Statutory Authority

North Dakota Century Code Chapter 37

Agency Description

The Office of the Adjutant General includes both the North Dakota National Guard (NDNG) and the Department of Emergency Services (DES).

The NDNG is a community-based defense force made up of quality North Dakota citizens, trained and available to protect the vital interests of our state and nation.

The NDDDES has two divisions: the Homeland Security Division and the Division of State Radio that contribute significantly to the public safety within the state.

Agency Mission Statement

North Dakota National Guard: Providing ready units, individuals, and equipment supporting our communities, state and nation.

Department of Emergency Services: Providing North Dakota with a central coordinating agency for public safety communications, prevention, protection, mitigation, response and recovery.

Major Accomplishments

-
- 10 National Guard: From July 1, 2022 - June 30, 2024 the North Dakota National Guard supported two emergency responses in the State and two Emergency
1 Management Assistance Compact (EMAC) mission requests out of state. The responses totaled over 4,300 personnel days. They included placing seven one-ton sandbags near White Earth to reinforce a failing dam, breaking up an ice jam with over 63,000 gallons of water on the Missouri River between Bismarck and Mandan, supporting the state of Texas along with the Southwest Border with 100 Soldiers for 30 days, and supporting the state of Wisconsin during the national convention with 117 Soldiers for 10 days.
-
- 10 National Guard: The North Dakota Army and Air National Guard continue to be mobilized around the country and globe in support of combatant commanders.
2 In the past two years 29% (843 Soldiers and 379 Airmen) of the North Dakota National Guard has been activated to support a variety of missions. At the same time members (620 Soldiers and 200 Airmen) of the North Dakota National Guard have participated in numerous national and multi-national training events (7 Army and 12 Air) to build readiness and develop partnerships.
-
- 10 National Guard: The North Dakota National Guard had two programs recognized nationally. The Sexual Assault and Response Director, Erica Davidson received
3 the Exceptional Sexual Assault Response Coordinator Award for enhancing outreach programs and building relationships and establishing partnerships with state and local agencies to improve access to victim resources. The Naturalization Program, which has assisted over 60 legal residents from over 40 countries in obtaining United States citizenship while being members of the North Dakota National Guard. Both programs are considered best practices and have been implemented at higher levels or in other states.
-
- 10 National Guard: Through the North Dakota National Guard State Partnership Program Service Members have participated in 25 engagements with the West
4 African Countries of Ghana, Togo, and Benin. These engagements ranged from senior leader officer and non-commissioned officer (NCO) engagements to heavy engineer machinery equipment training. Representatives from the Ghana Armed Forces also participated alongside ND Army National Guard (NDARNG) Soldiers in the Best Warrior Competition in August 2024.
-
- 10 National Guard: The North Dakota Air National Guard 119th Wing, based in Fargo, has started its 18th year of 24/7 operations without a lapse in service in
5 support of combatant commanders around the globe.
-

Major Accomplishments

10 6	National Guard: The North Dakota Air National Guard 219th Security Forces Squadron, based at the Minot Air Force Base, through unique agreement with the Air Force, continues to provide security for the 91st Missile Wing and the nuclear missile field.
10 7	National Guard: The North Dakota National Guard conducted five new events this year called Stakeholder and High Payoff Events. These events combined military career fairs, civic leader engagements, and community open houses, all with the purpose of exposing more people to military culture and opportunities afforded to members of the National Guard. Over 700 high school students, 35 high school teachers/counselors, and 30 civic leaders participated in the events.
20 1	Homeland Security: Conceptualized, developed and implemented a 24/7 all hazards Watch Center in January, 2023.
20 2	Homeland Security: Developed a geospatial all-hazards common operating picture dashboard for state and local public safety officials.
20 3	Homeland Security: Received continuous national accreditation through the Emergency Management Accreditation Program (EMAP).
20 4	Homeland Security: Provided support to three other states through the Emergency Management Assistance Compact (EMAC) since 2021, Texas, Hawaii and Wisconsin.
20 5	Homeland Security: Distributed \$14.5 million in state Homeland Security programs to local jurisdictions in the 2021-2023 biennium.
20 6	Homeland Security: Distributed \$8.7 million in state Homeland Security programs to local jurisdictions in the 2023 fiscal year.
20 7	Homeland Security: Conducted eight exercises since July 1, 2023 involving 439 participants, and supported the establishment of the Public Information Officers Association conference.
20 8	Homeland Security: Presented 68 training courses, reaching 1,228 participants since the beginning of the 2021-2023 biennium.
20 9	Homeland Security: Administered 11 open disasters in the 2023 fiscal year.
21 0	Homeland Security: Developed and executed a statewide snow removal grant that distributed \$18.3 million to local jurisdictions in under 90 days.
21 1	Homeland Security: Distributed \$103.3 million in disaster recovery assistance in the 2021-2023 biennium.
21 2	Homeland Security: Distributed \$42.5 in disaster recovery assistance in the 2023 fiscal year.
21 3	Homeland Security: Conducted 184 Site Assistance Visits including 40 K-12 school facilities, 41 higher education facilities, and 104 other critical infrastructure facilities.
21 4	Homeland Security: Prepared seven threat assessments on North Dakota critical infrastructure sectors and an assessment on the threats and vulnerabilities of GPS on critical infrastructure.
21 5	Homeland Security: Achieved continuing Enhanced Mitigation Plan status, resulting in an additional 5% of disaster recovery costs for mitigation projects.

Major Accomplishments

-
- 21 Homeland Security: Received \$101 million in flood mitigation projects under the 2022 fiscal year Flood Mitigation Assistance program, which was third in the
6 nation in terms of dollars and first per capita.
-
- 21 Homeland Security: Awarded \$20.2 million in federal funds for mitigation projects under the 2022 and 2023 Building Resilient Infrastructure and Communities
7 program, including the state's first ever competitive project awarded.
-
- 30 State Radio: With the equity package State Radio received, we were able to restructure the department in a way that gives more opportunity for upward
1 movement of team members. This restructuring also allowed State Radio to have a training officer on every shift to ensure that all new team members have the hands-on training they need. This has also helped with staff retention as team members are afforded promotional opportunities that were not available in the past.
-
- 30 State Radio: Due to the equity package State Radio received, the division has been attracting quality applicants at a rate double what they had in the past. This
2 is making it easier to fill positions as soon as they are vacated.
-
- 30 State Radio: In conjunction with the ND 911 Association, State Radio has initiated the process to start up a statewide dispatch training academy. This will unify
3 training across the state, leading to unified best practices, training and collaboration across Public Safety Answering Points (PSAPs).
-

Critical Issues

-
- 10 National Guard: Readiness remains the number one priority and is critical to ensure a prepared and ready force as part of the operational reserve and able to
0 respond to federal and state requirements. 1 a. Readiness starts with full formations which requires strong recruiting and retention incentives to meet our end strength requirements. The North Dakota National Guard has not been exempt from the recent and on-going recruiting and retention struggles. We have dropped below our desired 102% strength to 95% and trends indicate that decline could continue. Over the past five years on average the NDNG has lost 30 more members than gained. With about 25% of 17-21 year olds meeting the minimum standards for service and less than 10% having interest in military service, we need to change our approach. The Next Generation Leadership Program is an effort to do just that. 1b. Readiness requires exceptionally well trained Service Members and units. We continue our efforts to update ranges and training areas necessary to support changes in weapons and ammunition capabilities and to support the additional and challenging training requirements of an Operational Reserve. 1 c. Readiness requires our continued support of our Soldiers, Airmen and their Families. Their needs increase as we ask more of them. 1 d. Readiness requires the maintenance and modernization funding to support 330 state owned National Guard buildings and infrastructure across the state. The ability to perform maintenance and conduct necessary repairs as these facilities age is crucial to ensure they remain functional for our current and future force.
-
- 10 National Guard: The continuation of the state match levels necessary to retain federal funding of important programs in the Air and Army Guard federal/state
1 agreements.
-
- 20 Homeland Security: The two largest grants that fund ND Department of Emergency Services/Homeland Security operations, as well as local emergency
1 management programs (Emergency Management Performance Grant and Homeland Security Grant) have each received a 10% federal reduction. Projecting a funding shortfall in the 2025-2027 biennium.
-
- 20 Homeland Security: Bare minimum staffing level for the Watch Center threatens the ability to operate 24/7 and results in increased overtime.
2
-
- 30 State Radio: State Radio is currently running the Law Enforcement Message switch with a single point of failure. This system is critical to law enforcement safety
1 and duties. In the event of a failure, law enforcement will be without critical information for an unforeseeable amount of time. Currently, law enforcement agencies are running 7,000,000 transactions in a month on this system. In the instance of a failure, State Radio will need to rely on other states to run emergency data. Also, State Radio would need to pay for the emergency cost of a new system in excess of \$1,500,000.
-

Critical Issues

30 State Radio: State Radio is in need of critical infrastructure that is compatible with the SIRN system. We need the ability to record critical information on the
2 system in order to comply with North Dakota Century Code 57-40.6-10. The current recording solution is not compatible with the new system and will need to be upgraded.

Performance Measures

Program: Tuition and Enlistment Compensation

Performance is not measured at the program level. Performance is measured at the ND National Guard overall level.

Program: NG Operations

Performance is not measured at the program level. Performance is measured at the ND National Guard overall level.

Program: Air/Army Guard Contracts

Performance is not measured at the program level. Performance is measured at the National Guard overall agency level.

National Guard:

Line of Effort 1 – People (Attract – Develop – Retain)

1.1 Establish and enhance recruiting and retention initiatives NLT 2030.

1.2 Educate government, non-government, and community entities to enhance public trust NLT 2030.

1.3 Integrate a talent management approach to meet the needs of service members and team members NLT 2030.

Line of Effort 2 – Readiness (Force Structure – Infrastructure – Equipment)

2.1 Develop and validate NDNG force structure.

2.2 Develop infrastructure that supports current and future requirements.

2.3 Obtain modern equipment that support state and federal missions.

2.4 Maintain Garrison Training Center Level III status for CGTC.

Line of Effort 3 – Innovation (Policy – Process)

3.1 Anchor a culture of innovation in the NDNG.

3.2 Facilitate achievement of initiatives through legislative action.

3.3 Identify and mitigate policy barriers by creating innovative solutions.

Program: DES Administration

Performance is measured by the success of the divisions served, (Homeland Security and ND State Radio) and accounting excellence without major audit findings.

Objective 1: Preparedness: Optimize Preparedness and Outreach Efforts to Ready All Jurisdictions and Citizens for Emergencies

Key Result 1.1: Extend whole community emergency management in North Dakota by engaging additional community entities across all sectors throughout the lifespan of the plan.

Key Result 1.2: Maintain regular strategic effects-based communications with stakeholders, including but not limited to relevant updates, two-way feedback, and field visits to obtain firsthand knowledge regarding the stakeholders' situations, needs and capabilities throughout the lifespan of the plan.

Key Result 1.3: Develop a training program and schedule for public/private partners education to include information on NDDDES mission, vision, values, and operations; roles of local Emergency Management; and protection of critical infrastructure.

Key Result 1.4: Develop a training program and schedule for education of state, local and tribal public officials on the roles of Emergency Management and Incident Command System.

Key Result 1.5: Develop and implement a strategic communications plan to influence citizen stakeholders towards increased individual preparedness by Sept 1, 2023 (National Preparedness Month).

Objective 2: Operations: Enhance the Response, Recovery, and Mitigation Operations of State, Local, and Tribal Emergency Management Programs to Include New and Growing Threats/Hazards and Capabilities

Key Result 2.1: Develop clear list of new duties, assignments, and expectations of NDDDES with corresponding budget needs for presentation to executive and legislative branches.

Key Result 2.2: Climate Analysis: Develop plans and capabilities to mitigate, respond to, and recovery from threats related to climate.

Key Result 2.3: Technology Capabilities: Leverage technologies from public and private partners to inform decision making and enhance response capabilities though the lifespan of the plan.

Key Result 2.4: Establish 24-hour Watch Center to increase shared situational awareness and common operating picture across the state in order to maintain a timely coordinated response by December 2023.

Objective 3: People: Prioritize a People Centered Culture to Develop and Retain a Knowledge, Skilled, and Motivated Emergency Management Team by Being a Flexible, Problem-Solving Organization

Key Result 3.1: Decrease turn-over rates (not considering retirement) by 1% measured every two years.

Key Result 3.2: Increase employee satisfaction scores by 1%, measured every two years.

Key Result 3.3: Implement the National Qualification System utilizing a phased approach of State Emergency Operations Center staff, state agency staff, Emergency Management Support Team, local Emergency Management personnel and first responders.

Program Statistical Data

Program: Tuition and Enlistment Compensation

Service members (approximately 450 per semester) are provided this educational opportunity while at the same time make their contribution to defend and serve our state and nation. This program was started in 1977 and continues to provide an excellent recruiting and retention incentive. Our Army strength is currently at 2922 with an authorized strength of 3071 for FY24. The Air strength is currently at 1130 with an authorized strength at 1200 for FY24. This program is critical to maintaining current strengths.

Program: NG Operations

The agency maintains approximately 330 buildings throughout the State of North Dakota, of which approximately 20% are state supported. The total inventory of buildings is at a cost value of \$249 million. Current infrastructure costs are at \$61 million. Funding level is at a minimum requirement to continue state operational support of the ND National Guard and affects the long standing agreements and contracts with the federal government. Operational costs are primarily utilities, repairs, insurance and other day-to-day expenses involved with maintaining state supported facilities at current state. Grant funding provides rental payments to 7 city-owned armory facilities throughout the state that support our units. The ND Veterans Cemetery (NDVC), which currently provides a final resting place for over 11,960 individuals, requires support for salaries and wages. The average number of interments per year is 580. The NDVC is having a busy year and looks like it will be exceeding the annual average by 40 or more burials this year. The Reintegration/Outreach program includes one licensed social worker and two outreach specialists that perform outreach duties to all branches of veterans throughout North Dakota. ND Cares was an initiative created from Executive Order 2015-01 issued by Governor Dalrymple in January 8, 2015 and placed under the National Guard. It continues under Governor Burgum. ND Cares is a coalition of more than 40 military and civilian professionals dedicated to the care and support of North Dakota Service members, Veterans, Families and Survivors (SMVFS). ND Cares is not a provider of services, rather a coalition whose mission is dedicated to understanding the needs and services required by our SMVFS and to resolve barriers or gaps in those services, through local or statewide systematic changes, to strengthen an accessible and seamless network of support of SMVFS. ND Cares priority is behavioral health with the focus on the promotion of emotional health, prevention of mental disorders, prevention of substance abuse disorders, treatment and recovery support. ND Cares main strategic goal is to reduce barriers to the use of mental health services.

Program: Air/Army Guard Contracts

Personnel and facilities covered by these contracts/agreements are essential to the day-to-day operations of the Air and Army National Guard. The federal funding is dictated by the state share of support (general funds). The state share of support is also closely related to federal funds that come directly into the state that are not processed through the state budget system. The National Guard brings in over \$660 million in economic impact to the State of North Dakota in a biennial period. The Camp Grafton Training Center at Devils Lake is a nationally recognized training facility. Soldiers from throughout the United States and different branches of military as well as civilians train at this facility. This facility is critical to not only overall NDNG Soldier training, but specifically weapons training. Without adequate training range areas, our NDNG Soldiers would have to go out of state for critical weapons training and certification. This also is true for out of state

Soldiers that train at Camp Grafton Training Center annually.

540 Adjutant General

Agency 540

Program: DES Administration

The NDDDES Administration processed \$15.1 million in various Homeland Security and Emergency Management Performance grant payments and \$32.8 million in Disaster Recovery Assistance grant payments during the 2021-23 biennium and supported 73 FTE's in payroll and travel processing as well as overall administrative and accounting operations for the Department of Emergency Services. In addition, this division processed \$18.1 million in snow removal reimbursement grants to local political subdivisions.

Explanation of Program Costs

Program: Tuition and Enlistment Compensation

This program provides ND National Guard members with tuition assistance. The reimbursement payment is based on the highest undergraduate tuition rate at a ND University for an education level of both undergraduate and graduate level course work. The program is limited to 130 semester credit hours for undergraduate degrees and 39 semester credit hours for post graduate degrees, per military member. Most students have been receiving 100% tuition reimbursement when combining both federal and state funds. Budget request is based upon approximately 450 participants per semester with a goal of continuing 100% tuition reimbursement for the undergraduate level. Education benefits are the number one reason service members join the NDNG which is why this program is critical to maintaining the ND National Guard force strength.

Program: NG Operations

Program funds several FTE's with various functions including tuition reimbursement, reintegration/outreach program, ND Civil Air Patrol, the ND Veterans Cemetery and administrative support of all functional areas. The program maintains and operates our state supported facilities (330 buildings), to include the ND Veterans Cemetery and ND Civil Air Patrol, to ensure the readiness posture of our soldiers for federal as well as state missions. The capitalized cost of these state owned building is \$249 million and infrastructure costs of \$61 million - crucial to force readiness. The ND National Guard Reintegration/Outreach program consists of one licensed social worker and two outreach specialists. The 2015 Legislature approved ND Cares which currently consists of one FTE and operating costs.

Program: Air/Army Guard Contracts

General fund matching is critical to the Air and Army Guard Contracts to meet agreement commitments between the state and federal governments. The general fund match is needed to fund salaries, utilities and operations that require a state/federal match. This program supports various state FTE which are mainly 100% federally funded along with various federal/state cost share FTE's as well.

Program: DES – State Radio Division

Coordinates 24/7/365 9-1-1 services that dispatches emergency medical, fire, and law enforcement response for 25 counties, is the designated back-up for the other 15 public service answering points throughout the state and is the primary dispatch center for the N.D. Highway Patrol. In total, providing direct assistance to more than 4,000 users representing 287 federal, state, local, and tribal agencies.

Currently working with various agency stakeholders and 911 Association to establish a State Dispatch Academy. Additionally, State Radio runs critical emergency communication and intelligence infrastructures, systems, and services that allow emergency personnel to coordinate locally, statewide, federally, and with citizens.

Program: DES – Homeland Security Division

540 Adjutant General

Agency 540

The Homeland Security Division provides the organizational base for emergency preparedness, response, mitigation, and recovery operations for the state, 56 local emergency management organizations, and four tribal management organizations.

DES-HLS staffs the 24-hour Watch Center to monitor threats across the state and contribute to the State and Local Intelligence Center.

Program: DES Administration

1. This program consists of shared agency FTE's that provide the administrative/accounting support to the Department of Emergency Services.
2. Operational costs are the administrative costs supporting Homeland Security and ND State Radio.
3. The Grants line expenditures within this program are federal pass through of State Homeland Security Grant, Operation Stonegarden Grant, and Emergency Management Performance Grant.

Program Goals and Objectives

Program: Tuition and Enlistment Compensation

The goal of this program is to provide tuition assistance at institutions of higher learning in North Dakota and abroad. This goal is to provide 100% tuition reimbursement while maximizing federal funds and supplement with state funds for undergraduates and a portion of graduate level studies.

Program: NG Operations

The goal of the Operations Program is to adequately support and maintain the ND National Guard facilities and state personnel throughout the state. This program provides the day-to-day support to include salaries and wages, operating expenses and equipment for the units of the ND Air and Army National Guard for over 300 state-owned facilities. Without providing this critical support, we would not be able to support either state or federal missions. In addition, the Operations Program goal is to provide organized support to soldiers through its Outreach and ND Cares functions.

ND Cares encourages communities and businesses to become partners in ND Cares mission. Currently there are 58 communities (including 4 entire counties) and 28 businesses. Communities put up ND Cares Community signs at the entrance of their communities to let the military community know they are supported, and businesses display a sign at the entrance of establishments.

ND Cares also encourages the military related communities to seek behavioral health services via public education radio and video spots. These spots also announce events and new services and programs targeted to the military-related community. For example, there is a TV spot running for services under the COMPACT Act - a program that lets veterans know they can go to any emergency department when in a suicidal crisis and get VA assistance to pay for it. Other radio spots announce major veteran events such as the Stand Downs in Minot and Bismarck.

ND Cares is also leading the Governor's Challenge which is a partnership among the U.S. Department of Veterans Affairs, the U.S. Department of Health & Human Services' Substance Abuse and Mental Health Services Administration and the State of North Dakota to bring together community leaders and state agencies to prevent suicide among Service Member, Veterans, and their families. The North Dakota Governor's Challenge Team developed strategic action plans to prevent Veteran suicide using evidence-based methods within key priority areas. Core team organizations include ND Cares (team lead), VA Fargo, ND Dept. of Veterans Affairs, ND National Guard, FirstLink, ND Dept. of Health & Human Services, ND Suicide Prevention Coalition, University of ND (ND HOPES), American Foundation for Suicide Prevention, and Mental Health America of ND.

540 Adjutant General

Agency 540

Since the Challenge began in 2022, the ND Teams has offered and completed a variety of military focused suicide prevention trainings and military culture trainings resulting in over 750 people trained. Nearly 10,000 gun cable locks have been distributed. A quick reference guide was developed for community providers with veteran patients allowing providers to easily connect with the VA health care system for better coordination of care. The guide has been distributed at provider conferences and via partner list serves.

Program: Air/Army Guard Contracts

The goal of this program is to successfully execute the contracting/agreements with the federal government in support of the ND Air and Army National Guard. and adequately support and maintain the ND National Guard facilities and state personnel throughout the state.

Program: DES Administration

1. Maintaining highly accurate grant accounting records through continuous coordination with grant program managers.
2. Facilitating payroll processing and all travel for the Homeland Security and ND State Radio employees.
3. Ensuring all information processing, grant payments for Homeland Security and Emergency Performance Grants and data support functions following fiscal and administrative policies as well as state laws and regulations.

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: State Radio Priority #2

CHAPTER 57-40.6

EMERGENCY SERVICES COMMUNICATION SYSTEMS

57-40.6-10. Standards and Guidelines 4. Public Safety Answering Point must (k) have the capability of recording and immediate play back of recorded emergency calls and radio traffic

Necessary resources for implementation (including FTE's)*: General funds are being requested, but no FTE's are needed.

\$310,000 - new recording solution compatible with the new SIRN radio system

\$90,000 - cover SIRN costs for dual maintenance

\$95,000 - covert three deployable tower trailers with SIRN radio gear

Additional detail for each item above are provided within the decision package operating line, and also the equipment > \$5k form.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: State of North Dakota, Highway Patrol, BCI, Game & Fish, and State Radio Counties

State Radio's current logging/ recording solution is not compatible with the new SIRN Radio System upgrade. In order for calls and radio traffic to be recorded on the new SIRN radio system, State Radio has to replace its old recording solution. State Radio was going to ask for this funding in the 68th legislative session, but with project delays, State Radio pulled it from last session and placed it in the 69th session.

540 Adjutant General

Agency 540

The three portable tower trailers used for emergency response have radios in each of the three (3) trailers that need to be upgraded/replaced in order to work on the new SIRN system in the event of emergencies. If these radios are not upgraded, the tower trailers will not be able to be used.

Lastly, the current Zetron radio system State Radio is using until SIRN is completed will need to run in parallel with the SIRN. This will allow for thorough testing and safe efficient transition without causing risk to the 28 State Radio counties.

Critical Infrastructure State Match Funding (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	6,000,000	-	6,000,000	0.00	-	1,000,000	1,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	6,000,000	-	6,000,000	0.00	-	1,000,000	1,000,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority):* National Guard Priority #1

The ND Army National Guard Division of Facilities and Engineering (G9) staff supports over 2.5M SQFT in infrastructure requirements. About 27% of the 2.5M SQFT is infrastructure which requires a state match. For the 2023-25 biennium the federal government provided around \$18M to support the infrastructure requirements while the state provided \$1M. The Army National Guard has several facilities around the state that require new roofs, new chillers, boilers and other building system repairs. However, without additional state funding we will not be able to complete projects on these facilities.

Necessary resources for implementation (including FTE's):* Request for \$6,000,000 of general funds for critical infrastructure match.

Are resources being redirected or are they new or additional (including FTE's):* New funds are being requested.

Who is served and impact of not funding:* National Guard Soldiers, Federal Civilian Employees and State Employees all benefit. This initiative translates into modern, efficient, and healthy work areas. Additionally, this will enhance National Guard readiness and response capability to state emergencies.

The impact of not funding is increased probability of catastrophic failure of building systems and equipment as well as increased chances of unsafe, undesirable, or unhealthy working conditions.

540 Adjutant General

Agency 540

Infrastructure Insurance (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	790,853	-	790,853	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	790,853	-	790,853	0.00	-	-	-	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #2

The ND Army National Guard Division of Facilities and Engineering (G9) staff recently worked with Mr. Corey Olson from North Dakota Insurance Reserve Fund (NDIRF) to provide an updated assessment on the insurance coverage for our facilities. Mr. Olson found several severely underinsured buildings at both Camp Grafton and around the state. Raymond J. Bohn, Armory in Bismarck ND is one example. The Armory building is currently insured for \$17.7M. However, it should be insured for \$52.4M. Additionally, the Regional Training Institute Facility at Camp Grafton Training center is currently insured for \$36.7M and should be insured for \$62.1M.

This request is for funding to bring our insured property values to 100% of NDIRF's valuations. This request is also to help offset the premium increases experienced year after year. For State Fiscal Year 2024, the NDIRF premium was increased 23% across all properties. The large increases are no longer items the agency can absorb and is seeking additional funding for adequate coverage.

A small portion of this request also goes to help offset the 23% insurance premium increase for State Radio and all of their property and equipment needs.

Necessary resources for implementation (including FTE's)*: This request is for general funds as property insurance is not something we are able to seek reimbursement for from the federal government through the Cooperative Agreement, and the annual premium increase of 23% for SFY25 is too large to absorb.

Are resources being redirected or are they new or additional (including FTE's)*: The insurance is not a new expenditure, but this is for additional funding to provide adequate coverage and help offset the annual premium increases.

Who is served and impact of not funding*: National Guard Soldiers, Federal Civilian Employees, State Employees and agency partners are impacted by this request. National Guard Bureau's (NGB) Cooperative Agreement (CA) General Terms and Conditions, PROP Article II. Property Management System. Section A. Insurance Coverage for Real Property and Equipment (page 41) states, "You must, at a minimum, provide the equivalent insurance coverage for real property and equipment acquired or improved under NGB CA awards as you provide for real property and equipment that you own." Therefore, the state must insure federally supported assets at the same percentage as they insure state supported assets.

540 Adjutant General

Agency 540

NDIT Operations & Maintenance (O&M) Costs (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	509,232	-	509,232	0.00	509,232	-	509,232	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	509,232	-	509,232	0.00	509,232	-	509,232	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: State Radio Priority #3

As part of unification, NDIT now charges agencies Operations & Maintenance (O&M) costs for various agency support functions. Initially this was tied to unified FTE counts, but for the 2025-27 biennium they are going away from a count basing it on the utilization rates for the Public Safety team that helps support the agency. In working with NDIT for the projected 2025-27 rate increases, we discovered the O&M costs are not associated with our Homeland Security division. As a result of this, the State Radio division will be experiencing a significant increase to their NDIT operating costs they are not able to absorb. The agency is not able to transfer the funding from Homeland Security to State Radio to help offset the charges as the majority of the NDIT bill for Homeland Security is paid with federal grant dollars and those dollars are not able to support State Radio IT expenditures. The 2% general funds allocated to the Homeland Security division are also necessary in order to meet the state match requirements for the federal grants.

State Radio's base budget is comprised of 66% personnel costs, leaving limited resources for the remainder of their operations. The remaining operating costs are vastly technology costs the agency cannot operate without. The division has a no fail mission and cannot afford to downsize their manning power to help offset the increased technology costs. The demands put on the division are increasing as they continue to grow and take on more responsibility as jurisdictions continue to seek State Radio services.

For the 2023-25 biennium, both Homeland Security and State Radio are paying \$15,000/month (total of \$30,000/mo) for O&M costs. The projected rates for the 2025-27 biennium total \$36,218/month. This is a significant impact to State Radio, and will result in them experiencing an increase of \$21,218/month to their NDIT expenditures. This increase equates to \$509,232 of additional funds State Radio will need to request. They are not able to absorb all of this cost. State Radio is requesting general funds to offset the difference.

Per NDCC, State Radio does set rates and calculates an amount the locals pay for 911 fees. Those rates must be published one year prior to the start of the biennium. Unfortunately, the timing of when NDIT submitted the O & M costs and when the fee calculations were due, did not align. Therefore, the increased cost is not accounted for in the 2027-29 911 fees. Of State Radio's \$10.5 million budget, 21% on average goes to NDIT.

Necessary resources for implementation (including FTE's)*: Additional general funds to help offset the increased O&M costs.

540 Adjutant General

Agency 540

Are resources being redirected or are they new or additional (including FTE's)*: New funds are being requested.

Who is served and impact of not funding*: Currently State Radio services the responders and communities in 28 State Radio Counties. State Radio also is the Dispatch Center for all Highway Patrol, Game & Fish, BCI, State Fire Marshalls, and Parks & Rec Law Enforcement in all 53 counties. Our county rates are set over one year ahead of the biennium per NDCC. Since the timing of the O&M increased cost did not align with our rate publications, State Radio is not able to absorb a cost that equates to 4.8% of our total operating budget. The impacts of not approving this decision packet will severely impact other technologies, training, and travel associated to SORN Radio trainings and transition for over 4,000 radio users around the state. It may force cutting technologies that are meant to better serve and protect the public, responders and Law Enforcement around the state.

ND Response Website (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	87,336	-	87,336	0.00	87,336	-	87,336	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	87,336	-	87,336	0.00	87,336	-	87,336	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #1

The costs to operate the NDResponse.gov website are existing costs that have mainly been paid from the NDIT budget since it's inception in 2016. For the 2023-25 biennium, the Homeland Security incurs a monthly cost of \$486.00 to support the website. Based on the NDIT funding model, this is unsustainable for them as they do not receive funding for this site and have previously not sought reimbursement. For the 2025-27 biennium, NDIT has notified NDDDES they will need to cover the costs of the website. The projected monthly rate DES received from NDIT for this service is going from \$486/month to \$4,125/month. This is a \$87,336 increase that Homeland Security is not able to absorb.

The NDResponse website was originally developed during the Dakota Access Pipeline protests to direct citizens to one trusted source of information for all of ND Government related to public safety; regardless of which agency may be the lead.

At that time, the web traffic was extremely high and there were multiple ongoing cyber attacks against ND government systems. The website is built to effectively function even when all other ND.gov systems are down, providing a resilient and redundant way to reach the citizens.

In addition, the system is built to handle large, rapid influxes of web traffic during public alerts such as Amber, Silver and Blue Alerts. When a public alert is issued, the website may spike to over 200,000 concurrent visitors. NDResponse has been used to communicate to citizens during protests, floods, pandemics, severe summer storms, blizzards, and long-term power outages.

540 Adjutant General

Agency 540

Statutorily, 37-17.1 broadly charges NDDDES with reducing the vulnerability to communities, providing a setting conducive to the rapid and orderly restoration after a disaster, and providing a statewide emergency management system that includes prevention, mitigation, preparedness, response and recovery. All of those functions are supported by the NDResponse website. In addition, NDDDES has some statutory obligations to support the various public alerts which are now supported by NDResponse.gov.

Necessary resources for implementation (including FTE's)*: The resources required are funding and authority to pay for the web hosting service for NDResponse.gov.

Are resources being redirected or are they new or additional (including FTE's)*: This may be a re-direction from NDDIT's funding to NDDDES, but it is a new resource request for NDDDES.

Who is served and impact of not funding*: The citizens are served indirectly, but the website directly supports NDHP, BCI, NDDOT, NDDDES, NDDHHS, and likely other state agency missions. If not funded, when a public alert such as an Amber or Silver Alert is issued we would have to send them to a different website which customarily is not built to handle the load that these alerts put on a system. Additionally, this is the state's redundancy plan in the event a cyber attack or natural disaster disrupts the nd.gov websites hosted by NDDIT.

Emergency Response Funding (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	2,000,000	-	2,000,000	0.00	2,000,000	-	2,000,000	0.00
Total	2,000,000	-	2,000,000	0.00	2,000,000	-	2,000,000	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #2

This decision package is similar to approved decision packages from the 2021-2023 and 2023-2025 bienniums. In the 2021-2023 biennium, the legislature approved a decision package for \$2,000,000 in Bank of ND loan authority for the same purposes and a small amount of the funding was used to pay for wildland fire training and expenses. In the 2023-2025 biennium, the legislature approved a decision package for \$2,000,000 in one-time funding from the Disaster Relief Fund (DRF). This authority is located in section 8 of the Office of the Adjutant General's appropriations bill (SB 2016) from the 2023-2025 session.

We would like to propose a slight change: move from one-time to ongoing funding, making long term planning and operations of the agency more effective by stabilizing a source of funding when federal funds are not immediately available or may not be eligible, such as a significant cyber attack or hazardous materials train derailment.

540 Adjutant General

Agency 540

NOTE: NDDDES has proposed a policy bill that includes verbiage to make this part of 37.17.1, which would make this request moot.

Necessary resources for implementation (including FTE's)*: Authorization to spend DRF.

Are resources being redirected or are they new or additional (including FTE's)*: This would be a new ongoing resource balanced against an existing one-time resource.

Who is served and impact of not funding*: The citizens and local political subdivisions are primarily served by this funding.

If not funded, NDDDES will not have funding or authority to immediately respond in a disaster with state assets or equipment without first getting a local jurisdiction to agree to pay for the response.

Additionally, there may be an imminent need for training or supplies that the state would need prior to an event occurring that would hamper timeliness of response measures.

Civil Air Patrol Statewide Interoperable Radio Network (SIRN) Upgrade (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	250,000	250,000	0.00	-	250,000	250,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	250,000	250,000	0.00	-	250,000	250,000	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Civil Air Patrol Priority #1

This project would provide the ND Wing Civil Air Patrol with modernized communications systems to ensure interoperability with other state and local responders. This is a required upgrade in order to remain compatible with the response community.

Necessary resources for implementation (including FTE's)*: General funds are necessary for this request.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: The people and visitors of ND are served. The impact of not funding will be a lack of interoperability with other responders and the inability to coordinate response efforts.

540 Adjutant General

Agency 540

Joint Operations Center (JOC) SIRN Requirements (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	8,000	-	8,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	8,000	-	8,000	0.00	-	-	-	0.00

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #4

The Joint Operations Center (JOC) is the lead office within the ND National Guard (NDNG) for responding to and supporting any Governor’s request for support. The NDNG JOC normally operates as a federal agency and is funded to support daily activities by the federal government. When the NDNG activates to support domestic operations, the status of the supporting members is State Active Duty and are temporary state employees.

The National Guard division received \$2,700,000 in SB 2016 from the federal state fiscal recovery fund (ARPA funds) during the sixty-eighth legislative assembly for the statewide interoperable radio network equipment required from the Joint Operations Center (JOC). Throughout the current biennium, the necessary equipment is being procured and put in place, but this request is for funding on future biennium for ongoing costs associated with the SIRN system for things such as console maintenance, batteries, accessories, and programming costs.

Necessary resources for implementation (including FTE’s)*: Requesting general funds for the ongoing operating costs associated with the SIRN project. The SIRN assets allow the National Guard to seamlessly interoperate with other State and Local agencies during domestic emergency responses.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources are being requested.

Who is served and impact of not funding*: The citizens of North Dakota are served by this funding. In the absence of this funding the NDNG may not be able to keep up with the changes in the SIRN program being executed at the direction of NDIT. If we fall too far behind, our response capabilities would be reduced and thus potentially jeopardizing the health and welfare of North Dakota citizens in a time of crisis.

State Tuition Assistance Portal (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	32,400	65,000	97,400	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #5

Current NDCC does not allow for any State Tuition Assistance (STA) funding to be utilized for operations and maintenance. Our current program operates with a significant amount of data entry and that delays customer service. In addition, our federal network is not allowing ACCESS databases to be a trusted source and allowed on the federal network. We are proposing to establish a STA portal, that not only students will have access to, but schools will also be able to create an account. The goal is that the service member can consistently check their status of application, application history, reimbursement status & history, lifetime credit balance in each education level and other significant information. We also want to include an option for our universities to create an account, so they could verify students' eligibility to the STA program, create a rollout of applications and possibly a history file for their records.

This portal will increase efficiency, communication with universities and students, and bring our STA program to a more cutting edge of technology that has been long overdue.

Necessary resources for implementation (including FTE's)*: General funds are being requested for the implementation of the software solution recommended through NDIT's initiative intake process.

Are resources being redirected or are they new or additional (including FTE's)*: New funds are being requested.

Who is served and impact of not funding*: This not only affects our Service Members but our partners in the school systems. It will assist the STA office in clear and efficient communication back to the applicants, the universities and within our agency. The current program (ACCESS) is soon to be not a trusted source within our federal network and therefore we need to identify a solution for the future which will improve our current process that has been used for over 20 years.

Next Generation Leader Program (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: National Guard Priority #6

Establishing a state-funded high school training Next Generation Leader program aimed at providing a Choice Ready option for High-School students. Here are some key points to support this initiative:

1. Leadership and Character Development:

- o Leadership Skills: The program can instill leadership qualities in students, preparing them to take on future leadership roles in the military, public service, or private sector.
- o Discipline and Responsibility: Participation in such programs promotes discipline, responsibility, and a strong work ethic among students.

2. Educational Benefits:

- o Enhanced Academic Performance: Studies have shown that students involved in structured extracurricular activities tend to perform better academically.
- o Scholarship Opportunities: The program can provide pathways to scholarships and financial aid for higher education.

3. Career Preparation:

- o Military Careers: The program can serve as a feeder system for the National Guard and other branches of the military, providing well-prepared recruits who are already familiar with military culture and expectations.
- o Civilian Skills: Many of the skills taught, such as leadership, teamwork, and problem-solving, are highly transferable to civilian careers.

4. Community Engagement and Citizenship:

- o Civic Responsibility: The program can emphasize the importance of civic duty and community involvement, encouraging students to be active, responsible citizens.
- o Community Service: Participation often involves community service activities, fostering a sense of service and commitment to the local community.

5. Physical Fitness and Health:

- o Promoting Healthy Lifestyles: The program emphasizes physical fitness, encouraging students to adopt healthy lifestyles and improving their overall well-being.
- o Combating Obesity: With rising concerns about youth obesity, the physical training component can help address this public health issue.

6. Cultural and Historical Awareness:

- o Understanding Military History: The curriculum can include lessons on military history, fostering a deeper understanding of national heritage and the role of the military in society.
- o Respect for Veterans: It can also instill respect for veterans and active-duty service members, promoting a culture of appreciation and support for the military.

7. State and National Security:

- o Preparedness: Training programs can enhance state and national security by ensuring that a portion of the population is trained and prepared for emergencies, natural disasters, and other crises.
- o Resilience: A well-prepared youth population contributes to the overall resilience of the state in times of crisis.

8. Economic Benefits:

- o Job Creation: Establishing and maintaining the program can create jobs for instructors and support staff.
- o Long-term Savings: Investment in youth programs can lead to long-term savings by reducing the need for remedial education and interventions later in life.

9. State Pride and Identity:

- o State Cohesion: The program can foster a sense of pride and cohesion among participants, strengthening state identity and solidarity.
- o Positive Representation: It provides a positive representation of the state's commitment to youth development and education.

Necessary resources for implementation (including FTE's)*: Two FTE's are being requested along with start-up and operational costs to implement the program.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: The primary purpose of this program is to expose more youth to the tangible and intangible benefits of service described previously. It is through this exposure that these students consider the North Dakota National Guard as a full or part-time career opportunity.

The North Dakota National Guard has numerous vacancies in nearly all the career fields that we offer, and the recruiting landscape has proven difficult. Establishing this program is an innovative method based on an established methodology, with the ability to customize the program specifically to the North Dakota National Guards units, military history, and values.

540 Adjutant General

Agency 540

If this program is not funded the short-term risk is that the North Dakota National Guard continues to be under strength. Over the past five years, on average, we have lost 30 more members than we were able to recruit. The impact of that trend over time is the threat of losing units that are regularly called upon to support state emergencies like fires, floods, and civil unrest. The North Dakota National Guard takes great pride in the services we provide to the state and its citizens during difficult and trying times. Seeing success in this pilot program opens exciting possibilities for future expansion of the Next Generation Leader program.

Dickinson Readiness Center Custodial Supervisor (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #7

The Dickinson Readiness Center is a \$27,300,000 facility being constructed during the 2023-25 biennium. Historically, when the National Guard builds a facility of this nature the agency receives three FTEs to help maintain it once operational. During the sixty-eighth legislative session, the agency requested the standard three FTEs: a physical plant director, a maintenance supervisor, and a custodial supervisor. The agency did receive two of the three FTEs, however the custodial supervisor position was cut from our budget request. This request is for the third position the agency feels is critical to properly staff, clean and maintain the property. Building upkeep is a 24/7 year-round responsibility.

Necessary resources for implementation (including FTE's)*: One FTE - Facility Svcs IV - Grade 104 - 50% General & 50% Federal

Are resources being redirected or are they new or additional (including FTE's)*: New resources and one FTE are being requested.

Who is served and impact of not funding*: National Guard Soldiers. If not approved, the ND Army National Guard risks deterioration of a brand new building. Cleaning and maintenance are ongoing needs.

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority): Homeland Security Priority #3

NDCC 37-17.1 broadly tasks the Department of Emergency Services with reducing the vulnerability of citizens to threats, both natural and man-made, by providing for the rapid and orderly start of restoration of persons and property and by providing coordination between state, local, federal and tribal agencies. In the 2023-25 legislative session, NDDES Homeland Security Division was funded to start the North Dakota "Watch Center" and provide 24/7/365 rapid response coordination and intelligence monitoring. In the session, six positions were authorized but only four were funded. As the watch center was a high priority, the unfunded positions were filled temporarily and primarily with federal funds that were previously paying for an agency administrative assistant and logistics position in the response section of the agency. Federal grant funds have been reduced by 10% in our two primary grants used for funding personnel, which limits the ability to fund these and unfilled positions going forward. We are requesting the funding for what would have been the two watch officer positions to backfill the funding gap and allow the agency to fill the positions that were cut to ensure a successful introduction of the watch center. The watch center has proven to be a valuable asset that increases intelligence, preparedness levels, coordination, and response capability in the state while also decreasing response times and length of time processing public alerts.

Necessary resources for implementation (including FTE's): General funds for 2 unfunded FTE positions, Watch Officer - Grade 105, plus \$12,000/biennium for NDIT costs per employee.

Are resources being redirected or are they new or additional (including FTE's): These will be additional resources to fund the unfunded positions authorized in the previous biennium.

Who is served and impact of not funding: The watch center serves the wholistic public safety of citizens and through the gathering and dispersal of information across the state with local and partner agencies with 24-hour service. The Watch Center has been instrumental in recent events such as the Missouri River Ice Jam, Bordulac Train Derailment, and numerous public alerts. State and local partners have stated they appreciate the ongoing situational awareness and 24 hour coverage.

Veterans Cemetery Admin FTE (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #8

The ND Veterans Cemetery (NDVC) was established in 1992. In the early years an average of 130 burials per year would be completed. In the early years the cemetery had two office personnel. Currently, the NDVC is performing over 600 burials per year on the average. The cemetery has been utilizing a full-time temporary position to help out with the administrative duties to include working with families, helping with paperwork, answering phones and greeting the public. The turnover with this position being a temp position has been detrimental. It seems that when someone is finally trained in properly, they move on to another job that offers benefits.

The cemetery needs consistency with this position as it is a very crucial job for the day to day operations. Obtaining an FTE for this position would allow for this individual to eventually assist with additional duties and ease some work load off of other cemetery staff.

The NDVC is currently, and has been, paying someone in a temporary status. This request is seeking the authorized FTE and applicable state benefits that go along with it., but the position would be 100% special funds.

Necessary resources for implementation (including FTE's)*: Authorized FTE - Admin Services, Grade 104 - 100% Special Funds

Are resources being redirected or are they new or additional (including FTE's)*: An authorized FTE is being requested.

