical science, medical lab science, athletic training, physical therapy, occupational therapy, physician assistant program and public health. Further, the SMHS is acknowledged for its leadership in providing inclusive education in the health professions through its commitment to American Indian students and other trainees.

Agency Mission Statement

The primary purpose of the University of North Dakota School of Medicine and Health Sciences is to educate physicians and other health professionals and to enhance the quality of life in North Dakota. Other purposes include the discovery of knowledge that benefits the people of this state and enhances the quality of their lives.

Major Accomplishments

- 1 Implemented the Healthcare Workforce Initiative, increasing class sizes and growing residencies based on funding the legislature with additional funding coming from local healthcare organizations as part of public/private arrangements.
- 2 The SMHS has received state funding, through the Healthcare Workforce Initiative (HWI), to increase annual class sizes of medical students and health sciences students (occupational therapy, physical therapy, athletic training, physician assistants, and medical laboratory science). The current HWI funding allows for 35 additional residency slots. In addition, the new Pediatric resident program in Fargo will accept its first four residents in FY25, and will grow to a 12 resident slot program by FY27
- 3 Established a process of constant and recurring attention to and assessment of our compliance with accreditation standards.
- 4 Strategic planning process and monitoring aligned with UND’s strategic plan.
- 5 Ranked by the American Academy of Medical Colleges as one of the most committed medical schools to rural medicine, with above a 90% plus ranking among all medical schools.
- 6 Recognized by the American Academy of Family Physicians (AAFP) as having the nation’s highest percentage of graduating seniors select family medicine as their specialty choice.
- 7 Continued the RuralMed Loan Forgiveness program to mitigate medical student debt and encourage the choice of a rural family medicine practice location for graduating medical students. The RuralMed Loan Forgiveness Program has been expended to include all medical specialties that may practice in rural areas.
- 8 Expanded opportunities in interdisciplinary experience in rural settings with the Rural Opportunities in Medical Education [ROME] program.
- 9 Collaborated on Project Echo to help address the opioid epidemic.
- 10 The SMHS research activity continues to be very strong with of external funding for FY23 with over \$40.6M in sponsored funding being awarded. (3 year rolling average)
- 11 Progressed in building research infrastructure with federally funded INBRE and COBRE grants.

Major Accomplishments

- 12 Supervise the North Dakota Tobacco Quitline project
- 13 Provided services to all 53 counties and all 33 rural hospitals by the Center for Rural Health and Rural Assistance Center.
- 14 The SMHS received more than \$3M philanthropic support for student scholarships and faculty endowed chair positions in FY23.
- 15 The SMHS Simulation Center continues to be a state-of-the art simulation center that greatly contributes to the educational experience of all medical students and many health sciences students, as well as UND nursing students. In addition, the Simulation Center operates four simulation trucks that are positioned in the four quadrants of the state, offering patient simulation educational experiences to local health professionals (i.e. clinic & hospital staff, fire departments, police departments, EMTs, etc.).

Critical Issues

- 1 North Dakota's population is increasing, due in part to an increasing elderly population and the continuing effects of the "oil patch" developments. The SMHS, in conjunction with its Advisory Council, has, over the past decade, implemented the Healthcare Workforce Initiative (HWI) to address health care provider needs now and in the future, including: 1) reducing disease burden; 2) increasing retention of graduates for practice in the state; 3) training more practitioners; and 4) improving the efficiency of the state's health care delivery system.
- 2 The School has endeavored to keep tuition low and student debt manageable, and believe that those are some of the reasons why more graduates are staying in North Dakota to practice and practicing in rural areas. National comparison data shows that in the course of the past decade, the School has gone from well below the national average to well above it as to the fraction of our graduating physician classes that end up practicing medicine within North Dakota.
- 3 The increasing medical school debt issue across the country for graduating students creates an additional challenge to recruiting needed physicians to rural areas. The RuralMed program is helping to alleviate the overall medical student debt load. Alumni fund-raising efforts to augment financial aid availability to all SMHS students is ongoing.
- 4 The dependence on volunteer faculty (non-salaried community providers) leaves the SMHS vulnerable to changes in availability of qualified and willing individuals. Family medicine clerkships depend heavily on community-based family physician preceptors to teach medical students. These preceptors have traditionally been unpaid, but in recent years more clerkships across the country have started to pay preceptors.
- 5 A continued need for more diversity throughout the institution.
- 6 Although the new SMHS building in Grand Forks continues to be a wonder since it opened in 2016, the SMHS is having growing pains and needs additional space to house the growth in research and Indigenous health actives in particular. The need for additional space is exacerbated by the future closure of Columbia Hall and Hyslop, where the SMHS has educational, research, clinical, and service/support activities.
- 7 The NW Campus – Minot is also having to look for new space to lease. Their current leased space is within the former Trinity Hospital facility, which Trinity has moved out of when their new hospital was completed in 2023. We are currently negotiating a lease for new space across the street from the new Trinity Hospital.
- 8 The SMHS Sports Medicine clinic space has been in critical need of an upgrade for a number of years. It is currently located in the Hyslop Sport Complex which is scheduled to be torn down in FY25. We have initiated a renovation project at the former SMHS University Health Facility in which we will relocate the Sports Medicine clinic. The new clinic location will be also used by other SMHS Health Science departments for educational and research purposes.
- 9 The SMHS received special funding from the ND Legislature to purchase and install Hyperbaric Oxygen Therapy (HBOT) chambers in North Dakota hospitals for research and patient treatment purposes. The 5 HBOT chamber cost approximately \$140K each and will be placed at Essentia Hospital in Fargo and Trinity Hospital in Minot. A process needs to be identified how to transfer the ownership of these HBOT chambers from the UND SMHS to the respective hospitals that received them. The current NDCC does not allow the transfer of the chambers to the respective hospitals.

Critical Issues

- 10 Need to identify funding support to maintain the Simulation In Motion - North Dakota (SIM-ND). SIM-ND is a state-wide service for frontline healthcare workers and first responders to save lives in both urban and rural communities. Critical Access Hospitals, EMS units, Regional Healthcare Systems, Indian Nations, NDUS Institutions, Government Agencies: PD, FD, DOC, Military.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

- All allied health, graduate medical education, continuing medical education and medical student programs are fully accredited.
- The national exam pass rate for all allied health programs are at or exceed national standards.
- The national board scores for medical students are at or exceed national averages.
- Research, scholarship and creative activity make up an important part of the programs at the SMHS.
- 97% of the SMHS 2024 M.D. class graduates matched to a residency program, which included 16 specialties in 12 states.

Explanation of Program Costs

Program costs consist of salaries and fringe benefits, operating and equipment.

Program Goals and Objectives

The primary purpose of the University of North Dakota School of Medicine and Health Sciences is to educate physicians and other health professionals and to enhance the quality of life in North Dakota. Other purposes include the discovery of knowledge that benefits the people of this state and enhances the quality of their lives.