Who is served and impact of not funding*: Consequences if the position is not approved would be to lose another staff member who has received countless hours of training. This would then put others behind in their work having a domino effect on items needing to be completed. Having to focus on training in new staff rather than focusing on providing the best service to our Veterans and their families would be consequential.

Veterans Cemetery Facility FTE (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

540 Adjutant General

Agency 540

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #9

The NDVC was established in 1992. In the early years an average of 130 burials per year would be completed. At that time the cemetery had two maintenance workers year round. Currently, the NDVC is performing over 600 burials per year on the average. An additional FTE position was added for outside help in 2012, along with one full time temp in 2012 as well.

The agency is requesting an FTE authorization for the long term temporary position. This position is a needed position in order to get the workload done that is required. By having an FTE authorization, it would allow for lower turnover rates. This position requires a lot of detail and the more consistent we become with our staff, the less time training we need to spend and the more required work can get done in a timely fashion. Benefits are a huge deal for anyone, and if we could offer that to another individual, we would be able to focus on the details of the job and not always just the training.

The NDVC is currently, and has been, paying someone in a temporary status. This request is seeking the authorized FTE and applicable state benefits that go along with it., but the position would be 100% special funds.

Necessary resources for implementation (including FTE's)*: Authorized FTE – Facility Services IV, Grade 104 - 100% Special Funds

Are resources being redirected or are they new or additional (including FTE's)*: An authorized FTE is being requested.

Who is served and impact of not funding*: Consequences if the position is not approved would be to lose another staff member we have spent countless hours training in and have to start all over again on the training process. This would in turn put us further behind in accomplishing the needs each day. We are not just another state facility, we are constantly in the public eye and always need to maintain top notch service. Having to focus on training in new staff rather than to focus on providing the best service to our Veterans and their families would be consequential.

Watch Center Staffing (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Is this a Large IT project? No

540 Adjutant General

Agency 540

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #4

NDCC 37-17.1 broadly tasks the Department of Emergency Services with reducing the vulnerability of citizens to threats, both natural and man-made, by providing for the rapid and orderly start of restoration of persons and property and by providing coordination between state, local, federal and tribal agencies. In the 2023-25 legislative session, NDDES Homeland Security Division was funded to start the North Dakota "Watch Center" and provide 24/7/365 rapid response coordination and intelligence monitoring. In the session, six positions were authorized but only four were funded. The current four personnel are unable to meet the needs of 24/7/365 due to unplanned sickness, vacations, and training requirements. Filling the remaining two unfunded positions would allow the watch center to potentially switch to 8-hour shifts, reducing overtime costs. The new positions would serve as "power shifts" and could fill in when someone calls in sick or needs to take time off.

Necessary resources for implementation (including FTE's)*: Authorization and general funding for 2 FTE positions, Watch Officers, Grade 105.

Plus \$12,000/biennium for technology costs per employee.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE authorizations and funding for the positions.

Who is served and impact of not funding*: The watch center serves the wholistic public safety of citizens and through the gathering and dispersal of information across the state with local and partner agencies with 24-hour service. The Watch Center has been instrumental in recent events such as the Missouri River Ice Jam, Bordulac Train Derailment, and numerous public alerts. State and local partners have stated they appreciate the ongoing situational awareness and 24 hour coverage.

Dickinson Readiness Center (2) FTEs Funding (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #11

During the 68th Legislative Assembly, the agency received two FTE positions for the completion of the Dickinson Readiness Center construction project. The project was not going to be complete at the start of the biennium, therefore the FTE funding and authorization received were only for a portion of the 2023-25 biennium.

540 Adjutant General

Agency 540

The two FTE positions authorized received six months of funding. This decision package is requesting the general funds and federal authority that go along with having the two positions for a full biennium.

The two positions received were:

1. Physical Plant Director - \$63,863 (\$31,932 general and \$31,931 federal)
2. Maintenance Supervisor - \$47,631 (\$23,815 general and \$23,816 federal)

The agency is now requesting the remaining funds for the positions:

1. Physical Plant Director - \$213,949 (\$106,975 general and \$106,974 federal)
2. Maintenance Supervisor - \$159,285 (\$79,643 general and \$79,642 federal)

Necessary resources for implementation (including FTE's)*: Additional funding for two approved FTEs from the 68th legislative assembly.

Are resources being redirected or are they new or additional (including FTE's)*: New funds are being requested.

Who is served and impact of not funding*: National Guard Soldiers. If not approved, ND Army National Guard risks deterioration of a new \$27.3M Readiness Center.

Camp Grafton FTE Funding (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	84,384	-	84,384	0.00	84,384	-	84,384	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	168,768	-	168,768	0.00	168,768	-	168,768	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #12

During the 68th Legislative Assembly, the agency received an FTE position for a General Trades Maintenance Worker II position to support the needs and requirements of the ACFT/Fitness Facility project at Camp Grafton. The project was not going to be complete at the start of the biennium, therefore the FTE funding

540 Adjutant General

Agency 540

and authorization received were only for a portion of the 2023-25 biennium. The FTE position authorized received two months of funding. This decision package is requesting the general funds and federal authority that go along with having the position for a full biennium.

The position received was:

1. General Trades Maintenance Worker - \$12,064 (\$6,032 general and \$6,032 federal)

The agency is now requesting the remaining funds for the position:

1. General Trades Maintenance Worker - \$168,768 (\$84,384 general and \$84,384 federal)

Necessary resources for implementation (including FTE's)*: General funds and federal authority for a full biennium is necessary.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: The ACFT/Fitness Facility will be available, year-round, for all customers and tenants that utilize Camp Grafton. Not funding the position would have a negative impact on the facility due to limited maintenance support. The current state staff is already stretched thin with the addition of five other buildings within the last two years (31 plex, and 4- 8 plex housing units). Regular maintenance plays a vital role in ensuring the longevity of the building, helps to preserve the aesthetic of the building and prevents major issues from arising in the long run. Additionally, a well-maintained building creates a positive impression on visitors, tenants, and customers.

Watch Center Technology (Priority: 21)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	150,000	700,000	850,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	150,000	700,000	850,000	0.00	-	-	-	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #5

We are looking to further buildout data integration into the watch center to give a more complete picture of threats and hazards while automating as much data aggregation and analysis as possible. As the state coordinating agency and with the Watch Center approved in the 2023-2025 session, we believe it is the legislative

540 Adjutant General

Agency 540

intent that we pursue the technologies necessary to support holistic public safety information and intelligence analysis. Additionally, this will lay the groundwork for the build out of a public-facing dashboard to provide real-time threat and safety information to the citizens.

Flooding continues to be the number one threat confronting North Dakota. The real-time flood mapping gives us the capability to better predict flood extent and impacts, allowing for faster, better data-driven response and critical communications to save life, limb, and property. The solution will integrate directly into the Watch Center dashboard to provide local emergency managers and public officials with the information they need to prioritize available resources and to better predict the timelines and locations for flood impacts.

Necessary resources for implementation (including FTE's)*: General funds are being requested.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: Local emergency managers, state and local public officials, the public.

State Radio Staffing Addition (Priority: 22)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	215,416	-	215,416	1.20	-	-	-	0.00
Special	143,608	-	143,608	0.80	-	-	-	0.00
Total	359,024	-	359,024	2.00	-	-	-	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: State Radio Priority #4

Salaries for two (2) Emergency Dispatchers.

These positions were given back several biennium's ago, but since then staffing and State Radio Counties have increased. Based on the most recent staffing study reviewing call volumes, we have surpassed the threshold and are in need of additional staff to cover the increase of State Radio Counties.

Necessary resources for implementation (including FTE's)*: Approval and funding for (2) FTEs, Grade 104 - Communication Specialist II positions

Are resources being redirected or are they new or additional (including FTE's)*: New FTE requests

Who is served and impact of not funding*: State Radio Counties and their responders.

540 Adjutant General

Agency 540

Information Technology Systems (ITS) Manager (Priority: 23)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	257,670	-	257,670	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	257,670	-	257,670	1.00	-	-	-	0.00

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: This is a shared priority between the State Radio and Homeland Security divisions.

DES would like to hire an in-house IT Manager to serve our agency. This position would work directly with NDIT to audit, research, and lead all IT related projects.

As part of IT unification, the current cost for an in-house IT lead is far greater than previous costs for in-house staff. The 2025-27 projected Operations & Maintenance cost from NDIT is \$869,232 per biennium, which is an increase of \$149,232 over the current biennium. This cost has increased significantly from what our agency incurred when the IT staff were part of our in-house team. The agency feels the overall service has been downgraded since unification. The time to research IT items is taking longer over more staff cycles due to lack of knowledge of generalized IT support staff.

Hiring our own dedicated IT manager would lead to agency cost savings year over year and lead to better service. This position would allow us to save state funds and improve service to our agency.

Necessary resources for implementation (including FTE's)*: Authorization for one FTE - ITS Manager, Grade 206

Are resources being redirected or are they new or additional (including FTE's)*: New FTE and funding.

Who is served and impact of not funding*: Department of Emergency Services, State Radio Counties, and Stakeholders as it improves service.

If this request is not funded, the agency will continue to experience large increases in the IT costs paid to NDIT. The agency feels there is an opportunity to reduce costs, and experience better results by having our own internal ITS Manager.

540 Adjutant General

Agency 540

Critical Infrastructure Analyst FTE (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	114,934	-	114,934	0.64	-	-	-	0.00
General	64,650	-	64,650	0.36	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	179,584	-	179,584	1.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #6

This role has existed as a temporary role for the last three years. We would like to move the role of Critical Infrastructure Analyst from a full-time temp to a full-time employee.

The Division of Homeland Security supports the state fusion center (ND State & Local Intelligence Center) with programmatic and analytical support related to the 16 critical infrastructure sectors: community lifeline services that our citizens rely on including Safety and Security, Food, Hydration, Shelter, Health and Medical, Energy, Communications, Transportation, Hazardous Materials, and Water Systems.

Our support also includes completion of a federal data-call that identifies critical infrastructure within the state that is vital to national security and the economic well-being of the nation.

NDCC 37-17.1-06.6f requires the Division of Homeland Security to, among other things when preparing and maintaining a state disaster plan, "Make surveys of industries, resources, and facilities, within the state, both public and private, as are necessary to carry out the purposes of this chapter."

NDCC 37-17.1-02.1 tasks the Department of Emergency Services to "Reduce vulnerability of people and communities of this state to damage, injury, and loss of life and property resulting from natural or manmade disasters or emergencies, threats to homeland security, or hostile military or paramilitary action.

Necessary resources for implementation (including FTE's)*: 1 FTE, Critical Infrastructure Analyst/Protective Services II, grade 104

Are resources being redirected or are they new or additional (including FTE's)*: Partial resources (federal grant funds) are being redirected from a full-time temp position that would be reclassified to an FTE. Existing federal funding to be re-directed is equal to \$105,495/biennium

An additional \$61,957 in general funds would be required per biennium to make the position an FTE.

540 Adjutant General

Agency 540

Who is served and impact of not funding*: This position currently assists with categorizing critical infrastructure for state and local planning purposes; provides support to the state's "Site Assistance Visit" program that conducts safety and security reviews for schools, government facilities, and other critical infrastructure facilities; prepares sector risk and threat assessments for key industries in the state; collaborates on special event threat assessments for community events across the state; and provides analytical support for critical infrastructure impacts during disaster response operations.

This position serves decision makers within the Unified Command Structure during disasters, public and private sector infrastructure owners with guidance on security and safety, law enforcement and the intelligence community with threat and risk assessments along with incident impact analysis.

Cyber Security Program Manager (Priority: 26)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	259,878	-	259,878	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	259,878	-	259,878	1.00	-	-	-	0.00

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: homeland Security Priority #8

NDCC 37-17.1 broadly assigns the Department of Emergency Services with responsibility to "Reduce vulnerability of people and communities of this state to damage, injury and loss of life and property resulting from natural or manmade disasters or emergencies, threats to homeland security, or hostile military or paramilitary action."

For many years in a row, cyber security has been identified as a top threat to local jurisdictions and critical infrastructure.

NDIT has a statutory ban in NDCC 54-59-05.13 from providing services to the private sector, where the majority of critical infrastructure resides.

As such, NDES has been tasked with providing a state cyber security plan to ensure that citizens and critical infrastructure partners are informed of the threats while also providing a capability to assist during a cyber disaster.

Our current in-house expertise is slight and does not meet the extent of the threat.

Necessary resources for implementation (including FTE's)*: 1 FTE, Cyber Program Manager, Grade 106.

540 Adjutant General

Agency 540

In addition, there is an estimated \$12,000 per biennium for technology costs for a new FTE and \$10,000 for travel and training is estimated to implement the programs.

Are resources being redirected or are they new or additional (including FTE's)*: This is a new resource that was unable to be funded under federal grants.

Who is served and impact of not funding*: North Dakota citizens and critical infrastructure providers are the primary beneficiaries. The impact of not funding is the continued expectation for NDDes to fill this gap and fight this threat without the technical experts and necessary resources.

Construction Coordinator (East) (Priority: 27)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	257,694	-	257,694	1.00	275,816	-	275,816	1.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	257,694	-	257,694	1.00	275,816	-	275,816	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #13

This request is for approval only and does not actually require a new FTE position. The agency received a 100% federally reimbursed Security Forces Squadron position that we would like to repurpose. The agency wanted to be transparent since a position was requested for a specific purpose, Security, however we have a need in our Facilities and Engineering division for an additional Construction Coordinator. The Construction Coordinator would be 100% federally reimbursed.

The Office of the Adjutant General expends more than \$25,000,000 of funding to sustain and modernize critical infrastructure every biennium. Currently one Construction Coordinator is asked to routinely go out to the job sites and review the work. Additionally, the construction coordinator performs pre-construction meetings and attends weekly construction meetings. Based on the number of new and ongoing projects, and the size of North Dakota this tasking is becoming too much and another construction coordinator is required. The current construction coordinator who works in Bismarck would cover projects on the western half of the state and the additional construction coordinator would cover the projects on the eastern half of the state. This position would be 100% federally reimbursed.

Necessary resources for implementation (including FTE's)*: The approval to repurpose one of our vacant Security Forces Squadron FTE positions and utilize the FTE for one 100% federally funded FTE position in our Division of Facilities and Engineering.

The repurposed position would be an Engineering & Planning Svcs V - Grade 206 - 100% Federally reimbursed.

540 Adjutant General

Agency 540

Are resources being redirected or are they new or additional (including FTE's)*: A vacant FTE would be redirected from our Security Forces Squadron to our Division of Facilities and Engineering.

Who is served and impact of not funding*: National Guard Soldiers, Federal Civilian Employees and State Employees.

STORM Act (Priority: 28)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	700,000	700,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	2,000,000	2,000,000	0.00	-	3,900,000	3,900,000	0.00
Total	-	2,000,000	2,000,000	0.00	-	4,600,000	4,600,000	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #9

In the 2023-2025 legislative session, the legislature approved HB 1070 which created a revolving loan fund for mitigation projects in North Dakota to take advantage of the federal STORM Act. In addition, the legislature appropriated \$1,000,000 of Disaster Relief Fund Authority to provide for the 10% state match (90% federal). In the first year the state was eligible to apply for STORM act funding, applications far exceeded the available match. At the time of this request, awards have not been granted but many states have not yet been able to setup their revolving loan funds which increases the chances of applicants in ND and the likelihood of exhausting the full match authority appropriated. We are requesting to double the authority available in this biennium to account for two years of eligibility.

The revolving loan fund allows for local jurisdictions to borrow funds at better terms than are available in the market, and the loans count as the local share for federal grant purposes.

The STORM Act is currently only funded through 2027 federally.

Necessary resources for implementation (including FTE's)*: Authorization to spend Disaster Relief Funds (DRF).

Are resources being redirected or are they new or additional (including FTE's)*: This would be the continuation of one-time funding at the same amount per year as the previous biennium, but an overall increase of \$1 million in authority this biennium.

Who is served and impact of not funding*: Local political subdivisions are primarily served by this funding.

540 Adjutant General

Agency 540

If not funded, local political subdivisions will lose a low-cost option for providing a local match for mitigation projects under federal programs. In addition, if the STORM Act is not renewed at the federal level, the state would lose the opportunity to fund the revolving loan fund at a 90/10 federal/state cost share. In addition, the amount of future mitigation projects, whether federally funded or not will be limited by the balance in the fund.

Small Unmanned Aerial System(sUAS) (Priority: 29)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	26,000	26,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	26,000	26,000	0.00	-	-	-	0.00

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority): Homeland Security Priority #10

NDCC 37-17.1 lists NDDDES as the responsible state agency for search and rescue in support of county sheriffs. One of the key tools for search and rescue is UAS. In addition changes in the national defense authorization act prohibit the spending of federal funding on non-whitelisted UAS which is what the vast majority of sUAS in North Dakota is comprised of. NDDDES will be barred from reimbursing with federal funds any local jurisdictions who use UAS during disaster response and recovery if they do not upgrade to a white-listed system. This capability will provide local jurisdictions and state agencies an ability to request the use of a white-listed UAS.

Necessary resources for implementation (including FTE's): NDDDES has a pilot trained and certified to fly this aircraft, so no additional resources are expected.

Are resources being redirected or are they new or additional (including FTE's): New funding is being requested for equipment and software.

Who is served and impact of not funding: Citizens impacted by disasters or emergencies, including search and rescue operations are served primarily by this capability. In addition, not funding this request makes it less likely that we will be able to recoup UAS costs during disasters from a federal disaster declaration.

CAPability Development & Sustainment/Whitelist Small Unmanned Aircraft Systems (Priority: 30)

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Civil Air Patrol Priority #2

Supporting Civil Air Patrol’s (CAP) growth, capability development and sustainment aligns with state interests by bolstering emergency response, youth development, and cost-effective operations. An aggressive growth campaign will 1) amplify CAP’s impact through doubling the size of the Wing, 2) increase awareness of and integration of CAPabilities across our three missions of Emergency Services, Cadet Programs, and Aerospace Education with partner agencies and organizations, and 3) attracting resources and volunteers to sustain its critical mission. Resourcing for CAPability development will increase the number of aircrew members, small UAS operators, and adult leaders of cadets; and sustain their skills once initial competency is achieved. It will also greatly increase the numbers of agencies, organizations, and citizens served by the Wing.

A focused CAPability line of effort is also envisioned with an aim to acquire and train our members on whitelisted Small Unmanned Aircraft Systems (sUAS). Whitelisted sUAS technology contains limited to no foreign components. Acquisition will allow CAP to support emergency response efforts across the state while greatly reducing or eliminating the national security and cybersecurity concerns incumbent with sUAS containing foreign components.

Here’s an explanation and justification for providing funding to support CAPability Development and Sustainment/Whitelist Small Unmanned Aircraft Systems:

1. Mission-Critical Services:

- o CAP plays a vital role in emergency services, conducting 90% of inland search and rescue missions in the U.S. as well as aerial imagery collections from both manned and unmanned aircraft.
- o Expanding CAP’s capacity ensures even faster response times during disasters and emergencies.

2. Cost-Effective Operations:

- o CAP operates the world’s largest fleet of single-engine piston aircraft at an impressive average of \$170 per flight hour, making it a low-cost provider for emergency and disaster response needs.
- o CAP is also rapidly developing it’s sUAS capabilities, and is on track to be a significant response multiplier through adding this resource to its already impressive manned aircraft capacity.

- o The return on investment in CAP is exceptional, with over \$3 in value provided for every \$1 spent.

3. Youth Development and Aerospace Education:

- o CAP's core cadet programs foster leadership, character development, and STEM education. CAP is uniquely positioned across the state to provide localized delivery of these proven and holistic programs in North Dakota, enhancing the capabilities of educators and parents throughout the state.

- o Investing in CAP means investing in tomorrow's leaders, equipping them with skills for the future.

4. Aggressive Growth Campaign:

- o A well-executed growth campaign can raise awareness about CAP's contributions and attract new members and missions in support of other agencies and organizations.

- o Highlighting CAP's impact, lifesaving missions, and community involvement will resonate with potential new members as well as agencies and organizations.

- o Outsourcing the planning and facilitation of growth efforts will allow volunteer members to focus on executing the CAP mission, develop newly recruited members, and support other agencies and organizations across all three CAP missions of Emergency Services, Cadet Programs, and Aerospace Education.

5. Growing Aircrew and UAS Capabilities:

- o Expanding the wing allows for more trained aircrews, enhancing CAP's ability to respond swiftly.

- o Investing in small Unmanned Aircraft Systems (UAS) provides additional surveillance and reconnaissance capabilities. CAP's statewide presence will better ensure timely responsiveness to state and local partners. CAP is the only aviation organization in the state with such a statewide presence.

6. Adult Leaders of Cadet Capacity:

- o Adult leaders play a crucial role in mentoring cadets and ensuring program success. Without them, there can be no cadet program.

- o Funding can support training, recruitment, and retention of qualified adult leaders. It also supports retention of CAP adult volunteers to support our overall mission once their cadet children grow up and leave the program.

7. Whitelisted sUAS Acquisition and Training. Specific benefits of this line of effort are:

o Reduced Vulnerability:

Small unmanned aircraft systems with whitelisted or domestically sourced components minimize the risk of national security and cybersecurity vulnerabilities.

Foreign components may have hidden backdoors or security flaws, compromising data integrity and system functionality.

o Data Protection:

Acquiring sUAS with trusted components ensures better control over data collected during missions.

National security concerns arise when sensitive information is transmitted or stored on systems with foreign components.

o Supply Chain Assurance:

Whitelisted or domestically manufactured components provide supply chain transparency for future repair and replacement operations.

By avoiding foreign dependencies, CAP can maintain operational continuity and reduce reliance on potentially adversarial sources.

o Compliance with Regulations:

The National Defense Authorization Act (NDAA) has outlawed the use of federal funding for the acquisition and operation of most foreign sUAS. This includes federal grant reimbursements.

Using whitelisted components ensures compliance, avoids legal complications, and better assures grant reimbursements are not denied from the federal government.

o Long-Term Cost Savings:

While initial acquisition costs may be higher, long-term savings result from reduced cybersecurity risks and maintenance.

Avoiding costly security breaches justifies the investment.

o National Sovereignty:

Supporting domestic manufacturers strengthens the national industrial base.

Investing in sUAS with trusted components contributes to national sovereignty and resilience.

In summary, prioritizing sUAS with whitelisted or domestically sourced components aligns with national security imperatives and safeguards critical operations. CAP's strategy to position this technology across the state within local squadrons in 7 cities will also expedite sUAS response support anywhere in North Dakota. This approach aligns with an already successful strategy of positioning other unique CAPabilities across the state.

Necessary resources for implementation (including FTE's)*: This request is for general funds dollars.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: The people and visitors of ND are served. As mentioned above, supporting CAP's growth, capability development and sustainment aligns with state interests by bolstering emergency response, youth development, and cost-effective operations. Not supporting these initiatives will result in slow rates of growth in membership and capabilities, more difficulty in retaining skilled members long term, and turbulence in maintaining capabilities developed.

540 Adjutant General

Agency 540

Collections Manager (Military Gallery) FTE (Priority: 32)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard Priority #14

This position would serve as a National Guard liaison to the ND State Military Gallery and State Archivist. In 2025, construction will begin on a new military gallery at the ND Heritage Center. This position will be located at the Heritage Center and responsible for assembling, cataloguing, preserving, managing, and researching National Guard historical information, records, documents, and photographs. This position is also charged with the inventorying, storage, preservation, and researching the significance of military artifacts. This position is charged with conducting research to gather and analyze source materials, conduct interviews, and prepare concise written and verbal reports and presentations. This employee will also be responsible for scheduling and coordinating National Guard events conducted within the Regimental Room of the Military Gallery.

Necessary resources for implementation (including FTE's)*: FTE - Admin Svcs IV, Grade 104

Are resources being redirected or are they new or additional (including FTE's)*: New FTE is being requested.

Who is served and impact of not funding*: All citizens of North Dakota, North Dakota Veterans, National Guard Soldiers and Airmen, and out of state tourists. If not approved, the ND National Guard will not have the manpower available to coordinate, reserve, and setup for events. We will also lose the ability to maintain artifacts, conduct research for exhibits, portray our image, tell our story, and inspire future generations to serve.

Preparedness Coordinator (Priority: 33)

Total	249,878	-	249,878	1.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #11

This person would oversee preparedness coordination within communities and support ongoing regional expert volunteer response teams.

Prepared communities and citizens are more resilient and less expensive for the state during emergencies. Resilient businesses are more likely to re-open after a disaster. DES has provided training to North Dakota’s first responders and state, local, and tribal emergency managers to prevent, protect, mitigate, respond and recover from disasters and emergencies. This program will allow DES to expand training to the whole community (K-12 students, business community, and the public).

NDCC 37-17.1-06.6k requires the division to “coordinate and may enter agreements with the federal government and any public or private agency or entity in achieving any purpose of this chapter and in implementing programs for disaster mitigation, preparation, response, and recovery”.

In the last fourteen years, the expectations of the homeland security division by state, local, and tribal entities have increased exponentially. To meet these expectations the agency has created the Emergency Management Support Team (EMST), a Disaster Recovery Response Team, has begun work to develop a Cybersecurity Incident Response Team and an Unmanned Aerial System (UAS) team, along with entered into Memorandums of Agreement with local hazardous materials response teams and technical rescue teams. The coordination of these teams is currently distributed and disjointed; often falling behind other priorities. Because of this, the regional teams struggle getting off the ground and reaching effectiveness.

NDCC 37-17.1-06.6h-m requires the division to:

- h. Establish access to a register of persons with types of training and skills important in prevention, mitigation, preparedness, response, and recovery.
- i. Establish access to a register of equipment and facilities available for use in a disaster or emergency.
- j. Prepare, for issuance by the governor, executive orders, proclamations, and guidance as necessary or appropriate in managing a disaster or emergency.
- k. Coordinate and may enter agreements with the federal government and any public or private agency or entity in achieving any purpose of this chapter and in implementing programs for disaster mitigation, preparation, response, and recovery.

540 Adjutant General

Agency 540

l. Be the state search and rescue coordinating agency, establish access to a register of search and rescue equipment and personnel in the state, and plan for its effective utilization.

m. Do other things necessary, incidental, or appropriate for the implementation of this chapter.

Necessary resources for implementation (including FTE's)*: 1 FTE - Preparedness Coordinator, Grade 106

Are resources being redirected or are they new or additional (including FTE's)*: New, additional FTE requiring general funds.

Who is served and impact of not funding*: K-12 schools, the business community, and the general public will be served.

Unprepared communities, citizens, and businesses result in increased emergency and disaster costs. Unprepared businesses may not reopen, which means a loss of revenue to the community in terms of tax dollars as well as a loss of jobs for its employees. Unprepared children may suffer physical or emotional harm if a community is unprepared to address their specific needs.

The emergency response community, the business community, and the public at large are served by these teams. The EMST provides command and control resources to manage the operational, logistical, informational, planning, fiscal, and safety issues associated with complex incidents. The team is deployed at the request of a local jurisdiction. The Disaster Recovery Response Team assists a community to determine eligible disaster damages following a disaster event. The determination of those damage costs helps determine if a jurisdiction is eligible to be included in a presidential disaster declaration request. The regional hazardous materials teams and regional technical rescue teams provide assistance statewide so that communities without the skills and resources for such expertise have access to this type of response capability.

Public Assistance FTE (Priority: 34)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	205,668	-	205,668	1.00	-	-	-	0.00

Total	205,668	-	205,668	1.00	-	-	-	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security Priority #12

This request is for authority only and is expected to be funded with federal public assistance program funds. There has been an increase in both the frequency, severity and complexity of disasters nationwide and North Dakota is no exception. The current public assistance program consists of a public assistance emergency

540 Adjutant General

Agency 540

services program specialist and an admin services position for FTEs. The rest of the program is staffed by temporary employees. This program can be responsible for hundreds of millions of federal funds being reimbursed to communities after disasters in a biennium and has minimal resiliency or redundancy should the current public assistance emergency services program specialist leave employment or retire.

Necessary resources for implementation (including FTE's)*: Approval to add a staff member; this position can be funded through federal public assistance program management and administration funds.

Public Assistance Specialist, Emergency Program Specialist, grade 105, salary estimated at MPP.

Are resources being redirected or are they new or additional (including FTE's)*: Existing federal funding, but a new FTE.

Who is served and impact of not funding*: This position interacts directly with local jurisdictions, administering federal funds to local communities as they recover from disaster events. Impact of not funding would be potentially slower recovery time and an overall less resilient public assistance program at the state level.

Is this request for a new program or service? No

540 Adjutant General

Agency 540

Request explanation and justification (include any statutory authority)*: State Radio Priority #1

Current system is running with single points of failure. This system is on a "Cannot Fail Mission" and must be redundant due to the criticality of the system. Current system has processed 45.3 billion transactions through July 2024.

Idaho was running single instance with a Disaster Recovery. Had to use other states to help during their crash. Idaho was totally down for 4 days and took several months and \$1.6 million to resolve the catastrophic event.

This system is used by all law enforcement statewide as well as ND Insurance Department's Fraud Investigations, DOCR facilities including Probation and Parole. It is also used by Minot Airforce Base.

Necessary resources for implementation (including FTE's)*: Requesting funding for virtual servers, databases and circuits from both NDIT and vendors.

Are resources being redirected or are they new or additional (including FTE's)*: New, but no FTE requests.

Who is served and impact of not funding*: All law enforcement and dispatch centers across North Dakota and support agencies including DOCR, ND Insurance Commission, BCI, Federal agencies.

We are currently running a single instance of a law enforcement message switch. This is the system that allows law enforcement to run wants, warrants, driver's license and motor vehicle information. If the current system were to fail all law enforcement statewide will be impacted and not able to run any of the necessary searches. Currently law enforcement and dispatch centers are running approximately 7,000,000 searches per month.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2026

Replace existing application? No

Upgrade existing application? No

Development of new application? No

Anticipated Benefits*: Adding public safety redundancies to current law enforcement message switch.

Project Risk*: Timing and life expectancy of current message switch system.

Issue/Solution*: Adding a complete redundant message switch.

State Initiative:* Emergency Response Support

Justification: Under 37.17-1, NDDDES is designated as the lead agency for providing a statewide emergency management system embodying all aspects of prevention, mitigation, preparedness, response, and recovery. In order to enhance the agency’s capability to meet this mandate, NDDDES is requesting spending authority of \$660,000 for federal funds, should they become available for the purchase of items such as the following examples:

1. \$210,000 - (\$10,000/region X 6 and \$150,000 NDDDES capability) if funds become available, the Department of Emergency Services intends to purchase Unmanned Aerial System (UAS) equipment for up to 6 regional Emergency Management Support Teams (EMST) as well as one UAS within the department to assist in preparing for, responding to, and recovering from emergencies and disasters.
2. \$275,000 – Purchase commercial geospatial software to enhance the existing Common Operating Picture (COP) and may include software to integrate computer aided dispatch (CAD) alerts, IP based camera systems, Internet of Things sensors, or other natural disaster related analysis or prediction tools.
3. \$50,000 – Interactive Emergency Preparedness Display
4. \$125,000 - (3) Generators to support emergency operations

Justification: \$310,000 - New Recording solution compatible with the new SIRN Radio system. The current is not compatible with the new system and is past life expectancy. This logger also records 9-1-1 calls as well as radio traffic. Per Century Code 57-40.6-10 – Standards and guidelines, a public safety answering point (PSAP) must have the capability of recording and immediate playback of recorded emergency calls and radio traffic. These recordings are used in conjunction with quality assurance and open records requests.

\$95,000 - Funds necessary to convert our three deployable tower trailers with nine SIRN radios. This amount includes radios, materials, install and programming costs.

State Tuition Assistance Portal (Priority:)

Total					-	-	-	-	65,000	-	65,000	-	-

State Initiative:* Technology Investment

Justification: State Tuition Assistance portal to replace existing Access database. The current program operates with a significant amount of data entry, which results in customer service delays. The tuition office has worked with NDIT on completing an initiative intake form, and they have made recommendations for a more efficient solution to help with the tuition reimbursement process.

This portal will increase efficiency, communication with universities and students, and bring our STA program to a more cutting edge of technology that has been long overdue.

Small Unmanned Aerial System (sUAS) (Priority:)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	23,000	-	23,000	-	-

State Initiative:* Emergency Response Support

Justification: NDCC 37-17.1 lists NDDES as the responsible state agency for search and rescue in support of county sheriffs. One of the key tools for search and rescue is UAS. In addition changes in the national defense authorization act prohibit the spending of federal funding on non-whitelisted UAS which is what the vast majority of sUAS in North Dakota is comprised of. NDDES will be barred from reimbursing with federal funds any local jurisdictions who use UAS during disaster response and

540 Adjutant General

Agency 540

recovery if they do not upgrade to a white-listed system. This capability will provide local jurisdictions and state agencies an ability to request the use of a white-listed UAS.

Civil Air Patrol Statewide Interoperable Radio Network (SIRN) Upgrade (Priority:)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	220,000	-	220,000	-	220,000

State Initiative:* Emergency Response Support

Justification: This project would provide the ND Wing Civil Air Patrol with modernized communications systems to ensure interoperability with other state and local responders. This is a required upgrade in order to remain compatible with the response community.

CAPability Development and Sustainment/Whitelist Small Unmanned Aircraft Systems (Priority:)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Statutory Authority

North Dakota Century Code Chapters 10-30.5, 54-34.3, 54-34.4, 54-44.5, 54-60, 54-62.

Agency Description

The North Dakota Department of Commerce has four legislatively created divisions: Community Services, Economic Development & Finance, Tourism and Workforce Development and a Director of Administrative Services that work together with our stakeholders to expand and diversify the economy of North Dakota, support community development, raise awareness of North Dakota state brand/image in the national and international ecosystems and provide services to low income people. Our challenge is to make North Dakota a better place to live, work, do business and play, for all people that choose to make North Dakota their home which, in turn, will entice non-residents to consider becoming North Dakotans.

Agency Mission Statement

The Department of Commerce's Mission is to be the lead agency responsible for attracting, retaining and expanding wealth and talent in North Dakota.

The Department of Commerce's Purpose Empower people, improve lives and inspire success.

The Department of Commerce's Values are Courage, Curiosity, Humility and Gratitude.

Major Accomplishments

-
- 1 Administrative Services The administrative staff plays a crucial role in the Department of Commerce's accomplishments. Whether through increased efficiency by utilizing or enhancing existing information technology software, creating innovation, or demonstrating a growth mindset, the Administrative Department is truly reinventing government. As a support division, we aim to bolster our agency's role in creating successful outcomes. Our efforts are multifaceted and integral to the agency's overall success.

 - 2 Tourism • Visitation grew 5.3% reaching 25.6 million visitors • Visitor spending grew to \$3.3 billion • Visitors paid more than \$307 million in local and state taxes • Creating a \$960 per household savings for North Dakotans • Average of 8.8% visitor spending growth across counties • Cass County surpassed \$1 billion in visitor spending • June statewide hotel occupancy was at the highest level seen since June 2013 and 2014 and exceeds the national average • June visitation of Theodore Roosevelt National Park was the most visited month EVER – 210,938 visits, 50% more than June 2023

 - 3 Workforce Attraction • Leads – 3,370 (potential workers have completed form to engage) • Form Fill 2/Candidate Marketplace Eligible Leads – 1,934 • Connected to Champions – 1,121 leads • Made the Move – 36 individuals to 17 communities

Major Accomplishments

-
- 4 Global Engagement Office • Successful Investment Mission to Brazil. The office organized and executed a highly successful investment mission to Brazil. This mission resulted in significant interest from Brazilian companies in sectors such as agribusiness, energy, and technology, leading to potential investment opportunities and partnerships. • Participation in the Department of Energy/SelectUSA IRA Roadshow. Participation in the IRA Roadshow provided an excellent platform to showcase the state's renewable energy potential and attract investments in clean energy projects. This involvement has strengthened relationships with key stakeholders in the energy sector. • Collaboration with the ND National Guard in Togo and Benin. The office partnered with the ND National Guard on a mission to Togo and Benin, which focused on strengthening bilateral ties and exploring investment opportunities in defense, agriculture, and workforce. • Outstanding Performance at the Farnborough Air Show. The office's participation in the Farnborough Air Show was a resounding success, resulting in numerous leads and fostering relationships with aerospace companies. This event highlighted the state's growing aerospace vertical and its investment potential. • Planning for the Governor-Led Mission to South Korea. Preparations are underway for a Governor-led mission to South Korea in October. This mission aims to bolster economic ties, attract investment in technology and manufacturing, and explore opportunities for collaboration in various sectors. • Consul General and Ambassador Visits to North Dakota. The office facilitated multiple visits from Consul Generals and Ambassadors from Norway, Finland, Japan, Korea, and other countries. These visits have enhanced diplomatic relations and opened doors for future investments and collaborations. The Global Engagement Office has demonstrated significant success in advancing the state's FDI strategy through targeted missions, strategic partnerships, and diplomatic engagements. The upcoming budget will ensure the continuation and expansion of these efforts, driving economic growth and strengthening North Dakota's position on the global stage.
-
- 5 Division of Community Services (DCS) Administered and awarded legislative authorized grants for Food/Grocery store study and sustainability and Rural Workforce Housing/Slum and Blight removal. Delivered federal and state energy efficiency funding in multiple programs with limited staffing. Utilized federal funds and partnerships to start and grow four workforce development programs.
-
- 6 Economic Development & Finance -Growth of project portfolio • The portfolio of projects has increase in number, value and diversification of sectors. The obvious growth factor in sheer number of projects vying to land in North Dakota is tremendous with a portfolio of well over 150 projects. Portfolio had climbed to an excess of \$60B by mid 2024. With two hyper scaler data projects evaluating projects in the State in the past few months, that value has more than tripled with the data projects CAPEX in excess of \$150B. That pushes our total portfolio to over \$200B.
-
- 7 Economic Development & Finance - Strategic Growth • We are tasked in Economic Development and Finance to attract, retain and expand wealth in North Dakota. This means adding value to our valuable natural resources in North Dakota. We are expanding that effort to second and third and more levels of adding value to resources. We are working to add value to the agricultural and energy commodities we are rich with to generate even more wealth. We are also strategically diversifying the portfolio of projects with growth in the areas of ore processing, data centers and animal agriculture.
-
- 8 Developing Energy Opportunities in North Dakota • With partners across industry and other State agencies, we are we are working to understand all of the energy opportunities that can be developed in the State. Each major project that is developed in the State, there becomes more and more energy developed. North Dakota is rich in Energy, and is working hard to develop and deliver that energy into the appropriate forms in the appreciate geographic locations.
-
- 9 Participation on White House Task Force on Carbon Sequestration • We are capitalizing on the great advantages that geology, primacy and policy provide for carbon capture and sequestration. We participate on the White House's Task Force on Carbon Capture and Sequestration.
-
- 10 Successful representation of ND at Select USA • North Dakota has successfully participated in the largest Foreign Direct Investment event in the US for the third straight year. We make many valuable contacts each time we attend with each year better and more productive than the previous.
-
- 11 North Dakota Development Fund • NDDF continues to diversify the portfolio of projects they invest in with more investment now than any time in its history. The Legislature replenished the NDDF lending funds by \$30M in 2023c, allowing more investment in more industry. In addition to that, NDDF launched Advance ND which is a "deal closing" funding opportunity of low interest loans. This helps complete the diverse ways the NDDF can help land large projects that other States may be competing.
-
- 12 WFD - An increase of 29,000 volunteer hours, 2 programs, and 15 volunteers has contributed to growth of the AmeriCorps program in North Dakota.
-

Major Accomplishments

-
- 13 WFD- RWIP funding supported 19 local and regional talent attraction programs as well as funding the development of 23 childcares and 1,119 new childcare slots.

 - 14 WFD - Since inception in 2020 to date of the Technical Skills Training Grant there have been 52 programs approved with \$2,945,614 awarded and \$2,393,118

 - 15 WFD - There has been an increase in the number of employers utilizing Operation Intern for their Registered Apprenticeship Programs

 - 16 WFD - In the first year of operation, the Office of Legal Immigration secured an exclusive spot in the World Education Services Skilled Immigrant Inclusion Program, completed the first statewide immigration and industry opportunity study, was highlighted by U.S. Citizenship and Immigration Services as a best-practice office in May 2024 with the U.S. Department of Homeland Security, Department of Labor, Department of Health and Human Services and is hosting North Dakota's first Global Talent Summit to educate employers and legislators on visa pathway opportunities for North Dakota and understanding Visas and sponsorships.

Critical Issues

-
- 1 The Administrative Department is working under extreme pressure while processing three times the number of transactions due to the millions of additional federal funding added to our agency. If more federal funds are allocated during this session, there is a need for more full-time, non-temporary employees in the Department of Commerce's Administrative Department. The heavy workload of fiscally managing federal programs and the audit requirements involved with federal funding necessitate this increase in staffing.

 - 2 The procurement process within our organization has become increasingly complex and demanding. Historically, procurement duties were distributed among various team members who managed these responsibilities alongside their primary roles. However, recent increases in workload and the need for specialized procurement knowledge have made this model unsustainable.

 - 3 Tourism & State Marketing • Resource restraints -do not allow North Dakota to gain market share or increase awareness markedly. • Technology is necessary - but expensive and does not eliminate the need for dedicated customer service staff • Tourism development requires proactive work and support programs like other industries

 - 4 Global Engagement Office By investing in these key initiatives, the office will continue to attract foreign investments, create job opportunities, and foster international collaborations that benefit the state's economy and its residents. • Investment Missions to Finland and Norway. The budget will allocate funds for investment missions to Finland and Norway, focusing on attracting investments in renewable energy, technology, and agribusiness. These missions aim to leverage the strong diplomatic ties established through previous engagements. • Investment Mission to Taiwan (by invitation of the ND Ag Commissioner). Funding will support a mission to Taiwan, by ND Ag. Dept invitation. This mission will explore opportunities in agribusiness, technology, and trade, further strengthening economic ties with Taiwan. • Another Governor-Led Mission. The budget will support Governor-led missions, building on the success of the planned mission to South Korea and the previous mission to Japan. These missions will target a strategic region to attract investments in key sectors and enhance bilateral relations. • Additional Investment Missions. To maintain momentum in attracting foreign direct investment by building awareness and relationships, the budget will support additional investment missions. The target regions will be determined based on the current rubric which emphasizes emerging opportunities and strategic priorities. • Staffing Request. In order to support the growing list of relationships built from previous missions and expanding relationships with additional countries an FTE has been requested. The additional staff person will focus on improving the rubric used to identifying target rich countries with industry synergy with ND, planning the logistical details of mission trips, assisting with promotion (building a social media presence, providing data for website updates, etc.) conducting research on specific companies to visit during mission trips, and assisting with the creation of presentations used during mission trips. • Return Trip to Brazil. Recognizing the potential identified during this year's mission, the budget will fund a return trip to Brazil to further explore investment opportunities and solidify partnerships in agribusiness, energy, and technology.

 - 5 Division of Community Services (DCS) Lack of resources/staffing to support rural and community development to underserved communities. Individual communities lack planning to best utilize available program funding. Inconsistent regulations between different federal agencies.

Critical Issues

-
- 6 Economic Development & Finance - Increase Deal Flow and Diversity • We will be increasing efforts to diversify the project portfolio and expanding the volume of project deal flow. This will require several new programs, some realignment of departmental priorities and some additional subject matter expertise.
-
- 7 Economic Development & Finance - Site Readiness Initiative • This initiative has several key components. It will first include an in depth study of potential sites for development. This study will evaluate many factors regarding site readiness including environmental review, geotechnical review, logistics study, utility study, zoning studies and other relevant studies to fully understand the readiness of various sites across the State. This will be accomplished utilizing a site development expert. It will then provide funding to local EDO's and other agencies matching funds to accomplish basic site readiness work. Once these sites are deemed ready, they will be actively marketed to the 100's of potential clients looking for sites to develop.
-
- 8 State Data Center Initiative • This initiative will encompass several critical needs Commerce and other State Agencies need. First, the SDC will manage all of the demography and census needs for the State. The State Demographer position will reside within the SDC. Next, the SDC will maintain and manage a robust data collection representing all the sites ready for development across the State. Much of this data will come from the Site Readiness Initiative. Other data will come from local communities and EDO's sharing their site availability to be widely marketed to potential clients. In conjunction with this robust site data base, we will manage a GIS system to visually connect all the opportunities for development across the state while having the ability to manage socioeconomic data (via State Demographer) within the same system.
-
- 9 Workforce Efficiency Improvement • ED&F will partner with manufacturing experts to have evaluations performed on their process facilities to look for ways to improve their production flow efficiency. This evaluation will also evaluate workforce efficiency. Both endeavors are aimed at making the existing workforce as efficient as possible to help alleviate staffing issues due to lack of workforce.
-
- 10 Energy Planning • We will continue to work on developing an all of the above energy plan for the State to continue to attract leading edge industry to North Dakota. We will work with private and public sector partners to full understand all of the opportunities for North Dakota.
-
- 11 Economic Development & Finance -Sector Diversification and Depth of Value Add • ED &F will continue to seek out more sectors to diversify the industries in North Dakota. With this, we will seek to add additional levels of "Value Add" to every sector we can.
-
- 12 Adding Value to UAS Investment • We will seek to add value to the Intellectual Property we have developed in the UAS field. We will actively seek to market our capabilities for BVLOS flight to other states and regions of the country.
-
- 13 Staffing Need & Request • In order to manage the exponential growth in Economic Development and Finance, we will be requesting 5 FTE's. Two of these positions will utilized to expand our areas of subject matter expertise to further grow the diversity of projects we wish to attract to the State and to manage the exponential growth of the volume, diversity and size of projects. We will also be requesting a program coordinator to support the management of the Site Readiness Initiative, the State Data Center Initiative and other programs within ED&F. Finance will be requesting an FTE to support the huge increase in deal flow through the Development Fund. They will also be requesting a program coordinator to assist in managing the many programs administered by Finance (NDDF, LIFT, Innovate ND, Advance ND, etc).
-
- 14 WFD - One time funding for talent attraction programs
-
- 15 WFD - A name change is needed for the Office of Legal Immigration to defuse the use of divisive language and to better reflect the role of the Office in the continuum of global talent attraction and workforce development.
-

Performance Measures

3000 State Marketing & Tourism

Performance will be measured by a variety of metrics including but not limited to: visitor trips; overnight stays; visitor spend; earned media, website traffic; communities, partners, & agencies served; information provided; assets downloaded; new tourism businesses, grant supporting new offerings, program participants,

potential relocators in Find the Good Life pipeline and a plethora of marketing analytics. Visitation performance metrics all up: visitation +15%, border crossings +47%, national park visitation +11%, air arrivals +11%, hotel occupancy +6.7%

4000 Workforce Development

Operation Intern will be measured by the number of companies & interns served by the program, & by tracking how many interns obtain full-time employment with their internship host-site after completing the program.

AmeriCorps will be measured by tracking the number of new members, & by implementing new programs in state.

Technical Skills Training grant will be measured by the number of programs supported by the program, in addition to the number of trainees who participate in new programs.

Find the Good Life in ND will be measured by number of leads that enter, leads converted to employees & residency & job placements.

Workforce Development Council's state plan will be measured through the successful implementation of scalable workforce solutions.

5000 Economic Development & Finance

• Measurements associated with programs within ED&F paint a picture of how well ND performs from a business recruitment and retention/ expansion perspective. We will additionally measure the diversity of sectors that these project represent. It is recognized that more diversity is needed to maintain continued, generational growth in North Dakota's economic development.

• This will highlight how well the programs appropriated by the legislature have worked, how robust the finance team has attracted new types of venture & angel capital as well as private equity & the accelerated efforts led by the business development team.

• New metrics with the Economic Development Foundation will be used to measure success within ED&F.

• Addition of new programs will assist in attracting even more diverse, wealth building projects. A Site Readiness Initiative will be instituted in 2025 to assist communities and the State in managing a portfolio of sites to be developed across all sectors.

• AutomateND will be utilized to increase the viability and performance of manufacturing projects in the State. This effort will allow companies to produce more, with a streamlined workforce.

6000 Community Services

• Timely distribution of all program funds in accordance with federal guidelines.

Grow understanding and awareness of local authority for building code acceptance and updates.

Promotion and increased understanding of the benefits and changes to Renaissance Zones.

Enhanced quality of site-built, manufactured and modular structures in North Dakota through training and program implementation. Increase awareness of state and federal program managed by DCS on Native American Reservations.

Design and implement the HOMES/HERA Department of Energy allocation for North Dakota.

Implement auditor training program to support both the IRA Rebate programs and provide skilled workforce to the CAP agency weatherization crews.

Distribute the Energy Efficiency Community Block Grant (EECBG) DOE program in timely manner.

Greater collaboration and smart distribution of State Energy Program (SEP) and Energy Conservation Dollars (ECG)

Explore opportunities to support rural and community development with state and federal agencies through the Office of Community Development and Rural Prosperity (CDRP) to include but not limited to rural workforce development, community placemaking and support grant writing and management.

Support communities and nonprimary sector businesses through the CDRP and Collaborate with new economic development growth areas and businesses.

Implement additional support/funding to increase property valuation and decrease property tax through removal of slum and blight and good community planning.

Support and explore community housing options to increase workforce.

Program Statistical Data

2000 Administrative Services

Administrative services provides exceptional support for our \$258 million-dollar appropriated budget. This includes a near \$60 million dollars of Corona Virus Relief Funding which was added to the budget without an increase in full time employees.

3000 State Marketing & Tourism *Statistics reflect 2023 numbers

- ND had 25.6 million visitors. • Visitor spending was \$3.3 billion. • ND received \$307 million in state & local tax revenue through visitor activities. • 43,877 jobs are supported by the travel industry .
- Tourism-related taxable sales & purchases totaled \$2,324,796,806. • 3,011 businesses rely on tourism activity • 5.3 million hotel room nights. • 1.14 million airport arrivals. • paid media generated 379 impressions, 18.9 million video views and drove traffic to NDtourism.com to 2.78 million, 203,000 Travel Guides distributed. • 265,000 referrals sent to partner websites through NDtourism.com. • ND Travel Industry Conference served 220 attendees. • Personal service & enhanced technology like live chat, which served 1,970 users. • 110 participants in rest area brochure program. • Quarterly & Annual reports available online - 2,000 copies distributed to partners, policymakers, & state leaders.

State Marketing Additional Metrics: 2023

- Media outreach & coverage – public relations efforts garnered 2,444 media instances reaching 13.6 billion .
- Workforce recruitment strategic planning efforts included research, partner meetings to build system, new Find the Good Life 2.0 website

& marketing plan.

- State brand management- multiple state agency updates, brand guidelines, writers guide, virtual meetings, photo library, social skins.
- Inter-agency cooperation – meeting registration training (Eventbrite), website support, graphic design, video production, communications, & social media training.
- Grants: 14 Destination Development grants awarded, totaling \$25 M.

4000 Workforce Development

2023-2025 Operation Intern as of July 31, 2024 (Numbers reflect to date program years 1 and 2 for the biennium)

- Businesses participating - 124 (36 new) • Internship positions this biennium: 443 interns
- \$1,844,000 obligated to interns in 2021-2023 biennium; \$1,780,000 obligated to interns in the 2023-2025 biennium
- \$7,789,342 funds have been disbursed to program participants since inception (2007-to date)

A waitlist was developed for the 2024-2025 (program year 2), currently there are 62 companies on the list (approx. 151 interns)

2020-2025 Technical Skills Training Grant

Total Appropriation in 2023: Programs approved: 9 Total awarded: \$557,324

Total reimbursement: \$385,535 (4 open agreements remain)

Total Appropriation in 2024: remaining ARPA (carry-over) + \$2,000,000 general funds (2023-2025 Session)

Programs awarded: 13 (as of 8/2024) Total awarded: \$103,273 (as of 8/2024)

Total reimbursement: \$23,368 (as of 8/2024) (6 open agreements)

2023- 2025 AmeriCorps

- Fiscal Year 2022 6 Projects with 118 AmeriCorps members / 82,075 hours /\$554,707 amount of education assistance awarded to members
- Fiscal Year 2023 7 Projects with 132 AmeriCorps members / 100,123 / \$483,670 amount of education assistance awarded to member

Regional Workforce Impact Program

Total appropriation for biennium: \$12,500,000. Programs approved: 42. Total Awarded to date: \$11,141,466. Total Reimbursed to date: \$3,200,599.50.

601 Commerce

Agency 601

5000 Economic Development & Finance

InnovateND: Assisted XXX entrepreneurs as of June 2024

Innovate ND program has: Paid Projects Total: \$665,522.30

Graduated Projects: 22

Business Development 2023-2025 Biennium to-date (to July 1, 2024)

Active Business Development Projects: 238

New Projects this Biennium: 58

New Primary Sector Applications (approved/total): 140/190

(note: this is an increase of 97 from last biennium)

NDDF: 2023-2025 Biennium To Date (August 1, 2024)

NDDF Funded 6 projects totaling \$41,750,000

NDDF funded 14 childcare businesses totaling \$4,498,200

Advance ND awarded \$4,840,866 to 16 companies

LIFT Program: 2023-2025 Biennium to date \$10,332,600 awarded to 20 companies.

6000 Community Services

Administered & awarded legislative authorized grants for Food/Grocery store study & sustainability & Rural Workforce Housing/Slum & Blight removal. These two pilot programs delivered The community development staff also held educational Summits and webinars throughout the biennium. Monthly webinars attracted nearly 100 registrants each and the 2022 Summit registered 600 people. Summit 2023 was rescheduled to 2024 due to weather. PLEASE SEE ATTACHMENT FOR ADDITIONAL DCS STATS - SPACE HERE IS LIMITED.

Explanation of Program Costs

The ND Department of Commerce consists of administrative services and four divisions. For narratives purposes administration and each division is identified as 2000 Administrative Services / 3000 State Marketing & Tourism / 4000 Workforce Development / 5000 Economic Development & Finance / 6000 Community Services. Please see attachments for detailed explanation of program costs.

2000 Administrative Services

The costs associated with agency Administrative Services are dedicated to supporting the overall functions of the agency which encompasses fiscal, information technology, human resources, and administrative functions. These functions support the ND Department of Commerce's mission of attracting, retaining, and expanding wealth, and talent in North Dakota.

3000 State Marketing & Tourism

The State Marketing and Tourism Division is the agency responsible for marketing North Dakota to the world.

The budget includes dollars in the following major categories:

Destination Advertising/Marketing

Information Technology and Telecommunication

Printing and postage

Public / Media / Influencer Relations

Travel required to promote North Dakota to target markets.

4000 Workforce Development

Costs for the Workforce Development Division include Technical Skills Training grant, Operation Intern; apprenticeship programming; statewide biennial strategic planning, performance accountability, and activities related to support implementation of the Workforce Development Council's state workforce strategy, in addition to administration of the State Commission on National and Community Service, which serves as the required match for receipt of AmeriCorps Program funds.

5000 Economic Development & Finance

*The ND Development Fund continues to be a revolving fund and remains a self-funded, continuing appropriation.

- (Includes: InnovateND/Research/ Business Dvlp/NDDF/Partner Programs)
- ED&F works to grow an innovative entrepreneurial footprint in ND & further development of the state's economy. Overview of goals:
- Promote strategic growth and coordinating the stat's economic development resources to attract, retain and expand wealth in North Dakota.
- Attract diverse sectors of projects to encourage long term sustainable growth.
- Official source of population & social economic data and leads the state's efforts for reviewing and providing this information
- Manage data on all areas of development to encourage the continued advancement and development of major projects in North Dakota

- Advance economic development & optimum growth in the majors areas of: Value Added Agriculture; Areospace/UAS/Defense; Energy & Advanced Manufacturing; & Intellectual Property & Commercialization thru IT development, mineral resource development, data and AI development
- Innovate ND Program & continued work with the state’s entrepreneurial centers
- Implement relevant & effective strategies, programs & services to support business & community growth in ND

6000 Community Services

Approximately 90% of the funds in the DCS base budget are passed on to sub-recipient grantee agencies. The remaining 10% is used for salaries, fringe and operating expenses. Over 93% percent of the division’s base budget is from federal and other sources and is subject to federal and other judicially imposed regulations. It is necessary DCS maintain a programmatic and administrative staff to ensure compliance with federal regulations and be held to account for all sources of funds. Six percent of the DCS base budget request is for general funds. These funds are used for administering state programs, education and meeting the matching requirements of federal sources. The staff in Community Development continue to administer regular allocation, COVID grant funds and legislative pilot programs supporting community and economic development. The Department of Energy (DOE) energy efficiency and electrification programs have been started and distribution of nearly \$90 M to citizens across North Dakota will start spring 2025. This program is managed by one staff person and will need to increase staffing in order to distribute the funds and avoid corruption and fraud.

Program Goals and Objectives

The ND Department of Commerce consists of administrative services and four divisions. For narratives purposes administration and each division is identified as 2000 Administrative Services / 3000 State Marketing & Tourism / 4000 Workforce Development / 5000 Economic Development & Finance / 6000 Community Services. Please see attachments for detailed explanation of program goals and objectives.

2000 Administrative Services

Provide incomparable support services to the Department of Commerce & world class assistance to our stakeholders.

3000 State Marketing & Tourism

Market North Dakota through image development, brand building, storytelling, and advertising: Inspire travel through compelling advertising; increase awareness of the state through consistent brand messaging, logo use and merchandising. Overview of goals:

- Increase the number & reach of positive earned national media placements/mentions showcasing the state as a premier destination for visitors, businesses, employees, and investment.
- Increase the state’s image and awareness
- Increase visitor incremental trips motivated by marketing
- Increase visitor spending
- Workforce and talent attraction marketing

- Market the state’s competitive advantages to support business development

4000 Workforce Development

Ensure implementation of statewide strategic workforce goals & initiatives. Overview of goals:

- Support the Workforce Development Council in developing & implementing the state’s workforce strategy
- Serve as the convener of the state’s workforce system, including state agencies, higher education, K-12, CTE, & industry
- Lead the state’s talent attraction strategy
- Develop comprehensive recommendations and projects that will:

- Increase early career exposure

- Address the technical skills gap and connect employers with a skilled candidate pool

- Remove barriers to employment

- Lead occupational licensing reform efforts

- Recruit and retain workforce

- Identify ongoing enhancements to programs that assist in addressing state workforce development, including AmeriCorps, Operation Intern, national & global talent attraction initiatives, Technical Skills Training Grant, Regional Workforce Impact Program, and Workforce Innovation Grant.

5000 Economic Development & Finance

(Includes: InnovateND/Research/ Business Dvlp/NDDF/Partner Programs)

- (Includes: InnovateND/Research/ Business Dvlp/NDDF/Partner Programs)
- ED&F works to grow an innovative entrepreneurial footprint in ND & further development of the state’s economy. Overview of goals:

- Innovate ND Program & continued work with the state's entrepreneurial centers
- Implement relevant & effective strategies, programs & services to support business & community growth in ND

6000 Division of Community Services

The Division of Community Services was established to provide technical assistance to local governments and state agencies in the areas of community and rural planning and development, policy research and development, and grant program implementation. DCS programs directly help to assist and facilitate the Department of Commerce mission to improve the quality of life of the people of North Dakota. DCS provides technical assistance for goal orientated community development. This includes supporting the four pillars of the Main Street Initiative and effective, efficient and customer-oriented administration of federal and state programs for:

- Community Development and Planning
- Energy Efficiency in communities and in homes
- Housing

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Workforce Division was charged with establishing and sustaining the Office of Legal Immigration after the passing of Senate Bill 2142. The Division is submitting a request for a name change to the Global Talent Office. Senate Bill 2142 gave the Office operating costs of \$2,000,000 for two full time employees and other costs related to the training, services, and program administration. The Workforce Development Division is requesting to sustain the operation funding to continue the activities of the Office of Legal Immigration. The appropriation for the two FTEs has been included in the ND Department of Commerce operation line. This operation funds would allow the office to implement statewide immigration and foreign labor studies, provide training and education opportunities for employers and communities to recruit, retain, and integrate immigrants and New Americans in North Dakota.

Necessary resources for implementation (including FTE's)*: Sustaining the initial funding is needed for daily effective operation of the Office of Legal Immigration.

Are resources being redirected or are they new or additional (including FTE's)*: Initial bill provided one time funding, requesting ongoing funding for Office operations.

Who is served and impact of not funding*: Businesses that employ New Americans and Immigrants that face integration or retention challenges, potentially supporting businesses that are new to international recruitment processes. This could include Department of Labor job certification fees, contextual language learning fees for instruction and access to virtual learning programs, cost matching housing for initial relocation, travel

601 Commerce

Agency 601

There are many ways that employers and communities in North Dakota can benefit from grant opportunities that improve the ability to employ and integrate foreign-born individuals to meet our immediate and long-term workforce needs. The current grant program is designed to improve awareness and utilization of the nonprofit immigrant and New American serving agencies.

North Dakota Development Fund (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	675,496	-	675,496	3.00	275,514	-	275,514	1.00
Total	25,775,496	50,000,000	75,775,496	3.00	375,514	-	375,514	1.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: 1. The North Dakota Development Fund has evolved into a strategic investment fund for the state which has aided us in closing investments in projects we may have previously lost to other states. Two of the more high-profile projects include Cerilon GTL and Scranton Holdings.

These are just two example of projects that have the potential to return many multiples by way of tax revenue back to North Dakota.

We are seeking \$50m for the North Dakota Development Fund which would enable the fund to continue making strategic investments and outcompete other states for projects.

Necessary resources for implementation (including FTE's)*: We are requesting 3 FTE's for the NDDF. The NDDF has gone from an appx. \$50m fund to an over \$200m fund in the past two years without any additional resources. To ensure the NDDF can responsibly screen new investment opportunities and manage the existing portfolio, we need 3 additional FTE's.

Are resources being redirected or are they new or additional (including FTE's)*: 3 FTEs will be funded through the 50 million injection of capital as well through the Automate ND Grant Program we are requesting the authority to charge payroll time to this grant program.

Who is served and impact of not funding*: The State is served and without the 3 additional FTEs, injection of capital, and the Automate ND Grant Program our state could lose out on potential projects to other states.

Property valuation increase through improvements (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	-	5,100,000	5,100,000	0.00	-	2,600,000	2,600,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Continuation of the successful property improvements program from previous session to remove slum and blighted areas in communities, thus increasing property values of the existing property and the neighborhoods. The program is only available to political subdivisions where they will or have taken ownership of the property. Private owners are still responsible for maintenance, upkeep and demolition if owned privately.

Necessary resources for implementation (including FTE's)*: Requesting funds to support operation regarding administration and travel. Existing staff will maintain the program. Grant dollars of \$5M to accommodate the large need where no other sources are available to support this property improvement. The pilot program in 2023 session, including workforce housing, was \$1.5 M and the requests were over \$15 Million.

Are resources being redirected or are they new or additional (including FTE's)*: Grant program was piloted in 2023 session with \$1.5M. The program has been successful in increasing valuation, home ownership and attractive lots for future use.

Who is served and impact of not funding*: All citizens of the state will be served and positively impacted with this capacity increase. The target areas in the pilot program were rural communities of less than 10,000 population. These communities have the most difficulty cleaning up politically owned lots without assistance and burdening the tax payer. Once the hazards were removed, many of the projects and/or lots were available for private purchase, immediately increasing the property valuation for the local government and the state.

Tourism Marketing Awareness (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	7,000,000	-	7,000,000	0.00	-	5,000,000	5,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	7,000,000	-	7,000,000	0.00	-	5,000,000	5,000,000	0.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: North Dakota is not a well-known state. This low awareness can be improved by increasing our marketing budget. Our data shows that when we increase our marketing investment, we see increases in visitation. 2023 economic research done by Tourism Economics showed that visitation grew 5.5% - reaching 25.6 million visitors to our state. Those visitors spent \$3.3 billion. Our opportunity lies in converting the 17.8 million day-trip visitors who did not spend a single overnight in our state. Early 2024 metrics are strong: June hotel occupancy was the highest since 2013 and 2014 (oil boom) and Theodore Roosevelt National Park visitation set a new monthly high with 210,938 visitors in June 2024 up 50% from June of 2023. Full visitation and marketing metrics are available at <https://www.commerce.nd.gov/tourism-marketing/research-and-reports> or specifics upon request.

Necessary resources for implementation (including FTE's)*: Our 2021-2023 budget included \$7 million in one-time COVID funds and the 2023-2025 budget reduced that number to \$5 million in one-time special funds. In order to grow awareness, visitation and support for our 3,000 tourism related businesses we need to invest in marketing. Our request is for \$7 million in on-going funds and an FTE that would support the paid marketing efforts for Commerce. Our neighboring states have much larger budgets: Wyoming \$44 million (23-24), South Dakota \$22.8 million (25). And their visitation market share growth has been reflective of those budgets. Our largest biennial budget (21-23) was \$16.2 which included \$7.9 in ARPA funds for marketing.

The additional funding would allow for an impactful, national promotion of the opening of the Theodore Roosevelt Presidential Library. Opportunities include:

- Partnership with TR repriser Joe Weigand
- Geofencing every Presidential Library across the country to serve digital advertising
- Multi-state TR cooperative effort aligning TRNP, Mount Rushmore and Yellowstone NP.
- Partnership with the National Archives Foundation
- Advertising to targeted history enthusiasts
- Geofenced advertising of prominent museums and historical locations in bordering states
- Print campaign to readers of National Geographic History, Smithsonian History, History Today and National Parks magazines
- Printed promotional materials

By strategically targeting national media in key markets like New York City, we can significantly enhance North Dakota's brand visibility. Through media missions, we'll cultivate relationships, share compelling stories, and gain invaluable insights. This approach, coupled with a comprehensive plan including news releases, media familiarization trips, content creator partnerships, and long-lead media outreach, will position North Dakota as a premier destination for visitors, businesses, and talent. By aligning with the Theodore Roosevelt Presidential Library Foundation, we can amplify our efforts and capitalize on high-profile opportunities to generate widespread media coverage

601 Commerce

Agency 601

Additionally, we would look to motivate Canadian travel back to pre-2020 levels, expand streaming video presence, and engage in event activations. One potential event activation could take place on MLB opening day.

Visitation research is also highlighting the Seattle market for emerging growth. In the last year, North Dakota has been motivating more trips from Seattle with stays almost a day longer than average.

Are resources being redirected or are they new or additional (including FTE's)*: Dedicated funding would replace one-time dollars previously received. We are requesting a marketing assistant to replace staff who now do broader Commerce work. The FTE would work primarily on tourism and FTGL marketing, so we have allocated ½ to each request- which is detailed in the FTE request.

Who is served and impact of not funding*: More than 3,000 businesses across all 52 counties depend on visitor revenue. Tourism generated \$307 in local and state taxes which helps communities stay healthy and vibrant. The taxes paid by visitors created a \$960 per household savings for North Dakotas. Increasing visitation also increases our potential to attract the talent needed to keep our economy growing.

Strategic Site Development Initiative (Priority: 07)

Are resources being redirected or are they new or additional (including FTE's)*: New

601 Commerce

Agency 601

Who is served and impact of not funding*: The State is served by bringing new economic development products to the state.

Global Engagement (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	222,772	-	222,772	0.80	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	222,772	-	222,772	0.80	-	-	-	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Global Engagement office implements the foreign direct investment strategy for the state of North Dakota. Operational funds are used to defray expenses related to the execution of capital, investment and/or workforce missions designed to expand wealth in North Dakota by foreign investment in North Dakota. Expenses related to the execution of this mission include traditional office expenses like office equipment and utility expenses but also include travel, business development expenses, conference attendance, etc.

Necessary resources for implementation (including FTE's)*: Necessary resources for implementation include: an office location and the necessary office equipment, office supplies and utilities, website construction & maintenance, extensive travel to foreign nations, reliable access to fast internet, and training.

Are resources being redirected or are they new or additional (including FTE's)*: The foreign direct investment (FDI) strategy was legislatively assigned to the ND Department of Commerce to facilitate. Previously it was part of the ND Trade Office mission. Operational funds were provided but no FTE was authorized. This budget includes a request for a .8 FTE to assist with further execution and development of the program along with \$50,000 in operational funds to support the position.

Who is served and impact of not funding*: North Dakota is served by the FDI strategy implementation. There are several ways for foreign businesses to create a positive nexus in North Dakota: greenfield investment, co-investing/partnering with an existing ND company, and/or buying a ND company outright. Greenfield investments may be the most impactful due to capital investment and employee growth. The impact of not funding FDI is we lose the world wide exposure (which also has ancillary impacts in ND on tourism, etc. . .), opportunity for new wealth in North Dakota, opportunity related to job growth and the stabilizing effect of a more diversified economy.

Economic Development and Finance Operational Decision Package (Priority: 12)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Tourism Request : Our national talent attraction program, Find the Good Life, began in June 2022. Since it's launch over 3,000 individuals interested in relocating to North Dakota have entered the pipeline designed to connect leads with local community champions and provide them with additional materials to improve awareness and showcase the best of life in North Dakota, with the ultimate goal of motivating jobseekers and family to discover their journey to the state.

The process begins with national media targeting the personas: boomerangs, young families, recent college graduates, and veterans, aiming to drive traffic to the findthegoodlife.com website. The website includes a relocation help desk that connects prospective residents with locals eager to share resources and real-life experience about life in North Dakota. The relocation help desk utilizes three forms to collect

information on career aspirations and lifestyle to help community champions personalize the conversation regarding the individual's relocation journey. Additionally, prospective residents who provide career information now enter the candidate marketplace, a tool build for employers to directly access individuals interested in relocating to North Dakota with skills that could fill their open positions.

Find the Good Life is continuing to innovate with new marketing tactics and improved creative showcasing our state. It is imperative that we continue to invest in awareness of our quality of life to continue this momentum. To date marketing metrics include: 55.3 million total impressions from paid media, 232,200 click to website, 7.45 videos watched to completion, 505,282 emails opened, 491,304 audio completions.

This marketing has resulted in the following stats as of 7/29/24: 3,308 contacts in the pipeline, 81% are new to ND and 66% are looking to move within 6 months. There are 1121 leads connected to current campions. We have confirmations from 36 participants who have relocated to 17 communities in North Dakota.

Workforce Request: The Workforce Division developed and implemented a national talent attraction initiative by developing personas for marketing, and a leads generating and capturing pipeline that connects people interested in learning more about relocating to North Dakota can connect to community champions and employers that match their skills and interests. The program staff serve as subject matter experts, helping to connect employers to the candidate marketplace within the pipeline, build a culture of championing North Dakota communities, partnering with communities to identify opportunities to improve attractiveness, amenities, awareness, and events to connect people to the communities. This program works in partnership with the Office of Legal Immigration to connect foreign-born workers in the United States to job opportunities and champions in North Dakota. The funding supports the ongoing access to the pipeline platform, enhancements

601 Commerce

Agency 601

for data collection, job and career fair participation, programmatic and grant activities to support relocation, content and resource development for internal and partner use engaging leads in North Dakota, supporting locally led initiatives and events that connect leads to communities and jobs, providing best-practice training and addressing other emerging strategies.

Necessary resources for implementation (including FTE's)*: Tourism : In order to continue to increase awareness of North Dakota and attract workings we need to continue our \$6 million investment. These dollars would support additional marketing in targeted personals and potential new personas like new Americans, Fresh Start, Rural Entrepreneurs and expand into potential industry specific marketing for greatest needs (nursing, education, IT, admin/management and Energy.) The marketing also supports additional cooperative efforts with tourism like the Waste Management Phoenix Open golf tournament sponsorship and the McGregor Square activate in conjunction with the Colorado Rockies sponsorship. Both initiatives resulted in immediate results: Website traffic from Arizona was up 789% for tourism over previous year and 20% for FTGL. Web traffic from Denver was 30% on ND Tourism and 6,400% on FTGL. We are also seeing visitation growth from Colorado and Arizona.

Workforce: Sustaining the initial funding is needed for daily effective operation of the National Talent Attraction program.

Are resources being redirected or are they new or additional (including FTE's)*: Tourism: Dedicated funding would replace one-time dollars previously received. We are requesting a marketing assistant to replace staff who now do broader Commerce work. The FTE would work primarily on tourism and FTGL marketing, so we have allocated ½ to each request. One Time Funding Request

Workforce: Initial bill provided one time funding, requesting ongoing funding for operations. Ongoing Funding Request

Who is served and impact of not funding*: Tourism: Businesses, non-profits and communities statewide needing employers to keep their operations growing and their communities healthy and vibrant. When we curtailed paid marketing efforts for FTGL the website traffic dropped significantly. With every state and community competing for talent, it is in the states best interest to continue this investment.

Workforce: North Dakota employers that struggle to recruit and/or retain employees and communities seeking growth and implementing partnerships with local employers. Recruitment and retention is a challenge across the state with challenges that all communities experiences and some that are more unique in rural areas where resources and staff may be limited for development and implementation of talent attraction and retention best-practices.

IRA & IIJA Energy Program FTEs (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: increased ask for a total of \$3M - this 2M request and 1M is in base budget to support the growing demand for this business resource. Internships and Apprenticeships are an effective workforce pipeline, and

businesses around ND depend on this program to providing these work-based learning opportunities.

Necessary resources for implementation (including FTE's)*: Additional funding is needed to sustain the operation intern program - typically funding does not a longer than a day before it is obligated.

Are resources being redirected or are they new or additional (including FTE's)*: additional resources needed

Who is served and impact of not funding*: employers in the state of ND

601 Commerce

Agency 601

Marketing Assistant (Priority: 21)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	217,128	-	217,128	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	217,128	-	217,128	1.00	-	-	-	0.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority): As the state prioritizes marketing to support growth, the needs for a dedicated marketing assistant to analyze results, proof materials, audit placements, set up itineraries for media and product development tours, collect tourism stats, manage materials, support cooperative programs etc. are high. A complete job description is available upon request.

Necessary resources for implementation (including FTE's): Salary and benefits - \$202,128 + \$15,000 in operating= \$217,126

Are resources being redirected or are they new or additional (including FTE's): New including FTE

Who is served and impact of not funding: Assuring the quality and measurement of our marketing efforts benefits all citizens of North Dakota.

Without funding we will need to allocate additional marketing dollars to temp workers or contracted agencies which will reduce our marketing reach. This does not provide the consistency we would like to be accountable and transparent.

Legacy Investment for Technology Funds (Priority: 22)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

601 Commerce

Agency 601

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: transfer the sum of \$15,000,000 to the legacy investment for technology fund for the purpose of providing legacy investment technology loans

The LIFT program seeks to continue providing loans which enable companies to:

- a. Deliver applied research, experimentation, or operational testing in one or more of the diversification sectors to create information or data to enhance North Dakota companies or industries or companies making investments in North Dakota;
- b. Commercialize or patent an innovation technology solution; or
- c. Develop a new company or expansion of an existing company that will diversify the state’s economy through new products, investment, or skilled jobs.

Necessary resources for implementation (including FTE’s)*: injection of funds into the LIFT fund.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources.

Who is served and impact of not funding*: North Dakota companies or industries or companies making investments in North Dakota;

Tourism Operations (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	250,000	-	250,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	250,000	-	250,000	0.00	-	-	-	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Essential upgrades and enhancements are crucial for improving our operational efficiency, data management, and overall customer experience. The specific areas for which we require funding are as follows:

1. Data Visualization Tools:

- o Purpose: To enhance our ability to analyze and present data in an actionable and user-friendly manner.

601 Commerce

Agency 601

o Benefits: Transparency, improved decision-making, better insights into customer preferences and trends, and more effective reporting.

2. Drupal Upgrade:

o Purpose: To update our existing content management system to the latest version. Drupal 11 is coming in 2025 and will retire Drupal 10 by end of 2025.

o Benefits: Enhanced security, improved functionality, and better support for new features, ensuring a seamless and secure user experience.

3. Phone Charges:

o Purpose: To cover the operational costs associated with our customer service and support lines. Including our toll-free line for our visitors.

o Benefits: Maintaining effective communication channels with our customers, ensuring timely responses to inquiries and requests.

4. Data Processing (DP) Charges:

o Purpose: To manage and process the increasing volume of data we handle daily.

o Benefits: Ensuring smooth and efficient data operations, reducing downtime, and maintaining data integrity.

Necessary resources for implementation (including FTE's)*: \$250,000 operating funds ongoing

Are resources being redirected or are they new or additional (including FTE's)*: New Resources Needed

Who is served and impact of not funding*: Tourism industry managers, state and local leaders and decision makers will benefit from data visualization and consumers interested in traveling or moving to North Dakota who use our website will continue to have a seamless experience. If not funded, we will fall further behind other states and could lose visitors. The creditability of Commerce is also a risk if we do not provide good data.

Regional Capacity growth and planning grants (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	654,586	5,000,000	5,654,586	3.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	654,586	5,000,000	5,654,586	3.00	-	-	-	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: This initiative includes regionally placed community development specialists to aid local, regional and state initiatives and agencies along with and planning grants including but not limited to housing, placemaking, strategic and comprehensive planning and infrastructure/recreation combined planning. These grants augment and support other state agency funding to assure that communities are looking forward to support their growth the most comprehensive way possible.

Necessary resources for implementation (including FTE's)*: Three FTE regionally placed and community planning and improvements grants. Each of these people would hold specialties that regions and communities have requested (grant, workforce, placemaking) and support Commerce as a whole (\$500,000). Grant dollars to meet the planning demands of the communities, regions and nonprofits.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE, grant program that has been piloted with small amounts of Commerce Momentum fund and has great demand to continue. We see over \$12 million in requests for many of these program areas each year.

Who is served and impact of not funding*: All citizens of the state will be served and positively impacted with this capacity increase. With specialized fields, the regionally placed staff will serve the communities and regions but have identified areas where they will be subject matter experts, providing guidance and support statewide in that area. If not funded, we will continue to see declining ability and resources in rural communities where capacities continue to be stretched or eliminated. Without adequate support, the volunteers, elected officials and advocates for rural growth will be limited in their abilities to stretch and meet the economic opportunities we are seeing across the state.

Apprenticeship Awareness Promotion (Priority: 27)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	300,000	300,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	300,000	300,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Apprenticeship is a tried-and-true workforce development tool. Similar in concept to dual-credit courses between high school and colleges/universities, Quality Pre-Apprenticeship (QPA) Programs seek to credit students for a Registered Apprenticeship Program while in high school, ideally as a 16- and/or 17-year-old learner. There is opportunity for increased participation in apprenticeship programs to expedite entrance into the workforce across industry. State investments can help accelerate scaling such opportunities in North Dakota.

Necessary resources for implementation (including FTE's)*: \$300,000 in operating funds

601 Commerce

Agency 601

Are resources being redirected or are they new or additional (including FTE's)*: New Resources

Who is served and impact of not funding*: Employers, Students, Parents, and Job Seekers are served.

Impact of not funding: North Dakota is already lagging behind under states in apprenticeship participation in not generating awareness North Dakotans will miss out on the opportunity to prepare the workforce.

Building Codes (Priority: 28)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	98,583	-	98,583	0.00
General	150,000	-	150,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	150,000	-	150,000	0.00	98,583	-	98,583	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Division of Community Services statutorily is responsible for the State Building Code updating, amending and education (ND Century Code 54-21.3). They do not, nor want, enforcement of regulation authorization for any building codes. This should remain local. As the state resource, DCS received 2-3 calls/week from citizens, elected officials and others looking for guidance on a variety of topics. This funding would be used to pay partial salary for the existing staff who manage this program and education materials to support local entities in updating and understanding the state building codes and allowable codes according to national standards.

Necessary resources for implementation (including FTE's)*: Funding for partial FTE support (existing) travel and educational materials.

Are resources being redirected or are they new or additional (including FTE's)*: While statutory requires DCS to manage this program, we have never had funding to provide for qualified, educated staff and resources to support education of the citizens and elected officials. This is new funding.

Who is served and impact of not funding*: Elected leadership of townships, cities and counties are the first impacted by this funding. Additionally, we receive calls from citizen constituents looking for guidance when their jurisdiction does not have guidance or this guidance is out dates.

Texas Strategy (Priority: 29)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	3,600,000	3,600,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	3,600,000	3,600,000	0.00	-	-	-	0.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Texas has been identified as low-hanging fruit for marketing expansion. We’ve seen growing volume of travel, website traffic, and inquiries. Texas is also a consistent top-five state in resident migration to North Dakota. By focusing on a market where there is already interest, we increase the potential for converting both travel and talent attraction to North Dakota.

Tourism and talent attraction marketing efforts would run in tandem, amplifying North Dakota’s presence and impact. Because Texas is a large, and expensive market, three designated marketing areas (DMAs) have been identified for best return on investment.

Necessary resources for implementation (including FTE’s)*: A total media investment of \$3.6 million is needed to effectively advertise in this opportunity market. The tourism strategy would employ a multi-channel campaign across traditional, digital, and social media channels with an emphasis on impact, reach and frequency. Creative would be developed to create awareness and motivate consideration of North Dakota as a travel destination. Recommended Tourism investment - \$2.75 million. The talent recruitment strategy would capitalize on the tourism campaign by running advertising that targets industry-specific jobholders/jobseekers, along with personas like young families. Recommended Find the Good Life investment - \$850,000.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources would be required to add Texas as a target market. Redirecting funds would result in the loss of exposure and market share. For example, six years after adding the Chicago DMA as a primary advertising market we are seeing Illinois as our top state for website traffic. Influencing consumer opinion and behavior takes time, especially with limited dollars and seasonal campaign efforts. In order to incite action, we’ll need a dedicated, multi-year effort.

Who is served and impact of not funding*: “When you stop growing you start dying.” (William Burroughs). In sales and marketing, it’s imperative to continually look for opportunity markets and invest. Beneficiaries would include communities statewide, non-profits, businesses and employers

601 Commerce

State Initiative:* Reinventing Government

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: • Task 1: Data Center Unified Platform: Creation of a unified platform to support the immediate data products outlined in tasks 2-4, as well as provide a flexible environment for onboarding use cases, data domains, and programmatic components. Output: Flexible Unified Platform (leveraging existing Drupal and Azure technologies)

• Task 2: Data Hub: Create a central hub to collect and disseminate data from multiple sources (US Census Bureau, ND compass, economic impact studies, ESRI, reports from grants, etc.) and provide updated, reliable information for utilization by ND Department of Commerce, along with agencies and communities across the State for demographic, economic development, workforce, and socioeconomic information to better ND residents' quality of life. Output: Initial round of Census data displays and visualizations

• Task 3: Tourism Dashboards: Update existing State Data Center data products (e.g., PDFs) not dynamic and integrated dashboard reporting into the Commerce website. Dashboard reporting needs to create efficiencies, provide data source API, be public facing, and showcase data trends and performance in appealing visualizations. North Dakota Tourism uses both publicly available and custom reporting to analyze visitor activity. Output: Initial round of Tourism dashboards and visualizations

• Task 4: State Ranking Automation and Live Pulls: Automate and digitally enable (via RPA and other methods) refreshed pulls of key public metrics and reports on North Dakota's performance and positioning across the United States (relative to other states). These are currently manually maintained through individual staff member research, manual website updates, and excel-based tracking. Output: Automation of priority state ranking pulls and updates

Necessary resources for implementation (including FTE's)*: New resources and ongoing for maintenance - will be working as one with NDITD on this solution.

Are resources being redirected or are they new or additional (including FTE's)*: New resources

Who is served and impact of not funding*: By leveraging the benefits of tourism dashboards and state data centers, authorities can enhance operational efficiency, improve services, and support sustainable development, ultimately contributing to the economic and social well-being of the state.

Start Date (MM/DD/YYYY): 7/1/2025

601 Commerce

Agency 601

End Date (MM/DD/YYYY): 6/30/2026

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Tourism dashboards and state data centers are essential tools for managing, analyzing, and leveraging data to enhance the tourism sector and state services.

Project Risk:* Not applicable.

Issue/Solution:* State Data Center Modernization – Updating/Providing Public Census and Tourism Dashboards and Data Displays

The project work is broken down into the following four task areas:

- Task 1: Data Center Unified Platform: Creation of a unified platform to support the immediate data products outlined in tasks 2-4, as well as provide a flexible environment for onboarding use cases, data domains, and programmatic components. Output: Flexible Unified Platform (leveraging existing Drupal and Azure technologies)
- Task 2: Data Hub: Create a central hub to collect and disseminate data from multiple sources (US Census Bureau, ND compass, economic impact studies, ESRI, reports from grants, etc.) and provide updated, reliable information for utilization by ND Department of Commerce, along with agencies and communities across the State for demographic, economic development, workforce, and socioeconomic information to better ND residents' quality of life. Output: Initial round of Census data displays and visualizations
- Task 3: Tourism Dashboards: Update existing State Data Center data products (e.g., PDFs) not dynamic and integrated dashboard reporting into the Commerce website. Dashboard reporting needs to create efficiencies, provide data source API, be public facing, and showcase data trends and performance in appealing visualizations. North Dakota Tourism uses both publicly available and custom reporting to analyze visitor activity. Output: Initial round of Tourism dashboards and visualizations
- Task 4: State Ranking Automation and Live Pulls: Automate and digitally enable (via RPA and other methods) refreshed pulls of key public metrics and reports on North Dakota's performance and positioning across the United States (relative to other states). These are currently manually maintained through individual staff member research, manual website updates, and excel-based tracking. Output: Automation of priority state ranking pulls and updates

Total				-	-	2,000,000	-	2,000,000	-	2,000,000

State Initiative:* Workforce

Explanation / Justification: Office of Legal Immigration- Sustain the current one-time funding of \$2,000,000 for grants to employers that recruit and employ foreign-born workers and the communities where worksites or resettlement are bringing immigrants and New Americans to. The current pilot grant is to support employers implementing best-practices and providing work-based resources for their foreign-born employees, nonprofits that serve New Americans and immigrants developing resources and services that can be provided for employers as a sustainability format for the nonprofits, and for community serving organizations to create and facilitate events and activities that foster connectedness and integration which supports the long-term retention of all new residents.

Regional Workforce Impact Grant Program (Priority: 3)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4200	60163	-	-	12,500,000	-	12,500,000	-	12,500,000
Total				-	-	12,500,000	-	12,500,000	-	12,500,000

State Initiative:* Workforce

Explanation / Justification: Regional Workforce Impact Program Grant- The Workforce Development Division is requesting to sustain the one-time funding of \$12.5 million and an update to the intent of how the grant funds are used. Based on feedback from Regional Councils, community leadership and others that have applied for, received, or not applied for RWIP funding under the existing framework, the Division is recommending changing the funding intent to support regional workforce planning assessments and implementation funding for strategies that address the identified strategies that will address the leading challenges faced by communities, excluding housing and childcare development.

North Dakota Development Fund: Automate ND Grant Program (Priority: 4)

State Initiative:* Economic Development/Diversification

Explanation / Justification: North Dakota consistently ranks amongst the tightest workforce situations in the nation. As a result, many primary sector businesses (manufacturing, ag processing, biomedical, tech, etc.) remain critically understaffed and are turning work away. These capacity constraints limit economic growth in North Dakota, hinder the ability our primary sector operations to compete on a nation or global scale, and cause market share erosion as business is lost to markets with available capacity. Using ARPA funds, the North Dakota Department of Commerce piloted an automation grant program (AutomateND) for primary sector businesses in ND. This one-time program attracted applications from 42 applicants across the state representing over \$25,000,000 invested into automation projects from various sectors. This amounted to a state match demand of nearly \$12,000,000. The \$5,000,000 in ARPA funds were exhausted after awarding the top 17 candidates leaving many viable projects unfunded. The anticipated impacts from that \$5M in ARPA funds awarded to the 17 awardees includes the following:

1. Hours of labor freed up for upskilling,
2. Labor savings,
3. Additional capacity resulting in increased revenues , and
4. Increased compensation for existing workforce as a result of upskilling.

If a state fund-based program were to be implemented, it is anticipated annual demand and potential impacts would grow beyond these numbers. The grant is beneficial for a couple of reasons:

- 1) It acts as a true incentive assisting with the purchase of the equipment, whereas current programs are post purchase tax based reimbursements, and

2) Some of ND’s largest manufacturers are ESOPs or tribal organizations which do not benefit from tax based programs.