- To be the best community-based school in the country
- To continue to be an innovator in education (with a focus on interprofessional teams)
- To continue to develop focused programs of research excellence
- To serve the people of North Dakota and beyond

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

Inflation Factor increase (Priority: 02)

232 UND School of Medicine

Agency 232

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to assist with increasing costs for utilities, IT, vendor contracts, temporary staff/faculty, and other costs to deliver education to students.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: Now new FTE.

Who is served and impact of not funding*: Students attending the institution.

Statutory Authority

ND Constitution, Section 215, North Dakota Century Code Chapter 15-12

Agency Description

NDSU is a student-focused, land-grant, research university – an economic engine that educates students, conducts primary research, creates new knowledge and advances technology. The university is committed to providing affordable access to an excellent education. NDSU is a top-ranked R1 institution that combines teaching and research in a rich learning environment, educating future leaders who will create solutions to national and global challenges that will shape a better world.

NDSU offers expansive options in undergraduate, graduate and doctoral degree programs along with certificates and co-curricular learning experiences.

Approximately 93% of NDSU students are in-person, leading to a vibrant campus atmosphere, opportunities for community engagement, and contributions to the local economy. NDSU is accredited by the Higher Learning Commission with national and regional recognition for the excellence of its academic programs. Distinctive highlights include:

- Engineering: 2/3 of engineers in the state graduate from NDSU
- Agriculture: Provides the premier agricultural education programs in the state and region
- Nursing: Largest nursing program in the state
- Pharmacy: Only pharmacy program in the state
- Architecture: Only architecture program in the state

As a land grant institution, we serve the constituents of the state through programmatic and outreach efforts to provide access to knowledge. The impact of NDSU is felt statewide through our presence in every county with Extension. Field Days is an annual tradition for each Research Extension Center across the state to show North Dakota Agricultural Experiment Station research in action.

Additionally, the university's research and creative initiatives contribute to the vitality of the state's economy and quality of life. NDSU's R1 status is Carnegie's highest possible ranking for research activity. Reporting \$174.9 million in research expenditures in fiscal year 2022, NDSU ranks 99 out of 410 public institutions. NDSU conducts research across a wide variety of disciplines including food, energy, and water security; cybersecurity, computer science and software engineering; life sciences; and entrepreneurship and innovation. Research has led to receiving 804 awards, 85 patents, 53 registered U.S. trademarks, and 122 issued plant variety protections.

NDSU Athletics ranks among the overall best NCAA Division I programs in the nation. Bison teams have combined for 29 national championships in six sports. Success is seen off the field as well. NDSU's more than 400 student athletes routinely combine to achieve team GPAs of 3.0 or better across 14 sport programs.

Graduates of NDSU go on to build careers in North Dakota and contribute to the state's economy and workforce. More than 94% of 2023 graduates who completed the NDSU Career Outcomes Survey were either employed or continuing their education. Approximately 83% of graduates from North Dakota and 40% of graduates from Minnesota stay in-state for their first job.

Graduating Bison become part of an extensive and thriving network of more than 96,000 alumni in North Dakota, around the country and the globe. The impact the institution has on the lives of current and graduating students leads to high levels of pride and deep-rooted connections to the university and our Bison community overall.

Agency Mission Statement

North Dakota State University provides transformational education, creates knowledge through innovative research, and shares knowledge through community engagement that meets the needs of North Dakota and the world.

Major Accomplishments

- 1 NDSU is a significant contributor to the state's workforce, with the largest enrollment of first year and in-person students of any institution in the NDUS. The university graduates the largest number of bachelor's and doctoral students in the University System. On average, 2,000 bachelor's degrees are awarded to NDSU graduates each year. Approximately 40% of graduates are North Dakotans who are likely to stay in state for their first job (640 graduates). Minnesota residents make up 50 percent or 1,000 degrees awarded, with about 40 percent of them remaining in North Dakota for their first job.
- 2 NDSU entered into a Memorandum of Agreement with the North Dakota Air National Guard to better serve the research, service, educational and workforce needs of North Dakota through streamlined degree pathways and tailored professional advising for Guard members.
- 3 NDSU remains the state's only Carnegie R1 research university, reporting \$174.9 million in research expenditures in fiscal year 2022 and ranking 99 out of 410 public institutions in the National Science Foundation's HERD survey. Expenditures have consistently increased for the last four years. NDSU partnered with external entities to secure a \$160 million grant over 10 years as part of the U.S. NSF Regional Innovation Engines program. More than 800 awards have been received, 85 patents issued and 53 registered U.S. trademarks.
- 4 NDSU successfully hosted 41 scholars to North Dakota Governor's School. Scholars represented 27 high schools, 21 school districts and 17 counties from across the state. The four-week program houses scholars on campus during the month of June to engage in immersive research, small-group instruction and hands-on experiences, and participate in enriching extracurricular activities geared toward STEM.
- 5 With significant investments from the North Dakota Legislature, NDSU made significant progress on multiple capital projects to transform campus. NDSU completed construction of the Peltier Complex, a state-of-the-art agricultural facility designed to better serve NDSU students and faculty, as well as the agriculture industry across the state. Construction has begun on the Bolley Agricultural Laboratory and the Engineering Complex. The Bolley Agricultural Laboratory will house a variety of agricultural research programs, including plant pathology, plant breeding, weed science, agronomy, soil science and horticulture. The Richard Offerdahl '65 Engineering Complex will be built in the heart of campus, providing new space that emphasizes interdisciplinary learning.
- 6 NDSU's athletics program annually ranks among the best overall NCAA Division I programs in the nation. In the 2023-24 academic year, the NDSU football program advanced to the national semifinals for the 12th time in 13 years, the women's basketball program advanced to the Summit League championship for the first time in program history and qualified for the Women's National Invitation Tournament, and former NDSU student-athletes from men's track and field and women's basketball competed in the Paris Olympic games.

Critical Issues

- 1 NDSU serves the state and its workforce in three primary ways: (1) retaining North Dakota students in the state, recruiting out-of-state students and retraining non-traditionally aged students; (2) conducting world-class applied research that helps strengthen and diversify North Dakota’s economy; and (3) providing outreach in every county of the state to share access to new knowledge. A three percent budget reduction has been proposed by the Governor which would compound existing budgetary challenges due to inflation and enrollment declines.

- 2 Continuing to create workforce-aligned programs, expand recruitment efforts and student success programs requires support in the form of additional base general funds.

- 3 The higher education funding formula does not support all institutions equally and there is a need for improved transparency. There is opportunity to adapt the formula to provide support for inflation and incentives for workforce contributions.

- 4 Competing with surrounding states that are working hard to keep their students in-state requires additional scholarship dollars in the form of Challenge Grant funds that will match state investment with private philanthropy. Continuing to bring out-of-state students to NDSU will help support the state’s workforce and applied research.

- 5 Tiers one and two within the capital building fund need to be reviewed with transparency for equity so that all institutions can better care for their existing facilities.

- 6 Advancing research, enhancing curriculum, and increasing industry and community engagement on critical and emerging topics such as precision agriculture, automation, AI, robotics, analytics and entrepreneurship requires additional funding which will establish North Dakota as a leader in these innovative areas.

- 7 Additional computing capacity and stable, robust high-performance data storage is needed to support artificial intelligence related research. Investment in technology infrastructure will help NDSU continue to provide experiential education for students as well as prioritize our R-1 Carnegie Classification status.

- 8 Inflationary pressures are affecting operations at all levels. Funding support from the state would allow NDSU to remain competitive with regard to employee compensation and student tuition.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the “flexibility with accountability” expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

NDSU Transform is a process through which careful analysis and hard work identifies areas for reductions, disrupts old practices and processes to transform the university, and sets a new course for continuous improvement. It led to the recent consolidation of seven to five academic colleges: College of Agriculture, Food Systems and Natural Resources; College of Arts and Sciences; College of Business; College of Engineering; and the College of Health and Human Sciences. Along with the College of Graduate and Interdisciplinary Studies offerings span 290 undergraduate programs, 92 undergraduate majors, 92 undergraduate minors, 29 undergraduate certificate programs, 68 master’s degree programs, 48 doctoral degree programs, 32 graduate certificate programs, and one professional program for pharmacy. While a large majority of our academic programs are in-person, NDSU’s portfolio includes 65 online programs and continues to expand in areas where flexibility is most needed.

As of fall 2023, NDSU student enrollment headcount was 11,952 students producing 155,456 total student credit hours.

Explanation of Program Costs

Salaries and wages, including benefits, continue to make up the majority of NDSU's expenses, representing approximately 73% of the University's state educational and general fund operating budgets in the most recent fiscal year. At NDSU, in order to achieve and sustain the University's viability, programming and recognition as a leading student focused, land-grant, research university, sufficient funding is required for competitive compensation and start-up packages for faculty and staff, along with the capacity to retain those faculty and staff in a performance-based, market driven environment.

Non-salary operating expenses represent the remaining 27% of the state education and general fund operating expenses. NDSU's continued focus on operational efficiencies allows us to meet extra student demand of both undergraduate and graduate students.

Program Goals and Objectives

NDSU goals and objectives are guided by a strategic plan and priorities for implementation. Providing the institutional vision, the strategic plan focuses on reinforcing NDSU's position as an innovative educational institution, at the leading edge of research and outreach, while advancing student success and promoting a welcoming learning environment.

NDSU Transform focuses our work on top priorities and action items for implementing strategies to address NDSU's most pressing challenges and needs. It is a framework for the future of the institution as it prioritizes growth in enrollment, embracing the critical role of NDSU as a land-grant university, strengthening the institution's research status, and supporting initiatives for the health and wellbeing of people across the far-reaching NDSU community.

In meeting the implementation objectives of NDSU Transform, strategies driving change include rightsizing operations through college mergers and academic program review. We've modernized our financial infrastructure through an incentivized budget model for colleges, and reorganized how financial services are delivered. As we build a stronger and more efficient infrastructure, we are investing in best practices to enhance our academic enterprise and improve retention and enrollment.

The future of NDSU includes strong industry partnerships. As we transform the university, we are closely aligning educational offerings with workforce needs, seeking insights from industry leaders with direct knowledge of emerging trends and fields. This includes a recently established Industry and Workforce Ad Hoc Committee, bringing together area industry leaders with university leadership to better align NDSU programs with the workforce needs of North Dakota. These partnerships inspire new programs like cybersecurity, information technology, AI, supply chain, biotech, data science, and AgTech. Furthermore, our industry partners mentor our students and open pathways for career entry and advancement so that NDSU has a direct impact on building a career-ready workforce.

NDSU continues to build on the success of students. Transformational initiatives and industry best practices include professional advising, peer-led learning support, programs for local students in need of additional preparation for college life, and enhanced tutoring delivered online. We promote a better quality of life for our students through wellness programs, the provision of alcohol-free social activities, counseling and personal growth opportunities, as well as services for first generation students, veterans, and students with disabilities.

Budget Request Summary

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

235 North Dakota State University

Agency 235

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

Inflation factor increase (Priority: 02)

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to assist with increasing costs for utilities, IT, vendor contracts, temporary staff/faculty, and other costs to deliver education to students.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: No new FTE

Who is served and impact of not funding*: Students attending the institution.

AI and High-Performance Computing Storage (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This initiative is intended to provide on-going base general funds for additional computational capacity to support applied, computational and data-driven research. For example, research areas that could be supported with this initiative are: Artificial Intelligence, Genomics and Bioinformatics, Machine Learning, Food, Energy and Water Security.

Necessary resources for implementation (including FTE's)*: High-performance data storage

Training opportunities for researchers

Technical operations work

4-5 FTE

Are resources being redirected or are they new or additional (including FTE's)*: This initiative requires new resources to support additional applied research

Who is served and impact of not funding*: This initiative will advance several areas of applied research:

Artificial Intelligence and Machine Learning

Food, Energy, and Water Security

Computational and Data-Driven Research

Genomics and Bioinformatics

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: NDSU’s Sanford Health Athletic Complex (SHAC) was updated in 2015 for various athletic programs, including wrestling. The training commitments and requirements have grown since then and its physical space no longer meets requirements.

The addition of a stand-alone wrestling facility for NDSU athletics will allow our wrestling student-athletes the benefits of expanded athletic time and training resources for their health and safety, and more flexibility in strength and conditioning schedules that in turn works better for class scheduling and academic time. The overall added wrestling specific space allows for better practice efficiency (space and numbers) and use of time for student-athletes, coaches and support staff. The space will assist our coaching staff in the recruitment of BIG XII quality student-athletes to attend North Dakota State. The addition of that space will allow us to use the current existing space to either help support a current program/team or give us the ability to possibly add a program that would support NDSU enrollment.

One of the highest priorities of the new space is the expansion from two mat practice areas to four mats. Adequate space for all 36 wrestlers to safely practice at once is critical. Other needs include cardio space with weight lifting, fueling station for the health of the athletes, locker area, offices, team spaces and flexible spaces.

A facility attached to the SHAC would require a partial demolition of the North Stands, which will reduce some deferred maintenance for the campus.

Statutory Authority

North Dakota Century Code 15-15.02.

Agency Description

NDSCS provides educational programs and services which serve the needs of individuals preparing to transfer to four-year academic institutions, or preparing for careers in the applied sciences/technologies. It serves the businesses and industries of North Dakota by working with employers on the design and delivery of customized training programs. It is the vision of the college to provide quality education/services "second to none" through our commitment to student-centric programs and services, employee development and continuous improvement.

NDSCS is committed to a philosophy that provides for the varied educational needs of each person through competent faculty, curriculum and educational experiences. Students have the opportunity to develop their full potential, obtain gainful employment and make satisfactory career progress. It provides students with practical hands-on and general-education knowledge and skills.

Agency Mission Statement

The North Dakota State College of Science is a comprehensive, associate degree granting college founded on a tradition of quality and integrity. We deliver learner-focused education through a unique and evolving collegiate experience. Using innovative delivery strategies, NDSCS anticipates and responds to statewide and regional needs by providing access to occupational/technical programs, transfer programs, and workforce training.