The North Dakota Development Fund will administer this program - this needs to be notated as grants as well as we are requesting the ability to charge salary dollars against this grant.

Property valuation increase through Improvements (Priority: 5)

Total				-	20,000,000	-	20,000,000	-	-	-

State Initiative:* Economic Development/Diversification

Explanation / Justification: 1. Identification and inventory of existing land having availability and capability to be developed as Industrial Sites

- 2. Development of Economic Development tools/software as a means to best understand the current availability of existing infrastructure across the state, including sites ripe for redevelopment
- 3. Establishment of a program/approach to generate investment in the infrastructure associated with redevelopment of existing decommissioned industrial sites
- 4. Develop a Shovel ready sites certification program to enhance the competitiveness of sites and enhance the reach and strategy of marketing efforts

Destination Development (Priority: 8)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-3300	60160	-	-	50,000,000	-	50,000,000	-	-
	493	601-3300	60160	-	-	-	-	-	-	30,000,000
Total				-	-	50,000,000	-	50,000,000	-	30,000,000

State Initiative:* Economic Development/Diversification

Explanation / Justification: The Destination Development Grant has proven essential in fostering new tourism experiences across North Dakota. During the first round of applications, we received requests totaling \$151.5 million and approximately \$130 million would have been eligible to receive funds. This strong demand validates the potential for tourism growth. With only \$25,000,000 allocated initially, many high-quality projects could not receive funding. The additional \$50,000,000 requested for the next biennium will ensure we can support more of these initiatives, promoting tourism, enhancing community amenities, and attracting workforce talent. Improved grant guidelines have been submitted in policy suggestions.

In 2023, North Dakota welcomed a record 25.6 million visitors, who spent over \$3.3 billion, generating \$307 million in visitor-paid taxes. However, there’s a growing trend of day trips, with 17.8 million visitors not staying overnight. To boost economic growth and community vitality, it’s vital to increase and enhance experiences across the state to encourage more time spent in North Dakota.

Technical Skills Training Grant (Priority: 9)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4200	60163	-	-	2,000,000	-	2,000,000	-	2,000,000
Total				-	-	2,000,000	-	2,000,000	-	2,000,000

State Initiative:* Workforce

Explanation / Justification: The Technical Skills Training Grant is requesting to sustain the one-time funding and change to ongoing funding of \$2 million to support employers skilling and reskilling of new and incumbent workers to be able to meet the needs of in-demand jobs, including automation feasibility assessments that can address chronic vacancies and reduce redundant tasks.

Beyond Visual Line of Sight Uncrewed Aircraft System Program (Priority: 11)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-2500	60160	-	-	42,000,000	-	42,000,000	-	-
	493	601-2500	60160	-	-	-	-	-	-	20,000,000
Total				-	-	42,000,000	-	42,000,000	-	20,000,000

State Initiative:* Economic Development/Diversification

Explanation / Justification: Request supports Vantis strategic initiatives including:

- Lead North Dakota in aviation autonomy adoption by expanding Vantis operations within the state
- Execute the Vantis Business Plan to seize the market opportunity and generate returns on ND’s investment
- Generate demand for Vantis services through excellence in marketing, communications, and promotion

Commerce Department and NPUASTS efforts are ongoing to stand up a "Newco" that will have the capability to evolve into a public private partnership to commercialize Vantis. Depending on business plans and timing and extent of capitalization, Newco will potentially bear some portion of Vantis operating costs. This appropriation request recognizes the uncertainty in that effort and seeks to ensure funding for Vantis operations and strategic initiatives in the 25-27 biennium. Request reflects \$2 million increased personnel costs over 23-25 biennium. Staffing plan recognizes and rises to the challenge of workforce recruitment. Strategies include additional emphasis on utilizing part-time employees to enable seasonal- and demand-flexing. This includes leveraging the University system for interns that bring needed skills to the Vantis program and contribute to North Dakota workforce development and retention.

Anticipated new positions include the following; note that external project funding covers approximately 40% of Personnel costs:

- Vantis program manager to oversee execution of the various strategic objectives and maintain and build crucial relationships with key subcontractors, service providers, operators and their customers
- Vantis sales manager to drive state to state engagements to capitalize on the strategic Vantis advantage to establish the North Dakota model as the national BVLOS standard
- Marketing specialists in content & communication and data analytics to execute and guide continuous adjustments in the strategic plan for demand generation
- Information security officer to ensure best in class data & cyber security to conform to FAA, DoD, and national security requirements
- Operations field specialists utilizing interns to demand-surge and flex support for testing projects

- Workforce director to manage and direct talent acquisition, compensation, employee onboarding, training, development and retention, and organizational knowledge management

Additionally, request includes:

- \$20 million for Thales system design & development, integration, engineering, operations
- \$2 million to utilize MITRE for SME support and assistance with the various strategic objectives
- \$2 million for communications, marketing, and promotional spend in line with our strategic objective to significantly expand advertising and demand generation to seize on time-sensitive market opportunities
- \$1 million for NDITD support and other operational expense
- \$0.5 million for Mission & Network Operations Center equipment, leasehold updates for volume increases, and expansion planning & preparation

As described above, the budget request reflects an FTE add of 5 to manage Vantis program development, volume growth, and diversification of services, capitalize on expanded external funding opportunities provided by project ULTRA, and drive demand generation in other states to advertise ND's successful model for BVLOS networks and capitalize on the strategic market advantage gained from ND's investment in Vantis. Customers served include the citizens of North Dakota through UAS benefits of safety, productivity, and innovation, the economic benefits of ND's air autonomy leadership, and the return on the investment in Vantis primarily through export of the Vantis model to gain market dominance as the BVLOS standard; ND public entities through lower cost and safer mission execution; federal agencies and departments in service to their strategic objectives in the national airspace and national defense; commercial operators flying for their customers on the Vantis network.

Insufficient funding risks failure to capitalize on ND's investment in the Vantis network and export the Vantis model to other states to achieve BVLOS market dominance. It would also result in lost economic opportunity for the state of ND by failing to create a best in class UAS ecosystem that would attract capital, create jobs, and generate self-sustaining innovation. Insufficient funding would jeopardize delivery of UAS's safety, productivity, and quality of life benefits for ND citizens.

Local economic impacts include \$1 million over the biennium in hotel, restaurant, entertainment and other spending from the approximate 630 annual trips to ND from Test Site and Vantis customers, subcontractors and vendors, and federal and other state government officials.

Total				-	-	3,000,000	-	3,000,000	-	-

State Initiative:* Workforce

Explanation / Justification: Workforce Development Division received recommendation from the Workforce Development Council Skills Gap subcommittee to implement a pilot grant program to support small-businesses and nonprofits to implement AI solutions that create efficiencies and increase productivity. While AI may automate certain tasks within these jobs, it’s also important to note that AI is creating new opportunities and augmenting human capabilities in many fields. This often leads to the evolution of existing roles and the emergence of entirely new ones, such as AI trainers, ethicists, and developers. The types of roles where AI solutions may exist to address chronic vacancies for employers are those that are routine, repetitive tasks including manufacturing, production, retail, etc. AI can also create efficiencies in many industries including healthcare, financial services, education, customer service, etc. An AI workflow is a? Structured and systematic process that enables the efficient execution of complex tasks through the power of automation and advanced algorithms. By leveraging AI workflow, businesses can optimize their operations, and improve productivity. Custom AI solution start up or initial implementation costs can range from \$5,000 to over \$500,000 contingent on intricacy, hardware, and resource demands.?\$3,000,000 in pilot grant funding is requested to fund awards at a maximum of \$200,000 with a required 1:1 match.

Agency 601

Digital Literacy Grant (Priority: 23)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4200	60163	-	-	1,000,000	-	1,000,000	-	-
Total				-	-	1,000,000	-	1,000,000	-	-

State Initiative:* Workforce

Explanation / Justification: According to the 2022 National Governors Association Digital Equity Study that included North Dakota, there are opportunities to leverage federal funding opportunities meant to strengthen broad-band access and the Digital Equity Act that created 3 grant programs. North Dakota has received BEAD and DEA federal funding to NDIT. In addition to these funds and NDIT strategies to improve access to broadband services and enhancements to training opportunities with Tribal Colleges and Job Service North Dakota, there is a gap in access to these training programs. Adults that are already in the workforce or otherwise not accessing services through Adult Learning Centers and Job Service North Dakota (JSND) are a population of opportunity to expand equity and access to these programs. Currently, digital skills and digital training programs are offered through k-12, higher education, Adult Learning Centers, Job Service North Dakota, and other institutional partners but this leaves a gap. This recommendation to create a competitive state-funded grant program administered by ND Department of Commerce that will better prepare our workforce by equipping them with digital skills necessary to complete their duties in the current and/or future work environment. Employers and other organizations can apply for their workforce or population served to access and complete digital literacy and digital skills training programs. The funding may be used for in-person, virtual instruction, licensing, and certification costs. Workforce Development Division received recommendation from the Workforce Development Council Skills Gap subcommittee to implement a pilot grant program to support employers providing digital skilling education. This is a gap area of adults not currently enrolled in an education institution or connected with Job Service ND or Adult Learning Centers. \$1,000,000 in pilot grant funding is requested to fund awards at a maximum of \$25,000 with a required 1:1 match.

Regional Capacity growth and planning grants (Priority: 25)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total				-	1,259,044	-	1,259,044	-	-	1,259,044

State Initiative:* Economic Development/Diversification

Explanation / Justification: In the 2017 legislative session, the Innovate ND program received a \$2,250,000 appropriation. In the 2019 legislative session, the Innovate ND program received a \$2,948,467 appropriation. The last two legislative sessions resulted in an appropriation of \$948,467 in each respective biennium. This substantial cut in funding forced the program to close halfway through the 2021-2023 biennium. In response to the cut in funding we revised the program guidelines for the 2023-2025 biennium and we are only able to accept 20 startups this biennium (compared to appx. 80 companies in previous biennium). Additionally, staff dedicated to administering the program have been cut and the economic development support organizations have expressed concern with respect to their ability to continue administering the program under current funding levels.

- \$2,000,000, of which \$1,000,000 will be provided as grants to Innovate ND participants; and \$1,000,000 to support economic development support organizations administering the program.

Manufacturing Extension Partnership - Partner Program (Priority: 30)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-7800	60174	-	158,345	-	158,345	-	-	-
Total				-	158,345	-	158,345	-	-	-

State Initiative:* Economic Development/Diversification

Explanation / Justification: Expand funding of MEP to facilitate the expanded role of advanced manufacturing and workforce audits. These audits are necessary to increase the efficiency of the manufacturing sector in ND and to more fully utilize existing workforce - Total funding from base budget plus this decision package increases the funding to a total of 800,000

601 Commerce

APEX Accelerator - Partner Program (Priority: 31)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-7800	60174	-	275,000	-	275,000	-	-	-
Total				-	275,000	-	275,000	-	-	-

State Initiative:* Economic Development/Diversification

Explanation / Justification: Per the ND Small Business Center Director, Tiffany Ford, APEX has been flat funded now for the past 4 years, and an increase in funding is necessary if we are to continue to sustain program activities and look to continue the tremendous impacts to our state and the mission of Commerce, and the assistance that benefits other state agencies as well.

In previous biennium's this grant program was funded out of the Commerce Discretionary Line Item.

Enhanced Use Lease (Priority: 32)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Agency Description

The agriculture commissioner is statutorily responsible for enforcing laws and regulations pertaining to pesticides, fertilizers, anhydrous ammonia, livestock sales, dairy production, noxious weed control, plant export certification, and beekeeping. The commissioner is also responsible for the registration of pesticides, fertilizers, animal feeds, and veterinary medicines; the administration of fair and timely mediation services to agriculture producers, creditors, and energy related issues; the collection and elimination of unusable pesticides; the promotion and marketing of North Dakota products; environmental mitigation in relation to energy conversion and transmission facilities, and the administration of a state meat inspection program.

These responsibilities have expanded to include: a leadership role in the formation of policies affecting the state's agricultural industries; the advocacy of the needs and concerns of farmers and ranchers on state and national levels; and the distribution of information concerning agricultural issues to the governor, legislature, and the general public. The agriculture commissioner works collaboratively with the board of animal health to protect the health of domestic animals and nontraditional livestock of the state.

Agency Mission Statement

The department of agriculture fosters the long-term well-being of North Dakota by serving, advocating for, protecting, and promoting agriculture to benefit everyone. To carry out this mission, the department of agriculture supports agriculture by embracing diversity, innovation, research, and trade while adhering to the values of transparency, respect, integrity, and consistency. To fulfill these mandates, the department of agriculture:

- Serves as an advocate for farmers and ranchers and for the rural community.
- Provides services that ensure safe, high-quality, and marketable agricultural products.
- Develops and expands markets for agricultural commodities and value-added products.
- Reduces the risk of financial loss to agricultural producers and to buyers and sellers of agricultural commodities.
- Safeguards livestock and other domestic animals from communicable diseases.
- Ensures compliance with laws administered by the department through understandable regulations, information, education, and even-handed enforcement.
- Ensures human safety and a healthy environment through proper use of pesticides.
- Verifies the contents of fertilizers, soil conditioners, animal feeds, and veterinary medicines.

- Reduces agricultural losses from noxious weeds, predatory animals, insects, and diseases.
- Gathers and disseminates information concerning agriculture to the general public.
- Provides fair and timely mediation services to agricultural producers, creditors, and energy related issues.

Major Accomplishments

-
- 1 Issued 3,436 phytosanitary certificates in 2022 and 5,294 in 2023, assisting in the export of North Dakota commodities to countries worldwide.

 - 2 Collected 296,895 pounds of old and unwanted pesticides in 2023 through Project Safe Send. There were 186,108 pounds collected in 2022.

 - 3 Continued to promote North Dakota agricultural products in the global marketplace. North Dakota is ranked 11th in agriculture exports in the nation, with \$5.8 billion in tracked sales. North Dakota exports to 152 different countries.

 - 4 Continued to advocate for state agriculture. Agriculture comprises 25% of the state’s total economy, contributing more than 30 billion dollars in economic activity annually and generating some \$11.3 billion in cash receipts in 2022. North Dakota has roughly 24,800 farms and ranches. These farms and ranches comprise nearly 39 million acres or almost 90% of the state’s total land area. North Dakota is the leading producer of 12 different commodities as well as a close second to many more. More specifically, North Dakota farmers and ranchers lead the nation in the production important commodities such as spring and durum wheat, rye, oats, various types of dry edible beans, flaxseed, canola, honey, oil and non-oil sunflowers. North Dakota is also home to emerging crops like industrial hemp, hops, fava beans, borage and carinata. Additionally, North Dakota agriculture extends well beyond crops and livestock. Agritourism; agribusiness; food manufacturing and processing; agriculture equipment manufacturing and dealerships; ethanol production; innovative agriculture technology and cutting-edge farming practices; local food and farmers markets; IPA, wine, and cider production; and agricultural education all contribute to the state’s thriving agriculture industry and economy. Of North Dakota’s approximately 780,000 residents, only three percent are farmers and ranchers. Nonetheless, agriculture broadly supports one fourth of the state’s workforce, which is much higher than the national average of nineteen percent. North Dakota agriculture remains the leading industry in North Dakota.

 - 5 Conducted education and outreach to 75 produce producers on the Food Safety Modernization Act Produce Safety Rule. Certified 6 North Dakota vegetable producers on the Produce Safety Alliance Training Course.

 - 6 Conducted education and outreach to over 100 school employees and producers on the Farm to School Program. Six new producers signed up for the program since Fall 2023 as a result.

 - 7 Administered the Agriculture Diversification and Development Fund, awarding \$4,784,831 to 21 projects since July 2023.

 - 8 Administered the Bioscience Innovation Grant Program, awarding \$11,340,032 to 39 projects since July 2023.

 - 9 Implemented the Environmental Impact Mitigation Fund under the oversight of the Federal Environmental Law Impact Review Committee.

 - 10 Administered the Specialty Crop Block Grant Program, awarding \$6,705,243.11 to 42 projects since July 2023

 - 11 Assisted 20 county weed boards in updating old noxious weed mapping technology.

 - 12 Collected samples from 323 honeybee colonies for molecular analysis of many pests, viruses and diseases; many of which are not readily visible in the hives

 - 13 Collected a new biocontrol agent for leafy spurge (Oberea stem boring beetles) not yet widely established in North Dakota and distributed to sites across the state.

 - 14 Conducted focused inspections of Ash trees in Fargo for the invasive Emerald Ash Borer which was recently discovered in Moorhead, MN. To date no infestations have been found in North Dakota

 - 15 Conducted location inspections on 156 different beekeepers in 2023 ensuring compliance with state posting and registration requirements.

Major Accomplishments

16 Continue to monitor for many exotic pests across the state through growing season inspections, surveys and random sampling of host areas

Critical Issues

1 Agriculture is one of the most important components of North Dakota's economy and society. Future critical issues include: development of national and international agricultural policies, especially the ability of producers to contend with complex federal regulations; the growing demand for agriculture-based renewable energy, including ethanol, biodiesel, wind and biomass; environmental concerns and policies including the Endangered Species Act, Clean Water Act, Clean Air Act, climate change, livestock waste/nutrient management, worker protection, food safety, and on-farm petroleum product storage; tax code changes; developing new and better risk management tools to enable producers to effectively invest and to then protect their investments; increasing demand for marketing assistance through the Pride of Dakota program; increasing public concern about the use of agriculture chemicals that are critical to farmers and ranchers to control pests and diseases; growth and development of livestock infrastructure, increasing public concern regarding animal welfare standards: and, supply chain security, global market share, and commodity transportation.

Performance Measures

Administrative Services Division; The achievement measure is the successful oversight of developing and tracking the agency's budget, processing of payroll, paying of bills, developing and tracking contracts, and depositing of revenue. The Pipeline Program and Royalty Oversight Program, the performance measure of success is the number of cases ombudsmen assist in reaching reasonable resolutions and the number of landowners and tenants reached through educational outreach efforts. Performance measures for Wildlife Services includes the reduction of economic damage caused by wildlife, hazards at airports, and removal of beaver dams responsible for flooding of roads and cropland.

Business, Marketing and Information Division; Due to the diversity of the Business, Marketing & Information Division, the programs rely on various performance measures to manage success. Metrics for many programs are built into event, campaign and educational outreach results. The administration of grants provides another performance measure. Employees also receive feedback from the public through the programs they run, events and via online channels.

Livestock Industries Division; The dairy program measures its success through federal and state surveys taken at plants and farms and the high quality and demand of products produced in North Dakota. The meat and poultry program measures its success through the development and maintenance of 13 official establishments, seven CISP establishments, the continual improvement of custom exempt establishments, and the assurance from processors and producers that the program creates for them several benefits and opportunities.

Grain licensing Division; The feed program measures its success from increased number of product registrations and licensing and knowing there have been very few feed issues within the state. The grain program measures its success from the increased number of licensed buyers, increasing inspection frequency and reducing the number of insolvencies within the state. The livestock program measures success from the increasing number of livestock dealers and knowing there have been very few livestock issues within the state.

Animal Health Division; Performance is measured by preservation of North Dakota's disease-free status with regards to program diseases, the prevention of emerging/reemerging and foreign animal diseases, and the ability to effectively diagnose and respond to diseases diagnosed in North Dakota. The animal industry is comprised of over 1.9 million head of livestock with a valuation of well over \$1 billion; an industry that has annual sales exceeding \$1.1 billion dollars. The Animal Health division coordinates and communicates with practicing veterinarians in the state, as well as other state veterinarians and USDA-APHIS-Veterinary Services.

Plant Industries Division; For the noxious weed program, success is measured by the number of weed boards and landowners participating in the cost share programs and reduction in weed infestations. Apiary success is measured by the number of bee colonies registered and the number of inspections conducted at the

request of the beekeepers for migratory movement. It can also be measured by licenses, and health certificates issued. Nursery success is measured by the number of nurseries licensed and number of inspections conducted. Export Certification and plant protection success is measured by the number of certificates issued, number of surveys and the number of export inspections conducted.

Pesticide & Fertilizer Division; Project Safe Send Success is measured by pounds of old, unused pesticides collected, and the number of farmers and homeowners participating in the program. For Pesticide, Fertilizer and Anhydrous Ammonia success is measured by the rates of compliance and reduction of repeat violations to state and federal statutes and regulations related to use, storage, and security. Success is also measured by the number of formal complaints responded to and successfully resolved.

Program Statistical Data

Administrative Services Division; Fiscal Management tracks expenditures and files reports for over 45 grants. It also tracks 450 contracts during the biennium. Fiscal Management processes payroll for 80 FTEs and up to 30 temporary employees and oversees personnel responsibilities such as workforce safety training. The division's ombudsmen working in the pipeline program have assisted in 86 pipeline reclamation cases in 19 counties, while the royalty oversight program have assisted in 111 royalty cases across 9 counties. Wildlife Services provides active predator and beaver control to ensure that the states valuable livestock, wildlife, and the environment are being protected.

Business, Marketing, and Information Division; The division provides education, promotion and market enhancement programs to increase sales of North Dakota agricultural commodities and value-added agricultural products in international, domestic and local markets. The division also oversees the Pride of Dakota program and activity of over 500 members. Another notable program is the Ag in the Classroom program, which focuses on critical agriculture education to more than 6,000 school-aged children throughout the year. Business, Marketing & Information employees also provide support for the 14 state commodity councils, as well as all the other associations and boards that represent North Dakota's crop and livestock producers.

Livestock Industries Division; The Dairy program inspects 24 dairy farms three times per year. Haulers/samplers, mild trucks, wash station, transfer stations, and distributors are also inspected. The program inspects all plants four times per year. Approximately 500 raw and finished dairy products are sampled and tested yearly. The Meat and Poultry Inspection program inspects 13 official state slaughter/processing establishments and seven CISP establishments, on a daily or weekly basis, depending on volume. The program also inspects 77 custom exempt establishments three to four times a year for sanitary operations and structure of facility.

Grain Inspection Division; The grain program licenses 305 state warehouse, 121 roving grain buyers and 36 grain processors. All state warehouses and grain buyers are inspected annually. The livestock program licenses 109 livestock dealers, 195 livestock dealer agents, ten auction markets, and ten representatives for satellite/video auctions. The Feed program licenses 263 feed retailers and 493 companies as manufactures of feed. The program has over 4,037 feed labels and 15,520 pet food labels on file.

Animal Health Division; 57 disease investigations were completed. Of these, 54 involved avian diseases and 26 cases of Highly Pathogenic Avian Influenza were confirmed, involving over 200,000 birds, Issued, and maintained records of 334,600 official USDA metal tags, and 245,300 USDA radio-frequency identification (RFID) tags for animal disease traceability and program disease activities. 12,084 farmed cervids have been tested for Chronic Wasting Disease since the state program began. 330 Nontraditional Livestock, Farmed Elk, and permitted gamebird facilities have animal inventory audits conducted annually by Animal Health Division staff. 1,794 livestock medicines are registered representing 87 animal health companies.

Plant Industries Division; Export certificates were issued to facilitate movement of North Dakota agriculture commodities to other countries and states. Total number of certificates issued for 2022 and 2023 was 6,829 and 5,778 respectively. During 21-23, biennium the Landowner Assistance Program (LAP) distributed \$904,395.76, and the Targeted Assistance Program (TAG) distributed \$210,507.39. In 2022, 333 beekeepers were licensed with 809,321 colonies located on 20,387 apiary sites. In 2023, 356 beekeepers were licensed with 843,423 colonies located on 20,941 locations. Pre-inspected and certified 87,495 colonies for shipment into California in

2022 and 74,378 in 2023. In 2022, the hemp program had 33 growers and 24 processors, while in 2023, 16 processors and 22 growers. There were 243 nurseries licensed and 80 inspected in 2022, while in 2023 there were 239 nurseries licensed and 79 inspected. Over 800 acres of field-grown nursery stock was inspected each year.

Pesticide and Fertilizer Division; During 2022 and 2023, Project Safe Send collected roughly 483,003 pounds of waste pesticides and properly disposed of them. There were 232 Safe Send participants in 2022, and 322 participants in 2023. During the 21-23 biennium, the division licensed 976 fertilizer distributors, 274 anhydrous ammonia facilities, 7,827 fertilizer products registered and 16,925 pesticide registrations. From 2021-2023, there was 149 official storage facility inspections performed and 92 RMP inspections performed. From 2021-2023 there were 1,830 pesticide inspections performed.

Explanation of Program Costs

Administrative Services Division; The funds requested are the necessary funds to carry out the functions of the division. Information technology costs are a significant amount due to the fee structure for services provided by NDIT and daily contact with constituents, department staff, and others are the major means of providing the services for this division. Travel is a significant amount because the agriculture commissioner is active in outreach, education, and marketing. Office lease is a significant operating expense as the department leases office space for 11 FTEs to ease overcrowding issues in the Capitol Building.

Business, Marketing and Information Division; The funds requested are the minimum funds necessary to carry out the functions of the division. The division provides public information and outreach by researching, writing, and publishing department content on a variety of platforms, and responding to questions and requests from the public. The division is the marketing and communications resource for the entire department including strategic planning, creative execution, media placement, event planning, online engagement, and conducting promotional activities for the Pride of Dakota program and other program areas. Grants are a significant part of this division as the division oversees the Bioscience Innovation Grant, APUC, the Agricultural Diversification and Development Fund, the Agriculture Infrastructure Grant Program, the Specialty Crop Block Grant Program and several others. The SCBG Program alone accounts for over \$10 million dollars of federal grant line expenditures.

Livestock Industries Division; The funds requested are necessary to carry out the duties of the dairy, meat, and poultry inspections programs. Dairy costs remain neutral; however, as farm numbers go down, the department is faced with increased federal regulation. More consumer protection programs will increase our costs for finished product testing and drug residue screening. As farm numbers drop, per-farm inspection costs increase because of greater distance between farm inspections. The dairy program is responsible for the inspection and licensing of egg dealers.

Grain Inspection Division; The funds requested are the minimum funds necessary to carry out the functions of the division. Necessary functions include regulating and licensing grain warehouses, grain buyers, feed manufacturers, retailers, livestock dealers, auction markets, representatives of video livestock auction markets, and other activities pertaining to grain, livestock, or feed. Insolvency costs are reimbursed from trust fund assets after all revenues have been collected and payment has been accounted for. Grants are a significant part of this division as the livestock pollution prevention program receives federal EPA 319 grant funds and NRCS funds to cost share waste-water projects on livestock operations.

Animal Health Division; The funds requested are the minimum funds necessary to carry out the functions of this division. The funds are used for salaries for three veterinarian positions, three support staff positions, and one field investigator position, supplies, work related travel, USA-Herds database software, and other operating expenses necessary to carry out animal health regulations, the Board's policies, and orders as prescribed in statute. In addition to general funds, funding sources include monies from ND Game and Fish Department, and when available, USDA-APHIS cooperative agreements and other federal grants.

Plant Industries Division; The funds requested are necessary to carry out the duties of the hemp program, nursery inspection program, plant pest prevention, detection, and outreach, phytosanitary export certification program, apiary, and noxious weeds program. Major noxious weed budget items include funding for the

Landowner Assistance Program (LAP) and the Targeted Assistance Grant (TAG). T Program costs include salaries for adequate personnel to conduct inspections (hemp, nursery, apiary and export), conduct outreach and pest surveillance, associated travel, and motor pool costs.

Pesticide and Fertilizer Division; The funds requested are necessary to carry out the pesticide program, project safe send, fertilizer program, anhydrous ammonia, and risk management program. The pesticide, fertilizer, and anhydrous ammonia programs each have a registration and/or licensing component that occurs primarily in the office, and a complimentary field regulatory component that involves inspecting regulated entities and sampling products to ensure compliance with regulatory requirements. These efforts have dramatically increased levels of compliance, although they do require significant investments in salaries, travel, and IT.

Program Goals and Objectives

Administrative Services Division; Establish and maintain proper fiscal management controls. Assist the agriculture commissioner in carrying out legally mandated responsibilities. Provide fiscal management and research support services to the various divisions of the department, and to provide coordination and efficient delivery of various agency services. Address pipeline and wind energy reclamation and restoration problems in the early stages to have a higher degree of resolution. Administer the royalty oversight program that connects royalty owners and well operators with an independent ombudsman to help with royalty payment issues. In cooperation with USDA Wildlife Services, prevent predator damage, protect livestock, manage bird damage to crops, and mitigate beaver damage to roads, crops, and trees.

Business, Marketing and Information Division; Provide services to department divisions to include event planning, research, marketing, communications, public information, creative talent, design, marketing plans, and social media content creation. Develop activities which initiate and/or expand effective promotion of North Dakota agricultural commodities and value-added products in international, national, regional and local markets. Educate and inform the public on North Dakota agriculture products and production practices, and build connections between farmers, ranchers, and non-agriculture audiences. Administer and implement the Pride of Dakota program.

Livestock Industries Division goals and objectives; Ensure that all dairy, meat, and poultry products are safe from contamination. The Dairy program is responsible for the promotion, improvement, and growth of the dairy industry in North Dakota. It is responsible for the enforcement of state and federal rules and regulations pertaining to the production of milk and milk processors, distributors, and wholesalers. The Meat and Poultry Inspection program is responsible for ensuring that meat and poultry products produced in the state and sold to consumers comply with the required standards for safety, purity and wholesomeness set by the state and federal governments. All products produced in a state-inspected plant must meet or exceed standards set by USDA.

Grain licensing Division; Inspect and license all grain warehouses and grain buyers, eliminating losses to sellers of grain in North Dakota. License various livestock marketing agencies to eliminate losses to sellers of livestock in North Dakota. Provide effective education of stakeholders regarding the goals of the grain/livestock licensing program to create buy-in and cooperation. The feed program ensures the health and well-being of the ND livestock and companion animals by protecting the integrity of feed. It also protects the consumer by ensuring truth in labeling and ensuring that the industry is competing on a level playing field.

Animal Health Division: Protects the health of domestic animals and nontraditional livestock in the state by ensuring the humane treatment of animals and prevention of infectious and contagious diseases. While maintaining a comprehensive animal health database used for animal disease traceability and multiple programs and purposes. The division also licenses facilities that sell virulent products, approves all modified live vaccines that are sold in North Dakota, and registers Livestock medicines sold in the state.

Plant Industries Division goals and objectives; Protect agronomic crops, horticultural crops, and native and tame grasses used for livestock production from losses caused by exotic and invasive plant pests and noxious weeds. Participate in programs to prevent introduction of invasive pests (e.g. Emerald ash borer). Implement a hemp program. Assist in the development and implementation of effective, integrated, environmentally sound management practices for noxious weeds on all land within the State of North Dakota. Maintain a healthy beekeeping environment by inspecting colonies of migratory beekeepers and non-migratory beekeepers' bees

602 Agriculture

Agency 602

upon request. To continue to strive for compliance with statutes. Conduct inspections of nursery stock for pests, diseases, and consumer protection for nonhardy plants, correct labeling and viability concerns. Coordinate with USDA-APHIS-PPQ for export certification and invasive plant pest monitoring and detection.

Pesticide and Fertilizer Division; Ensure compliance of pesticide laws and administrative rules through education and regulation to better mitigate the risk of pesticides to human health and the environment. Distribute copies of the state pesticide laws and rules, informational brochures, and other references to the public, provide outreach to the regulated community through presentations at public meetings and news releases. Act as a liaison between EPA, North Dakota pesticide users, and other stakeholders on pesticide issues. License fertilizer distributors and anhydrous ammonia facilities. Regist

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

602 Agriculture

Agency 602

Request explanation and justification (include any statutory authority)*: The Department of Agriculture is requesting additional funding to cover inflationary increases affecting NDDOT-assigned vehicles. The department anticipates the cost of vehicles will double, along with increased rates for office supplies, printing, capitol building rent, and risk management.

Continued funding is crucial to maintain the current level of staff and services provided to the state of North Dakota. Without this funding, there could be significant impacts on programs and overall service to the state of North Dakota.

Necessary resources for implementation (including FTE's)*: Additional funding for operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding for operating expenses

Who is served and impact of not funding*: The department employees and the citizens of the state of North Dakota. Continued funding is crucial to maintain the current level of staff and services provided to the state of North Dakota. Without this funding, there could be significant impacts on programs and overall service to the state of North Dakota.

Plant Protection FTE (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	107,344	-	107,344	0.50	114,059	-	114,059	0.50
Special	107,344	-	107,344	0.50	114,059	-	114,059	0.50
Total	214,688	-	214,688	1.00	228,118	-	228,118	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The Department of Agriculture is requesting the addition of one field employee to assist in many plant industries programs to alleviate some of the growth and workload that has greatly increased over the past 10 years. The demand for phytosanitary certificates (required for many overseas shipments of plants and plant products such as grain), apiary inspections and hemp retail inspections have increased. Many of these inspections and duties are required by various statutory authority:

a. Apiary certificates of inspection NDCC 4.1-16-14, 4.1-16-13 and inspections for compliance with other aspects of the beekeeping law (NDCC 4.1-16). Apiary numbers have increased from 482,660 colonies in 2013 to 843,423 in 2023. The increased number of colonies in the state combined with the challenges beekeepers face in maintaining healthy colonies has resulted in the need for more apiary inspections for both compliance with state law and for purposes of determining the health of bee colonies and health related bee deaths.

602 Agriculture

Agency 602

b. Phytosanitary inspections and other export and plant protection duties: NDCC 4.1-23-12 for export certification and 4.1-23 for other plant protection duties. In 2013 we issued 2,957 phytosanitary certificates for the export of North Dakota commodities to countries around the world, in 2023 we issued 5,294 certificates.

c. The 68th Legislative Assembly added regulations for Hemp Retail locations in NDCC 4.1-18.1. This addition did not come with additional resources to carry out the chapter and those duties were added to existing employees and workloads. The added sections of law put restrictions and regulations on retailers selling hemp products in state, all the inspections were new and in facilities not already licensed and inspected under the hemp chapter.

Necessary resources for implementation (including FTE's)*: New FTE; Additional funding for salary and operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE; Additional funding for salary and operating expenses.

Who is served and impact of not funding*: Beekeepers, grain producers and the public are served by these areas. Additional staff to aid with beekeeping will result in more inspections for beekeepers struggling to keep hives healthy and for landowners who are struggling with non-compliant beekeepers. Up until 2024 in North Dakota phytosanitary certificates could be obtained from either NDDA or from the local USDA-PPQ office in Bismarck. Due to budget cuts the USDA-PPQ office will no longer be supporting staff to issue phytosanitary certificates, leaving NDDA as the only source of certificates in state. NDDA had already been the preferred location due to fast turnaround times and reasonable fees. Without this additional FTE issuing times will continue to slow down and where we were once able to ensure all complete applications were issued the same day, that will decrease and could cause other implications or complications with shipping overseas. The new requirements for hemp retail inspections are to ensure a safe product for residents of our state, without adequate staff for inspections illegal products could be sold and purchased unknowingly by residents of the state.

Environmental FTE (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	221,278	-	221,278	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	221,278	-	221,278	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Agriculture is requesting the addition of a new employee to assist with the development and implementation of the wind/transmission mitigation program. Under this mitigation program, wind energy companies may elect to contribute into the Mitigation Fund for environmental impact offsets. The new staff will manage the program and have a strong technical background in natural resources management, agriculture, finance, and property easement agreements.

602 Agriculture

Agency 602

This new staff member must possess the capacity to work constructively with a variety of stakeholders, including landowners, agriculture producers, ranchers, consultants, wind energy companies, other state agencies, NGOs, and the public. The new staff member will also be required to conduct informative site surveys to assess and determine eligibility of mitigation project proposals and to ensure compliance with conservation working lands lease agreements. These mid-term “25-30 years” agreements will provide opportunities for landowners to adopt certain practices, aiming for net-zero or beneficial conservation impacts. Further, the new staff member must have the ability to make sound practical tactical decisions as well as to provide well-thought-out recommendations to NDDA decision makers about complex land agreements.

The new staff member will also be required to conduct informative site surveys to assess and determine eligibility of mitigation project proposals and to ensure compliance with conservation working lands lease agreements. Consequently, within the NDDA mitigation program, the new staff member must continually emphasize that conservation and environmental enhancement of working lands are strongly preferred over land practices that involve simplistic preservation with corresponding nonuse.

Additional duties of this new staff member will include involvement in coordinating meetings of the Federal Environmental Law Impact Review Committee (FELIRC) under NDCC 4.1-01-18; and managing the Environmental Impact Mitigation Fund under NDCC 4.1-01-21.1.

Necessary resources for implementation (including FTE's)*: New FTE; additional funding for salary and operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE; additional funding for salary and operating expenses.

Who is served and impact of not funding*: The department employees and the citizens of the state of North Dakota.

North Dakota Trade Office (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	400,000	-	400,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	400,000	-	400,000	0.00	-	-	-	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Agriculture requests an additional \$500,000 for the North Dakota Trade Office (NDTO) in regards to their trade missions for the state of North Dakota. Domestic travel and fees continue to be a limiting factor in operations, due in part to the high costs of travel and limited budget which includes; airline, hotels, registrations, mileage, etc. Reverse trade missions and hosting requests for international visitors and diplomat programs have expended as an increasing duty. Engagement with global partners to assist in raising awareness, identifying potential customers/partners, arranging meetings, etc..

602 Agriculture

Agency 602

NDTO is currently negotiating with partners to establish an overseas office for the state. Research has led to an optimal office space in Asia.

The additional funding request would bring the total for the North Dakota Trade Office to \$2.1 million.

Necessary resources for implementation (including FTE's)*: The department has a contract with the North Dakota Trade Office.

Are resources being redirected or are they new or additional (including FTE's)*: Additional Funding Request, no additional resources would be required to implement.

Who is served and impact of not funding*: Producers of North Dakota doing domestic or international trade. Not funding would limit new opportunities for North Dakota companies to

promote their value added products.

Livestock Planning Grant Program (Priority: 2)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	376	602-3000	60260	-	-	660,000	-	660,000	-	660,000
Total				-	-	660,000	-	660,000	-	660,000

State Initiative:* Economic Development/Diversification

Explanation / Justification: The Department of Agriculture is requesting continuing appropriations for the Livestock Planning grant program to continue to work with and assist counties and regional planning councils in livestock development planning. Uses include site analysis, coordinating strategic planning, and accommodating and encouraging investment in livestock production.

Four regional councils have been successful and we would like to allow additional time and funds for other counties and townships to participate in the livestock development for their particular area within the state.

4.1-01-25. Regional livestock development and planning program

Noxious Weed Program (Priority: 5)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	376	602-9100	60260	-	366,900	-	366,900	-	366,900	-
Total				-	366,900	-	366,900	-	366,900	-

State Initiative:* Health, Vibrant Communities

Explanation / Justification: The Department of Agriculture is requesting funds for county weed boards to assist landowners in purchasing chemical through the Landowner Assistance Program and through Targeted Access Grants for purchases the counties may need such as chemical for county ditches or upgrading

602 Agriculture

Agency 602

equipment. Chemical costs alone in the last five years have increased anywhere from 8.5% to 57.5%. The requested increase would help offset some of these costs and allow counties to cost-share to a greater number of landowners.

Bioscience Innovation Grant Program (Priority: 6)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	602-6001	60265	-	-	12,000,000	-	12,000,000	-	5,500,000
Total				-	-	12,000,000	-	12,000,000	-	5,500,000

State Initiative:* Economic Development/Diversification

Explanation / Justification: The Department of Agriculture is requesting an appropriation for the purpose of the Bioscience Innovation Grant Program (BIG) to foster the growth of the bioscience industry in the state of North Dakota.

The request is to assist Bioscience companies to start or expand in ND. Eastern ND has become known nationwide as a leader in the bioscience industry. Companies that have started or relocated to the state have shown tremendous growth. The Department continues to have high interest in the program and feels the funding is critical to capturing the emerging opportunities and diversify our economy. Currently the BIG committee has awarded funding to 39 projects.

4.1-01-20.1. Bioscience innovation grant program.

Ag Diversification and Development and Ag Infrastructure (Priority: 7)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total				-	-	25,000,000	-	25,000,000	-	-

State Initiative:* Economic Development/Diversification

Explanation / Justification: The Department of Agriculture is requesting funding for the Ag Diversification and Development and Ag Infrastructure (ADD) programs. ADD was created to assist large scale value added agricultural projects and livestock development. The fund is divided into three areas, grants, loans and interest buy-downs and infrastructure development. The funds are used to support new and expanding value-added businesses such as food production or processing facilities, feed or pet food processing facilities, commodity processing facilities, animal agriculture production facilities and feed lot production facilities. The fund has been critical in assisting several value added business start and/or expand in the state. The infrastructure funding is an important part of the funding as it assists local sub's with the cost of building or upgrading critical infrastructure. Currently this Biennium ADD has awarded 22 grants to ND Companies.

4.1-01.1-07. Agriculture diversification and development fund

4.1-01-27. Agriculture infrastructure grant program

Agricultural Products Utilization Commission (Priority: 8)

Total				-	-	3,000,000	-	3,000,000	3,000,000	-

State Initiative:* Economic Development/Diversification

Explanation / Justification: The Department of Agriculture’s request is for the Agricultural Products Utilization Commission (APUC) to continue to carry out it’s mission. APUC is a grant fund whose mission is to diversify the state of North Dakota’s economy by providing funding to companies that add value to ND Agricultural products and services. The Commission accomplishes this through by administering funds for agricultural research, equipment, development, processing, business plans, development costs, technology and marketing. APUC is an important program for the agriculture industry and the potential new and expanding value added companies in the State. As of June 30, 2024 APUC has awarded 22 projects.

04.1-01.1 Agricultural products utilization commission (APUC)

Statutory Authority

North Dakota Century Code Chapter 54-53

Agency Description

The Upper Great Plains Transportation Institute(UGPTI) was created by the North Dakota legislature in 1967 as part of North Dakota State University to foster a better understanding of the role of transportation in the economy and state. UGPTI provides timely information to state and local governments regarding the condition of transportation infrastructure in the state and expected road and bridge investment needs. Moreover, UGPTI provides transportation expertise that helps North Dakota businesses compete nationally and globally.

Agency Mission Statement

Providing innovative transportation research, education and outreach that promote the safe and efficient movement of people and good.

UGPTI conducting applied and advanced research in highway, transit, rail, air and waterway transportation that addresses the critical issues of the state, region and nation.

Educating the transportation workforce of tomorrow through multidisciplinary curricula that focus on transportation economics, management, infrastructure planning, mobility and logistics.

Improving the skills and knowledge of the existing workforce through training, technical assistance and the transfer of research results to practitioners.

Major Accomplishments

-
- 1 Completed 55 research projects under the University Transportation Centers grant from USDOT on preserving the existing transportation system, transportation safety, and advanced transportation technologies.

 - 2 Completed 13 research projects under the Tier 1 University Transportation Centers grant from USDOT related to small urban, regional and transit mobility needs.

 - 3 Conducted 662 training and professional development events for roadway managers, city planners and transit operators in North Dakota and the nation.

 - 4 Disseminated research results and transferred applied knowledge to 11,689 transportation practitioners in North Dakota and the nation during the previous biennium.

 - 5 Provided state agencies, agricultural industries and investment groups with important insights into grain marketing patterns and trends, including the publication of 9 UGPTI reports.

 - 6 Provided essential services to North Dakota’s Metropolitan Planning Organizations to help them predict future traffic levels, update their transportation planning procedures, and deploy intelligent transportation systems.

 - 7 Provided counties throughout the state with technical support including: on-site training and technical assistance, online roadway inventory tools, and online road and bridge planning assistance.

 - 8 Provided oil and gas producing counties with technical assistance regarding roadway challenges stemming from oil traffic and movements of drilling-related inputs and equipment.