Major Accomplishments

-
- 1 Reimagined all new guiding statements for the institution; mission, vision, values

 - 2 Nursing program received continuing accreditation from the Accreditation Commission for Education in Nursing (ACEN), April, 2023

 - 3 Using grant dollars, will begin new cohort of 32 nursing students in the Fargo location beginning Fall, 2024

 - 4 All diesel programs were reaccredited with the Associated Equipment Distributors (AED), July, 2023

 - 5 Successful fundraising campaign (\$1.5 million) to make the financial match for the legislatively approved capital project (Ag expansion/Bisek Hall addition) of \$20 million. Project began during the summer of 2024; expected completion August, 2025

 - 6 Best Community College in North Dakota award by 'Intelligent.com', January, 2024

 - 7 Awarded Federal Aviation Administration (FAA) grant of \$300,000 to start new Aviation Maintenance program

 - 8 Earned 2023-2024 Military Friendly® School Designation

 - 9 Student Credit Hour (SCH) production increase of over 9% from 2021-2023

 - 10 FY23 Composite Financial Index (CFI) at 6.24, among the highest in the NDUS system

 - 11 Received the N.D. State Energy Program – Bipartisan Infrastructure Law (SEP-BIL) grant of \$315,645

 - 12 American Welding Society certified NDSCS as an Accredited Test Facility

 - 13 Continue to move toward a Fall, 2025 start date for the Career Innovation Center (CIC) in Fargo

 - 14 Dual credit enrollment has increased 32% since AY22

Critical Issues

- 1 Imminent threats regarding free tuition “promise’s” (i.e., MN North Star Promise, NDSU Promise, Concordia Promise, MSUM offering free tuition to ND students, Bismarck Promise, etc.)
- 2 Regional competition. Competitors such as Lake Area Tech. (Watertown, SD) and Alexandria Tech. (Alexandria, MN) are expanding, offering housing, and growing programs
- 3 CIC funding challenges
- 4 Preparation for opening of the CIC (programming, curriculum, organizational issues, etc.)
- 5 Deferred maintenance funding challenges
- 6 As enrollment continues to increase, housing will soon become a challenge
- 7 Maximizing the use of existing space. Must provide additional space for growing programs, while cutting space for programs that are shrinking
- 8 Serving workforce needs in North Dakota. Continue to build the TrainND presence in the SE region
- 9 Embrace and adapt to new technology; in both curriculum as well as institutional operations
- 10 Innovation within academic programs and support the Schrieber-Beck bill for more funding to start up new and innovative programs
- 11 Dual credit; continue to expand into more rural areas of N.D., and grow our CTE dual credit programs

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the “flexibility with accountability” expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

NDSCS is a comprehensive community college located in Wahpeton, a progressive city with a population of 8500 in the southeastern corner of North Dakota. Wahpeton, the county seat of Richland County, is located at the head of the Red River of the North. Across the state border lies its sister city, Breckenridge, Minnesota, with a population of approximately 3700. Over 200,000 people live within a 60-mile radius.

Student FTE for fiscal year Fall 2023 was 2,124.

The following programs are currently being offered at NDSCS: agriculture, architectural drafting and estimating technology, auto body repair and refinishing technology, automotive technology, banking and financial services, building construction technology, business management, caterpillar dealer service technician, civil engineering and surveying technology, computer information systems, cooling and heating services, culinary arts, dental assisting, dental hygiene, diesel technology, electrical technology, health information technician, John Deere tech, machinist and toolmaker, mechanical systems, mental health care associate, occupational therapy assistant, office administration, pharmacy technician, plumbing, nursing, recreational engines technology, HVAC systems and technology, refrigeration and air conditioning, technical studies, welding, workforce training and community education.

The campus is located on 128 acres of land and includes thirty-five major building totaling 1,382,613 square feet. Twenty-four of these buildings are instructional/administrative buildings totaling 690,165 square feet. The other twelve buildings are used for Auxiliary Enterprises (Student Housing, Dining Services, etc.) totaling 692,448 square feet. The insured value of the building and contents total \$246,808,515. The buildings are utilized heavily due to large number of labs/shops areas that are provided for career and technical students (seventy-two percent of NDSCS students are enrolled in these programs).

The replacement value of all Type I-III buildings at NDSCS is valued at \$245,269,578 and consists of the following areas:

15.4 acres of roofs

11.38 miles of electrical utilities

3.4 miles of water lines

2.5 miles of storm sewer

1.9 miles of sanitary sewer

2.33 miles of steam line

19.75 acres of parking lots

4.75 miles of sidewalk

6.3 miles of telecommunication

Explanation of Program Costs

Program costs for North Dakota State College of Science include cost of salaries and benefits for staff and faculty, operating expenses for instructional and support functions and facilities upkeep and maintenance expenses.

Major operating costs include the cost of equipment for labs/shops, which is continually escalating due to the constant changes in technology, instructional supplies, faculty and staff training and development, risk management insurance, the local computer network, computer and telecommunication infrastructure for the campus, cost of marketing NDSCS's services, class time, etc., the constant increase of utilities, repairs and maintenance, and building and ground supplies.

Program Goals and Objectives

To provide high quality instruction on and off campus in curricular areas approved by the State Board of Higher Education, to provide community and statewide educational services at the collegiate level and to provide an atmosphere of scholarly activity. It is NDSCS' goal to increase enrollment to approximately 3200 students per academic year at the freshman and sophomore levels and to graduate approximately 1200 students per year. Further, we strive to provide the instructional and academic support required to reach our goals and for the delivery of high quality instruction, research, and scholarly activities and service by the faculty.

238 North Dakota State School of Science

Agency 238

To provide the required support services in meeting the needs of all students and student groups. Institutional support provides administrative leadership within a growing institutional environment, academic and financial coordination of all institutional affairs, operating guidelines, and compliance with the policies established by the North Dakota State Board of Higher Education.

To help plan, create, maintain, and operate an environment conducive to learning and training for approximately 7,000 individuals per year through its involvement in the Workforce Training initiative as well as its other outreach activities and services which are provided through staffing and facilities on the NDSCS campus as well as the Skills and Technology Training Center in Fargo. All of which are to be accomplished through the most economical means possible. It is also the intent to maintain and preserve the campus buildings, streets, parking lots and other facilities, and to remain current on special assessments.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: "The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent."

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

Inflation Factor Increase (Priority: 03)

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: This proposal calls for a plan to revitalize what is currently known as the Mildred Johnson Library to meet both current and future programming needs. This project includes the proposed relocation of several CTE programs, including Automation/Robotics, Occupational Therapy, Pharmacy Technician, as well as other educational components of the campus including our Educational Innovation group. It should be noted that this project was included in the 2016 NDSCS Master Facilities plan, the 2022 Master Facilities Plan, and has been a top priority on campus for many years. The project was a top priority for NDSCS heading into the 68th Legislative session but has yet to be funded.