Major Accomplishments

-
- 9 Provided tribal leaders and planners with insights into roadway management, safety, and transportation planning issues, solutions, and methods.
-

Critical Issues

-
- 1 Federal Programs: The passage of the Bipartisan Infrastructure Law(BIL) in the Infrastructure Investment and Jobs Act(IJJA) reauthorized the surface transportation program for five more years. The University Transportation Centers (UTC) program was reauthorized in the BIL and other discretionary research programs were established, creating potential opportunities for UGPTI, as well as uncertainties. It is important that the appropriations for the BIL program are at least equal to authorized amounts.
-
- 2 Federal Match Requirements: Many federal programs require 100% match, which increases the amount of state and non-federal funds needed to compete for grants. The UTC program(a key source of funding for UGPTI) requires a substantial "institutional commitment" from the university and state. It is critical that UGPTI have enough non-federal source dollars to match federal grant opportunities.
-
- 3 Rising Travel and Procurement Costs: Inflation and supply chain issues have impacted the cost of many electronic and office goods. Increases in travel costs(particularly airline fares and vehicle operating costs) pose budget challenges and may limit some professional development opportunities for staff in the future.
-
- 4 Employee Recruitment and Retention: Finding qualified applicants with the appropriate technical backgrounds and skills is a major challenge. The small regional labor pool is resulting in few qualified applicants for open positions. In addition, UGPTI is frequently at a competitive disadvantage with respect to other universities in the United States, where the pay scales are often higher, and have been increasing in the response to the tight labor market. Many of the qualified applicants for research positions are foreign nationals. Immigration policies often make it difficult to recruit and retain foreign nationals.
-

Performance Measures

The agency has not established a formal performance measure and results oriented reporting system at this time because over 85% of the budget is contract in nature. As a result of this, the terms of the contracts become the performance measures for UGPTI.

Program Statistical Data

1. Contracts/Grants Revenue
2. Research Reports/Staff Papers/Journal Articles published
3. Presentations/Seminars presented
4. Courses/Workshops/Seminars taught
5. Number of Student Research Assistants

Explanation of Program Costs

The primary costs of this program are for faculty and staff necessary to develop and operate a program of excellence that is among the top university transportation programs in the United States. A large contract research program requires travel for selling the Institute's capabilities, identifying and securing contracts, and serving

the clients once the contracts have been successfully procured. State-of-the-art computers, office, communications, and traffic monitoring equipment is also crucial to remaining competitive and continuing to improve performance.

Program Goals and Objectives

The Upper Great Plains Transportation Institute's primary goals are to (1) provide government and private industry with essential knowledge about transportation infrastructure, operations, safety and logistics; and (2) prepare existing and potential workers to manage complex transportation systems. These overarching goals give rise to several strategic objectives, including:

1. Contribute to informed decisions at the state and national level through cutting-edge interdisciplinary transportation research.
2. Improve the knowledge and skills of transportation workers through training, technical assistance, and the transfer of research results to practitioners.

An abbreviated list of operational objectives follows (drawn from the strategic objectives).

1. Support urban planning by offering expertise in: a) traffic analysis software (e.g., traffic signal timing and simulations), b) metropolitan travel demand modeling, and c) the automation of traffic data collection.
2. Improve mobility by providing transit stakeholders, users, providers, suppliers, and agencies with the information and human resources needed to deliver cost-effective services in rural areas and small urban centers.
3. Enhance the competitiveness of North Dakota producers and businesses through freight transportation, supply chain, and logistics research.
4. Improve transportation infrastructure management through statewide models of economic production, truck traffic generation, and road and bridge deterioration and through the development of asset management systems for county roads and bridges.
5. Support Vision Zero through an improved understanding of safety risks and mitigation strategies for rural areas and tribal communities and through motor carrier safety research.
6. Enable the transfer of technology and information to local and tribal units of government through technical assistance, training and workforce development.
7. Facilitate the deployment of Intelligent Transportation Systems that use sensors, automated controls, and integrated communication systems to inform travelers and improve highway safety and efficiency.
8. Inform infrastructure investment decisions by providing the state with estimates of investment needs in county/local roads and bridges on a biennial basis.
9. Provide decision makers with critical knowledge about emergent technologies and their impacts on transportation operations, programs, and services.

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: If this request is funded, a Multimodal Autonomous Surface Transportation(MAST) Freight Center would be established at the Upper Great Plains Transportation Institute. The center would focus on applied research and technology transfer rather than basic research. It is not UGPTI’s goal to develop competing autonomous driving systems or autonomous vehicles that might be in competition with the proprietary systems being developed in the private sector, most of which are in the advanced stages of development. Rather, UGPTI’s roles would be to: (1) propose new directions for ADS development to address challenges posed by rural and northern operations; (2) work with private-sector autonomous vehicle developers to better understand the markets, types of freight operations, and conditions most conducive to autonomous trucking operations (such as hub-to-hub, last- and first-mile, and short-haul intra-industry movements); (3) identify adjustments in government policies and regulations needed for autonomous trucks to operate effectively while complying with the safety oversight responsibilities of government; (4) analyze and evaluate highway infrastructure enhancements and investments that will

627 Upper Great Plains Transportation Institute

Agency 627

support automated driving and allow autonomous trucks to penetrate edge markets such as rural communities; and (5) contribute to a collaborative strategic planning process that involves all stakeholders and increases the transparency of developments in the autonomous trucking industry.

Necessary resources for implementation (including FTE's)*: This request involves two types of funding requests: (1) \$1,400,000 of one-time startup funding, and (2) \$575,000 of base funding to sustain the effort. The startup funding is necessary to effectively launch the autonomous freight center with several timely deliveries during the 2025-2027 biennium and includes funds to temporarily hire national experts in autonomous vehicles—people and organizations that can forge deep connections within the autonomous vehicle and automotive industries, assist the director in strategic planning, and position the new center for federal grants. In addition, the base funding will allow for the hiring a full-time expert at UGPTI (by filling a vacant position), the hiring and mentoring of postdocs and students, and funding for research faculty. Moreover, the base funding is essential for leveraging federal grants, many of which require a 50% to 100% match in non-federal funds.

Are resources being redirected or are they new or additional (including FTE's)*: Overall UGPTI will not increase the FTE count since the FTE positions can be accommodated by filling and redefining current vacant positions.

Who is served and impact of not funding*: Autonomous trucking is vital to the future safety and economic competitiveness of North Dakota and will affect future workforce needs in the State. The MAST Center will serve the Governor; the Legislature; the North Dakota Departments of Transportation, Commerce, and Agriculture; the North Dakota motor carrier industries; the agricultural sector (including grain and sugar beet enterprises); and the oil and gas industries. It will serve students and future workers of the State who are focused on careers in highly automated sectors, including autonomous trucking. It will directly support the Governor's Mainstreet initiative "To create a skilled workforce; smart, efficient infrastructure; and healthy, vibrant communities."

If this request is not funded Autonomous trucking will develop at a slower pace with less overall coordination and fewer opportunities for public input and information sharing. Economic growth opportunities will be lost and North Dakota will be less competitive economically with states in the south and coastal regions where autonomous trucking is flourishing.

Artificial Intelligence in Surface Transportation (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	375,000	-	375,000	0.00	375,000	-	375,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	375,000	-	375,000	0.00	375,000	-	375,000	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The 68th Legislative Assembly provided \$432,000 of one-time funding for room renovation, equipment, and sensors to establish a Transportation Data and Intelligence Center, focused on advanced data analytics and artificial intelligence. The main goals of the Transportation Data and Intelligence Center are to: (1) conduct leading edge research in intelligent transportation solutions that benefit transportation planning

627 Upper Great Plains Transportation Institute

Agency 627

and infrastructure/asset management; (2) develop new planning and forecasting models of freight and passenger transportation in a connected/automated vehicle environment; (3) provide advanced data analysis capabilities for the North Dakota DOT, MPOs, cities, Tribal nations, and other clients in the state and region; and (4) train and mentor future transportation specialists in machine learning, artificial intelligence, and agency operations in a highly automated environment. The focus of this effort would be restricted to transportation-related research and workforce development and the development of prototypes which could potentially be implemented by state and local agencies or commercialized by private industry with further development and integration.

Necessary resources for implementation (including FTE's)*: This request (for \$375,000 in base funding) will cover some senior researcher time and the hiring and mentoring of 1 to 2 postdocs and 3 to 4 students. Moreover, the base funding will be used to leverage federal grants, many of which require a 50% to 100% match in non-federal funds.

Are resources being redirected or are they new or additional (including FTE's)*: This will request will cover some time of our existing senior researchers and allow the hiring of 1 to 2 Postdocs and 3 to 4 graduate students. No new FTE positions are being requested.

Who is served and impact of not funding*: Artificial intelligence (AI) has the potential to alleviate many workforce shortages, improve worker safety, boost the consistency and reliability of data, and foster cost-effectiveness in transportation operations and asset management. This requested program will serve the North Dakota Departments of Transportation and Commerce and Metropolitan Planning Organizations. Moreover, it will serve students and future workers focused on careers in highly automated sectors. It will directly support the Governor's Mainstreet initiative "To create a skilled workforce; smart, efficient infrastructure; and healthy, vibrant communities."

If this request is not funded productivity and job satisfaction in the transportation sector will not improve as rapidly as would otherwise be the case with strategic AI deployments. The preservation and performance of transportation infrastructure will not benefit from the leading-edge AI applications that could be generated from the new program.

CO2 Transportation Network Study (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	408,100	408,100	0.00	-	408,100	408,100	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	408,100	408,100	0.00	-	408,100	408,100	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As stated in N.D.C.C. 38-22-1, "it is in the public interest [of North Dakota] to promote the geologic storage of carbon dioxide. Doing so will benefit the state and the global environment by reducing greenhouse gas emissions." Governor Burgum's vision is for North Dakota to lead the nation in carbon capture, utilization, and storage (CCUS) and achieve carbon neutrality by 2030. CO2 has many industrial uses—including

enhanced oil recovery—that could spur economic growth and productivity in the state. However, this CO2 vision requires that captured carbon dioxide be transported from producing locations to utilization and sequestration sites. Although some regional CO2 pipelines are in place (mostly in Texas and surrounding states), the transportation network needed to support these movements does not exist on a national scale and must be built to accommodate greatly increased future demands.

Federal

Funding

Opportunities

The Department of Energy (DOE) has introduced several programs to encourage the expansion and interconnection of a CO2 transportation network, including the Front-End Engineering and Design (FEED) and Transportation Infrastructure Finance and Innovation (CIFIA) Future Growth Grants programs. The CIFIA program is intended to “support shared infrastructure projects, including pipelines, rail transport, ships and barges, and ground shipping, that connect anthropogenic sources of carbon dioxide with endpoints for its storage or utilization.” These programs are intended to “finance projects that build shared transport infrastructure to move CO2 from points of capture to utilization facilities and storage wells” and “help form a domestic interconnected carbon management ecosystem.” However, a piecemeal approach to constructing CO2 transportation infrastructure requires “close coordination and alignment in the development of each element of the CCUS value chain” to realize the nation’s goals.

Necessary resources for implementation (including FTE’s)*: This one-time funding would allow for the use of existing researchers time and the hiring of Postdoc, Graduate Students, and Undergraduate Students to work on a strategic study of multimodal CO2 transportation options and infrastructure needs to support North Dakota’s goals and position the state to develop proposals for federal funding.

Are resources being redirected or are they new or additional (including FTE’s)*: No new FTE positions are being requested with this package.

Who is served and impact of not funding*: CO2 has many industrial uses—including enhanced oil recovery—that could spur economic growth and productivity. Having a CO2 transportation network plan in place could provide competitive advantages in seeking Department of Energy infrastructure funds and be instrumental in matching federal research grants. The study could benefit the oil/gas, ethanol and biofuels industries and new or emergent industries focused on carbon sequestration.

To realize the North Dakota’s economic vision, captured carbon dioxide must be transported from producing locations to utilization and sequestration sites. Without this study and network model, the CO2 transportation infrastructure may develop more slowly and in piecemeal fashion, rather than in a coordinated and integrated manner. Major federal funding opportunities may be missed.

Statutory Authority

North Dakota Century Code Chapter 15-12.1

Agency Description

The North Dakota State University (NDSU) Research Extension Centers (RECs) are dedicated to enhancing agricultural productivity and sustainability across various regions of North Dakota. Each center focuses on the unique needs and opportunities of its area, contributing to the state's agricultural development through research, education, and community engagement. Together, these centers play a vital role in advancing North Dakota's agricultural sector, leveraging research and innovation to meet the evolving needs of producers and communities across the state.

The Dickinson Research Extension Center (DREC) serves a 13-county region in southwest North Dakota, focusing on agronomy, beef management, and sustainable agricultural practices. With over 6,500 acres of land, DREC supports economic development while ensuring the sustainability of natural resources for future generations.

The Central Grasslands Research Extension Center (CGREC) concentrates on managing grasslands in central North Dakota, aiming to improve soil health, support beef production, and enhance the resilience of grasslands to varying weather conditions. The center's research promotes economic value while preserving the region's natural resources.

The Hettinger Research Extension Center (HREC) in southwest North Dakota focuses on agronomy and animal research, particularly in sheep and livestock feeding. Situated in a semi-arid region, HREC collaborates with various organizations to improve the productivity of livestock, grazing, and cropping systems, contributing to the region's economic development.

The Langdon Research Extension Center (LREC) supports a nine-county region in northeast North Dakota, where it addresses the unique challenges of crop production in a climate characterized by high precipitation and cooler temperatures. LREC's research focuses on disease management and providing growers with strategies to maximize returns on their crops.

The North Central Research Extension Center (NCREC), located near Minot, focuses on increasing agricultural productivity in the north central region of North Dakota. NCREC's research includes crop variety evaluation, pest management, and soil fertility, all aimed at supporting local agriculture and enhancing crop production.

The Williston Research Extension Center (WREC) in northwest North Dakota conducts research on crop variety evaluation, soil and water conservation, and irrigation development. WREC's work supports crop diversification and profitability, helping local farmers adapt to changing conditions and improve their livelihoods.

The Carrington Research Extension Center (CREC) in central North Dakota focuses on enhancing agricultural productivity and diversity through research in agronomy, plant pathology, soil science, and precision agriculture. CREC's work supports both dryland and irrigated farming systems, contributing to the sustainability and competitiveness of agriculture in the region.

Agency Mission Statement

North Dakota Agricultural Experiment Station researchers at the Research Extension Centers throughout the state develop and share premier research solutions and technology to enhance the quality of life, sustain food, feed, fiber and fuel production, and protect our heritage - the great land and resources of North Dakota.

Major Accomplishments

- 1 CREC improved fungicide application strategies for dry beans and soybeans, resulting in more effective disease control.
- 2 CREC evaluated hybrid rye in cattle feed, which demonstrated better feed efficiency and no adverse effects compared to corn, benefiting livestock producers.
- 3 CREC developed and released a new buckwheat variety, advancing the agronomy research program and providing farmers with better crop options.
- 4 CREC developed a new tool to streamline state-wide crop variety testing, enhancing consistency, accuracy, and launching a user-friendly website for better access to trial data across North Dakota.
- 5 DREC conducted research on lime rates across over 30 sites, leading to the development of lime recommendations now being shared with farmers.
- 6 DREC scouted over 12,000 acres in Southwest North Dakota in 2024 for pests and diseases in various crops, providing timely management advice that boosts crop health and supports agricultural exports.
- 7 DREC's range research revealed that grasslands managed by a twice-over grazing system can annually sequester 2.5 tons of carbon per acre, improving soil health and carbon storage.
- 8 DREC research showed that retaining ownership of calves through wintering, grazing, and delayed feedlot entry enhances animal growth, supports environmental sustainability, and maximizes profitability using a vertically integrated business model.
- 9 HREC collaborated on trials that led to the release of "ND Nighthawk," a hard white spring wheat variety tailored for the growing conditions of western North Dakota.
- 10 HREC conducted trials that supported expanding herbicide labels for better weed control in spring wheat, buckwheat, soybean, and canola.
- 11 HREC's Western North Dakota Native Plant Project developed local plant varieties for future grassland restoration, pollinator plantings, and energy reclamation across the western Dakotas and Eastern Montana, including contributions to the Theodore Roosevelt Public Library's green roof.
- 12 LREC identified canola clubroot hotspots across North Dakota and is actively working with growers to prevent the disease's spread, protecting future crops.
- 13 LREC's foundation seedstocks program sold out most varieties of NDSU HRSW and soybeans, reflecting the strong demand from local seedsmen and growers for the most genetically pure seed.
- 14 LREC's ongoing research in canola production solidified the region's status as "Canola Capital USA," with North Dakota canola acreage surpassing two million acres for the first time in 2024, largely within the region served by LREC.
- 15 WREC collaborated with the Department of Plant Sciences to bring the ND Crown chickpea to market, offering North Dakota growers a variety with improved yields and moderate resistance to Ascochyta blight.
- 16 WREC's research under both irrigated and rainfed conditions helped growers in the Northern Great Plains explore diverse crops, such as black gram and guar, providing alternatives after the closure of a major sugar beet buyer in the region.
- 17 WREC conducted vital research on soil stabilization and agricultural productivity in areas impacted by oil and gas pipeline installations, supporting the coexistence of agriculture and energy production in the region.
- 18 NCREC produced Foundation-grade seed for seven commonly grown North Dakota crops, providing growers with top-quality seed that maximizes production. These NDSU-improved cultivars offer competitive yields, pest resistance, and desirable quality traits.
- 19 NCREC evaluated and screened weed samples from across North Dakota for herbicide resistance, identifying potential resistance in wild oat, green foxtail, and kochia. This information aids farmers in making informed herbicide management decisions.
- 20 NCREC conducted soil fertility trials, providing farmers and ranchers with unbiased, scientific information to improve soil management and enhance operational efficiency.

Major Accomplishments

-
- 21 NCREC utilized its grape vineyard to increase and distribute two new grape lines, marking the first NDSU grape releases that are well-suited to North Dakota's climate.
-

Critical Issues

-
- 1 Research Continuity and Expansion: Ongoing research in soil health, agronomy, livestock production, and range management needs continued support, with an emphasis on maintaining and expanding these programs.

 - 2 Deferred Maintenance and Facility Upgrades: Many facilities are outdated, unsafe, or in need of repairs, impacting both safety and the ability to conduct research. Specific needs include facility upgrades, equipment replacement, and completion of unfinished projects.

 - 3 Funding and Operational Support: There is a need for increased base funding to support research and extension activities. Rising operational and labor costs, along with inflation, are straining budgets, making it difficult to maintain current programs and staff.

 - 4 Land Ownership and Security: The need for secure land ownership is critical, particularly for research programs relying on rented land. The potential sale of land currently used for livestock and wildlife research adds uncertainty to future operations.

 - 5 Programmatic and Staffing Requirements: There is a demand for additional technical support and research specialists to handle the growing needs of various research programs, as well as increased salary packages to retain and attract qualified staff.

 - 6 External Funding and Grants: With appropriated funds declining, there is a greater dependence on grant opportunities and private funding to support research initiatives and maintain the quality and scope of the centers' work.

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 19, 2024. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

See Agency Description

Explanation of Program Costs

The total budget request for this agency is \$42,702,492. Of this total, 50.1% is general fund and the remaining 49.9% is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 55.7% of the total budget. Operating expenses represent 32% and equipment > \$5,000 represents 12.3%. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies.

Program Goals and Objectives

See Agency Description/Future Critical Issues.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Enhanced operating budgets are essential for sustaining growth and achieving ongoing success. The operational costs associated with the NDAES research mission have escalated. Expenses for fuel, equipment maintenance, repairs, feed, fertilizer and more limits the ability of scientists to be responsive to critical research needs. Additionally, operating funds are crucial for fostering the early career development of scientists, enabling them to acquire necessary start-up equipment and supplies, and to support graduate student salaries. Sufficient start-up and operating funds are vital for establishing successful research programs.

Necessary resources for implementation (including FTE's)*: \$560,000 operating for 7 branch stations

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota Agriculture

Statutory Authority

North Dakota Century Code Chapter 11-38.

Agency Description

North Dakota State University (NDSU) Extension is part of a nationwide, university-based educational system that provides research-based educational programs to advance the lives and livelihoods of citizens in all 53 counties and four American Indian reservations in North Dakota. Programs focus on addressing current needs and issues affecting the state’s agriculture, youth, families, communities and natural resources. In an effort to provide extensive reach and share knowledge and resources across North Dakota, NDSU Extension staff are located at state, area and local/county offices. NDSU Extension combines funding from federal, state, county and grant sources to specifically address local concerns and make a positive impact on our land and our people.

Agency Mission Statement

Empower North Dakotans to improve their lives and communities through science-based education

NDSU Extension believes:

In lifelong learning through transformational education

That all people belong and deserve respect

In stakeholder input to guide program development

In science-based, locally relevant information

In the value of partners and collaboration

Major Accomplishments

-
- 1 NDSU Extension had 312,589 individual contacts through 7,425 educational sessions and over 15,261 recorded educational hours in 2023.

 - 2 More than 5,260 Extension volunteers contributed 43,766 hours, providing a value of \$1,391,759 to North Dakota using the Independent Sector Value of a volunteer hour (\$31.80).

 - 3 Agricultural Support and Sustainability- The NDSU Extension Pesticide program trained and certified 5,300 farmers, ranchers and commercial applicators in 2023, ensuring safe pesticide use for sustainable food production. Potato farmers using the ND Agricultural Weather Network (NDAWN) potato app reduced production costs by over \$5.6 million by making timely and judicious use of fungicides, guided by the provided app information. About 30% of farmers seeking Extension’s help with soil sampling are now applying soil amendments and planting salt-tolerant grasses, eliminating revenue loss and remediating salinity and sodicity.
-

Major Accomplishments

- 4 Disaster Response and Livestock Health- The NDSU Extension Disaster Response Team played a crucial role in responding to animal disease outbreaks in North Dakota, reaching thousands through media interviews. Water sample screening efforts since 2019 have identified and mitigated toxicity levels in 412 sources, potentially saving the lives of 64,000 head of livestock and enhancing the health and performance of an additional 40,000 head. Over 100 operations in the Beef Quality Assurance program implemented written herd health and management protocols.

- 5 Community Reach and Engagement- Volunteering, including 7 hours per month reported average by ND 4-H volunteers, contributes to stronger and better-connected communities. One in 13 North Dakotans needs to take on a government or non-profit leadership role in the state, underscoring the crucial need for effective leadership development initiatives. In response, NDSU Extension trained over 350 individuals in its leadership programs during 2023.

- 6 4-H and Youth Impact- 4-H experienced a 9.7% increase in enrolled club members (2022-2023), totaling 6,909 North Dakota members. NDSU Extension had 41,217 youth educational contacts in 2023, a 40.3% increase from the previous year, reaching one in five youth in North Dakota. The 4-H Leadership Awareness Weekend (LAW) had a significant impact, with 68% of youth indicating increased interest in the Legislative system and 75% now aware of and knowing how to contact their legislators.

- 7 Community Well-being and Support- NDSU Extension has been a vital support during difficult times, focusing on stress management and wellness in agriculture since 2020. Educational efforts have reached 4,556 North Dakotans, with over 600 community members trained in suicide prevention and more than 1,200 hours of counseling support provided to farmers and ranchers through partner organizations. The North Dakota Aging in Community (AIC) project engages over 2,800 older adults, with 77% feeling more confident living at home due to the community-based approach.

- 8 STEM Education and Workforce Development- STEM day camps reached over 150 youth in diverse communities, including Spirit Lake Nation, Standing Rock Sioux Tribe, Cass County Somali After-School program and Grand Forks Air Force Base. The 4-H STEM Challenge kit, Explorers of the Deep, reached over 1,000 youth in 30 counties.

- 9 Horticulture and Health- Over 3,000 youth participated in Junior Master Gardener activities in 2023, completing 55 garden projects that produced and donated more than 10,000 pounds of fresh vegetables. Educational efforts on increased local food access have led to 10 SNAP-authorized farmers markets in North Dakota that have successfully expanded their customer base and positively impacted community health by accepting SNAP payments for fresh produce, fostering a more inclusive and accessible local food environment.

- 10 Social Media- NDSU Extension reached 6,776,856 through social media channels in 2023 with 514,335 engaging further for information.

Critical Issues

- 1 Biofuels and Carbon Initiative Given the growing demand in multiple markets for agricultural products with low carbon intensity (CI), particularly in ethanol and biodiesel production, it's important for farmers in the region to adapt to meet these market preferences. This shift necessitates a comprehensive understanding of climate-smart practices and the intricacies of carbon contracts. These contracts often entail long-term commitments from farmers and ranchers to implement practices that enhance carbon sequestration in soils, thereby mitigating greenhouse gas emissions. However, navigating the complexities of carbon capture practices and associated contracts can be daunting for producers. Education plays a pivotal role in empowering farmers to navigate the complex landscape of carbon management effectively. A carbon specialist would serve as a vital conduit between farmers, ranchers and various stakeholders, including government agencies and carbon offset markets. By staying informed about the latest developments in carbon management policies, market trends, and technological advancements, the specialist will provide farmers with up-to-date information and valuable insights. Through workshops, training sessions, and personalized consultations, they will educate farmers on the intricacies of carbon contracts, sustainable practices, and the potential benefits of participating in carbon markets. This educational support equips farmers with the knowledge and resources needed to make informed decisions, maximize their participation in carbon offset programs, and ultimately contribute to climate change mitigation efforts while enhancing the sustainability and profitability of their operations.

Critical Issues

-
- 2 Extension and State Soil Conservation Committee Operating Support Request for increased operating funds is crucial for the continued success of NDSU Extension's mission. These funds are essential in empowering extension specialists and agents to adapt and innovate, ensuring they can effectively address emerging needs and devise novel strategies to engage with local communities. However, the cost of operating has risen, including equipment and assistantships, placing strain on our ability to fulfill our mission effectively. One area where increased operating support is particularly impactful is in the advancement of North Dakota's future through 4-H youth development and leadership programs. These programs nurture the next generation of leaders by providing them with positive experiences, fostering club involvement, enriching school environments, and equipping youth with essential workforce readiness skills. In addition, allocating operating support to the State Soil Conservation Committee provides an increase in direct assistance funding to be distributed to local Soil Conservation Districts for technical assistance and conservation planning support.

 - 3 Livestock: Precision Management and Animal Health Initiative The landscape of animal agriculture is experiencing a transformative evolution, driven by the integration of data related to a myriad of production variables. This integration serves a multifaceted purpose, overseeing crucial aspects such as health, nutrition, reproduction, and overall well-being of the animals. Through the utilization of cutting-edge technology, livestock management is undergoing significant enhancement, leading to improved efficiency across livestock enterprises. This shift toward digitization marks a pivotal moment in the industry, promising better outcomes for animals and farmers alike. NDSU plays a pivotal role in shaping the future of animal agriculture. With an understanding of the interconnectedness between animal health, technology and economic prosperity, NDSU Extension serves as a technical resource and focuses on safeguarding livestock health in the state. Central to this mission is the elevation of monitoring and surveillance of zoonotic diseases, which pose a threat to both animal and human populations. By actively engaging in this endeavor, NDSU Extension significantly contributes to the overall well-being of the community and the continued prosperity of the livestock industry.

 - 4 As NDSU's agribiome research progresses toward solutions that can positively impact North Dakota crop and livestock operations, the involvement of an Extension specialist becomes pivotal in translating scientific advancements into practical applications. Extension education plays a crucial role in assisting producers in navigating the rapidly expanding and increasingly intricate microbial biologicals market. Presently, there are over 1,200 companies producing various biostimulants, inoculants, biofertilizers, biopesticides, probiotics and other biologicals aimed at enhancing crop and livestock production. Extension education is vital to provide the necessary guidance to empower producers with the knowledge needed to make informed decisions in this complex landscape.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 19, 2024. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

See Agency Description.

Explanation of Program Costs

The total budget request for this reporting level is \$65,293,977. Of this total 54% is general fund, 14% is federal funds and the remaining 32% is special funds. Salaries and wages represent 87% of the total base budget, and operating expenses represent 13%. Major operating expenses include travel, utilities, operating fees and service, professional services, office supplies, printing, and professional supplies. Soil Conservation grants total 2.3% of the budget request.

Program Goals and Objectives

The NDSU Extension Service, through its research-based educational programs, strives to:

630 NDSU Extension Service

Agency 630

1. Enhance the profitability of North Dakota's crop and livestock producers by focusing on production, marketing and risk management issues.
2. Conserve and enhance the natural resources of our state.
3. Develop life skills within North Dakota's youth through 4-H youth development programs that focus on decision-making, communication skills, career development and healthy lifestyles.
4. Strengthen individual and family skills relating to parenting, financial management, workforce preparation and communication.
5. Maintain a healthy food system at the production, distribution and consumer levels while promoting healthy lifestyles for all age groups.
6. Provide leadership for communities and community leaders to identify strengths, enhance local expertise and increase the rural economic base while creating an environment that fosters entrepreneurship.
7. Guide communities through processes that relate to public issues.
8. Serve as educational leaders in the adoption and utilization of technology for economic, community and individual benefit.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Given the growing demand in multiple markets for agricultural products with low carbon intensity (CI), particularly in ethanol and biodiesel production, it's important for farmers in the region to adapt to meet these market preferences. This shift necessitates a comprehensive understanding of climate-smart practices and the intricacies of carbon

630 NDSU Extension Service

Agency 630

contracts. These contracts often entail long-term commitments from farmers and ranchers to implement practices that enhance carbon sequestration in soils, thereby mitigating greenhouse gas emissions. However, navigating the complexities of carbon capture practices and associated contracts can be daunting for producers.

Education plays a pivotal role in empowering farmers to navigate the complex landscape of carbon management effectively. A carbon specialist would serve as a vital conduit between farmers, ranchers and various stakeholders, including government agencies and carbon offset markets. By staying informed about the latest developments in carbon management policies, market trends, and technological advancements, the specialist will provide farmers with up-to-date information and valuable insights. Through workshops, training sessions, and personalized consultations, they will educate farmers on the intricacies of carbon contracts, sustainable practices, and the potential benefits of participating in carbon markets. This educational support equips farmers with the knowledge and resources needed to make informed decisions, maximize their participation in carbon offset programs, and ultimately contribute to climate change mitigation efforts while enhancing the sustainability and profitability of their operations.

Necessary resources for implementation (including FTE's)*: Extension Carbon Specialist 1.0FTE – \$275,000. Will provide education on climate-smart practices related to carbon contracts farmers and ranchers have the opportunity to implement.

Operating support for the specialist. - 50,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota counties

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request for increased operating funds is crucial for the continued success of NDSU Extension’s mission. These funds are essential in empowering extension specialists and agents to adapt and innovate, ensuring they can effectively address emerging needs and devise novel strategies to engage with local communities. However, the cost of operating has risen, including equipment and assistantships, placing strain on our ability to fulfill our mission effectively.

One area where increased operating support is particularly impactful is in the advancement of North Dakota’s future through 4-H youth development and leadership programs. These programs nurture the next generation of leaders by providing them with positive experiences, fostering club involvement, enriching school environments, and equipping youth with essential workforce readiness skills.

In addition, allocating operating support to the State Soil Conservation Committee provides an increase in direct assistance funding to be distributed to local Soil Conservation Districts for technical assistance and conservation planning support.

Necessary resources for implementation (including FTE's)*: Extension operating support – \$600,000

630 NDSU Extension Service

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The landscape of animal agriculture is experiencing a transformative evolution, driven by the integration of data related to a myriad of production variables. This integration serves a multifaceted purpose, overseeing crucial aspects such as health, nutrition, reproduction, and overall well-being of the animals. Through the utilization of cutting-edge technology, livestock management is undergoing significant enhancement, leading to improved efficiency across livestock enterprises. This shift toward digitization marks a pivotal moment in the industry, promising better outcomes for animals and farmers alike.

NDSU plays a pivotal role in shaping the future of animal agriculture. With an understanding of the interconnectedness between animal health, technology and economic prosperity, NDSU Extension serves as a technical resource and focuses on safeguarding livestock health in the state. Central to this mission is the elevation of monitoring and surveillance of zoonotic diseases, which pose a threat to both animal and human populations. By actively engaging in this endeavor, NDSU Extension significantly contributes to the overall well-being of the community and the continued prosperity of the livestock industry.

Necessary resources for implementation (including FTE's)*: Extension Precision Agriculture Specialist 1FTE - \$275,000. Will provide education around key technological advancements in livestock technologies such as sensors, transponders, livestock collars and artificial intelligence.

Extension Veterinary Epidemiologist 1FTE - \$440,000. Efforts will focus on safeguarding the health of North Dakotans and their livestock by elevating the monitoring and surveillance of zoonotic diseases shared between animals and humans.

Operating support for two specialists - \$100,000

Are resources being redirected or are they new or additional (including FTE's)*: New

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As NDSU's agribiome research progresses toward solutions that can positively impact North Dakota crop and livestock operations, the involvement of an Extension specialist becomes pivotal in translating scientific advancements into practical applications. Extension education plays a crucial role in assisting producers in navigating the rapidly expanding and increasingly intricate microbial biologicals market. Presently, there are over 1,200 companies producing

various biostimulants, inoculants, biofertilizers, biopesticides, probiotics and other biologicals aimed at enhancing crop and livestock production. Extension education is vital to provide the necessary guidance to empower producers with the knowledge needed to make informed decisions in this complex landscape.

Necessary resources for implementation (including FTE's)*: Extension Agribiome Specialist 1 FTE– \$275,000. Will assist producers in navigating the rapidly expanding and increasingly intricate microbial biologicals market.

Operating support for the Extension agribiome specialist. - \$50,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota counties

Statutory Authority

North Dakota Century Code Chapter 4.1-15

Agency Description

The Northern Crops Institute (NCI) is a collaborative effort between North Dakota, Minnesota, Montana, and South Dakota to promote, develop, and market crops grown in the four-state region, and value-added agriculture, both internationally and domestically. NCI is an international meeting and learning center that brings together customers, commodity traders, technical experts, agricultural producers, and food and industrial processors for education, discussion, and technical services. NCI provides technical and marketing assistance through specialized training programs and technical services that facilitate domestic and international market development and expand the sale of northern grown crops. Representatives from more than 155 countries have visited NCI since its inception in 1979.

Agency Mission Statement

NCI's mission is to support regional agriculture and value added processing by conducting educational and technical programs that expand and maintain domestic and international markets for northern grown crops.

Major Accomplishments

- 1 NCI successfully completed a physical relocation to the newly opened Peltier Complex.
- 2 NCI has delivered a 20% increase in technical service projects in the last biennium. This has helped to grow markets for crops grown in North Dakota and the surrounding states, but also assisted in growing value-added agriculture in the region.
- 3 Collaborated with US Grains Council on a study designed to show the performance value of U.S. corn compared to crops from other countries.
- 4 NCI has successfully navigated a significant budget shortfall through strong financial management and staffing changes, leading to a positive FY24 and a projection for significant growth in FY25. This is coupled with improved financial accounting practices and transparency.
- 5 NCI has implemented several new programs designed to increase opportunities for farmers growing specialty crops and small businesses utilizing those goods in North Dakota and within the U.S.
- 6 Continued work with the Northern Crops Council to carry out our strategy, and increase our impact, by conducting new and innovative courses, programs, and other educational activities, as laid out in century code with the goal of building capacity to maximize our potential.
- 7 Strengthened relationships and maintained service with our state and national commodity partners while navigating budget and staffing changes.
- 8 Improvements to the NCI Feed Production Center have positioned NCI well to provide training and consultation to North Dakota livestock and feed producers as the livestock industry begins to expand in the state.
- 9 Completed a second Impact Analysis survey to quantify and economic benefit of NCI programing and services. The 2023 survey reported a 56% increase in US commodity purchases and a 24% increase in investment in the region after participating in NCI programming and tech services, respectively.

Critical Issues

- 1 NCI has become increasingly dependent on earned income and sponsorships to sustain current services and consider growth. The volatility of markets, grants, and commodity group partner income make that earned income uncertain. NCI needs to focus on sustainable income sources and growth to continue expanding its impact on the economy of North Dakota and the region.

Critical Issues

-
- 2 Growth in crops being utilized for biofuels, new crops, and increased demands for information on sustainability, traceability, and artificial intelligence is creating a need for NCI to develop further areas of expertise. More staffing may be needed to manage growing needs in these areas.

 - 3 The NCI will have additional operating expenses for energy, maintenance, and consumable supplies in the new building and laboratories. The NCI cannot rely on grant funds to cover these costs. To meet its' mission NCI needs a sustainable source of operating funds to cover these increased costs.

 - 4 In the first quarter of 2024, NCI entered a leadership transition, a budget transition, and a facility transition. NCI needs time to focus on stabilization, continuing to provide service at a high level, and planning for financial sustainability, while sharpening its vision and creating a new 5-year strategy.
-

Performance Measures

NCI provides status reports to the Northern Crops Council (per North Dakota Century Code Chapter 4.1-15). The last meeting was held on July 23 2024. NCI conducts an Impact Analysis survey every 2 years to quantify the impact of our technical services and programming, increase in commodity purchases, and investment in the region. The next survey has begun for the fall of 2024.

Program Statistical Data

See Agency Major Accomplishments.

Explanation of Program Costs

The total budget request for this agency is \$6,982,488. Of this total, 48.4% is general fund and 51.6% is made up of gifts, grants and contracts. Salaries and wages represent 66.7% of the total budget. Operating expenses represent 28.3%. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies. Capital and equipment requests represent 5.0%.

Program Goals and Objectives

See Agency Description.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Northern Crops Institute is requesting \$788,400 per biennium for additional operating expenses. A majority of these funds will be used to off-set an increase in energy and operating costs in the Peltier Complex, from electricity, maintenance, consumables, and sanitation in the new food safe development labs. Increases in the cost of part-time and student labor has also been a significant challenge post-COVID, and we prefer to keep our workforce flexible as we grow into our new facility. Additional funds will be used to expand the awareness of NCI and our food and livestock feed development services and educational programing to local entrepreneurs and numerous commodity stakeholders.

Necessary resources for implementation (including FTE's)*: \$788,400 per biennium for additional operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota Agriculture

State Initiative:* Other

Justification: Protein Extraction/Air Classification System (\$350,000): The NCI is requesting funds to purchase a pilot-scale mill and air classification system to separate protein, starch and fiber. The special milling capability produces finer particle sizes than traditional or available milling at NDSU or the NCI. Separate fractions can then be used for further research and development within NDSU and the NCI. Interest is rapidly growing in using plant proteins in a variety of foods and beverages. Sales of plant-based food rose by 27% in the United States in 2020, with the current market value reaching \$7 billion. Also reported was a compound annual growth rate of 37% from 2016 to 2020 for plant-based food and beverage launches globally. Euromonitor, a global market research organization, reported the segment is valued at \$20.7 billion, and expected to reach \$23.2 billion by 2024. A significant share of recent NCI client work has involved protein fortification and food development, yet we either outsource the protein or starch isolation, or buy these ingredients from the marketplace. Having this capability allows NCI to confidentially work with clients, expand our services, and promote the protein found in the cereal grains, oilseeds, and pulse crops grown in our region. This equipment also allows NDSU researchers access to larger quantities and "industrial-quality" starch and fiber for other grants and research projects. This equipment would be a key piece to the Peltier Complex protein lab and have a short return on investment for ND agriculture.

Statutory Authority

ND Constitution Article XIX; North Dakota Century Code Chapter 15-12.1.

Agency Description

Situated on the campus of North Dakota State University of Agriculture and Applied Science, the Main Research Station serves as the administrative hub for the North Dakota Agricultural Experiment Station (NDAES). It conducts and coordinates all research activities, focusing on developing and disseminating technology crucial for producing and utilizing food, feed, fiber, and fuel from crop and livestock enterprises. This research contributes to economic development, enhances the quality of life, ensures sustainable production, and protects the environment. The Main Research Station meticulously documents all activities and publishes valuable information for the state's residents. Our research is an important component of agriculture's \$30.8 billion contribution to the State's economy.

Agency Mission Statement

Our mission is to provide premier research solutions that empower our people and communities to thrive in a dynamic world. The NDAES is dedicated to transforming agriculture by embracing digital advancements, pioneering technological innovations, and prioritizing the conservation of our most precious natural resource, the land. Our goal is to become a global leader in research related to the production of food, fuel, and fiber.

Major Accomplishments

- 1 Soybean Meal Marketing Strategy: An analytical model, developed to guide long-term marketing strategies for North Dakota soybean meal, identified market opportunities in western Canada, the Philippines, Vietnam, and other regions. These findings are now helping the North Dakota Soybean Council focus their market development efforts.
- 2 Cutting Herbicide Use with Drones: Demonstrated a new method of site-specific weed management using drone imagery, which reduced herbicide use by 50%. This success is leading to larger-scale trials with other crops in North Dakota.
- 3 Virtual Fencing for Smarter Grazing. Demonstrated that virtual fencing is promising for managing grazing patterns, improving calf performance, and increasing forage efficiency in North Dakota's integrated crop-livestock systems, making this precision technology more cost-effective.
- 4 Microbes Enhancing Crop Production: Microbiologists developed critical diagnostic tools, tested breakthrough inoculants, and found innovative microbial solutions to boost crop yields and combat challenges like root rot and drought, enhancing the health and productivity of key crops such as soybeans, pulse crops, and barley.
- 5 Proactive Disease Monitoring: Plant pathologists lead programs that monitor diseases affecting North Dakota crops, from well-known threats like rust in wheat to emerging dangers like Sudden Death Syndrome in soybeans. By identifying these threats early, researchers help farmers make informed decisions, preventing potentially millions of dollars in losses.
- 6 New Crop Varieties: NDSU breeders released new pulse crop, winter wheat, and oat varieties, helping to boost income, increase market share, enhance farm sustainability, and reduce costs.
- 7 Fertilizer Savings. Incorporating alfalfa in rotations for corn growers or using cover crops in wheat rotations can save on fertilizer. By increasing adoption of these practices by just 10%, ND farmers could reduce fertilizer costs by \$3.77 million and boost grazing revenue by \$1.24 million each year.
- 8 Wild Oat Control: New research on herbicide application timing has improved wild oat control in wheat fields, potentially adding \$160 million in revenue for North Dakota wheat growers.

Major Accomplishments

-
- 9 Restoring and Protecting Our Land: Developing strategies to minimize the impact of energy extraction on soil health and plant growth. This work also improves grassland quality, benefiting both livestock and wildlife habitats.
 - 10 Detecting Dangerous Toxins: Veterinary toxicologists and chemists have developed tests to detect harmful substances like ergot, blister beetle toxin, and bromethalin in animal tissues and feed, helping to ensure livestock safety.
 - 11 Protecting Animal and Public Health: Our veterinary laboratorians performed crucial testing for serious diseases like rabies, anthrax, and avian flu, helping to safeguard both animals and humans in North Dakota.
-

Critical Issues

-
- 1 Center for Agricultural Policy and Trade Studies (CAPTS): Research into the effects of national and international policies and trade on North Dakota's agriculture is needed. Export markets for agricultural products have become increasingly more complex, resulting in increasing levels of risk for farmers and agribusinesses in the state. North Dakota's economy, heavily dependent on agriculture and trade, faces vulnerabilities due to tensions in international relations and trade dynamics, impacting food security and global trade patterns. The prosperity of North Dakota's agricultural sector is intricately linked to the success of its farmers, ranchers and agribusinesses. Unique challenges confront the state, including the fact that its location requires rail transport to export markets. Research is crucial to comprehend the repercussions of changes in agricultural policies and global market trends on North Dakota's agricultural community. There is a need for operating and three FTEs including an agricultural policy analyst, market and trade analyst, and economic impact/contributions specialist.
 - 2 Digital Transformation of Agriculture: Digital agriculture, precision farming and ranching, and related technologies are advancing rapidly, driven by breakthroughs in artificial intelligence (AI) and machine learning (ML). NDAES scientists are leveraging these technologies to transform food production. Investing in new technologies, staff and infrastructure will equip scientists with the necessary resources to accelerate research in sensor technology, plant breeding, precision livestock farming and other digital initiatives. This effort is key to enhancing global food security through innovations in North Dakota agriculture. Such funding is crucial for improving infrastructure and capabilities in agricultural data analysis and precision agriculture. There is a need for six FTEs including a AI/ML engineer database architect, data manager, data scientist, GIS specialist, and an unmanned aircraft systems (UAS) chief pilot. Operating is needed for software subscriptions for cloud server access, network servers, high-speed computers for AI computations, data archiving, storage architecture specialized for AI and ML, and software licenses.
 - 3 Livestock Animal Health: North Dakota faces a significant risk of having no veterinary toxicologist available. To address this critical need, a position is requested to fund a toxicology resident. A toxicologist plays a vital role in supporting the state's livestock industry by developing assays for the detection of mycotoxins, ergot, blister beetle toxin, bromethalin in feed and other challenges that affect the industry. Operating and a veterinary toxicology resident are needed to support critical needs in the Veterinary Diagnostic Laboratory.
 - 4 Operating, Equipment and Graduate Research Assistantships: Enhanced operating budgets are essential for sustaining growth and achieving ongoing success. The operational costs associated with the NDAES research mission have escalated. Expenses for fuel, equipment maintenance, repairs, feed, fertilizer and more limits the ability of scientists to be responsive to critical research needs. Additionally, operating funds are crucial for fostering the early career development of scientists, enabling them to acquire necessary start-up equipment and supplies, and to support graduate student salaries. Sufficient start-up and operating funds are vital for establishing successful research programs. Modern research equipment is essential for conducting accurate experiments and advancing new methods to improve North Dakota's livestock and cropping systems. Funding is requested to ensure laboratories and agricultural field operations are equipped with modern equipment needed to generate world-class results. Graduate research assistants play an indispensable role in the successful completion of every NDAES agricultural research project. They are deeply involved in conducting experiments, analyzing data and applying research findings to solve real-world agricultural problems. Graduate students also share their advancements to the wider community by the dissemination of research through publications and presentations. Additionally, their research prepares them as the next generation of leaders, equipped with the knowledge and skills needed to address challenges facing North Dakota agriculture. This initiative requests an increase in the number of assistantships to support the research activities by attracting talent to NDSU.
-

Critical Issues

- 5 Biofuels and Carbon Management: As a consequence of national and international agricultural customer base, North Dakota farmers can achieve economic gains through the adoption of carbon and climate-smart farming strategies. This is key to reduce carbon intensity scores to more effectively participate in markets for renewable fuels. There is a significant need for research to develop advanced farming techniques tailored to North Dakota's unique agricultural conditions. This research will focus on practices such as crop rotation, cover cropping and efficient nutrient management aimed to both reduce carbon intensity and enhance the production of biofuel feedstocks. This supports efforts in improving sustainability and profitability in farmers' operations. There is a need for operating and two FTEs, a scientist and research specialist.
 - 6 Research Specialists: Technical support staff are critical in assisting agricultural scientists to achieve their research goals. They provide essential expertise in the operation and maintenance of sophisticated laboratory and field equipment that ensures experiments are conducted efficiently and accurately. Staff contribute to the collection and analysis of data, which is fundamental for validating research findings and advancing scientific knowledge in agriculture. By providing logistical and administrative support, they enable scientists to focus on their core research activities, thereby accelerating the progress and impact of agricultural research. There is a need for five FTEs in areas including grapes/vineyards, agronomy, plant pathology, soybean breeding and biosystems engineering.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 19, 2024. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

See Agency Description.

Explanation of Program Costs

The total budget request for this agency is \$132,412,982. Of this total, 56% is general fund and the remaining 44% is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 75% of the total budget. Operating expenses represent 17%, capital projects 4% and equipment > \$5,000 represents 4%. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies.

Program Goals and Objectives

See Agency Description.

640 NDSU Main Research Center

Agency 640

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: There exists a significant need for research into the effects of policies and trade on North Dakota’s agriculture. Agricultural markets become increasingly unpredictable, making it imperative for farmers to understand these complexities. North Dakota’s economy, heavily dependent on agriculture and trade, faces vulnerabilities due to fluctuations in international relations and trade dynamics, impacting food security and global trade patterns. The prosperity of North Dakota’s agricultural sector is intricately linked to the success of its farmers, ranchers, and agribusinesses. Unique challenges confront the state, including port-related issues, heightened production risks, and its geographical position away from coastlines. Research in this domain is crucial to comprehend the repercussions of changes in agricultural policies and global market trends on North Dakota’s agricultural community.

Necessary resources for implementation (including FTE’s)*: 3 FTE: 1 agriculture policy analyst; 1 market and trade analyst; 1 economic impact/contributions specialist

\$150,000 operating expenses associated with the three scientist positions of the CAPTS

Are resources being redirected or are they new or additional (including FTE’s)*: New

Who is served and impact of not funding*: North Dakota agriculture

Digital Transformation of Agriculture (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	2,634,000	-	2,634,000	6.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Digital agriculture, precision farming, and related technologies are advancing rapidly, driven by breakthroughs in Artificial Intelligence (AI) and Machine Learning (ML). Researchers at NDAES are leveraging these technologies to transform food production. Investing in new technologies, staff, and infrastructure will enable us to equip our scientists with the necessary resources to accelerate research in sensor technology, plant breeding, precision livestock farming, and other digital initiatives. This effort is key to enhancing global food security through innovations in North Dakota agriculture. Such funding is crucial for improving infrastructure and capabilities in agricultural data analysis and precision agriculture.

640 NDSU Main Research Center

Agency 640

Necessary resources for implementation (including FTE's)*: \$1,730,000 salary + fringe per biennium. Positions include in prioritized order: 1. AI/ML Engineer (\$280,000), 2. Database Architect (\$430,000), 3. Data Manager (\$280,000), 4. Data Scientist (\$280,000), 5. GIS Specialist (\$230,000), and 6. UAS Chief Pilot (\$230,000).

\$904,000 biennium request. Software subscriptions for cloud server access, network servers, high speed computers for AI computations, data archiving, and storage architecture specialized for AI and ML, and data systems.

- Azure Cloud Services \$18,000/biennium
- Servers \$36,000/biennium
- AI Compute \$200,000/biennium
- Mass Storage \$100,000/biennium
- High Performance Storage \$300,000/biennium
- VAST Data System \$100,000/biennium
- Software licenses \$150,000/biennium

Are resources being redirected or are they new or additional (including FTE's)*: New

Is this a Large IT project? No

Is this request for a new program or service? No

640 NDSU Main Research Center

Agency 640

Request explanation and justification (include any statutory authority)*: North Dakota faces a significant risk of having no veterinary toxicologist available. To address this critical need, a position is requested to fund a toxicology resident. A toxicologist plays a vital role in supporting the state's livestock industry by developing assays for the detection of mycotoxins, ergot, blister beetle toxin, bromethalin in feed and other challenges that affect the industry.

Necessary resources for implementation (including FTE's)*: Veterinary toxicology resident 1FTE, to support critical needs in the Veterinary Diagnostic Laboratory. \$50,000 in operating.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota Agriculture

Operating, Equipment, & Graduate Research Assistantships (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Enhanced operating budgets are essential for sustaining growth and achieving ongoing success. The operational costs associated with the NDAES research mission have escalated, including expenses for fuel, equipment maintenance, feed, fertilizer, and more. This escalation is constricting the range of research projects that can be undertaken. Additionally, adequate funding is crucial for fostering the early career development of scientists. It enables them to acquire necessary equipment and supplies, cover travel expenses, and support graduate student assistantships, all of which are vital for establishing successful research programs.

Research equipment is crucial for conducting accurate experiments and advancing new methods to improve North Dakota's livestock and cropping systems. It ensures research findings are reliable and applicable to real-world farming. Equipment is especially important for early career scientists, helping them establish their research projects and contribute fresh insights into agricultural sciences.

Graduate research assistants play an indispensable role in the successful completion of every agricultural research project at the NDAES. They are deeply involved in conducting experiments, analyzing data, and applying research findings to solve real-world agricultural problems. Graduate students also share their advancements to the wider community by the dissemination of research through publications and presentations. Additionally, their research prepares them as the next generation of leaders in agriculture, equipped with the knowledge and skills needed to address challenges facing North Dakota Agriculture. This initiative requests an increase in the number of research assistantships to support the research activities by attracting talent to NDSU.

640 NDSU Main Research Center

Agency 640

Necessary resources for implementation (including FTE's)*: Operating \$630,000 main station units

Equipment \$1,000,000

Graduate research assistantships \$900,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota Agriculture

Biofuels & Carbon Management (Priority: 05)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Farmers can achieve economic gains through the adoption of carbon and climate-smart farming strategies, which are key to reducing carbon intensity scores. There is a significant need for research to develop advanced farming techniques tailored to the unique agricultural conditions of North Dakota, focusing on practices such as crop rotation, cover cropping, and efficient nutrient management. These strategies are aimed at both reducing carbon intensity and enhancing the production of biofuel feedstocks, thereby supporting farmers in improving sustainability and profitability in their operations.

Necessary resources for implementation (including FTE's)*: Scientist \$275,000 1.0 FTE

Research specialist \$200,000 1.0 FTE

\$50,000 operating funds to support research activities around climate smart agricultural practices, carbon management, and biofuels.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota Agriculture

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Technical support staff play a crucial role in assisting agricultural scientists to achieve their research goals by providing essential expertise in the operation and maintenance of sophisticated laboratory and field equipment, ensuring that experiments are conducted efficiently and accurately. They contribute to the collection and analysis of data, which is fundamental for validating research findings and advancing scientific knowledge in agriculture. By offering logistical and administrative support, they also enable scientists to focus more on their core research activities, thereby accelerating the progress and impact of agricultural research.

Necessary resources for implementation (including FTE's)*: \$1,000,000 salary + fringe per biennium. Positions include technical support in needed areas: (i) grapes/vineyards (\$200,000), (ii) agronomy (\$200,000), (iii) plant pathology (\$200,000), (iv) soybean breeding (\$200,000), and (v) biosystems engineering (\$200,000).

Are resources being redirected or are they new or additional (including FTE's)*: New

End Date (MM/DD/YYYY): 06/30/2027

Description: Purchasing and/or leasing expensive field equipment is an investment that the NDAES needs to protect. Storing expensive research plot equipment such as tractors, planters and combines outdoors reduces the life of the equipment and can compromise the sophisticated electronics typically used on such equipment. Sheds are needed at the Dickinson REC, Central Grasslands REC and Carrington REC.

State Initiative:* Other

Explanation / Justification: Deferred maintenance funding continues to be an important issue. Updates and repairs to facilities that enhance worker safety and productivity are needed across the AES. Various and ongoing issues exist at Main Station and all RECs, primarily with respect to facility updates and repairs.

State Initiative:* Other

Justification: Modern research equipment is essential for conducting accurate experiments and advancing new methods to improve North Dakota’s livestock and cropping systems. Funding is requested to ensure laboratories and agricultural field operations are equipped with modern equipment needed to generate world-class results.

Statutory Authority

North Dakota Century Code Chapter 15-12.1.

Agency Description

The Agronomy Seed Farm (ASF) is a 590 acre farm located near Casselton, which has been a part of the North Dakota Agriculture Experiment Station (NDAES) since it was gifted to the state in 1950. It was the result of a fund drive conducted by the North Dakota Crop Improvement Association, which solicited farmers, seed companies and many others throughout the state to help establish a farm whose main purpose is to increase seed of new varieties as they are developed by the plant breeding and supporting departments of the NDAES. The ASF also propagates seed of older but still desirable varieties for the seedsmen of the area.

Agency Mission Statement

To produce an adequate supply of foundation-grade seed for the seedsmen of the state and area at a reasonable price and to support the varietal development research of the NDAES.

Major Accomplishments

-
- 1 Produced 35,000 to 50,000 bushels of seed for availability to the seed industry annually.
 - 2 Conditioned 35,000 to 50,000 bushels of seed for availability to the seed industry annually.
-

Critical Issues

-
- 1 The critical issues facing the ASF are a continued demand for foundation-grade seed, favorable weather for growing seed and a good supply of varieties that are in demand by the seed industry. If these three conditions are present and good commodity prices accompany them, the future of the ASF is secure.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 19, 2024. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

Nearly 100 seed customers purchase an average of 31,000 bushels of seed of approximately 25 to 30 varieties annually.

Explanation of Program Costs

The base budget request for this agency is \$1,641,034. Of this total, 100% of funding is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 40% of the total budget. Operating expenses represent another 40%, and the remaining 20% is for equipment. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies.

Program Goals and Objectives

The Agronomy Seed Farm is a self-supporting facility designed to increase breeder and foundation grade seed of new varieties. The agency also maintains supplies of pure seed of older varieties and increases experimental lines with potential release as new varieties. The facility is unique in the state and region in that it combines the practical and efficient production of high quality seed stocks with the maintenance of research lands used extensively by the NDSU Main Station researchers for basic and applied research projects.

Statutory Authority

North Dakota Century Code Chapter 4.1-45-01 to 4.1-45-24.

Agency Description

The North Dakota State Fair Association produces the State Fair for North Dakota. This nine day event includes the production of horse, cattle, goats, sheep and swine shows, 4H State Championship competitions, FFA State Championship competitions, several junior stock shows, and open class competitions for hundreds of categories. The annual budget for the State Fair and All Seasons Arena complex is over \$10 million.

State Fair provides the facilities, administration, staffing judges, equipment, prizes and recognition for those who bring over 40,000 entries from every community in North Dakota.

The Association provides educational and entertaining exhibits along with special attractions that bring North Dakotan’s together to celebrate their heritage and lifestyle each year.

Agency Mission Statement

To meet the needs of North Dakota Fair goes through program changes determined by surveys of patrons and non-patrons.

To keep the association financially solvent.

To continue to fund the Fair’s general operations through user fees.

To solicit private, corporate, city and county support for general operations and capital assistance.

To retain the support of state government through accountability for awards/prizes and assistance with one-time capital improvements.

To enhance security with multi cameras installed on the grounds.

To coordinate with the State, City and County law enforcement, fire departments, ambulance service and security personnel to implement plans in case of disaster during fair days/nights.

To follow CDC guidelines for appropriate procedures during a pandemic.

To seek a flood risk management system to reduce the State’s risk of financial loss due to flooding on the State’s fairgrounds and buildings.

Major Accomplishments

1 Generated revenues to operate facilities through admissions, rents, and gifts from friends.

2 Solicited \$29.5 million in capital construction from non-state revenues for capital improvements.

3 Generated revenue of \$19.4 million for capital improvements from admissions and rents.

Major Accomplishments

-
- 4 Hosted 94,056 entries in a biennium.

 - 5 Received entries from 52 counties in North Dakota.

 - 6 Recognized nationally, regionally and statewide as a great attraction as the "Showplace of North Dakota".

Critical Issues

-
- 1 Flood Control. Current flood mitigation projects in the Minot area will not protect the State Fairgrounds from a flood such as the one that occurred in 2011. The North Dakota State Fair would like to be included in the City of Minot flood protection projects. The North Dakota State Fairgrounds are located within the floodplain of the Mouse River in northeast Minot. The Souris River Joint Board and the City of Minot are working together to advance enhanced flood protection for the region, but funding has been committed by the State of North Dakota to assist in the construction of levees and floodwalls only in north and west Minot. The southern and eastern portions of Minot will remain at risk to flooding for an estimated 20 years, unless financial assistance is offered from the State for construction of flood risk reduction features to protect the State's assets on the North Dakota State Fairgrounds. The 2011 flood caused the cancellation of that year's North Dakota State Fair. Heroic efforts saved the State Fair Center and the main grandstands, but several buildings suffered significant damages. Additionally, the ND State Water Commission and the Federal Emergency Management Agency are in the process of remapping the regulatory floodplain in Ward County, which will significantly increase the costs of providing flood insurance to mitigate the State's risk against flooding.

 - 2 Security. Another future risk is the need for additional security measures for all patrons during the nine days of the fair where over 300,000 people are on the grounds. With the pandemic now as one of the front security concerns, new steps must be in place to also continue to make security include these concerns.

Performance Measures

See major accomplishments.

Program Statistical Data

The State Fair prizes and premiums need to be increased to further encourage participation of the youth in the 4-H and FFA program and to build additional open class participation. Fair exhibit numbers have grown from 15,128 exhibits in 1976 to 93,000 in the 17-19 biennium. The cash premiums and prizes have not kept pace with other state fairs or with the cost of living. Increasing the premiums is an important step in continuing to support the youth participation in these critical state fair programs, as well as to help offset the investment made by them as they learn by participating. Increasing premiums will help the fair build on this base of entries and strengthen the future of the fair.

Explanation of Program Costs

The State Fair offers hundreds of competitive divisions where state champions are named. Our exhibitors are limited to one or two entries per person/per competition. 4-H and FFA members cannot show the same project in both departments. 4-H exhibits must either first win a blue ribbon at a county achievement day or as in the case of FFA, or where counties have a late achievement day, worthy competitors are determined by the agent. The State Fair publishes 4-H, education, FFA, horse show, and open class award books. These books offer competitions for North Dakotans with a wide variety of interests. Exhibitors displayed over 93,000 competitive exhibits at the 17-19 biennium. The award funds are used to buy ribbons, trophies, and to provide cash prizes to the winners of 4-H, FFA, and open class exhibitors. These funds cannot be used to pay for any related services such as buildings, maintenance, staff, judges, advertising, rule books, etc.

Statutory Authority

NDCC 53-06.2-01 to 53-06.2-16

Agency Description

The North Dakota Racing Commission is the regulatory body in charge of regulating live and simulcast racing, and account deposit wagering companies. The Commission administers three special funds for the benefit of the horse racing industry in North Dakota. The Commission is made up of five members appointed by the Governor and has an office staff of an Executive Director and an Administrative Officer.

Agency Mission Statement

The mission of the North Dakota Racing Commission is to ensure pari-mutuel wagering and live horse racing are viable and productive within North Dakota.

Major Accomplishments

- 1 Developed tax revenue to the General Fund sufficient to offset Racing Commission Biennial appropriation for the past five biennium and have additional revenues over our allocated dollars making the Racing Commission a net positive revenue agency.
- 2 The revision of tax requirements for live horse racing, simulcast wagering, and account deposit wagering has been advantageous to the companies engaged in simulcast and account deposit wagering. As a result, we have seen a few new companies begin operating under our license as well as the growth of those already established, contributing to an increase in revenue the past four years.
- 3 In the post-COVID-19 era, we have remained operational. We were also able to maintain our tax revenues and have even seen increases in some areas despite the negative impact Covid had on the U.S. and the rest of the World.
- 4 We continue to work with Horse Race North Dakota in Fargo to establish a long-term financially viable business plan, including the payment of debts to the City of Fargo while reestablishing a live race meet each summer.
- 5 We continue to work with Outdoor Recreation Development Association and the Turtle Mountain Band of Chippewa to maintain their race meet season. We have also seen an increase in both special fund and Tribal funding to the racetrack to make structural and infrastructure improvements at the track.
- 6 Regulated live horse racing, simulcast, and account deposit wagering industry in North Dakota.
- 7 We continue to work with an independent accounting agency to strengthen oversight and review of all pari-mutuel activities including audits.
- 8 Provided support for developing and maintaining account deposit wagering companies accounting for wagering and tax revenue increases.
- 9 Work with management of both racetracks on capital improvements including the rehiring of a full-time General Manager at the North Dakota Horse Park in Fargo.
- 10 Promoted and supported live horse racing and horse racing breeding programs in North Dakota.
- 11 Supported any and all problem gambling programs in whatever form they exist.
- 12 Executed the duties required by the North Dakota Century Code.
- 13 Approved and licensed live racing via licenses provided to racetracks, associations, owners, trainers, jockeys, and other key positions.
- 14 Approved and licensed simulcast racing, including account deposit wagering companies/service providers, totalizators, site operators, and simulcast employees.

Major Accomplishments

-
- 15 Monitored live racing by contracting to provide veterinarians, stewards, and other individuals required to assure compliance with the Administrative Code.

 - 16 Administered the promotion fund monies to promote live racing and provided oversight to ensure compliance with promotion awards.

 - 17 Approved and disbursed the purse fund grants to live horse racing associations.

 - 18 Actively worked to update administrative rules in a fast-changing horse racing rule environment.

 - 19 Worked with NDIT to create an improved Breeders Fund database for better efficiency and performance to help expedite annual breed fund awards to horsemen and horsewomen.

 - 20 Approved funding for experimental social media, radio & television advertising and marketing campaign through WDAY in Fargo.

Critical Issues

-
- 1 The continued appropriation of adequate General Fund dollars for the Racing Commission in the 2025-27 biennium to conduct statutory responsibilities and to grow the industry to support its continuing financial self-sufficiency.

 - 2 The Racing Commission must continue to receive Legislative support and the necessary financial resources to protect North Dakota from criminal activity, fraud, and money laundering in the racing industry.

 - 3 The Racing Commission must have the continued ability to recruit and retain account deposit wagering companies to underwrite the Breeders, Promotion, and Purse Funds to support the racing industry and horsemen in the state. To accomplish this we will need to expand the events allowed under the statute to allow for the licensing, regulation, and taxation of all pari-mutuel wagering events (not only horse and greyhound) around the world through our licensed service providers.

 - 4 To allow for the licensing, regulation, and taxation of sports betting and all pari-mutuel wagering activities in legally licensed jurisdictions through our ADW/Service Provider licensees.

 - 5 The Racing Commission must also have continued resources through racing taxation to contract for services to assist in the administration of live racing and the auditing of the wagering process.

 - 6 The continued upgrading of the regulations of live racing is a primary effort by the Racing Commission to elevate the standards of horse racing in North Dakota and to remain in compliance with national regulating requirements.

 - 7 The Racing Commission needs to transition to a more paperless format by expanding our licensing and payment process to include digital applications and online payment capabilities.

Performance Measures

A formal performance measures system is not utilized by this agency.

Program Statistical Data

Account wagering activity regulated by the Commission has continued to provide significant funding for live racing and the horse industry throughout the State and the Turtle Mountain Nation. In 2023-2024, the Commission has or will pay out over \$2,000,000, to horsemen, horsewomen, racetracks, breeders, jockeys, and horse racing organizations with support from our Breeders, Promotion, and Purse Funds. These payouts include the following:

- Breeders Fund: \$542,106

670 Racing Commission

Agency 670

- Promotion Fund: \$887,952
- Purse Fund: \$592,550

1. The 2016 NDSU Economic Impact Study showed a direct financial impact on the State of nearly \$25,000,000 per year from a department general fund budget of roughly \$200,000 for the calendar year. A small investment with a large return to our State. This includes the creation of over 500 full and part-time jobs in ND and the Turtle Mountain Tribal Community.
2. The Commission currently licenses 16 ADW's, 7 Totalizator Companies, 5 Site Operators (charities) and 2 racetracks during 2024.
3. During the current fiscal year (June 2024), the Commission has paid back \$287,167, to the General Fund, or almost 60% of our General Fund allocation in the first fiscal year.
4. During the first fiscal year, the Commission has assessed ADW tax value totaling \$1,117,379.28, and an additional collection of almost \$80,000 in licenses and other fees to our administrative fund.

Explanation of Program Costs

The Racing Commission is the agency responsible for regulating live racing and wagering through companies and associations licensed by the Racing Commission.

To enhance the monitoring and accounting of wagered funds, the Racing Commission entered into a contract with an accredited accounting and auditing firm on July 1, 2011. The Commission has continued to work with this firm to enhance the effectiveness of its regulatory and auditing functions.

The Racing Commission hires and contracts with several individuals and organizations each year to monitor and enhance racing in North Dakota. These positions include a State Veterinarian, State Steward, Assistant State Steward, Licensing Staff/Interns, independent Testing Lab, Breed Fund Administrator, and an independent Breed Fund Auditor.

The Racing Commission has adopted the Uniform Classification Guidelines for Foreign Substances and Recommended Penalties and Model Rules developed by the Association of Racing Commissioners International. These rules require the use of a credentialed and accredited lab for all testing including split sample tests.

The Racing Commission contracts with ARCI as well, to enhance our individual licensing program as well as create consistency with many other jurisdictions. North Dakota is currently not subject to the new Federal HISA Regulations.

In 2020, the racing commission instituted an Internship Program for college students. Each year we hire 2-3 Interns that work with both the NDRC and track racing officials. The goal is to help educate and expand interest in horse racing with our younger citizens. One of our first interns, Jessica Benson (an NDSU AG Graduate), was appointed by the Governor to be one of our Commissioners.

The Racing Commission continually works on upgrading and making recommendations for changes to State Statutes and Administrative Rules as well as State Forms, licensing procedures, and costs associated with all programs.

All the above items help ensure that we provide the best live racing programs as well as provide protection for all horses and humans involved in our racing programs.

670 Racing Commission

Agency 670

Program Goals and Objectives

The North Dakota Racing Commission's primary objective is to regulate and promote the pari-mutuel wagering and live horse racing industry in North Dakota.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Every summer since 2020, the Racing Commission has provided an Internship program allowing registered college and university students an opportunity to work with the Executive Director during the live race meets within the state. Qualifying students assist in licensing racing personnel where emphasis is placed upon reviewing background checks, fact checking, accounting, and teamwork. Interns also learn while assisting veterinarians, security, communications, and other necessary functions of a live horse race event in North Dakota.

Necessary resources for implementation (including FTE's)*: The original and current biennium General Fund appropriation includes a one-time funding for Interns at \$20,000. Because of the success of this program, we would like to see the funding for the Internship Program continue at \$20,000 into the next biennium.

Are resources being redirected or are they new or additional (including FTE's)*: Resources for this request would shift from what has been a budget-to-budget request to a continuing part of the Commission’s budget so that we may continue what have been proven to be a valuable addition to our live racing program.

670 Racing Commission

Agency 670

Who is served and impact of not funding*: Interns are a valuable resource not only for the Racing Commission but for the numerous other positions at the racetrack that they assist including veterinarians, stewards, and others. The impact of not funding would require annual funding from our racing Promotion Fund which would reduce the amounts available to the racetracks and breed associations.

Total					-	-	-	-	13,000	-	13,000	-	13,000

State Initiative:* Technology Investment

Justification: The Racing Commission has a printer/copier that was purchased used in 2016. We were notified in 2023 that we could no longer have a service contract for the machine. This year (2024) when we needed to have it serviced, the technician was able to secure one of the parts that was needed but told us that the parts were becoming very scarce, if not impossible to find. Another part that was worn but didn't need replacing yet - was not available. We were advised to start looking for new printer/copier. We have our fingers crossed that it will last another year.

Since 2006, the Commission has purchased used printer/copiers. They do save some money but they only seem to last about 10 years, as they have a lot of use by the time the commission buys them.

North Dakota Century Code Chapters 55-01, 55-02, 55-03, 55-05, 55-06, 55-09, 55-10, 55-11, and 55-12.

Agency Description

The State Historical Society of North Dakota is responsible for identifying, preserving, interpreting, and promoting the heritage of ND and its people. The agency was founded in 1895 and accomplishes its mission through four departments, as follows:

Administration is headed by the Assistant Director and is responsible for overall agency support, budgeting and fiscal matters, personnel management, security, ND Heritage Center & State Museum building maintenance, manages space rentals, and concession sales and inventory control.

The Audience Engagement & Museum Department provides engaging, entertaining and memorable learning experiences for the public and collects artifacts representing the history and culture of North Dakota and the northern plains. This team oversees museum exhibitions, plans public events and educational opportunities, produces publications and ND history curriculum, collects and preserves 80,000+ artifacts, coordinates our volunteers, and manages the marketing, branding, and digital presence of the agency.

The State Archives manages, preserves, and ensures access to permanent historic records that document the history, heritage, and culture of North Dakota and the northern Plains. Historic records and documents managed by the State Archives include state and local government records, manuscript and photograph collections, newspapers, microform, maps, moving image, and publications. These resources are accessible to the public through in-person and virtual reference services. Archivists provide technical assistance to constituencies.

Archaeology & Historic Preservation services include evaluating architectural and archaeological properties, providing assistance to historic property owners, nominating properties to the National Register of Historic Places and State Historic Sites Registry, administering the Preservation Tax Credit Program, reviewing the impact of federally-related projects on historic properties, and providing information about historic preservation and restoration. Provides for programming, management, maintenance, repair and operation of unstaffed State Historic Sites. Manages the archaeological artifact collections.

Agency Mission Statement

Empower through history.

Major Accomplishments

-
- 1 Grew the digital use of our agency websites by 713,000 visitors during this biennium—to 1,339,118 users.

 - 2 The State Archives increased acquisitions across all types of materials by acquiring more than 2.7K published books and reports, 1K linear feet of government records and private manuscript collections, issues from 74 state-wide newspapers, and over 11K digital files.

 - 3 Archaeology and Historic Preservation employed technology to expand our ability to serve North Dakotans has led to increased demand. (Ground Penetrating Radar, Magnetometry, Drones, etc.)

 - 4 Agency increased participation in National History Day exponentially in an exciting trend that is expected to continue.

 - 5 The State Archives increased and enhanced digital access to history through in-house digitization of over 600 video files, 250 audio files, 45K photographs and historic documents and 333,828 newspaper pages for access by patrons.

Major Accomplishments

- 6 Increased the number of visitors to our 60 museums and state historic sites by 94,600 during this biennium—In 2023 we welcomed 607,722 visitors.
- 7 The agency is improving IT infrastructure needs, including increasing internet speeds, services, and security at the historic sites with the completion of a pilot project at Camp Hancock. Other projects will include a dark fiber project at Fort Buford and security camera installation at 1883 Stutsman County Courthouse.
- 8 The State Archives hired a new archivist to increase the availability of historic newspapers online, perform the ingest of digital newspapers, create preservation microfilm of digital files using an archive writer, and monitor the Archives' extensive print and microfilm collections of newspapers.
- 9 A record number of exhibitions have been produced by the agency during this biennium including the national-award-winning Fashion & Function: North Dakota Style.
- 10 The State Archives hosted over 50 behind-the-scenes tour to increase advocacy and education related to the purpose of the State Archives.
- 11 The State Archives Digital Repository grew from 16.9 TB at the beginning of the year to 42.2 TB at the end.
- 12 The agency paid off its 2005 Series A bond payments, which were issued for the Archives addition and the Chateau de Mores Interpretive Center additions in November 2023.

Critical Issues

- 1 We are seeing an increased demand for our services, which ranges from review and compliance to increased calls for services in Archaeology, exhibits, education, and outreach. The issues that the agency has been maintaining the same amount of resources, which is causing overloaded team members and delays on deliverables.
- 2 Storage at our two outlying buildings is beyond capacity. Both buildings do not meet current codes, have pest control issues, leakage issues, and environment control issues. To best preserve and protect the state's precious large artifacts stored at these facilities, it is critical to find an option to store and make available to the public some of these large objects.
- 3 In early 2024, the Department of Interior released new regulations that overhauled how institutions receiving federal funds comply with the Native American Graves Protection and Repatriation Act {NAGPRA} (1990). NAGPRA covers requires that institutions receiving federal funds, such as museums and universities, make efforts to repatriate skeletal remains, funerary objects, sacred items, and objects of cultural patrimony, and limits the ability of museums to display objects without tribal consultation. In the past, NAGPRA required institutions to decide which items were covered by NAGPRA and which were exempt. The new regulations puts these decision-making authorities on tribal communities, typically lineal descendants or Tribal Historic Preservation Officers. Because of the shift in who defines which items fall under NAGPRA, the display of any Native American artifact should include tribal consultation before finalizing exhibits. This will change our curatorial and educational practices.
- 4 Through our mandated role in state government, the State Archives holds the recorded history of state government and North Dakota's people. A recent inventory and study of the current storage space indicates the State Archives will be at full storage capacity in less than twelve years, resulting in a need for a building expansion. Reaching storage capacity would force us to decline mandated transfers from government agencies and entities, in addition to donations of historic materials from citizens.
- 5 North Dakota owns some of the most important historic sites in the Northern Great Plains. We have received funding in the past two biennia to address our prioritized statewide needs, but more work is needed. Investments in these buildings and sites need to be attractive and welcoming for visitors, maintained at a level that can be leveraged to attract entrepreneurial partnerships, and positioning so they become contributing to the local economy. Continued investments in the these sites will strengthen the economic climate of North Dakota and contribute to the State's overall attractiveness for the retention of new businesses and residents.
- 6 Our need to stay abreast of technology in our museums, communications, and practices.

Critical Issues

7 There are competing interests in Medora. Our agency must invest in our three historic sites to remain competitive in the growing market in Medora.

Performance Measures

Program performance measures relate to activities enumerated in work plans based on the agency Strategic Long Range Plan and include quantitative measures of services provided and time of response. The major goals in the Strategic Long Range Plan are: Build Organizational Capacity, Partner for Impact, Embrace Emerging Technology, and Increase Earned Revenues. Specific strategies, tactics, action steps, metrics, and the staff responsible are identified under each of the major goals.

Program Statistical Data

Administration

7/1/2023 - 6/30/2024

1. Completed 44 hires 39 rehires
2. Processed 142 pay rate changes
3. Completed 61 background checks
4. Processed 19,617 time entries totaling 126,943 payable hours
5. Reviewed 2,484 leave requests
6. Processed 13 Completions of probation
7. Managed and collected payment on \$33,436 of invoices

State Archives

Stats for CY2023 are the following:

1. Responded to approximately 3K requests for reference services.
2. Acquired materials including more than 2.7K published books and reports; over 1K linear feet of government records and private manuscript collections; issues from 74 state-wide newspapers; and over 11K digital files. Digitized over 600 video files, 250 audio files, 45K photographs and historic documents, and 3 complete newspaper runs for access by patrons. Digitized 333,828 newspaper pages for online access at <https://ndarchives.historyarchives.online/home>.
3. Maintained materials that included more than 50K linear feet of archival records, 865K digital files (42.1 TB), 129.6K cataloged and accessioned publications, 13K volumes of selected federal publications, 2.3K titles of periodicals, 1.5K titles of newspapers, 4.5M feet of motion picture film, 2.1M photographic images, and 19.7K rolls of microfilm.

Historic Sites

1. Provided visitor services with visitation exceeding 373K visitors. We also provided programming, interpretation, preservation, and maintenance at 60 state historic sites.
2. Welcomed 169 school field trips with a total of 4,654 students.
3. Reached more than 10K viewers with blogs and social media posts.
4. Completed 32 capital improvement projects at 16 sites.
5. Brought 9 major historic sites online with virtual interpretive programs that supported ND Studies. 10 of these interactive programs were delivered live to 107 attendees this spring term.
6. Brought Red River Rendezvous, a popular outreach program developed by Pembina State Museum, to over 600 students around the state.

Archaeology & Historic Preservation

1. Maintained data on approximately 70K cultural resource sites. Historic Preservation staff processed over 5,200 archaeological, architectural, historical, and cultural heritage site forms and site form updates.
2. Increased the cultural resources manuscript collections by approximately 800 reports.
3. Maintained and enhanced the GIS system for cultural resources site forms and reports with an interface for state and federal agencies, tribal governments, and cultural resource specialists.
4. Increased the 467 National Register of Historic Places listings in North Dakota by 5.
5. Worked with an applicant to start an application for a Renaissance Zone Historic Tax Credit in Minot.
6. Reviewed approximately 4,750 federal or state-assisted projects in the last biennium.
7. Granted over \$150K to certified local governments.
8. Awarded \$521,400 in Cultural Heritage Grants.
9. Managed the archaeological collections, numbering over 12M artifacts. Curated historic and prehistoric archaeological collections from over 2.5K sites in North Dakota with assemblages from 13.5K years ago.
10. Accepted and processed into collections 46 boxes of archaeological collections.
11. Provided access to approximately 900 researchers and the public cultural resource records.

Audience Engagement & Museums

1. Served approximately 10K school children at the ND Heritage Center & State Museum. Led the development of digital history education resources for students and classrooms through ND Studies and provided in-service training opportunities for state teachers.
2. Preserved and protected more than 80K artifacts in the museum collection.
3. Provided visitor information services at the ND Heritage Center & State Museum for almost 200 thousand local and international visitors per year and provide marketing materials for 607,722 visitors to all of our historic sites and museums.
4. Collaborated with more than 100 state agencies, organizations, and private businesses to provide enhanced programs, exhibits, and projects for the citizens of North Dakota and all visitors.
5. Managed and/or developed content for agency websites, socials media channels, e-newsletters, and agency blogs. The agency has more than 46K social media followers, agency websites have more than 625K digital users; and about 2K individuals subscribe to our e-news and blog page.
6. Published the state's academic history journal and 2 monthly e-newsletters.
7. Managed and created fresh exhibitions for 80K square feet of exhibit spaces at our museums and sites.

Explanation of Program Costs

Funding for the Administrative Department covers the operating and salaries and wages expenses for the director, business office team, custodial team, IT personnel, and security staff. The Administration Department makes the business processes flow smoothly, provides the public with clean facilities at the ND Heritage Center & State Museum, keeps up with the all IT needs specific to museums, and provides protection to the ND Heritage Center & State Museum, and all remote state historic sites.

Funding for operating costs and wages associated with State Archives staff is to collect, preserve, catalog, arrange, describe, and provide public access to all documentary resources of the agency. Through this program, North Dakota state and local government analog and electronic records, manuscripts, newspapers, books, film, maps, photographs, audiovisual recordings, and other historical materials are made available to the general public and other state agencies.

The salary and operating request for state historic sites covers funding for staff and operations located at historic sites throughout the state and provides memorable opportunities for worldwide tourists to discover these hidden gems important to North Dakota history .Each site's staff is responsible for the operation, programming, interpretation, maintenance, restoration, and development at the 60 historic sites and museums across the state. Grounds staff located in Bismarck maintain the significant historic sites that do not have staff or interpretive centers.

Funding for the Archaeology & Historic Preservation Department is for staff members and their operating expenses that address the agency's responsibilities for the administration of the federal historic preservation program within the state; implementation of state law related to the identification and protection of the state's significant cultural resources; development, maintenance, and enhancements for the Geographic Information System for Cultural Resources and reports for the state; and responding to burial calls on state and private property (NDCC 23-06-27). The agency must comply with federal requirements for the Historic Preservation Grant, which funds the majority of this program.

Expenses in the Audience Engagement & Museum Department are for staff-related costs such as salaries, training, production of materials for all departments, exhibition production, and supply costs as well as programming and advertising costs. Department staff perform activities relating to the entire agency and our 60 state historic sites and museums. These include statewide communications and branding, media relations, marketing, building visitor awareness of our sites and many services for the public and contractors, overseeing education programs for the agency, writing and editing educational curriculum for students, teacher training, overseeing the agency's volunteer program, and managing rental spaces. Department staff also collect, preserve, and manage the state's museum artifact collection, oversee loans for educational exhibits, fabricate exhibitions statewide, and provide technical assistance and resources to local and county historical societies and museums. We also partner with private businesses and organizations to bring North Dakota history to an expanded audience.

Program Goals and Objectives

The goals for the Administrative Department are to keep the ND Heritage Center & State Museum and historic sites safe and clean for all visitors; to provide a large selection of North Dakota product inventory available for sale to the public; and to provide business and technology support to all staff effectively and efficiently.

The goal for the State Archives Department is to ensure the identification and preservation of North Dakota governmental records of enduring historic value as mandated by N.D.C.C 55-02.1. Additionally, the State Archives acquires, preserves, and makes available all documentary resources, including state and local government records, books, periodicals, newspapers, photographs, motion picture film, video and sound recordings, manuscripts, and other historical materials.

The goal for state historic sites is to preserve unique, original structures, sites and other "in situ" prehistoric and historic features that illustrate the major themes in North Dakota history through the acquisition, preservation, research and interpretation of these resources for the inspiration, enjoyment and education of the people of the state of North Dakota and its visitors.

The goals for the Archaeology & Historic Preservation Department are to identify, evaluate, register, and maintain and manage information on the state's significant cultural resources and help assist in the preservation of these cultural resources by awarding grants to private and public entities; to maintain and update a statewide plan for historic preservation along with encouraging and assisting with economic development and expansion of historic preservation efforts by rehabilitating historic buildings using federal tax incentives, administering covenants and maintenance agreements on historic properties, and authoring and reviewing National Register nominations to submit to the National Park Service for final approval; and to manage archaeology collections and maintain and update the Archaeology Component of the State Plan every five years.

The goals for the Audience Engagement & Museum Department are to continually create inspiring and inclusive educational opportunities for state citizens and global visitors by providing a broad variety of educational services, exhibitions, programs, events, publications, and activities of excellence that fulfill the needs of our diverse audiences and promote the state of North Dakota; to help the agency optimize our assets by encouraging professional development, managing a vibrant volunteer program, preserving museum artifact collections, and collaborating with our diverse audiences; to establish deeper connections with core constituencies through proactive educational partnerships with local, state, federal, and private businesses and schools to increase our reach; by striving to provide the best visitor experiences at museums, historic sites, events, and through our digital offerings; and to provide assistance to local and county historical organizations and museums. These key collaborations assist us with continuing to grow and share the state's history, ethnology, and natural history collections. Another goal is to oversee and increase the use and impact of our digital products and services. Staying current with technology developments will help us provide improved, engaging guest experiences for digital and physical users.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The agency is requesting funds that are needed to continue with the expenses associated with operating our agency. With the 3% cut to the budget, the agency shifted budgets within the agency and came up with a base that more accurately reflects actual historic costs. There are specific increased costs that we know will be above and beyond our base budgets.

We are requesting funding for the following instances:

- The agency received ARPA funds to improve IT Infrastructure across the state. One of the projects completed was to install dark fiber optics at the Missouri Yellowstone Confluence Interpretive Center and Fort Buford State Historic Site. Upon completion of this project, we will have increased NDIT data processing costs. We're expecting this increase to be about \$17K per biennium.
- The agency has over 80 buildings, including historic buildings that are insured by the Fire and Tornado fund. We have been informed that insurance costs will increase by a minimum of 25%.
- The agency received APRA funds to install an elevator in the 1883 Stutsman County Courthouse. This project was completed in FY24. With this completion comes additional costs that were not needed prior. This includes elevator maintenance contracts that are close to \$6K per year. In addition, we plan to make this site open year round. This increases utilities, temp salaries, and programming expenses.

701 Historical Society

Agency 701

- The State Archives uses Preservica for digital storage of records. We are currently under a contract that allows us to store up to 10TB of data. However, we are currently storing 50TB. We expect a change in the contract with an additional cost of \$49K.
- Funds have been provided over the past 2 bienniums that give new life and functionality to some of the 80 buildings we manage. With improved use and functionality of these buildings comes operating costs that were not budgeted prior, like utilities.]
- There are specific LED lights that are used in exhibit production. The cost of these lights will increase to about \$10K.
- There is an anticipated increase that State Archives will need to produce 360 rolls of film per year rather than 120 rolls usually produced. This is necessary for the proper newspaper preservation and accessibility.
- As part of the digital interactive initiative in which was funded by the 2023 Legislative Assembly, the plan is to create a digital trails program along the capital grounds. We will need additional funding to cover the data processing charges associated with this, which we are estimating to be an additional \$8K.
- Temporary salaries are needed at
 - Maintenance at Pembina State Museum for snow removal and law mowing, which will be cheaper than entering into contracts for services.
 - Data entry position to digitize records that are currently stored in filing cabinets.
 - Additional visitor services guides to greet the public at our west entrance.
 - Full-time maintenance position at MYCIC/Ft Buford to work on the maintenance site plan.
 - Restore employees at LCIC/Ft Mandan in which funding has been used for other positions due to vacancy savings.
 - Interns across the departments with a HRMS 50% match.
 - Temp employees at Ronald Reagan Minuteman Missile Historic Site to supplement admissions.
 - Recover budget cuts.

Necessary resources for implementation (including FTE's)*: Operating funding and temp salary resources are needed.

701 Historical Society

Agency 701

Are resources being redirected or are they new or additional (including FTE's)*: Restored and additional funding is needed.

Who is served and impact of not funding*: All the citizens of North Dakota that visits our sites will be served. Not funding this will result in the agency not being able to cover the costs of operations.

North Dakota Heritage Center & State Museum Expansion (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative*: State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The sixty-seventh legislative assembly authorized a North Dakota military museum in HB 1016 Section 4. This section stated the adjutant general may accept up to \$10M from other funds for the construction of a North Dakota military museum. This law also gave the adjutant general the approval to enter into an agreement with the state historical society for the construction of a new facility, the renovation of an existing property, and the operations and maintenance of a military museum. On October 17, 2022, the Office of the Adjutant General and the State Historical Society entered into an agreement to work together towards the addition of a military museum.