Statutory Authority

North Dakota Century Code 15-13-01

Agency Description

Dickinson State University (DSU) is a comprehensive state institution, one of 11 colleges and universities that make up the North Dakota University System. The university employs approximately 180 faculty and staff with an enrollment of approximately 1,400 students. More than 75 programs are offered at the undergraduate level. The institution is comprised of 4 schools, the School of Education, the School of Applied Sciences, the School of Professional Studies, and the School of Business and Entrepreneurship. DSU is North Dakota’s only dual mission university, with a growing career and technical education program and five accredited master’s programs. The majority of students come from North Dakota, Montana, and other Midwestern and Western states. A modest contingent of international students are also an important component of the student body.

Agency Mission Statement

Dickinson State University is a regional comprehensive institution within the North Dakota University System, whose primary role is to contribute to intellectual, social, economic, and cultural development, especially to Southwestern North Dakota. The University’s mission is to provide high-quality, accessible programs; to promote excellence in teaching and learning; to support scholarly and creative activities; and to provide service relevant to the economy, health, and quality of life for the citizens of the State of North Dakota.

Major Accomplishments

-
- 1 The University has worked hard over the past several years to cut expenses and reorganize the academic framework of the organization. The 2025-2027 biennium will reflect the full implementation of several Career and Technical Education (CTE) programs including diesel technology, meat processing, expanded welding programs and several others that are under review. The University’s plan is to continue to establish itself as the premier Dual Mission university in the region.

 - 2 Dickinson State University has entered into a number of agreements with its sister institutions over the past year. Agreements have included the expanding of courses to students, participation in grant projects, and the providing of support services.

 - 3 Dickinson State University, in cooperation with the Walton Foundation, has developed and continues to refine the Theodore Roosevelt Center, in anticipation of the opening of the Theodore Roosevelt Presidential Library, in Medora, ND, in 2026.

Critical Issues

-
- 1 Access to workforce

 - 2 Aging infrastructure

 - 3 A shrinking student population to draw from

 - 4 An increase in competition for students

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

Dickinson State University served a headcount enrollment of over 1400 students during the fall, 2023 semester. The campus consists of 26 buildings with a total gross square footage of 640,975 square feet with an estimated replacement value in excess of \$123.6 million situated on approximately 132 acres. Based upon expenditures of \$33 million, the projected direct economic impact of Dickinson State University's operations was approximately \$100 million.

Explanation of Program Costs

As a service orientated agency, personnel costs make up the largest component of DSU's expenditures at approximately 58.5% of total anticipated Campus Operations expenditures, followed by Supplies and Repairs at 13.3%, Utilities at 2.5%, and all other expenses at 25.7%. Of the all other expenses Travel, Waivers, and Operating Fees make up 92% of the total. Funding requests in support of extraordinary repairs will help us address deferred maintenance projects in instructional and administrative facilities/grounds.

Program Goals and Objectives

Provide quality collegiate level instruction in curricular areas approved by the North Dakota Board of Higher Education thus fostering an atmosphere of scholarly activity including research. Serve as a regional/national resource center capable of disseminating information that promotes change, fosters economic development, and contributes toward the betterment of society. Assist those in pursuit of knowledge to acquire information/instruction through an environment that is conducive to meeting their goals and furthering their well-being, at an affordable price.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

239 Dickinson State University

Agency 239

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: This project will modernize DSU’s campus substantially (though not completely), by eliminating two outdated structures and their attendant major maintenance and inefficient utility costs, as well as dormant asbestos concerns that would arise from any attempt to renovate these facilities. DSU proposes this project as a pilot project for the State of North Dakota to address major maintenance issues wholesale on a campus, with the idea that major modernization be addressed on other campuses in future biennia.

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: The plan is to complete the renovations that were started in 2017 and 2018. This project has been identified in the DSU Master Plan as a top priority to enhance on-campus student housing. At the present time, only the second floor and a portion of the first floor are useable for campus housing. This project would complete the renovations on the first floor and the third floor and provide 68 additional beds to the University's housing inventory. The addition of the 68 beds are necessary before we can do anything to address any other campus housing needs.

Statutory Authority

ND Constitution Article VIII, Section 6; North Dakota Century Code Chapter 15-13.

Agency Description

Mayville State University (MaSU) is a regional institution of higher education established in 1889 with a focus on teaching and learning. MaSU is one of the 11 public colleges and universities that make up the North Dakota University System (NDUS). The State Board of Higher Education (SBHE) is responsible for system governance to ensure that each campus fulfills its roles and responsibilities to the system, as well as to the citizens of North Dakota. While the University maintains its historical mission of teacher education, other programs are available to prepare students for careers in business, health & physical fitness, science, mathematics and nursing. Students can also pursue a Masters of Arts in Teaching (MAT), Masters of Science in Nursing or continue study in professional and graduate schools. Distance and online education has allowed MaSU to expand its course and program offerings to the region while continuing to meet the current needs of students in North Dakota. These opportunities offer accessible courses and degrees via a variety of delivery methods, so that working adults in North Dakota have the flexibility to further their education while remaining close to their homes, families, and jobs. Through this evolutionary process, MaSU institutional identity and direction have been guided by its mission statement, vision, and purposes. MaSU has defined itself as the school of "personal service", and fosters a campus community that provides a variety of programs and services that are designed to nurture a student's academic and personal success.

Agency Mission Statement

Mayville State University is dedicated to excellence in teaching, service, and scholarship in dynamic, inclusive and supportive learning environments that are individually focused. We offer quality undergraduate and master's programs enriched with practical experiences to prepare all learners for a global economy. The mission statement, approved by SBHE November 2016, has four specific purposes 1) To provide academic programs and services that address contemporary career and workforce opportunities. 2) To maintain collaborative relationships with schools, employers, and communities which contribute to the economic growth and social vitality of North Dakota. 3) To deliver flexible programs, instruction, and student services to meet the needs of the individual. 4) To cultivate an environment that supports creativity, intellectual curiosity, lifelong learning, service, and an appreciation of diversity.

Major Accomplishments

-
- 1 Old Main renovation underway with all resources relocated to temporary locations until June 2026.

 - 2 CFI Score Increased from .4 to 5.76 through efficiencies and conservative financial stewardship.

 - 3 Completed the Natural Gas addition to the heating plant, reducing utility costs by approximately 20% .

 - 4 Keeping annual student cost of attendance down at \$15,000 - 73% less than the national average.

 - 5 Annual giving is at an all time high with \$2,290,043, an increase of \$1,201,299 from the previous record and year, including a 1 Million gift in 2023 which matches the largest ever by Mayville State.

 - 6 Fully expended the ND Challenge Grant of \$1.1Million for the third straight biennium.

 - 7 Utilized Economic Diversification Research Grant Funds to add a criminal justice program in response to demand fall of 2024.

 - 8 Mayville state has seen 16% growth in the degrees awarded over the past four years and 71% stay in ND to work or further their education.

 - 9 82% of MSU education graduates to seek teacher licensure in ND.

 - 10 Restructured tuition, waivers and scholarships for students to better meet evolving needs, diversifying the target audience and focusing recruitment efforts.

Major Accomplishments

-
- 11 Utilized \$20,000 using the Paraprofessional-to-Teacher Pathway initiative to provide scholarships for tuition for paraprofessionals to become licensed teachers in North Dakota.
 - 12 Partnered with Dickenson State University to assist in providing continuity during a difficult transition in their Nursing program. Supported the sister institution with Program Director and Dean and Instructor so their students could continue without interruption in service.
-

Critical Issues

-
- 1 The planned closure of PERS Defined Benefit Plan Closure from HB1040 is estimated to have a significant impact on both General Funds and Special Funds for Mayville State - last estimated at just under \$2.2M.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools

complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

Mayville State University delivers instruction, through six academic divisions, and instructional support services to approximately 1050 on campus and distance students. MSU's enrollment fall 2023 totaled 1048 students, 987 undergraduate, and 61 graduate. Full time students totaled 570 with 560 resident on campus, and 488 distance.

MSU and the Mayville community demographic indicate a more diverse campus than within the community and the state. MSU's racial and ethnic diversity percentage (21%) is one of the highest across all of the ND campuses when compared to total student populations.

The support services function reacts to non-instructional needs such as: housing, dining, bookstore, library, health services, wellness center, academic support services, counseling services, career development, and campus administrative services.

Facilities services are responsible for the care and upkeep of the 55 acre campus which includes: administrative, instructional and auxiliary buildings encompassing 371,355 sq. ft.; the football stadium and practice fields, the baseball stadium and tennis courts, all located at the east end of campus; and parking lots, streets, and sidewalks throughout campus.

Explanation of Program Costs

Program costs include the salary and fringe benefits for all faculty, administrators, professional and support staff, instructional supplies and equipment, operating costs for institutional administration and student services programs, and utilities and maintenance costs for the entire campus. Capital improvements are also essential costs that provide systematic repair and upgrade of facilities for a safe and comfortable environment for students and employees to learn and work in. Program costs align with mission, vision, purposes, core values, and strategic plan.

Program Goals and Objectives

The Mayville State University instructional program provides high quality instruction in curriculum areas approved by the North Dakota State Board of Higher Education, community and state-wide educational services at the collegiate level, and in an atmosphere for scholarly activity including research. MaSU Theme 3 Goals support excellence in teaching and learning. 3.1 Focus on strengthening the quality of instruction across all modes of course delivery. 3.2 Improve academic excellence by recruiting and retaining qualified diverse faculty and faculty with diversified qualifications. 3.3 Provide faculty with the tools and resources for success to create a culture that supports quality instruction. 3.4 Strategically increase options for course offerings in programs. 3.5 Assess and respond to emerging opportunities through strategic investment in new programs of study. 3.6 Use valid student learning assessment techniques and resulting data for decision making. 3.7 Ensure academic quality across all modes of course delivery.

Campus support services include the functional areas of student services and institutional support. Student Services provides the support services to meet the needs of all students and student groups. Institutional Support provides leadership and direction for an institution embracing change, coordinates all institutional affairs, and ensures compliance with the policies established by the North Dakota State Board of Higher Education. MaSU Theme 1 goals support these efforts. 1.1 Redefine and strengthen the recruitment and admissions process. 1.2 Increase the number of students who make timely academic progression and attain degree completion. 1.3 Provide transformative experiences for students. 1.4 Utilize systems and analytics to monitor and manage retention that leads to graduation.

Facilities services maintains and operates campus facilities in a manner which assures safety, complements learning and research, and is accomplished through the most economical means possible. MaSU Theme 3 goals support these efforts: 2.1 Provide safe, secure, and inclusive physical and social shared environments. 2.2 Technology use across the institution reflects current social, instructional, and workforce practices. 2.3 Facilities support the development of a positive living, learning and working environment. 2.4 Develop environmentally safe and responsible practices. 2.5 Provide reasonable accommodations for learners with documented disabilities with readily available resources and alternative instructional strategies regardless of delivery mode.

Additional cross-cutting goals that support MaSU's core values are supported in Themes 4 and 5: 4.1 Create opportunities for students and faculty to engage in research and other scholarly activities. 4.2 Support and reward innovation that results in new relationships, research, academic programs, enrollments, and learning experiences. 5.1 Strengthen a culture of communication 5.2 Foster commitment to personal service across campus. 5.3 Employ the Strategic Plan to guide institutional vision and priorities. 5.4 Invest in qualified faculty and staff that support institutional mission and achieve priorities. 5.5 Invest in new ways of charitable giving that support institutional priorities.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 6/1/2023

End Date (MM/DD/YYYY): 6/30/2026

Description: Background Information

Old Main is the iconic face of Mayville State University. The four-story building, constructed in two phases in 1890 and 1905, is the original building on the Mayville State campus. Old Main has been a prominent structure serving the campus and community for decades.

Project Description

The Old Main Renovation project will involve a substantial remodel of the existing building and construction of a four floor mechanical addition. Components to the project renovation include:

- New windows to improve energy efficiency and restore historic character to the building.
- Add exterior wall insulation and attic insulation to improve comfort, energy efficiency and reduce operating costs.
- Repair foundation deterioration and cracking.
- Re-paint exterior brick to seal the building envelope.
- Replace and repair exterior soffit and fascia.
- Remove hazardous materials (asbestos, lead paint, etc.).
- Gut and replace building antiquated mechanical HVAC system to improve energy efficiency, controls, indoor air quality and occupant comfort.
- Replace antiquated and deteriorated building plumbing system including waste and

water supply lines.

- Gut and replace obsolete electrical power and lighting systems to improve energy performance and control, respond to increase power demands, and improved lighting.
- Replace fire alarm and add life safety notification system.
- Provide new technology, data and communication systems to respond to current and future demands of information technology access.
- Install new automatic fire suppression system.
- Create more efficient use of building space by raising the lower-level floor in west wing.
- Administrative, student services and faculty offices and classrooms will be reorganized to meet current and future needs and to provide improved visibility, access and student/student and student/faculty interaction.
- Reconfigure interior circulation and stairway access to improve utilization, access, and life safety for offices and classrooms. Rectify dead-end corridor safety concerns.
- Improve theatre access and exiting to meet current code requirements for life safety.
- Locate new building mechanical systems and equipment.
- Provide adequate number of accessible restroom facilities on each floor.
- Provide a passenger/freight elevator to serve all building levels.
- Provide a new staircase that is also an approved egress from the theatre.
- Construct an addition that will be sensitive and complimentary to the existing building brick and stonework.

Consistency with Campus Facility Master Plan and Budget

240 Mayville State University

Agency 240

- The project is included in the 2022 master plan and is consistent with the campus strategic goal to provide safe, modern, campus facilities.

- Project has been approved and funded in phases - first phase was in the 68th Legislature. Project is also a top SBHE priority.