The sixty-eighth legislative assembly extended a line of credit of \$20M from the Bank of North Dakota to the Society to pay the costs associated with the construction of a North Dakota military museum in SB 2018 Section 5. It was the intent of the sixty-eighth legislative assembly that the Society request funding from the sixty-ninth legislative assembly from the legacy earnings fund to repay the line of credit.

The military gallery expansion project is well established as schematic designs have been completed and the agency is beginning to enter the developmental design phase of the project. Private fundraising for this project is ongoing. The SD Narratives and other descriptive materials are included in the attachments.

As the ND Heritage Center & State Museum attracts roughly 250K visitors per year, it is one of North Dakota's premier attractions. This addition will be sure to attract even more visitors with a state of the art gallery, regimental room seating up to 400 guests, improved restaurant services with a North Dakota flavor, and an expanded amphitheater. For an overall plan of this expansion, see video at: <https://youtu.be/GAyrbXWfjF0>

As almost 20% of the objects in the Inspiration Gallery: Yesterday and Today at the State Museum will be moved into the military gallery, funding is needed for repairs and preservation related artifacts in need of conservation, along with updating the Inspiration Gallery, which will involve hiring exhibit consultants, and the production and installation of new exhibits. The Inspiration Gallery is intended to showcase the latest accomplishments and amazing technology and energy leadership of North Dakota. Many changes have transformed the state over the past 15 years since this gallery was first conceived.

701 Historical Society

Agency 701

In addition to a military gallery expansion, the Society has completed an architectural plan of an additional expansion for an agricultural gallery. Agriculture is North Dakota's #1 industry and the Society would like to showcase our strong agricultural sector with interactive exhibits highlighting this history, as well as educational spaces and state of the art exhibits.

Necessary resources for implementation (including FTE's)*: Funding is needed in the 2025-27 biennium to repay the line of credit to the Bank of North Dakota for the schematic design and developmental design phases of the military gallery expansion during the 2023-25 biennium. In addition, funding will be needed to construct the military gallery expansion, conservation of military artifacts, and redesign the Inspiration Gallery once 20% of the military objects are moved into the Military Gallery. Funding is also being requested for the schematic design, developmental design, and construction phases of the large object and agricultural gallery additions. Although additional FTEs are not needed now, upon completion of the expansion, they will be needed to expand the services the agency provides.

Are resources being redirected or are they new or additional (including FTE's)*: The line of credit is currently being used to make payments on the planning stages of the military gallery. However, additional funding will be needed to repay the line of credit and complete the construction. In addition, additional funding will be needed to expand into the agricultural gallery. Additional FTEs will be needed to provide the proper services in future bienniums. This expansion will also require accommodations to parking facilities and wayfinding around the Capital grounds.

Who is served and impact of not funding*: These expansion projects will have huge impact, not only to North Dakotans, but to all visitors from near and far that will come to visit. As moneys have already been invested in this project, not funding it would be a waste of taxpayers' dollars.

Compliance with new NAGPRA regulations (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	610,872	106,135	717,007	3.00	626,237	106,135	732,372	1.00
Special	-	-	-	0.00	-	-	-	0.00
Total	610,872	106,135	717,007	3.00	626,237	106,135	732,372	1.00

State Initiative*: Tribal Partnerships

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In early 2024, the Department of Interior released new regulations that overhauled how institutions receiving federal funds comply with the Native American Graves Protection and Repatriation Act (1990). NAGPRA requires that institutions receiving federal funds, such as museums and universities, make efforts to repatriate skeletal remains, funerary objects, sacred items, and objects of cultural patrimony, and limits the ability of museums to display objects without tribal consultation. In the past, Federal regulations required institutions to decide which items were covered by NAGPRA laws and which were exempt. The new regulations puts the decision-making authorities on tribal communities, typically lineal descendants or Tribal Historic Preservation Officers. Because of the shift in who defines which items fall under NAGPRA, the display of any Native American artifact should include tribal consultation before finalizing exhibits.

701 Historical Society

Agency 701

The State of North Dakota and the State Historical Society have a history of repatriation that predates the passing of NAGPRA at the national level. The Historical Society completed its NAGPRA inventory of existing collections in 1992. The current efforts to comply with the new guidelines would represent the first agency-wide inventory since the early 1990s.

Necessary resources for implementation (including FTE's)*: Resources are needed to conduct tribal consultation. In addition, three FTEs would be needed, one to be a tribal liaison and two as collections managers.

Are resources being redirected or are they new or additional (including FTE's)*: These would need to be new resources for a consultant and three FTEs.

Who is served and impact of not funding*: Studies have shown that community engagement in cultural heritage has a positive impact on quality of life, including population metrics regarding mental health. Robust consultation with Tribal Communities will help North Dakota comply with the new NAGPRA guidelines while contributing to overall quality of life in traditional communities.

Additionally, NAGPRA consultations will ensure that the Historical Society complies with national laws, while providing North Dakota citizens world class educational opportunities and exhibits providing a wholistic approach to understanding the cultural history of all North Dakotans.

State Archives Storage for Maximum Longevity & Efficiency (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	365,072	211,590	576,662	2.00	-	207,500	207,500	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	365,072	211,590	576,662	2.00	-	207,500	207,500	0.00

State Initiative*: State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As mandated by NDCC-55-02.1-03, the State Archivist is the official custodian of the archival resources of the state, which are defined by NDCC 55-02.1-01 as "noncurrent public records which are no longer essential to the functioning of the agency of origin and which the state archivist determines to have permanent value for research, reference, or other use appropriate to document the organization, function, policies, and transactions of government."

An integral part of serving as the official custodian is the ability to properly house, preserve, and create access to records of enduring historic value. In order to continue fulfilling this mandate, the State Archives is seeking funding for upgrades to current storage solutions and two additional FTEs to assist with processing, rehousing, and appraising records for historic value to increase the longevity of current storage capacity.

A recent inventory and study of the current storage space indicates the State Archives will be at full storage capacity in less than twelve years, resulting in a need for a building expansion. By maximizing space usage now and addressing the backlog and duplication of material that may be rehoused, reprocessed or weeded, an expansion may be prolonged well beyond the twelve year estimate.

The upgrades desired to enhance our current storage solutions include enclosed and fire proof storage carriages to better preserve priority items, such as the Original Draft of the State Constitution, and conversions of microfilm and map case storage for more efficient shelving and use of space. Additionally, we desire to replace the remaining static shelving with compact shelving, which would provide an additional 7,500 linear feet of capacity.

The two requested FTEs will focus on the preservation/processing/reappraisal of incoming and legacy/existing government records for efficient access (NDCC 55-02.1-08) to historic government records to increase transparency, connection, and civic engagement for patrons in North Dakota, the United States, and around the world.

One of the requested FTEs will focus solely on reviewing and creating access to the backlog/legacy government records held in the State Archives. This past biennium, the two existing government archivists focused primarily on incoming transfers due to the high volume of government records we receive. Since the 2015-17 biennium, the State Archives' average biennial intake was 1,024 linear feet of paper (analog) government records. During the last biennium (2021-23), only 8 existing (backlog) government record series were reprocessed - approximately 20 linear feet. Having a dedicated government archivist to focus solely on the backlog/legacy collections could allow for an inventory/reprocessing of nearly 500-700 linear feet biennially.

The other requested FTE will be tasked with inventorying and processing incoming transfers from government agencies to effectively and efficiently maintain no additional backlog. The existing government archivists' main priority are incoming transfers. Over the past 10 years, the State Archives has received 271.62 GB of digital record transfers biennially. From July 2023 to June 2024, the State Archives has received 1,609 linear feet of paper records and 306.43 GB. Due to this increase, an additional government archivist who is focused on incoming transfers is essential to maintaining efficient access to government records of historic enduring value.

Necessary resources for implementation (including FTE's)*: Structural Engineer to study floor load limit; 2 FTEs; Funding for storage upgrades

Are resources being redirected or are they new or additional (including FTE's)*: New resources are needed for the storage upgrade, along with 2 new FTEs.

Who is served and impact of not funding*: The North Dakota State Archives serves thousands of patrons biennially. Patrons can be anyone from North Dakota or other states, in addition to international patrons, as well. We also serve state and local government personnel. Through our mandated role in state government, the State Archives holds the recorded history of state government and North Dakota's people.

Not funding would result in storage space reaching capacity sooner than later. Reaching storage capacity would force us to decline mandated transfers from government agencies and entities, in addition to donations of historic materials from citizens.

With the increase in records transferred to the State Archives, the two current government archivists could not maintain the incoming, which would lead to difficult access to records.

701 Historical Society

Agency 701

North Dakota 250 Commemoration (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	-	7,200,000	7,200,000	0.00	-	7,000,000	7,000,000	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCC 55-01-13 & 14 establishes the America 250 commission and presents the powers and duties of the commission. As the commemoration date of July 4, 2026 will occur during the next biennium, funding is being requested to provide grants to communities and groups across North Dakota: display the replica of the liberty bell that is currently in storage; plan, fabricate, and purchase an exhibit production service for a State Museum Governors Gallery exhibition to be installed in the Governors Gallery of the State Museum; and provide public programming and events at the State Museum and state historic sites to compliment the North Dakota 250 exhibition in communities across the state.

Necessary resources for implementation (including FTE's)*: Funding is needed to continue with a temporary position to handle communications of all 250 events across the state. In addition, resources are needed for updating the Governor's Gallery exhibit, along with providing grants across the state.

Are resources being redirected or are they new or additional (including FTE's)*: Any unused one-time appropriations in Line 70173 (America's 250th Celebration) of the \$250,000 authorized in the 2023-25 biennium would need to be carried over. In addition, additional funding is needed to create a new exhibit and provide grants.

Who is served and impact of not funding*: All ND Residents and communities. Not funding would result in a less than robust 250th US commemoration.

Updating State Historical Society Visitor, Student, and Digital User Information (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	809,758	138,180	947,938	4.00	-	-	-	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding is requested to make updates as to how the information the State Historical Society shares with our visitors, students, and digital audiences is shared.

Included in this request is the hiring of a website design firm to update the State Historical Society website design and functionality. The agency currently has one new media specialist for web programming as well as many other duties, which challenges us to keep up with daily needs and lack of resources to devote to this project.

Next, we plan to create and install 30 new interpretive panels at state historic sites that currently show inappropriate or dated historical information. We strive to bring the most current professional historical information to our visitors and researchers about each of our state historic sites. This project, along with a tremendous increase in the volume of written materials that the agency produces, creates a need for an additional assistant editor FTE to help manage the growing amount of historic content to research, write, edit, and manage American Disabilities Act compliance in print and digital formats. Historical content not only includes the text written for agency exhibitions, but also agency newsletters, grant proposals, blogs, video content, and additional social media outlet content, which have more than doubled the workload of the editorial team consisting of one editor and one assistant editor on staff. Additions in 2025-27 biennium will include producing new military gallery content, new Pembina Museum content, and additional new exhibits will permanently increase the editorial workload beyond current capacity.

Updates are needed to review North Dakota Studies content that was produced more than 10 years ago. These updates would include researching and writing new content, lesson plans, and activities to connect with today's students. With over 100,000 annual users of the ND Studies websites, it is critical for our agency to maintain the latest information about North Dakota for students, teachers, and lifelong learners. The 2024 North Dakota History Day doubled its student participation over recent years and anticipate thousands more will join in 2025. Field trips and options for field trip choices at the State Museum and historic sites have increased by 70% during this biennium. Our agency needs two additional staff to manage these growing education workloads involving North Dakota's students, teachers, and lifelong learners.

We are looking to hire consultants and/or exhibit products to help us update the complex stories and interpretation of the Fort Totten State Historic Site.

One additional staff member is needed to provide increased technical assistance and studies using GIS and AI, both for a growing audience of users and researchers, and to meet National Historic Preservation Act, ND Century Code 55-02, 55-03, and 55-10, and ND Administrative Code 40-02 requirements. Our GIS and AI resources will create efficiencies in data analysis, and promote North Dakota's rich historical record, the Society is leveraged to provide state-of-the-art assistance to federal agencies conducting cultural resource reviews, applicants looking for federal funding or permitting, and provide world-class historical experiences that will benefit North Dakota's citizens and visitors alike.

Necessary resources for implementation (including FTE's)*: Resources include funding for consultants, materials, and four FTE.

Are resources being redirected or are they new or additional (including FTE's)*: New and additional funding is needed for this initiative.

Who is served and impact of not funding*: All elements of this project serve citizens in communities across North Dakota, as well as national and international visitors, and contractors for review and compliance work in the state. About 608,000 worldwide people visit our museums and state historic sites, as well as approximately 1.3 million digital visitors to view the State Historical Society's online content.

701 Historical Society

Agency 701

The impact of not funding this initiative will be displaying an increasingly outdated website that does not reflect our contemporary, high tech and high energy state agency, as well as continuing with incorrect, inappropriate, or old interpretation at state historic sites and textbooks that do not reflect the best research or knowledge of North Dakota. We will not be able to continue increasing and modernizing the educational opportunities for students, teachers, lifelong learners. Review and compliance requests within the Archaeology & Historic Preservation Department have increased by 50% over the past 2 years. We will not be able to provide streamlined services in a timely manner to meet the growing list of review and compliance projects based on the capacity of our current staff without additional help.

New Exhibition Needs for State Museum & State Historic Sites (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In order to continue to showcase the best of North Dakota's history, we need to update our public-facing information and most used visitor services in attracting tourists, students, and digital users of our content from around the world.

The first initiative involves updating the Pembina Museum. In the current biennium, consultants have been hired to re-create a new museum space. New funding will be used to purchase the exhibit objects and install the new gallery design. In addition, we would add a new permanent fossil exhibit in the Pembina Museum's temporary exhibits gallery. We will collaborate with ND Geological Survey paleontologists to create this exhibition to add value, promote the valuable fossil discoveries in this region of the state, and draw new visitors to the museum. The State Museum exhibit gallery featuring dinosaurs and fossils receives the most visitors of the four main galleries. Visitors love dinosaurs and fossils. Funding is needed for two billboards, reaching traffic coming and going from Canada to increase awareness of the Pembina State Museum. North Dakota Century Code 55-02-06 mandates agency responsibility to promote the Pembina State Museum.

The next initiative is for a photo gallery exhibit produced in-house following the North Dakota 250th commemoration exhibition in the State Museum's Governors Gallery.

Additionally, funding is required to fulfill the newspaper advertisement requirements of the museum abandoned property law in chapter NDCC 55-12 in order to resolve the ownership status of loans that have remained in our possession without any contact from the lender.

For at least the past 30 years, the State Historical Society has added historic sites with exhibition areas, expansion projects, and community outreach for exhibits. Additions include the Pembina State Museum, the Welk Homestead, Ronald Reagan Minuteman Missile Site, and the Lewis & Clark Interpretive Center and the Fort Mandan Interpretive Center, as well as a State Museum expansion with multiple museum galleries. Federal regulations, such as Americans with Disabilities Act and

701 Historical Society

Agency 701

the 2024 Native American Graves & Repatriation Act affect the exhibition planning and care of exhibit objects. Over the next five years, projects will include the creation and management of a new ND Military Gallery and hallway exhibits, upcoming Medora projects at existing facilities and potential new facilities, a rethinking of the State Museum’s Inspiration Gallery, and a new exhibition plan for the Pembina State Museum. However, with this exciting agency growth, we continue in the manner of the past 30 years maintains a team of three curatorial staff processing hundreds of donated objects each year, one exhibitions manager, and one preparator to serve the needs of two state museums and 12 historic sites open to the public across the state. Our exhibitions at our state museums and historic sites are becoming outdated. Repairs and complete breakage are increasing exponentially each year with higher visitation and use. Theft of objects and exhibit parts creates a constant need for repairs and replacements. The two-person exhibits management team and three-person curatorial team has reached capacity. With our growing agency needs, additional staff is needed to maintain new exhibit spaces and existing ones. We wish to continue providing high-tech, highly interactive, accurate historical and educational content to our visitors. An additional three FTEs are being requested, which are an Exhibitions Manager to research, work with partners and exhibitions firms on proposals and contracts, fabricate, install and take out exhibit parts, make public appearances and interviews, and address maintenance challenges; an Exhibitions Preparator to maintain high-level skills for exhibit fabrication, fix aging exhibition and technology parts, and work with electrical components; and a Museum Curator to help create and maintain our upcoming new exhibitions and statewide outreach curatorial work.

Necessary resources for implementation (including FTE’s)*: Necessary resources include funding for exhibition consultants, 2 FTE and temporary staffing, and funding for new and updated exhibit resources.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources would be needed.

Who is served and impact of not funding*: All elements of this project serve citizens in communities across North Dakota, as well as national and international visitors. About 608,000 people from around the world visit our museums and state historic sites, as well as approximately 1.3 million digital visitors to view the State Historical Society’s online content, including digital exhibits, per year.

The impact of not funding this initiative will be a continued physical decline of our exhibitions offered at the State Museum and state historic sites, resulting in reduced visitation due to lack of interest in old and broken exhibition pieces. Refreshes, new content, and new technology is critical to growing our audiences, promoting state commerce, and livability and vitality of our communities and workforce.

State Initiative*: State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: In 2024, the State Historical Society of North Dakota (SHSND) initiated a comprehensive strategic planning process for the Chateau de Morès State Historic Site and surrounding properties in Medora. This plan is designed to guide the site's development from July 1, 2024, through June 30, 2034, aligning with SHSND's mission to identify, preserve, interpret, and promote North Dakota's heritage.

There were four overarching objectives that came out of the strategy review and are as follows:

Objective 1 - Transform the Chateau from a seasonal to a year-round interactive and engaging historic site and expand the Interpretive Center footprint.

Objective 2 - Develop Chimney Park for multiple purposes including new facilities, and providing new amenities, services, and experiences.

Objective 3 - Develop Chateau de Morès riverside property with hiking, walking, biking, and water access experiences combined with historic interpretation.

Objective 4 Reimagine and promote de Morès Memorial Park for public events and rental opportunities.

Our success can be measured through the following:

1. Increased Visitation: Develop strategies to increase the number of Chateau visitors from 15,000 per year to 100,000 per year, leveraging the anticipated increase in regional tourism due to the opening of the Theodore Roosevelt Presidential Library in 2026.
2. Surveys: Conduct simplified annual surveys of visitors and stakeholders to gauge satisfaction and gather feedback.
3. Educational Impact: Engage 25,000 students per year through participation in programs at the Chateau, Packing Plant, and/or Memorial Park.
4. Partnerships: Secure formal engagements and memoranda of understanding with federal, state, local and private partnerships.
5. Community: Document frequency of community engagement to keep local citizens informed of various SHSND projects in the area.
6. Projects: Measure the amount of funding committed to development and the number of projects funded.

The agency has issued an RFQ for Architectural Design Services to help achieve our objectives. The company hired will help the agency in developing the following:

1. Sustainable use of the sites; balancing preservation of exhibits and artifacts with visitor engagement; and carefully designing restorations and enhancements, including installing heating, air, and improved accessibility in Chateau.
2. The addition of an attraction at the Chateau Interpretive Center in the form of a museum focusing on hunting in North Dakota. Playing on the conservation legacy of Theodore Roosevelt and the history of the Chateau as that of a hunting lodge this museum will attract significant visitation from TRPL Library goes as well as other Medora visitors. This will be a large addition of gallery space including food service and some housing for staff.
3. Development of Chimney Park with new amenities and experiences, which include the recreation of the historic packing plant with mixed-use amenities like spaces for food, lodging, retail, and visitor interpretation. Additionally, interactive exhibits would showcase the packing plant's history and operations.
4. Plans for the construction of a family-friendly riverfront walkway, along with development of river access for kayaking, canoeing, tubing, and wading.

701 Historical Society

Agency 701

Necessary resources for implementation (including FTE's)*: Resources will be needed for additional work of the architect design service, along with the hiring of architects, engineers, exhibit designers, and interpretive planners.

Upon completion of major capital projects, staff will eventually be needed to maintain and operate.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources will be needed to add to the established lands the agency has in Medora.

Who is served and impact of not funding*: All ND residents and visitors to Medora. A hunting museum will resonate with most North Dakota residents and many visitors to Medora. This will bring potentially huge numbers of new visitors to the Chateau Interpretive Center.

If not funded, properties will continue to languish as development of TR Library and surrounding TRMF properties grow.

Enhancing digital services among increasing workloads (Priority: 10)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The State Historical Society has statutory authority for federal and state cultural resource reviews through its State Historic Preservation Office and State Historic Site Management responsibilities under the National Historic Preservation Act, North Dakota Century Code 55-02, 55-03, and 55-10, and North Dakota Administrative Code 40-02. With the influx of infrastructure funding to the state combined with an employment environment where there has been increasing review and compliance workload and turnover at the federal level, advocacy on the importance of excellent and efficient consultation is needed to ensure North Dakota's historic resources and provide a visitor experience that reflects the state's diverse history.

Additionally, non-destructive methods, such as the introduction of Unmanned Aerial Systems and geophysical prospection tools, including Ground Penetrating Radar, have revolutionized archaeology. The State Historical Society has been at the forefront of these emerging technologies through academic partnerships. However, the contract community has adopted these methods more slowly. Efforts to conduct these studies in-house at Society managed properties will help set precedents to modernize fieldwork for CRM Consultants to use non-destructive methods. Contractors adopt technological innovation to reduce contractors' costs, which can then be passed on to the clients seeking regulatory assistance.

701 Historical Society

Agency 701

To accomplish these goals, the Society is asking for three FTEs: two to provide advocacy and technological assistance within Archaeology and Historic Preservation and a third to provide GIS and AI guidance across the Society.

Necessary resources for implementation (including FTE's)*: Resources are needed for two FTEs, one for historic preservation work and one for archaeological work.

Are resources being redirected or are they new or additional (including FTE's)*: Federal funding is available for a 60% match, but additional general funds are needed for the 40% match.

Who is served and impact of not funding*: Use of technology and automation would increase review and compliance speeds, helping federal agencies conduct efficient NHPA Section 106 compliance. The increased use of technology within cultural resource management should help the Historical Society lead in innovative, time saving, and cost-saving approaches among cultural resource contractors that can be passed to their clients.

Increasing the use of non-destructive methods reduces long-term curation costs associated with NAGPRA compliance and traditional archaeological excavations. Methods that encourage preservation in place enhance preservation for all North Dakotans.

Rural Revitalization and Cultural Heritage Grant Programs (Priority: 11)

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: We have learned from the Ellendale Opera House grant funded in the current biennium that there are small communities throughout North Dakota that could be more economically viable with extra infrastructure support. Historic preservation conserves resources, reduces waste, and saves money by repairing and reusing existing buildings instead of tearing them down and building new ones. The preservation of old buildings, neighborhoods, and landscapes define the look of a community. The rehabilitation of a single historic building can spark a new residential or commercial development. Suburban sprawl and roadside development make every community look the same, it is important for rural North Dakota to keep their identities intact.

Across the state, historic preservation and economic development are making a difference. Traill County North Dakota is a treasure trove of historic architecture with nineteen buildings listed in the National Register of Historic Places and three historic districts. The stunning beauty, character, and craftsmanship of the state's oldest public library is the Mayville Public Library. Constructed of rustic sandstone, classic columns, wood brackets, and cornice windows, the city has made a commitment to maintaining the historic library with recent rehabilitation to the windows, doors, cornice, and roof contributing \$200,000 for preservation since 2001. The library remains in use and is an anchor for other historic architectural buildings in region.

701 Historical Society

Agency 701

The former Williston Middle School sat empty for years before being transformed into affordable senior housing representing both a way to help seniors living on fixed income and preserve the history of Williston. Built in 1931 as Williston Senior High School, the building would later become the junior high school before closing in 2005. Located a block off Main Street, the old Williston Senior High School is one of five buildings in the city that is on the National Historic Register. The \$10.6 million redevelopment was supported by federal, state and local government funding. With the addition of long-term downtown housing, retail and entertainment thrives, creating a virtuous cycle where downtown housing becomes even more desirable, and continues to support the downtown economy.

It is projects like the rehabilitation of the Williston High School and the Mayville Public Library that the North Dakota Rural Revitalization Grant program hopes to assist.

In Ellendale, for example, the community has sustainable business operating in the Opera House building, yet the structure has restoration needs that exceed our agency's capacity to fund. Larger grants to communities like Ellendale would allow communities to complete large restoration projects. Often times these communities have people willing to start and operate small businesses, yet they lack the substantial capital to rehabilitate large community buildings. This grant program would assist in providing funds to finish construction and allow local commerce to take hold.

In addition, as part of the 3% budget reduction, the agency cut \$500,000 from our cultural heritage grant program. These are small grants that are given to communities throughout North Dakota for a variety of projects ranging from \$10K-\$30K. The demand for these grants continues to increase.

Necessary resources for implementation (including FTE's)*: Funding and authorization is needed to restore the cultural heritage grant program and add a new rural revitalization grant program. We would need an additional FTE to monitor the grant programs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional and new resources are needed.

Who is served and impact of not funding*: The whole state will be impacted as these grant funds would be given to rehabilitate and preserve historic structures; preserve and exhibit collections; provide educational programs or activities that present ideas or enhance an exhibit, event or theme; or provide special projects to local museums, historical societies, or non-profits as they relate to our mission. Not funding this grant program will put a hold on rural revitalization and cultural heritage programs.

Underrepresented Communities Grant (Priority: 13)

Agency 701

State Initiative:* Economic Development/Diversification

Start Date (MM/DD/YYYY): 07/01/2024

End Date (MM/DD/YYYY): 06/30/2034

Description: A comprehensive strategy plan for the Chateau de Morès State Historic Site was completed. This plan was designed to guide the site's development from July 1, 2024, through June 30, 2034. One of the overarching objectives of this strategy review included the transformation of the Chateau from a seasonal to a year-round interactive and engaging historic site and expand the Interpretive Center footprint. In order to accomplish this objective, the goals are as follows:

Goal 1-1: Complete the interior and exterior improvements ensuring accessibility to the Chateau to enable year-round operations.

Tactic 1-1-a: Finalize a capital improvement plan to assess infrastructure and accessibility needs within historic preservation standards.

Tactic 1-1-b: Secure state funding and match with grants and partnerships.

Tactic 1-1-c: Implement installation with minimal disruption to the site.

Goal 1-2: Launch new programming and tools for self-guided tours.

Tactic 1-2-a: Develop new tours and programs and identify resources needed by December 2025.

Tactic 1-2-b: Recruit and train staff and volunteers to lead programs by March 2026.

Tactic 1-2-c: Market the new opportunities through various channels.

Goal 1-3: Expand the Interpretive Center to include food service options and an additional gallery interpreting the history of hunting and conservation.

Tactic 1-3-a: Plan the layout and determine the key features including exhibits, artifacts, and food service options.

Tactic 1-3-b: Source exhibit firm.

Tactic 1-3-c: Construct the expansion.

The agency would like to add an attraction at the Chateau Interpretive center in the form of a museum focusing on hunting in North Dakota. Playing on the conservation legacy of Theodore Roosevelt and the history of the Chateau as that of a hunting lodge this museum will attract significant visitation from TRPL Library

701 Historical Society

State Initiative:* State Facility Investment

Explanation / Justification: Senate Bill 2018 Section 5 of the sixty-eighth Legislative Assembly provided for the Bank of North Dakota to extend a line of credit to the state historical society to provide funding to pay costs associated with the construction of a North Dakota military museum and related expansion projects for the state historical society. Also stated in this section that it was the intent of the sixty-eighth assembly that the state historical society request funding from the sixty-ninth legislative assembly from the legacy earnings fund to repay the line of credit.

State Archives Storage for Maximum Longevity & Efficiency (Priority: 4)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Film vault enhancement in State Archives	001	701-4200	70150	-	-	200,000	-	200,000	-	200,000
Total				-	-	\$200,000	-	\$200,000	-	\$200,000

State Initiative:* State Facility Investment

Explanation / Justification: As mandated by NDCC-55-02.1-03, the State Archivist is the official custodian of the archival resources of the state, which are defined by NDCC 55-02.1-01 as "noncurrent public records which are no longer essential to the functioning of the agency of origin and which the state archivist determines to have permanent value for research, reference, or other use appropriate to document the organization, function, policies, and transactions of government."

An integral part of serving as the official custodian is the ability to properly house, preserve, and create access to records of enduring historic value. In order to continue fulfilling this mandate, the State Archives is seeking funding for upgrades to current storage solutions and two additional FTEs to assist with processing, rehousing, and appraising records for historic value to increase the longevity of current storage capacity.

A recent inventory and study of the current storage space indicates the State Archives will be at full storage capacity in less than twelve years, resulting in a need for a building expansion. By maximizing space usage now and addressing the backlog and duplication of material that may be rehousing, reprocessed or weeded, an expansion may be prolonged well beyond the twelve year estimate.

701 Historical Society

Agency 701

The upgrades desired to enhance our current storage solutions include enclosed and fire proof storage carriages to better preserve priority items, such as the Original Draft of the State Constitution, and conversions of microfilm and map case storage for more efficient shelving and use of space. Additionally, we desire to replace the remaining static shelving with compact shelving, which would provide an additional 7,500 linear feet of capacity.

Historic Site Improvements and Extraordinary Repairs (Priority: 6)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

	493	701-8100	70150	-	-	-	-	-	-	3,000,000
Total				-	-	\$7,203,000	-	\$7,203,000	-	\$5,000,000

State Initiative:* State Facility Investment

Explanation / Justification: We continue on our list of historic site improvements and extraordinary repairs that have been funded over the past two bienniums. We are working to modernize and repair state structures and sites so they are welcoming and attractive to all ND residents and visitors. Only after our structures are inhabitable and usable can they be leveraged for purpose of interpretation brought into the local economy for use as a business venture.

Over the past two biennium, legislature has given the agency a total of \$7.45M for these site improvements. Our list of improvements and repairs continues to grow and there is currently a total of over \$30M need to get to done.

See Decision Package 6326 for additional attachments.

Improved accessibility and climate control in the Chateau de MorËs (Priority: 9)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	701-5030	70150	-	-	2,000,000	-	2,000,000	-	-
Add HVAC and accessibility to the Chateau	493	701-5030	70150	-	-	-	-	-	-	2,000,000
Total				-	-	\$2,000,000	-	\$2,000,000	-	\$2,000,000

State Initiative:* State Facility Investment

Explanation / Justification: Per the strategy review completed for the state-owned lands within the city of Medora, one of the goals is to complete the interior and exterior improvements ensuring accessibility to the Chateau to enable year-round operations. Funding would provide for an HVAC system within and the Chateau and also making the Chateau more accessible.

State Initiative:* Health, Vibrant Communities

701 Historical Society

Agency 701

Explanation / Justification: The State Historical Society would like to add a new grant program to provide large grants sums to local museums, historical societies, and non-profits for capital improvement projects.

Cultural Heritage Grant Program (Priority: 11)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	701-1100	70161	-	1,500,000	-	1,500,000	-	-	-
Total				-	1,500,000	-	1,500,000	-	-	-

State Initiative:* Health, Vibrant Communities

Explanation / Justification: With the ask to cut 3% from budgets, the agency made the difficult decision to cut our cultural heritage grant program from our base.

This program provides small grants to communities throughout North Dakota for a variety of projects. The demand continues to grow for these grants as we had \$950K in asks during our last grant application period, but only had \$500K that could be given. Funding would be used to continue and improve upon this grant program.

Paul Bruhn Historic Revitalization Grant (Priority: 12)

Statutory Authority

North Dakota Century Code Chapter 54-54.

Agency Description

The North Dakota State Legislature created the North Dakota Council on the Arts (NDCA) “to ensure that the role of the arts in the life of our communities will continue to grow and will play an evermore significant part in the welfare and educational experience of our citizens.” Our purpose is to bring that commitment to life.

NDCA is a grant-making agency with a commitment to supporting creators, art providers, and participants. Through grants, education, and partnerships, we seed new ideas and activities and build resilient capacity through our work with organizations, communities, artists, and educators.

Everyone deserves equal access to a full, vibrant creative life, which is essential to healthy communities. We hold ourselves accountable to the people of North Dakota and the trust placed in us. Because of this NDCA: pursues excellence and innovation in all things, pursues cultural equity throughout the state, and engages our state through fair and transparent processes.

Agency Mission Statement

We strengthen the creative capacity of North Dakota for all who live or visit here: honoring our cultural traditions, empowering excellence and innovation, and inspiring arts and culture opportunities for all.

Major Accomplishments

- 1 Arts Across the Prairie, the creative placemaking initiative, continues its work to build 8 large installations in each of the 8 regions throughout the state. Sites and artists are chosen through a comprehensive process with stakeholders within each region. Each artist will provide dedicated, on-site training to 10 local artists to create an evergreen creative placemaking network. The program is being recognized nationally through a panel discussion at the National Assembly of State Art Agencies assembly in the fall of 2024. Partnerships include North Dakota Department of Transportation, North Dakota Guard, US Forestry, and many regional municipalities and organizations.
- 2 Installation of the exhibit On the Edge of the Wind: Native Storytellers and the Land. Since its opening, the exhibition averages 7,000 visitors per month.
- 3 In collaboration with the DOCR, CREA, and NDCA, the Arts in Justice program has successfully integrated arts education within the Youth Correctional Center. This initiative has provided impactful arts experiences to students within the correctional system, fostering personal growth and creative expression.
- 4 In partnership with Dakota Legacy and the Bush Foundation, the Densmore Lakota Song Repatriation Project re-recorded, corrected speed, and cleaned-up old Lakota songs originally stored on wax cylinders at the Library of Congress for repatriation and distribution to the Lakota Nation.
- 5 A partnership with DOCR and Prairie Public Broadcasting supported the Chainz to Changed podcast. Co-producers and co-hosts, Antonio Stridiron and Zach Schmidkunz, interview high ranking DOCR officials and residents to share stories of changing lives, hope, and what it’s like doing time at the North Dakota State Penitentiary.
- 6 Arts Labs for You (ALFY) Program in partnership with NDCA, promotes the Artist in Residence (AIR) grant through the ALFY program. This program not only supports the recruitment and engagement of teaching artists but also promotes arts education and organizes professional development workshops for educators.

Major Accomplishments

-
- 7 A partnership between NDCA and SEEC continued the Afterschool Arts Learning program, which provides additional arts learning opportunities outside of regular school hours.

 - 8 Through a partnership with Sacred Pipe Resource Center, a comprehensive 18-month professional development opportunity was piloted to support artistic goals for Indigenous artists.

 - 9 NDCA piloted a new approach to professional development by organizing cohorts of teachers per school or district, scheduling workshops around already planned professional development days. This model aims to create more cohesive and sustained learning communities.

Critical Issues

-
- 1 NDCA's Creative Placemaking initiative has hit a critical point. Immense stakeholder and artist buy in and in-kind support from other state entities and organizations have all been secured. With this deep community investment, funding is needed to execute the majority of these regional placemaking works in the 25-27 biennium.

 - 2 During the two-year period from April 2023 – March 2025, NDCA will see staff turnover in half of its full-time positions (including the director position) due to retirements. In addition, another FTE has been eligible to retire since before the current biennium but has so far opted to continue employment. Together this poses both budgetary and operational challenges: ensuring salaries remain competitive in the job market, significant time and resources needed for onboarding, and the transfer of critical knowledge from these experienced staff members, all while ensuring continuity and minimizing disruption to programming.

 - 3 An ongoing critical factor of NDCA's budget is through our partnership with our federal funding source, the National Endowment for the Arts (NEA). These funds require a cost share/match to the NEA Partnership Agreement grant funds of at least 1 to 1. This match must come from state government funds that are directly controlled and appropriated by the state.

 - 4 It is critical that NDCA's grants fit the needs of our communities, organizations, schools, and artists. To retain the creative experts and project ideas that keep our communities vibrant, grants must align with regional and national opportunities. Continual evaluation of the programs and award amounts is critical to best serve the state's creative needs, with focused intention for the educational and K-12 environment.

Performance Measures

NDCA will measure program performance in the 23-25 and 25-27 biennia in the following ways:

1. The number of fundable applications received, the amount of funds granted in each cycle, and the ability to fully fund grantee excellence.
2. The local matching dollars each NDCA grant dollar generates as stated in grantee's final reports.
3. An overall increase of the number of individuals benefiting from each grant program.
4. Final reports to determine underserved areas of the state in relation to past data collected.
5. Progress on specific initiative work plans, including Arts Across the Prairie and ongoing growth of partnerships.

Additionally, valuable quantitative information is collected from all NDCA grantees as well the communities they serve. Through an upcoming Strategic Plan, NDCA will perform a comprehensive survey to learn of needs, interests, and areas of growth from individuals and organizations.

Program Statistical Data

NDCA's grants support four main program categories:

Institutional support programs comprise the largest volume of NDCA grant activity, primarily through federal funds from the NEA. During the last biennium, the Council awarded 105 grants totaling \$1,051,285 across all 8 of the state's regions. These grants leveraged an equal amount through cash matched requirements. Grant funds enhance an organization's ability to generate local match dollars, increase its ability to pay administrative and artistic staff, and impact quality of life in the community while enhancing the local economy.

Arts in Education grants support K-12 arts education through a variety of programs and partnerships. Key initiatives include expanding arts education opportunities statewide through community special projects and professional development for educators. During the last biennium, 43 Artist-in-Residencies (AIR) grants and 21 Arts in Education Collaboration (AIEC) grants offered students hands-on experience with one or more art forms. Approximately 8,800 students and 1,680 teachers, artists, administrators, and community members engaged in AIR and AIEC programs. Additionally, this program provides professional development workshops tailored for both classroom teachers and teaching artists. NDCA also administered the national Poetry Out Loud program in North Dakota, reaching over 4,000 high school students and their teachers.

In the last biennium, NDCA Community Services provided 43 Community Arts Access grants to support arts activities for arts and non-arts organizations. 27 Professional Development grants supported artists, educators, and organizations, and 34 Special Projects grants helped fund community events in all disciplines and forms. Individual Fellowships for artists are awarded to two artists per year in various disciplines.

A major component of Folk and Traditional Arts is the apprenticeship grant program, which offers direct financial support for master traditional artists to teach apprentices, ensuring the continuation of traditional art forms. Some of the cultural traditions preserved include Norwegian rosemaling, Nepali music, spur and bit making, Lakota porcupine quillwork, Ma'di headdress construction, Swedish bonadsmalning, saddle making, quilting, Chinese dance, and much more. Another program is Art for Life, which pairs local arts organizations with elder-care facilities and schools for health and wellness. During the last biennium, 31 grants supported 41 master artist/apprentice teams throughout the state where 340 artworks were created/learned. In addition, 58 concerts, performances, readings, or demonstrations were produced. In total, 106 artists were involved, 1,263 children were reached along with 3,592 adults benefiting.

Across all programs, NDCA funded 368 grants totaling over \$2.25 million during the 21-23 biennium. These grants supported projects in 70 communities from all 8 regions and benefited North Dakota's residents and visitors by providing 1,341,186 arts interactions by adults and 308,643 arts interactions by youth in the state. Creative partnerships include Prairie Public Broadcasting, The Art for Life Program, North Dakota Parks and Recreation, Sacred Pipe Resource Center, North Dakota Department of Corrections and Rehabilitation (DOCR), the Central Regional Education Association (CREA), and the South East Education Cooperative (SEEC).

Explanation of Program Costs

NDCA's 23-25 biennial appropriation is comprised of three lines:

1. Salaries - 28.5% % of budget
2. Operating - 18% of budget
3. Grants - 53.5% of budget

These in turn support:

1. 11 Grant Programs for artists, arts organizations, K-12 education, and North Dakota communities.
2. Additional Statewide Programs: Art for Life, Poetry Out Loud, Statewide Arts Convening in conjunction with Main Street, Governor's Awards for the Arts, public exhibitions at the State Capitol, Accessibility training for organizations, and community fieldwork.
3. Numerous partnerships with nonprofits and many state agencies.
4. Strategic Initiatives such as Arts Across the Prairie Creative Placemaking Initiative, Indigenous artist professional development training, and the ongoing incorporation of Accessibility principals across the agency.

Program Goals and Objectives

NDCA pursues four long-term goals that drive programs aligned with the Governor's five strategic initiatives:

1. Art and Creative Process for All: Working toward a North Dakota in which all can experience arts and culture – diversity of tradition, of genre, of exposure. All can participate. All are welcome.
2. Vibrant Communities: Regions, cities, communities, and networks across the state appreciate the power of the arts. They use that power to enhance the vitality of North Dakota. They celebrate the vibrant communities that result, each with arts and culture at their core.
3. Thriving Arts Ecosystem: NDCA, communities, organizations, artists, and educators thrive in an interdependent, mutually supported, system. Each has resilient capacity aligned for impact.
4. Excellence and Innovation: NDCA models excellence and innovation for the field. It sustains its gains through self-reflection, evaluation and continuous improvement. Its innovative partnerships open doors to greater influence and impact, increase its efficiency, and leverage its resources.

To meet these goals, Arts in Education plans to build upon stable partnerships while supporting schools and educators in increasing ways. New and expanded partnerships include the Arts in Justice Program in collaboration with North Dakota Department of Corrections and Rehabilitation (DOCR) and the Central Regional Education Association (CREA), Professional Development Cohorts for teachers per school or district, Arts Lab for You (ALFY) Partnership, and providing Real-World Work Experiences in the arts for students.

NDCA Grants Program will continue ongoing evaluation of accessibility, approachability, and the effectiveness of the grant programs and levels of support that we provide to our grantees.

Folk and Traditional Arts seeks to build new partnerships and continue the valuable work of supporting the traditions that run deep within the state. We aim to continue to grow the apprenticeship program which often acts as a springboard to other NDCA grant opportunities. New and expanded partnerships include ND Health and Human Services – Adult and Aging Services, State Historical Society of ND/ND Heritage Center, American Scandinavian Foundation, Bush Foundation, ND Long Term Care Association, Activity Professionals of North Dakota and Arts Midwest, among more.

NDCA special projects and programs goals include building partnerships that amplify the work done within our communities to broaden reach and maximize benefits. Creative placemaking initiatives will build upon the template for creative works brought to the state by its communities. Additional approaches include pairing programming and grants to bring multiple opportunities within one visit or contact and building upon partnerships with other state agencies and initiatives.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCA continues to need a dedicated Grants Program Officer to handle its Community Grants. These grants include Community Arts Access grants, Special Projects grants, Professional Development grants, and Individual Artist Fellowship grants. Combined,

709 Council on the Arts

Agency 709

these grant programs provided funding through 85 grants during the last biennium (July 2021-June 2023) despite heavy impacts from COVID. Demand is increasing once again in the current biennium.

This position will also be responsible to maintain NDCA's online grant system (Foundant), serve as the primary liaison with Foundant and main point of contact for staff concerning system questions and issues, and will provide staff training as needed.

In addition, this position will assist NDCA's Executive Director in administering the Institutional Support grant program, which supports over 50 well-known non-profit arts organizations across the state each biennium.

Everything NDCA does is to improve the lives of North Dakotans and those who visit here through increased access to arts and culture opportunities so that all can experience the power of the arts. We do this through our grant programs, which allow us to distribute over half of our total biennial budget to non-profits, communities, schools, and artists across the state.

Necessary resources for implementation (including FTE's)*: Approval for 1 FTE and increased state funding of \$172,772 for salary and benefits.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for new funding and FTE resources.

Who is served and impact of not funding*: NDCA's grantees and prospective grantees will be directly served and positively affected by the addition of a new grant program officer. Funding for this position will allow a dedicated staff member to be a point person for the majority of our grants, which will build new relationships and partnerships with constituents and organizations. In addition, this staff member will have capacity to assist with grant inquiries, a critical component to supporting our community.

Staff will also be positively impacted by added staff resources to share the workload, one that is multi-faceted for each staff member in our small agency. Without this funding, NDCA will continue to struggle at current capacity, and will be unable to grow granting capacity, a major need for our community's vitality.

Existing PT Temp Employee to FT Temp Hours (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

709 Council on the Arts

Agency 709

Request explanation and justification (include any statutory authority)*: During the last legislative session NDCA was funded \$35,359 for a part-time temporary employee for the 23-25 biennium. The funding provides a pay rate of \$17/hour for up to 20 hours per week. However, as NDCA has expanded programming and outreach efforts, staff appointments have not kept up with the growth.

In order to facilitate everyday workflow and administrative tasks to support NDCA Program Officers, this position must expand to full time which then requires funding for single health insurance policy for the temp position. In addition, the staff member in this role has taken on many extra duties since hire and is in need of a raise to \$20-22/hour to match this new responsibility.

Necessary resources for implementation (including FTE's)*: State funding of \$85,713 is needed for the 25-27 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional funding resources.

Who is served and impact of not funding*: NDCA's constituents, staff, and the incumbent temporary employee will all be served by this position being funded for additional work hours.

NDCA has done a notable job serving the state with a small staff. Without funding, NDCA's administrative and internal capacity will be stretched to an impractical level. With new initiatives implemented in the past and current biennium, staff capacity continues to receive new demands. This funding is critical for the function of the agency.

Completion of Arts Across the Prairie Public Artworks (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	559,750	559,750	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	559,750	559,750	0.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: There is great momentum with the Arts Across the Prairie (AAP) initiative, with activity underway in 6 of the state's 8 regions. Immense stakeholder and artist buy-in, as well as in-kind support through partnerships with other entities (including NDDOT, ND National Guard, and US Forestry) have been secured.

However, despite deep community investment, the initiative has hit a critical point. Funding is needed to bring these regional placemaking works to completion in 25-27 biennium. This state investment, together with the in-kind support from our partner entities, will see these placemaking pieces to fruition and ready for visitors to experience.

Funding is requested for the following needs:

Professional Fees & Services:

*Engineering fees - \$60,000 - Engineering fees needed for AAP site preparation.

*Contractor fees - \$175,000 - Construction personnel to perform the site prep work needed.

Building/Grounds Maintenance:

*Materials - \$220,000 - Site materials for clearing and build. These include topsoil, seeding, parking lot and pathway materials, and grading costs.

*Signage - \$12,500 - Stop signs, ADA parking signs, and wayfinding signs are needed. Additionally, once Arts Across the Prairie works are installed, signage will provide an educational component to the work. Explaining artist intention as well as community participation in the project allows for a deeper experience for the visitors.

Travel:

*Travel - \$17,250 - The sites secured for Arts Across the Prairie are all in rural locations, requiring staff to travel and provide support to the stakeholders, landowners, artists, and community partners. This funding will support approximately one trip per month during the biennium for NDCA staff to facilitate these critical meetings as well as allow them to be on site to host community events.

Grants:

*Regional Partner Grants - \$75,000 - The artists selected in each of the regions are paid a set artist fee for their original design and involvement throughout the months and sometimes years-long process of creating these large scale, community-driven sculptures and installations. This request will allow NDCA to grant funds to regional AAP partners in need of support to fully fund the artist fee for their region.

Note: Region 3 is in the early planning stage with site selection and community outreach about Arts Across the Prairie's impact and may not be fully completed in the 25-27 biennium. Regions 5 and 7 have not yet begun the planning process. NDCA expects these regions to be fully active and completed during the 27-29 biennium.

Necessary resources for implementation (including FTE's)*: State funding of \$559,750 is needed for the 25-27 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional funding resources.

Who is served and impact of not funding*: The entire project of Arts Across the Prairie is served by the funding of these costs, and therefore the surrounding communities and future visitors are served as well.

Not funding would freeze the project.

FT Temp Employee (not Contractor) for Arts Across the Prairie (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	49,376	-	49,376	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	49,376	-	49,376	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: While funding received through the last legislative session supported a contracted site manager for Arts Across the Prairie, it was quickly realized that NDCA needed an internal staff member to manage the program. The work is closely tied to NDCA’s core mission and values and due to the scope and breadth of the work, it became clear that the role needed to be staff-based.

This request covers the balance of funding needed to support an AAP Program Manager as a temporary position at full-time status.

Necessary resources for implementation (including FTE’s)*: State funding of \$49,376 is needed for the 25-27 biennium.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for additional funding resources.

Who is served and impact of not funding*: This funding will serve the entire health of the Arts Across the Prairie Initiative, as it allows for streamlined operations and communication, as well as the proper execution of the agency’s mission by supporting all those invested in the process.

Without a temporary full-time Program Manager on staff, the work would stall, as that individual connects all components of the operation and provides forward movement for each region’s initiative.

Art Across the Prairie Education Component (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	5,000	-	5,000	0.00	-	5,000	5,000	0.00

709 Council on the Arts

Agency 709

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Arts Across the Prairie aims to grow into an evergreen template for creative placemaking projects within the state.

To promote community participation, funding is needed to support educational art opportunities for the region-specific works. This can take form through NDCA supported projects for teachers which help students envision their place in the community and supporting their vision for growth.

Necessary resources for implementation (including FTE's)*: State funding of \$5,000 is needed for the 25-27 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional funding resources.

Who is served and impact of not funding*: Students and schools will be served through educational art opportunities provided to them by NDCA. This funding will allow the project to provide a deeper understanding of not only the site-specific work, but of the benefits of supporting community.

If funds are not received, one of the first outreach goals for the project will not be implemented. Outreach is critical to the vitality, and therefore the visibility, of the project.

Leave Payout (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	40,000	40,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	40,000	40,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Even after three retirements between April 2023 – March 2025, one additional NDCA FTE is eligible to retire. Although this employee has so far opted to continue working, we need to be prepared for his potential retirement in the 25-27 biennium.

In addition, non-retiring staff who leave state employment or transfer to another agency are likely to have leave that would need to be paid out.

709 Council on the Arts

Agency 709

Under state and federal labor laws employers must pay out an employee’s balance of earned, unused annual leave upon separation of employment. If the employee is non-exempt under the Fair Labor Standards Act, the balance of the employee’s comp time that was earned in lieu of overtime pay must also be paid out. HRMS rules further require a pay out of 10% of an employee’s sick leave balance if the employee has 10+ years of state service.

Necessary resources for implementation (including FTE’s)*: State funding of \$40,000 is needed for the 25-27 biennium.

Are resources being redirected or are they new or additional (including FTE’s)*: Resources needed are new state general funds.

Who is served and impact of not funding*: Beyond the employee being served by being treated lawfully, the State of ND and NDCA are well-served by complying with applicable laws and rules. If funding is not provided, the State could be in violation of employment law and the employee would have basis to file a wage claim for the unpaid leave, which may include Interest and penalties if the violation is considered willful. It would also be a black eye for the State as an employer should it not comply with state and federal employment laws.

Total				-	-	75,000	-	75,000	-	-

State Initiative:* Health, Vibrant Communities

Explanation / Justification: There is great momentum with the Arts Across the Prairie initiative and all community planning is in place, however, artist fees must be funded for the installations to be produced. Artists are paid for the months and sometimes years-long process of creating these large scale, community-driven sculptures and installations.

This funding will permit NDCA to ensure each of the currently active regions has the funding needed to engage their selected artist.

Statutory Authority

North Dakota Century Code Title 20.1.

Agency Description

The North Dakota Game and Fish Department manages publicly the state of North Dakota’s fish and wildlife resources for the benefit of the public. The Game and Fish Department consists of five major divisions, as follows:

- Administrative Services provides policy, planning, and support services and is responsible for all game and fish licensing.
- Fisheries manages the state’s fisheries.
- Enforcement provides enforcement of the laws and regulations governing the use of the state’s wildlife resources and recreational waters.
- Conservation and Communication informs the public of rules, regulations, and guidelines for safe, lawful hunting, fishing, trapping, and boating.
- Wildlife provides for the management of wildlife resources in the state.

Agency Mission Statement

The mission of the North Dakota Game and Fish Department is to protect, conserve and enhance fish and wildlife populations and their habitats for sustained public consumptive and appreciative use.

Major Accomplishments

- 1 Continued development and enhancement of 400-plus productive fishing waters across the state; partnered with landowners and local entities on providing fishing opportunities; continued a state/federal partnership allowing for some of the highest fish production stocking in North America.
- 2 The Department’s Private Land Initiative (PLI) worked with nearly 2,500 private landowners to provide 800,000 acres of private land to hunters through the well-known Private Lands Open To Sportsmen (PLOTS) program. Efforts to increase habitat and expand access to 1M acres of quality habitat are ongoing. PLI developed new habitat on private land enrolled in PLOTS and through conservation partners, soil conservation districts, USDA programs, Outdoor Heritage Fund, Meadowlark Initiative and other partnerships.
- 3 Implemented electronic, paperless licensing and lotteries and continue to expand digital capabilities.
- 4 Improved efforts to restrict aquatic nuisance species utilizing automated technology.
- 5 Expanded education and outreach to the public on Chronic Wasting Disease (CWD) by forming a task force and updating the Department’s CWD plan utilizing the best science available.
- 6 Continued increase in youth participation in shooting sports programs.
- 7 Increased emphasis on initiating hunter and angler recruitment, retention, and reactivation efforts.
- 8 Expanded on-line hunter education opportunities to accommodate demand and to increase efficiency in the certification process.
- 9 Partnered with local municipalities along Lake Sakakawea and Lake Oahe to increase boat ramp accessibility.

Major Accomplishments

- 10 Expanded the shooting range grant program to fund larger shooting range projects throughout the state.
- 11 Maintained 241 wildlife management areas and developed new acquisitions and donations.
- 12 Continued growth mindset with fish and wildlife research to increase management capabilities.
- 13 Coordinated numerous research studies to answer crucial questions regarding wildlife and fisheries management.
- 14 Conducted population monitoring on over 50 game species which provided key data to issue sportsmen and women with over 260,000 hunting licenses each year.
- 15 Initiated the process for the 10-yr update to the State Wildlife Action Plan, the document for guiding the management and sustainability of the state’s rare, declining, and "At-risk" species. Staff met with nearly 40 conservation partner/stakeholder groups and a dozen external experts.

Critical Issues

- 1 Hunter and angler recruitment, retention and reactivation
- 2 Minimizing the risk of spread of Aquatic Nuisance Species within the state
- 3 Wildlife disease (Chronic Wasting Disease, pneumonia, Epizootic Hemorrhagic Disease)
- 4 Habitat loss
- 5 Decreasing hunter numbers/license sales
- 6 Access (hunter, angler, boater)
- 7 Landowner/sportsmen relations
- 8 Lack of ability to provide conservation easements
- 9 High crop land rental rates
- 10 Need customer demographics
- 11 Secure USFWS hatchery funding and inclusion of recreational fishing in their mandates
- 12 Impacts from water management decisions affecting fish & wildlife
- 13 Lack of shooting ranges within 50 miles of some populations greater than 5,000
- 14 Becoming more difficult to find partnerships to maintain fishing access sites
- 15 Create additional Agriculture partnerships
- 16 Education and outreach to newly elected legislators and leadership positions

Performance Measures

ADMINISTRATIVE SERVICES

- 1. Successful completion of state and federal audits.
- 2. Ensure compliance with laws, regulations, and audit requirements.

720 Game and Fish

Agency 720

3. Maximum use of available federal funding for department programs.
4. Adequate office, shop and office facilities at all major headquarters.
5. Efficient, up to date technology systems for the agency.
6. Adequate secretarial and telephone support for the agency.
7. Efficiently issue hunting, fishing and boating licenses in North Dakota.
8. Provide accurate, timely and quality customer service
9. Oversee the fiscal management of the Department (revenue, expenditures, fund balance)

FISHERIES

Angler participation metrics –

1. Total fishing license sales – 210,000
2. Total angler effort (days) – 1.7M.
3. Active resident angler participation - 132,000
4. Resident adult participation – 25%
5. Angler satisfaction - High

ENFORCEMENT

1. Maintain an enforcement database to track calls for service and violations.
2. Calls reporting violations are responded to in a timely manner and documented in a central reporting system.
3. Boating related fatalities less than 5 per 100,000 registered boats per year, annual reportable accident rate of less than .5% of registered watercraft.
4. Regulate and monitor Guides & Outfitters as well as all other department issued commercial licenses for compliance.
5. Monitor and investigate license fraud.
6. Identify and apprehend persons in violation within our jurisdictional authority.

7. Through enforcement of game and fish laws, rules and regulations, add to the department's ability to manage wildlife life and fisheries within the state.
8. Administer the Boat Safety Program - Provide grants to county law enforcement to assist in the promotion and enforcement of boat and water safety on their local recreational waters.

CONSERVATION AND COMMUNICATIONS

1. Increase public awareness about wildlife management, conservation, wildlife species and the relationships of important habitats to these species. Develop in the public a wildlife stewardship mindset and the ability to make informed decisions, which benefit wildlife and habitat in North Dakota.
2. Introduce and inform North Dakotans about rules, regulations, management and ethics for safe hunting, fishing and boating, as well as recruit, retain, and reactivate hunters, anglers, and trappers.
3. Manage nongame species in a manner that ensures populations will remain healthy and viable by working with private landowners, conservation agencies/groups and the general public
4. Coordinate resource-planning activities with other state and federal agencies, policymakers, and the private sector in order to minimize fish and wildlife habitat losses associated with development or construction activities on public and private land.

WILDLIFE

1. High hunter satisfaction and hunting quality as a result of sufficient populations of big game, waterfowl, upland game, and furbearer species.
2. Reasonable access to quality hunting opportunities on both private and public lands of North Dakota.
3. High hunter recruitment and retention with relatively low level of conflicts with private landowners associated with wildlife damages, noxious weeds, and hunters.
4. High landowner satisfaction of those landowners taking part in the Department's private land access program.

Program Statistical Data

ADMINISTRATIVE SERVICES

Over 800k fishing, hunting, & boating licenses are distributed & processed annually. 100% online licensing, lotteries, watercraft. Over 285,827 customers served. In lieu of tax payments are made as required by law. Federal funding administrative requirements are met.

FISHERIES

More than 140k res & 60k non-res adults purchase fishing licenses in ND annually. Collectively, these anglers fish approx. 1.3M days in state waters. Anglers also generate \$1.7B (including more than \$39M in state tax collections) in gross business volume annually. More than 80% of all angler's target walleye & overall angler fishing satisfaction remains high. Over the past 10 yrs, ND's fishing waters have been stocked annually w/ approx. 1M northern pike, 10M+ walleye, 400k trout & salmon, & supplemental stocking of crappie, bluegill, largemouth & smallmouth bass, channel catfish & muskie. Fisheries mgmt. surveys are conducted on many of the 400+ waters annually. The Development program provides facilities for 70+k registered boat owners & 200+k anglers. ND's Aquatic Nuisance Species program

has led to an increase in statewide inspections of watercraft, development of infrastructure for watercraft cleaning stations, intensified educational efforts & increased monitoring.

ENFORCEMENT

The Enforcement division strives to reduce illegal activities that could adversely affect game & fish populations. The division should attend 150-300 public meetings & contact between 40k & 50k people a biennium. Assistance should be given to the public & landowners & all landowner complaints should be investigated.

CONSERVATION AND COMMUNICATIONS

Provided over \$2M in the last 5 yrs to construct shooting complexes in Watford City, Fargo & other locations. Provide \$110k annually to community shooting ranges. Produce & distribute weekly news & press releases to 110 ND media outlets & more than 50k individual subscribers. Website views 8.5M/yr. Social media followers through Facebook & Instagram 45k, website users 1.4M, YouTube channel views 1.3M, a blog & podcast. Produce & distribute weekly audio news releases to state radio stations. Certify 4,500-5,500 hunter education students per year; includes online hunter education. Train & support 650 volunteer outdoor education instructors. Administer the Boating Basics Course to 1k-1,500 annually. Coordinate & manage 10-12 major events annually using volunteers to deliver programs to over 30k youth and adults. Produce 10 issues annually of ND Outdoors magazine for 31k subscribers. Handle 30k telephone calls per year & respond to 8k mail requests. Broadcast 52 television news features & 52 webcasts per year. Design & manage a Dept website that averages more than 1.5M pageviews per month. Conduct environmental reviews & provide technical input to mitigate impacts on approx 500 development projects annually. Respond to approx 1k phone calls, emails or walk-in inquiries on development projects, regulatory-related issues, or specifics pertaining to rare & declining fish and wildlife. Participate in about 100 interagency or project-related meetings annually to discuss environmental issues assoc w/ developmental projects or habitat loss. Grants & programs designed to educate & engage citizens, boost participation, establish habitat conservation demonstrations, & aid in enjoyment of nongame resources are provided. The workshops, informational meetings, & personal contacts reach over 1k individuals per year. Reach 20k customers during the Dept's state fair effort. Organize & coordinate annual events to recruit, retain, & reactivate hunters, recreational shooters, trappers, anglers, & boaters. In 2024, National Archery in the Schools program included 8,881 participants statewide; the state competition had 939 bullseye archers and 738 participated in the 3D shoot.

WILDLIFE

Over 350k user days are spent hunting big game, resulting in annual expenditures of over \$55M. Approximately 50k gun deer hunters will harvest appropriately 30k deer & 27k bowhunters will harvest around 7,000 deer. The Dept expects to issue about 250 moose permits, 800+ elk permits, 4-8 bighorn permits, & over 500 pronghorn licenses. The pronghorn population was severely impacted from the winter of 2022-23 resulting in a drop from 1,650 licenses to 415 in 2023. Approx. 49k waterfowl hunters will spend 255k hunter days & \$44.3M harvesting 243k ducks & about 218k geese. We predict roughly 95k upland bird hunters (70k res, 25k nonres) will spend over \$87M annual & over 540k hunter days harvesting an estimated 67k gray partridge, 67k sharp-tailed grouse & about 300k pheasants annually. In an average year fur sales total a minimum of \$700k in ND, but international fur markets have weakened considerably. Full & aggressive implementation of the private land initiatives will help maintain or increase recreational opportunities. About 1.5M days are spent hunting each year, generating direct expenditures of approx \$187M annual.

Explanation of Program Costs

ADMINISTRATIVE SERVICES

Salaries for 26 Full-Time Equivalent (FTE) positions and temporary staff.

720 Game and Fish

Agency 720

Operating costs include, but are not limited to, travel, information technology costs, printing/tags for the licensing section, postage, utilities, insurance, legal fees, buildings and grounds maintenance supplies and repairs.

Extraordinary repairs to buildings and grounds for Department owned facilities and shops statewide. In Lieu of Tax payments for all Department lands.

Grants and agreements. A special line for Department Grant-Gift-Donations.

FISHERIES

Salaries for 27 FTE positions. Temporary salary funds for seasonal workers. Operating costs for fish production and distribution, fishery research and surveys, fishing area and boating facility development and maintenance, dam repairs, grant to Garrison Dam National Fish Hatchery for O&M, local entities for boating and fishing access facilities, grant to ND Parks and Recreation to support the operation of boating access facilities in state parks, and the Aquatic Nuisance Species special line. Federal Funds are 60% of the Fisheries budget.

ENFORCEMENT

Salaries for 40 FTE and temporary employees. Travel is the major expense. District game wardens drive over 2M miles per biennium using State Fleet vehicles. Vehicle changeover installation is not part of state fleet rental rates. Other costs are, but are not limited to, professional supplies such as in car video systems, body cameras, mobile data computer consoles, binoculars, firearms, boating related items and uniforms. Equipment is replaced at a rate to maintain reliability and cost efficiency. Grants for sheriff's departments and dive rescue teams for recreational boating safety and search and rescue work. The Missouri River Enforcement Special Line for salaries and operating expenses of department employees coordinating or performing Missouri River law enforcement activities and for grants to local law enforcement agencies which are funded 50% with US Coast Guard boat safety federal funds.

CONSERVATION & COMMUNICATION

Salaries for 23 FTE and temporary employees. The division's operating costs are for the communication section, education section and conservation section. Some programs include aquatic and hunter education, boating education, youth mentoring program, national archery in the schools program, ND Outdoors magazine, ND Outdoors weekly television program, web page management, supplying publications to the public, environmental reviews, work involving the Endangered Species Act, etc. Also, natural resource related reviews and recommendations are provided to private and government entities. Federal funds are used for shooting range grants throughout the state. Other grants are State Wildlife Grants, Pollinator Plots Program, expenditures to increase or enhance the Recruitment, Retention, and Reactivation of hunters, anglers, trappers, boaters, and recreational shooters of all ages, genders, and abilities. Also, includes 2 special lines: Shooting Sports Grant Program and Nongame Wildlife.

WILDLIFE

Includes salaries for 54 FTE. Temporary salary funds are requested for seasonal workers.

Operating costs, include but are not limited to, Department managed lands, wildlife surveys and investigations, grants to organizations on cooperative projects.

Extraordinary repairs (e.g. fences, roads, water control structures) on department wildlife management areas (WMA) statewide. Equipment items. Land acquisitions of small tracts near wildlife management areas, possibly in-holding or round-outs that may come up during the biennium. Grant to reimburse the State Veterinarian for costs related to oversight of farmed wildlife producers and the administration of wildlife propagation permits.

The Private Land Habitat and Deer Depredation special line's largest expenditure is landowner payments for Private Land Open to Sportsmen (PLOTS) program allowing walk in access to the public. It also includes costs for big game depredation.

Other Special Lines are: Noxious Weed Control, Lonetree, and Wildlife Services.

Federal funds are 60% of the Wildlife budget and are from various federal agencies, the majority is from US Fish & Wildlife Service.

Program Goals and Objectives

ADMINISTRATIVE SERVICES

To provide Department policy making, planning, and coordination of programs. To have support services for the entire Department. Maintain and monitor all fiscal functions and human resource management of the department. To provide game and fish licensing as established by the Legislature and Governor's proclamations. To make in lieu of tax payments for Department lands as required by law. Maintain and provide guidance so federal administrative requirements are met.

FISHERIES

The mission of the Fisheries Division is to provide diverse and valued fishing opportunities for public enjoyment while safeguarding the fishery resource. Further,

- Maintain and enhance angling opportunities for recreational fishing by application of scientific management, survey, research and culture techniques.
- Optimize fishing and boating oriented recreation activities on North Dakota's lakes, rivers and reservoirs with boating and shore fishing facilities.
- Provide hatchery produced fish needed to stock North Dakota waters.
- Preserve and enhance fisheries habitat in North Dakota.
- Protect North Dakota waters from aquatic nuisance species

ENFORCEMENT

To enforce the provisions of Title 20.1 of the North Dakota Century Code, the Governor's proclamations, and Department regulations to assure an orderly and controlled harvest of wildlife populations and to protect the wildlife resource and the rights of all citizens. To ensure reasonably safe boating use of North Dakota's recreational waters to save lives and protect property. To provide law enforcement on Department Wildlife Management Areas for public safety and intended uses. Provide assistance to other Divisions within the department, to achieve Department objectives. Assist other law enforcement agencies, tribes, and departments within the state when called upon. Perform functions as necessary within the State Emergency action plan. Provide grants to county law enforcement to assist in the promotion and enforcement of boat and water safety on their local recreational waters.

CONSERVATION AND COMMUNICATIONS

- Inform North Dakotans about rules, regulations and guidelines for safe, lawful hunting, fishing, boating and trapping experiences.
- Educate people about outdoor ethics, principles of wildlife management and ecological relationships.

- Enlist and train volunteer instructors in this effort.
- Recruit, retain, and reactivate hunters, trappers, anglers, boaters, and recreational shooters through education and awareness of outdoor opportunities
- Create a stewardship conscience in people and promote the sustainable use of our natural resources,
- Provide assistance programs and incentives for individuals and groups to protect and conserve habitat and enjoy wildlife.
- Provide project review and recommendations to developers in an effort to avoid, minimize, and mitigate impacts to important wildlife habitat in North Dakota.
- Stem declines of our state's rare and declining "Species of Conservation Priority" through implementation of the North Dakota's State Wildlife Action Plan (SWAP).
- Coordinate Department activities with state, federal and private interests.
- Maintain Department habitat base information.
- Formulate Department responses on activities which affect fish and wildlife resources in North Dakota.
- Implement the Outdoor Wildlife Learning Sites (OWLS) program and the Watchable Wildlife Project.

WILDLIFE

This program includes Department responsibilities for the management of wildlife in North Dakota. The manipulation and distribution of wildlife and their habitat on Wildlife Management Areas (approx. 220,000 acres) are accomplished to maintain acceptable populations of these species to provide optimal recreational opportunities for both consumptive and non-consumptive users. There are about 100,000 resident and 50,000 nonresident hunters in North Dakota. This program includes the Private Lands Initiative (PLI). It is designed to improve wildlife habitat and foster better working relationships between the agricultural and wildlife communities. The goal of 1,000,000 acres of public hunting access on private land by 2009 was reached two years early in September 2007. The PLI fell below 1M acres due to CRP loss in the state. In 2017, a survey was conducted to ask the users if they wanted quantity over quality. The users chose quality, and quality habitat is more expensive to create and get access too. Thus, PLI has worked to improve existing acres in the program and attract high quality acres while maintaining around 800,000 acres. PLI is the Departments main program for implementing the Department's goals on private lands statewide.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

720 Game and Fish

Agency 720

Request explanation and justification (include any statutory authority)*: \$34,000 for State fire and tornado insurance: Premiums had a 15% increase annually. NDIRF conducted a survey on our building values, and they are underinsured and the values need to be increased, which will increase the premium as well.

\$114,420, 7.5% increase for in lieu of taxes (75% federal)

\$139,782 Fisheries operating base, 6% increase, due to inflation: The biggest part of Fisheries Division is field orientated (boat ramps, parking lots, etc.). The cost of construction for gravel projects and has gone up significantly. Field costs and costs associated with developing new fishing and maintaining existing water has increased.

\$25,691, Enforcement operating base, 2% increase, due to inflation: The Enforcement department spends most of their time conducting fieldwork, and various costs associate with their operations have experienced significant increases. These costs cover a range of needs from basic supplies to operational expenses, reflecting the challenges and demands faced by the department in carrying out its duties effectively.

Wildlife \$150k increase for operating costs on Wildlife Management Areas (WMA); \$75k increase for CWD/Disease testing, surveillance and outreach; \$125k increase for division wide operating costs; \$125k increase for operating costs on roads, fence, grazing infrastructure development on new and existing WMAs; \$110,500 operating costs for ongoing northern pintail study and \$125k increase on capital improvement base roads, fence, grazing infrastructure development on new and existing WMAs.

\$15,000 Conservation and Communication: Allocate additional funds in the base budget to replace camera video equipment, crucial for the Conservation and Communication division, as per the division's established replacement cycle.

\$440,000 IT Monthly rate increase: Using the NDIRF Budget Guidelines, the ND Game and Fish Departments estimates Data Processing (DP) and Telecommunications (TC) increase of \$640,000. The OMB IT Rate adjustment total nearly \$200,000 for DP increases and does not include any TC adjustments for a difference of \$440,000. The NDIRF adjusted rates that have not been included with the OMB IT Rate adjustment include:

- Application/Database hosting fees for Online Services, Warden Incident Management System, Business Applications, /Mapping Applications
- Dedicated Infrastructure
- Application Support and Development
- Building/Video Surveillance Licensing
- Disk Storage
- Phone service
- Call Center Agents

These systems are necessary for the Department to deliver customer service by phone as well as provide services to all customers enabling the Department to use technology to manage many Department programs, systems, and data. These systems include online licensing, lotteries, watercraft registrations, hunter education, Department business applications, warden incident management, and all digital data.

720 Game and Fish

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: NA

Who is served and impact of not funding*: •Buildings will be underinsured.

•Facilities will become outdated, and cost for repairs will continue to escalate.

•We would not be able to maintain our portion for taxes paid to counties in which the department owns or leases land.

•Operating costs for fisheries, wildlife and enforcement would suffer significant losses due to not being able to keep up with today's prices on construction costs, gravel, paving, fencing, etc.

•Video equipment would not be on an established replacement cycle and would not be able to be replaced, as it's shelf life would be of no value

•Disruption of customer service.

•Impacts online services.

Adjustment to Base-Motorpool (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	321,100	-	321,100	0.00	321,100	-	321,100	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	366,231	-	366,231	0.00	366,231	-	366,231	0.00
Total	687,331	-	687,331	0.00	687,331	-	687,331	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increase in motorpool costs due to rising fuel prices based on Department of Transportation Fleet Services Budget Guideline Rates.

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: NA

720 Game and Fish

Agency 720

Who is served and impact of not funding*: Motorpool costs are incurred during the day to day operations of the Department and are essential in serving our customer base. A reduction in motorpool allocation would result in a reduction of services such as enforcement activities, management of our Wildlife Management Areas, delivery of our Private Lands Initiative, management and development of the state’s fisheries, monitoring and surveillance of Aquatic Nuisance Species and wildlife diseases including Chronic Wasting Disease, and the responsibility of implementing the Statewide Action Plan for species of conservation priority. Our entire customer base including hunters, anglers, trappers, and watercraft operators would be impacted, at varying levels, by a reduction of motorpool cost allocation.

Additional emphasis on Wildlife Habitat and Access on Private lands (Line 70) (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	4,100,000	4,100,000	0.00	-	2,460,000	2,460,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	900,000	900,000	0.00	-	540,000	540,000	0.00
Total	-	5,000,000	5,000,000	0.00	-	3,000,000	3,000,000	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request follows on the heels of last biennium which placed much needed emphasis for habitat on private lands. The work has only begun. Last biennium was a step in the right direction and a much-needed boost to modernize the Private Lands Initiative. Unfortunately, habitat conditions in the state are trending in the wrong direction. Additional appropriation authority will allow the Department to be seek additional grants and funding opportunities to expand habitat in a timely and efficient manner. Many of these grants will be 75% federal funds or require minimal State funding as match. Having the appropriation authority on the front end allows the Department to plan out and seek grant funds as well as quickly respond when new opportunities arise.

In the last decade, North Dakota has lost over 2.5 million acres of grasslands, including CRP and native prairie. In addition, nearly 60% of North Dakota’s wetlands have been converted, tree rows, fence lines and abandoned farmsteads have been removed. This is most evident in eastern ND, but central and western ND are experiencing this as well. Some deer units in eastern ND have seen an 85% decrease in deer harvested due to habitat loss. Habitat conditions in North Dakota are at a crossroads. With over 90% of land in North Dakota held in private ownership, the Department must increase efforts on private land by developing critical wildlife habitat.

- \$2,000,000 additional appropriation authority to increase PLOTS acres and habitat development on those areas. The Department’s goal is to increase enrolled PLOTS acres by 120,000 – 160,000 acres with 6,000 acres of habitat development and improvement per year. 75% Federal (\$1,500,000).

- \$3,000,000 additional appropriation authority to allow the Dept. to seek grant opportunities for additional habitat and partnerships.

- \$2,000,000 to expand Rangeland Legacy Program (30-year agreements)

720 Game and Fish

Agency 720

-\$1,000,000 expand Habitat Development Program

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: The Department receives federal funds from excise taxes on the sale of guns, ammo and archery equipment which is allocated to the states by a formula. These funds are from the USFWS and are known as Pittman-Robertson (PR) funds. We have received an increase of these funds over the past years and projections show this increase will continue. These funds are apportioned to States from USFWS by law and are not dependent on Congress approval. These PR funds have a 2-year window to be obligated by the department; otherwise, we will lose the funds and they will revert to the USFWS to be allocated to other states. Abundant grant opportunities are available with additional funding the Department may be eligible for to use to expand habitat and hunting access. These grant funds are available from various sources with varying matching requirements.

Who is served and impact of not funding*: This additional federal and special spending authority will benefit hunters seeking more habitat and hunting access and private landowners who have expressed interest in developing wildlife habitat on their land.

These funds are apportioned to States from USFWS by law and are not dependent on Congress approval. These PR funds have a 2-year window to be obligated by the department; otherwise, we will lose the funds and they will revert to the USFWS to be allocated to other states.

Other grant funding opportunities come available during different times of the year and biennium. The Department is seeking this additional spending authority to be in a position to act upon and submit proposals in a timely and efficient manner when they become available. Missed opportunities may occur if grant funds are not secured resulting in fewer acres of habitat development and hunting access.

Adjustment to base-Temporary Salaries (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	77,756	-	77,756	0.00	77,756	-	77,756	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	187,744	-	187,744	0.00	187,744	-	187,744	0.00
Total	265,500	-	265,500	0.00	265,500	-	265,500	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Fisheries and Wildlife-Due to job force issues, market value and a dramatic rise in the inflation rate, an increase is needed for our seasonal staff.

Enforcement currently has one full-time temporary employee position. The addition to baseline is for hiring four seasonal employees, for 3 months each (mid may to mid august) for a total of 24 months. These temporary positions would spend approximately 50 percent of their time working boating safety which would qualify for

720 Game and Fish

Agency 720

US Coast Guard boating safety 50 percent reimbursement to the department. The positions would provide opportunities for students to learn about employment as a District Game Warden and serve as a recruitment tool for the enforcement division to fill open positions.

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: NA

Who is served and impact of not funding*: Fisheries/Wildlife: The fisheries and wildlife seasonal employees are tasked with a number of duties that benefit anglers who wet a line in 430 Department managed water bodies and hunters who pursue game on more than 220,000 state wildlife management acres of wildlife habitat and public hunting opportunities in 51 counties. These duties include tagging fish, pulling fish nets, aquatic nuisance species surveillance, planting food plots, spraying weeds, fixing fence, duck banding, assisting with necropsies, to name a few. If not funded, the Department would not be able to keep up with the demand and would lose and/or not be able to fill these important positions to competitors in the already challenging workforce industry.

Enforcement: The seasonal employees will serve the public who use and recreate on the hundreds of North Dakota public water bodies and will provide other services for the public such as educational events, injured/nuisance wildlife response, and aquatic nuisance species surveillance. If not funded, the Department will not be able to provide the same amount of services to the public and will not be able to use the positions to recruit new employees as District Game Wardens.

Baukol-Noonan Dam Repair (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	150,000	150,000	0.00	-	150,000	150,000	0.00
Total	-	150,000	150,000	0.00	-	150,000	150,000	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This work is to repair the failed riser pipe that has rusted through as well as also cure in place line the principal spillway to correct its rusting steel pipe. Cured-in-place pipe (CIPP) lining is one of several methods used to repair existing pipelines that don't require that you dig up the pipes. CIPP is a jointless, seamless, pipe-within-a-pipe with the capability to repair pipes ranging in diameter from 4–110 inches.

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: NA

720 Game and Fish

Agency 720

Who is served and impact of not funding*: If not addressed, in time not only will the local community lose an important fishery but so will all others who use the lake (dam) for water-based recreation. More importantly, again if not addressed, there could be a human safety factor that could threaten both property and human life if the dams were to fail.

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation

Special	-	380,000	380,000	0.00	-	380,000	380,000	0.00
Total	-	380,000	380,000	0.00	-	380,000	380,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: \$30,000 Video Asset Management System: This includes a disaster recovery solution for the Department's Video Asset Management System. These systems house the Department video assets for webcast, footage for news and digital media resources.

\$250,000 CRM: Service Overview: We are looking for a CRM solution to manage, track and assist the delivery of a variety of conservation, restoration, and habitat programs for interested landowners. The facilitators of these programs may involve state, federal and private organizations that currently deliver landowner conservation programs. The CRM solution would assist with the coordination, communications and outcomes for citizens seeking these programs. We are interested in the various CRM solutions similar to Salesforce, ServiceNow or Microsoft Dynamics.

\$100,000 NDGF Mobile App: The Department expects continued growth with mobile device usage over personal computers for Department services. With the deployment of the Department's mobile app in 2023, the Department is looking to further the functionality and provide enhancements to the function of the NDGF mobile app.

720 Game and Fish

Agency 720

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: NA

Who is served and impact of not funding*: Customers, business partners and department staff

Start Date (MM/DD/YYYY): 9/1/2025

End Date (MM/DD/YYYY): 12/31/2026

Replace existing application? No

Upgrade existing application? Yes

Development of new application? Yes

Anticipated Benefits*: CRM Landowner Programs: The architecture of this system can use the state of ND's CRM solution. This can provide automation to assist in the discovery of landowners interested in conservation, restoration and habitat programs. The project can ensure interested landowners receive the proper information on a variety of programs. This can improve customer service and ensure the customer is matched up with the proper program coordinator and organization.

Mobile App Enhancements: These enhancements will assist the user experience for customers with a variety of Department online service license features.

Project Risk*: CRM Landowner Programs: This project would require participation with other state, federal and NGO partners. This project may require an existing state CRM solution to be available and have the capability of building on this environment.

Mobile App Enhancements: No risk anticipated for mobile app enhancements.

Issue/Solution*: CRM Landowner Programs: The responsibility for managing the state's wildlife and its habitats on a landscape comprised of 94% private land, necessitates the Game and Fish Department develop, provide, and deliver an extensive assortment of public access and habitat conservation, enhancement, and restoration programs for interested private landowners, producers, and ranchers. The Department must collaborate, partner, and assist with other state, federal, and private entities in targeting, combining, and delivering their respective conservation programs to maximize their benefit to the state's wildlife resources. The Meadowlark Initiative is just one example of this collaborative approach to conservation delivery.

As the lead, the Department desires to improve the overall performance of orchestrating and delivering this mission, both efficiently and effectively. The Department is looking for a CRM solution to coordinate, communicate, manage, and track conservation program delivery by its own staff, as well as those of partner groups, through all stages of marketing, customer engagement, gathering customer interest, acceptance/delivery/transfer of customer service by partners, and on-the-ground conservation activities and accomplishments. The CRM solution must have the capability to gather, retain, sort, query, and share customer data and intel, as allowed and provided by customers for future and on-going efforts. The Department is interested in the various CRM solutions as promoted by Salesforce, ServiceNow or Microsoft Dynamics.

Beside the habitat and/or public access programs, offered and made available to private landowners by the Department, there are a wide array of similar state, federal and NGO programs available, as well. While conducting its role of managing and sustaining the state wildlife resources, the Department often takes the lead

720 Game and Fish

Agency 720

in promoting, facilitating, and tracking the delivery of conservation efforts by other partnering conservation entities. Department staff, working with cooperating landowners/operators to develop and enhance habitat on their private land, often seek partner programs to find the “best fit” for aligning and fulfilling the landowner’s goals and needs. They provide guidance and information on the various programs available and how to apply for and potential combine or “stack” entity programs to enhance the producer’s “bottom-line”. Often this involves referring or passing the customer information and needs on to another entity for them to enquire further information and potentially begin a formal agreement process.

To provide better (smooth, efficient, and effective) customer service, the Department is interested in a solution to help coordinate, transfer, monitor, and roll-up these efforts between landowner and participating entities. This is to help ensure the customer receives proper service and the appropriate information he/she requested, and to facilitate conservation efforts among the various entities involved.

Mobile App Enhancements: Work with mobile app vendor and NDI to develop on the Department’s existing NDGF App. Determine strategies to implement a variety of enhancements for use offline and integration with the Department’s Online Services features.

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
GDNFH Pondliners	N3751	720-2100	72050	-	-	1,125,000	-	1,125,000	-	1,125,000
GDNFH Pumps	N3751	720-2100	72050	-	-	225,000	-	225,000	-	225,000
Total				-	-	\$1,800,000	-	\$1,800,000	-	\$1,800,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: As in past bienniums, there is a continued need to invest money at the Garrison Dam National Fish Hatchery by continuing the pond lining program which eliminates water loss issues with the current ponds as well as increases fish production capacity. Depending on the liner cost, the request should line approximately four 1.5 acre ponds (the cost includes engineering fees). There are 40 ponds in the Department owned east rearing unit with 15 of the 40 lined to date.

There are three 75 HP pumps that are used to fill the east unit ponds at Garrison Dam National Fish Hatchery. Getting all 40 ponds filled in a timely manner is crucial as we only have fry so long. Since these original pumps are from 1988, they are nearing their life-expectancy (and then some) thus need to be replaced.

Total					-	-	-	-	13,200	-	13,200	-	13,200

State Initiative:* Other

Justification: This request is for 2 radios to be placed in law enforcement boats that do not currently have radios installed. The radios will be compatible with the Statewide Interoperability Radio Network (SIRN). The boats are used for law enforcement patrol, search and rescue, and emergency response (such as floods) and must have radios for proper communication with State Radio and other law enforcement/emergency medical agencies.

720 Game and Fish

Agency 720

This request qualifies for 50% US Coast Guard reimbursement for boating safety and if funded the actual cost to the Department would be \$39,100.

20' Fiberglass boat/motor/trailer (Enforcement) (Priority: 8)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	65,000	-	65,000	-	65,000

State Initiative:* Other

Justification: This request is for a 20-foot fiberglass boat, motor, and trailer for use in the Riverdale/Garrison district, including Lake Sakakawea and Lake Audubon. The boat will replace a 2014 18-foot boat, motor and trailer which will be traded in on the requested boat. This boat is used for law enforcement patrol, search and rescue, and emergency response. Due to the required use and high number of hours enforcement boats are replaced every ten years to maintain safety and reliability. The requested boat is also larger and safer to use on large bodies of water in rough conditions.

This request qualifies for 50% US Coast Guard reimbursement for boating safety and if funded the actual cost to the Department would be \$39,100.

Statutory Authority

North Dakota Parks and Recreation were created and governed by NDCC 55-08.

Agency Description

The North Dakota Park Service was created in 1965. In 1977, it was renamed the North Dakota Parks and Recreation Department (NDPRD) when it merged with the State Outdoor Recreation Agency. NDPRD offers a diversity of recreation opportunities and sustainably manages resources. NDPRD currently operates within four major program areas, as follows:

- Administration, which provides support services, such as accounting, human resource management, information technology, media relations, risk management, ADA coordination, budget functions, and policy review and development.
- Grants, Trails, and Planning, which consists of recreation grants coordination, snowmobile and off-highway vehicle trail and safety programs, statewide comprehensive outdoor recreation and trail planning, and master planning for park properties in the state system.
- Natural Resources, which manages land natural resources through planning, implementation of management strategies for improvements and enhancements and provides oversight for state nature preserves.
- Park Programs, which consists of park visitor services, operation and maintenance of infrastructure associated with park properties, and education through natural, cultural, and historical interpretation.

In addition, as trustee for the state of North Dakota, NDPRD has general supervision over the lands comprising the ND portion of the International Peace Garden.

Agency Mission Statement

We offer a diversity of recreation opportunities and sustainably manage resources.

Major Accomplishments

-
- 1 Founding of Pembina Gorge State Park with construction beginning in June of 2024. Completion anticipated in spring of 2025.
 - 2 Sully Creek State Park campground redesign and renovation to increase the number of sites by 90%
 - 3 Creation of the Office of Outdoor Recreation to coordinate the outdoor recreation offerings within the State of North Dakota.
 - 5 Utility upgrades at several state parks. Construction will commence at Forth Lincoln, Lake Metigoshe, Graham's Island, and Lewis and Clark in September. This upgrade will ensure that each campsite has an individual water hydrant and electrical service upgrade to allow up to 50-amp service at each pedestal. Phase 2 will see improvements coming to Icelandic, Fort Ransom, and Fort Stevenson in 2025.
-

Major Accomplishments

-
- 6 50th Anniversary celebrations at Fort Stevenson and Lewis and Clark State Parks. Both parks did a variety of activities throughout the year. Fort Stevenson set a Guinness World Record for the most people making s'mores as one time (1,250 people). Both parks celebrated their founding with fun, food, and games that were for the whole family. These events drew more guests than we would have had with just filling the campgrounds.

 - 7 We have had engagements with multiple tribal nations in North Dakota. For example, we worked with the Turtle Mountain Band of Chippawa's to coach them on preparing successful applications for federal grants under the Land and Water Conservation Fund. We engaged the MHA Nation to help update our story of their village located at Fort Lincoln to ensure that it is being told accurately and correctly.

 - 8 We have increased our use of technology including utilizing Web Grants for managing all the state and federal grants that we administer. We have our new app by Outer Spatial for running our hiking challenges and showcasing state trails and look forward to adding more functionality over the next biennium. We are working with NDIT to increase wi-fi access in our park operations, to free up team members so that they can do more value-added work.

 - 40 Lake Metigoshe State Park master planning moving forward. Engaging the community and other stakeholders to redesign the park to better meet the needs of our guests.

Critical Issues

-
- 1 Work with the Army Corps of Engineers for our lake parks. Currently all three (3) state parks on Lake