Project Management Oversight (consistent with 9/25/13 SBHE approved guidelines)

- Project design and construction will take approximately 36 months, with project construction completion approximately June 2026.

SBHE Capital Criteria (address each of the criteria below)

- Project addresses current life, health, and safety issues

- The project will improve health and safety issues in the current building by adding automatic fire suppression, replacing fire alarm system, and rectifying code deficient circulation and exiting concerns. Replacement of mechanical HVAC system will improve efficiency, indoor air quality and occupant comfort. Hazardous building materials will be removed. Video surveillance will be upgraded, and door security added.

- Project addresses compliance with local, state, or federal law or other requirements

- Building is currently deficient with lack of accessibility to the lowest level, open stairway issues, dead-end corridors, in-operable fire protection, inadequate accessible restrooms, and theatre assembly and egress issues.

- Project corrects significant deferred maintenance

- This historic building is over 120 years old yet is structurally sound. Deferred maintenance is a concern and needs to be addressed. With significant improvements to

building envelope, mechanical and electrical systems, accessibility, life safety and utilization efficiency, Old Main will continue to be a historic campus icon positioned to serve the campus for many more years.

- Project addresses a critical maintenance need defined by situations which must be addressed, and which, if neglected, could result in substantial damage to the structural integrity of the building
- Critical building systems are very old and in need of replacement; and if unattended will result in damage to the integrity of the building.
- Project meets a compelling programmatic or accreditation justification consistent with campus mission and strategic goals
- Enrollment is on the increase; and modern facilities are needed to continue to attract and retain students. The project impacts two education divisions and critical core campus services. It will provide a modern environment to educate and guide students.

Project has been partially funded by the legislature in a previous biennium, but is not yet complete .

This project has received partial funding in a previous biennium.

Space will be used to advance a specific program or activity that is a high priority of the state

Old Main is the campus cornerstone building for many administrative services, and houses two academic divisions offices and classrooms. Renovating building space and updating teaching and learning technology will support accelerated learning in new and innovative programs.

Project addresses an urgent infrastructure need.

The building is critical to campus operations, but a more modern facility is needed to continue to attract and retain students, faculty, and staff.

Project is consistent with campus master plan and is highly rated by the campus

240 Mayville State University

Agency 240

Old Main Renovation is included in the current and previous master plans. The project is super important and viewed as the most beneficial capital improvement for the campus.

Project is necessary based on clearly demonstrated condition of existing space

Yes. Old Main is a historically significant 54,140 sq. ft. building that has been marginally improved over the years. This project will enhance the building's functionality and efficiency and preserve a very significant campus asset.

Project fosters the consolidation of services or enhances operating efficiencies

Clustering faculty offices and classrooms will leverage innovation. New systems throughout the building will improve access to technology for students, faculty, and support staff throughout office and classrooms. Student Services functions presently scattered around campus will be centralized, and faculty and classrooms in the building will be clustered in the building to better serve our customers.

State Initiative:* Emergency Response Support

Justification: Project type based on percentage of cost as per Master Plan section 3.

100% Life Safety Concerns

Master Plan Alignment

Within the March 2022 Mayville State University Campus Master Plan, based on campus risk and security assessment and student surveys, the three highest priorities are surveillance, card access and adequate exterior lighting.

This project encompasses three priorities: completing the installation of card access on all exterior entrances to campus facilities as well as major corridors on campus; enhancing the visual surveillance of campus with the installation of hardware and software for cameras in additional locations; and installing and replacing dilapidated pedestrian lighting for added safety after dark.

Steps toward completion of this project have been implemented in phases at the university over the past several years. This funding will complete those efforts for all areas of campus, helping to secure the safety of our campus residents and visitors.

Scope of Work

1. Purchase and installation of 32 additional exterior solar pedestrian lighting fixtures.
2. Purchase and installation of 40 additional IP cameras, hardware and software.
3. Purchase and installation of 377 additional card access points and software.
4. Purchase and installation of 5 doors replacing existing doors that are not compatible for card access installation.

The pedestrian lighting enhancement will provide adequate, ample and enhanced lighting outside after dark for all campus visitors, improving situational awareness and visibility.

240 Mayville State University

Agency 240

The additional IP cameras will provide enhanced visibility and monitoring of campus facilities, recall ability for any issues that may arise and act as a deterrent.

Additional card access points on all exterior and interior doors aid Mayville's ability to secure the safety of students and employees in the normal and emergency course of action.

This project would commence in July of 2025 and complete by June of 2026.

Statutory Authority

ND Constitution Article VIII, Section 6; North Dakota Century Code Chapters 15-10 and 15-13.

Agency Description

Minot State University (MiSU) is a regional, public institution located in the northwest region of North Dakota, serving students from Minot, the region, state, nation, and other countries. Undergraduate and graduate courses and programs are offered on campus and at a distance, through face-to-face, online, and alternative modes of delivery. Non-credit and professional training and experiences are offered to students and community members.

Agency Mission Statement

Minot State University is a public university dedicated to excellence in education, scholarship, and community engagement achieved through rigorous academic experiences, active learning environments, commitment to public service, and a vibrant campus life.

Major Accomplishments

-
- 1 MiSU completed a \$26.6 million remodel of Hartnett Hall.
 - 2 The Minot State University Development Foundation closed the books on another successful year fundraising over \$9.3M in FY24. Also, the MSU Development Foundation EMPOWER capital campaign that publicly launched in the Fall of 2022 has exceeded its \$50 million goal.
 - 3 Enrollment is up 31% in undergraduate cyber/digital degree fields since 2020.
-

Critical Issues

-
- 1 The enrollment declines and subsequent funding formula effects compiled with higher-than-average inflationary costs have resulted in a significant tightening of budgets.
 - 2 The aging of campus facilities and the corresponding growing deferred maintenance needs continues to be an area of concern for MiSU.
 - 3 The ability to recruit and retain qualified faculty and staff especially in high-demand areas is a critical issue for the campus.
 - 4 There are several external factor which are contributing to a period of slow enrollment decline. These include increased interest in non-college related career paths from traditional audiences, expansion of online offerings from new and existing competitors, increased competition in ND with expanded bachelor's academic offerings, and out-of-state free tuition offers.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

STUDENTS:

Headcount Students-Fall 2023 – 2,741

10% are graduate students

30% are freshman

33% are part-time students

4% are international students (other than Canadian)

5% are Canadian students

66% are North Dakota students

FTE Students-Fall 2023:

20% live in student housing (Common Data Set 2023-2024)

Programs

56 undergraduate, 9 graduate, and 17 and 14 undergraduate and graduate certificates, respectively, are offered.

The programs with the highest enrollment are: Nursing (251); Management (133); General Studies (112); Exercise Science & Rehabilitation (104); Criminal Justice (100); Special Education (96); and Elementary Education (92).

Faculty and Staff"

419 FTE employees paid from all sources of funds (as of 6/30/23).

Average faculty salary - \$73,546 (Fact Book 2023-24).

Data Source: 2023-24 MSU Fact Book, Fall 2023 enrollment reports, IR major/minor departmental reports, and Human Resources Office.

Explanation of Program Costs

Revenue by source including all funds:

General Fund 30.5%

241 Minot State University

Agency 241

Tuition & Fees 21.5%

Auxiliaries 4.5%

Restricted Funds 35% (Includes Grants & Contracts and Scholarships)

Other 8.5%

TOTAL 100%

Expenditures by type including all funds:

Salaries and wages 62%

Operating 38% (Includes cost of goods sold and scholarships)

TOTAL 100%

Program costs are inclusive of salaries and benefits for faculty and staff and operational expenses for instruction, support services, and physical plant operations and maintenance. Major costs other than salaries and benefits would include; utility costs; communications costs-combination of telecommunications and information technology network infrastructure costs; repairs and maintenance for buildings and grounds-including deferred maintenance and capital repairs; travel; insurance; maintenance agreements; software licenses; equipment purchases and leases.

Data source: FY2023 audited financial statement.

Program Goals and Objectives

Mission

Minot State University is a public university dedicated to excellence in education, scholarship, and community engagement achieved through rigorous academic experiences, active learning environments, commitment to public service, and a vibrant campus life.

Vision

Minot State University will:

- Deliver high-quality education where, when, and how it is needed to a diverse, multi-generational student population.
- Prepare students and the institution for the evolving social and technological challenges of the world.
- Inspire scholarship and creative activity among students, faculty, and staff.
- Empower graduates with a distinctive combination of professional expertise and broad-based education to support varied careers and

productive lives.

Goals in Brief

- Goal 1: Build enrollment to secure financial sustainability for the institution
- Goal 2: Support collaboration and innovation to create an active, hands-on learning environment and rigorous interdisciplinary academic experiences
- Goal 3: Strengthen meaningful community engagement and commitment to public service
- Goal 4: Foster a campus community where all members are valued and appreciated

Is this a Large IT project? No

Is this request for a new program or service? No

241 Minot State University

Agency 241

Request explanation and justification (include any statutory authority)*: The North Dakota University System is facing tough financial decisions for each institution. The proposed 3% budget reduction would lead to staff and faculty layoffs alongside cuts to academic programs. Reducing staff, faculty, and academic programs would diminish our core mission and ability to provide the needed workforce for North Dakota.

Our institutions rely on the funding formula to plan and make strategic decisions for future academic programs and operations. Implementing an additional 3% reduction alters the ability to plan and make adjustments. Currently there are seven institutions who will experience general fund reduction, approximately \$11.3 million, due to decreased credit production in the funding formula. Those institutions are in the process of planning for the \$11.3 million in general fund reductions.

Our System has dedicated faculty and staff, whose expertise and commitment provide success in our academic excellence. Reducing FTE numbers would diminish our capacity to deliver quality education and erode morale. Cutting academic programs would limit opportunities for our students, diminish our competitiveness, and undermine our ability to attract and retain top talent.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: N/A

Inflation Factor increase (Priority: 02)

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: Phase one of this overall project would include relocation of the DCB Nursing program to the second floor and skywalk of the Trinity HCW building. Relatively minor modifications would provide state-of-the-art facilities and allow for program expansion. The first floor of Health Center West would be ideal for a shared simulation skills center, with access for DCB students, MiSU nursing students, and students in shared Trinity programs, such as paramedic, sonography, and radiography. MiSU Nursing could move simulation faculty, as needed, as well as its RN-to-BSN program into the first floor of HCW, further strengthening its partnership with DCB students interested in pursuing their BSN.

State Initiative:* Workforce

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: The request includes funding for multiple academic departments on campus. The primary focus of this is entirely on renovating campus facilities. All expenditures would go towards renovations with no new or additional square footage. These projects are focused on workforce demand, and specifically geared toward such academic areas.

Statutory Authority

ND Constitution, Article VIII, Section 6.

Agency Description

Valley City State University (VCSU), operating as a post secondary educational institution within the North Dakota University System, serves the citizens of North Dakota and the surrounding area by offering a broad and diverse population of students an opportunity to challenge their individual learning capabilities.

Agency Mission Statement

Valley City State University is a public, regional university offering exceptional programs in an active, learner-centered community that promotes meaningful scholarship, ethical service, and the skilled use of technology. As an important knowledge resource, the University offers programs and outreach that enrich the quality of life in North Dakota and beyond. Through flexible, accessible, and innovative baccalaureate and master’s programs, VCSU prepares students to succeed as educators, leaders, and engaged citizens in an increasingly complex and diverse society.

Major Accomplishments

-
- 1 VCSU experienced record head count enrollment Fall 2023 and Spring 2024 and projections for Fall 2024 are trending in a positive direction.

 - 2 VCSU’s first ever capital campaign concluded successfully and included its largest single donation of \$5 million dollars in VCSU history. The success of this campaign is impacting scholarships, helping towards the McCarthy Hall Renovation, and an Athletic Complex addition to include an indoor practice field.

 - 3 VCSU added new programs and agreements. These include being approved for a new prison education program at the Jamestown River Correctional Center. Viking Pathways was also approved and its first student will be enrolling in Fall 2024, this program helps students with intellectual disabilities complete college courses.

 - 4 VCSU was once again recognized as a BEST College in U.S. News as the #1 public regional institution in North Dakota and #2 in the midwest 12 state region.

 - 5 VCSU was rated as one of the Best Colleges in America this year by Money.com. The ranking lauded VCSU’s affordability, graduation rates, and employment after graduation.

Critical Issues

-
- 1 Retaining quality Faculty and Staff continues to be a priority at VCSU. Fall 2024 will see 10 new faculty and staff has seen turnover in 20 positions over the year. The salary increases, market/equity adjustments, and internal initiatives have made strides in employee retention but the market continues to increase and employees are still leaving due to salary reasons.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

The university delivers instruction through thirteen academic departments serving approximately 1,600 students. All students and faculty are issued notebook computers. Information technology skills are required of all graduates. Instruction is supported by traditional and web-enhanced library services as well as an extensive, high speed, technology infrastructure. Approximately 2000 web portals support 1600 students and 200 employees. All classrooms are smart rooms allowing wide use of web and communication services. The campus covers 90 acres of which 54 are maintained. The remaining is primarily hillside woodland. The campus has 11 instructional/administrative and 12 service buildings and a total custodial square footage of 549,194.

Explanation of Program Costs

The program major costs include salaries for faculty and staff positions. Other costs include the associated operating expenses including instructional material used in the classroom, fuel, natural gas, water sewer, electricity, telephone, maintenance and custodial supplies and repair and maintenance cost.

Program Goals and Objectives

1. Provide high quality instruction in curricular areas approved by the Board of Higher Education. Provide community and statewide educational services at collegiate level and provide an atmosphere of scholarly activity, including research and service to the local and regional community.
2. Provide the required support services in meeting the needs of all students and student groups. Provide leadership and directions to a growing institution, coordinate all institutional affairs, and ensure compliance with the policies established by the North Dakota State Board of Higher Education.
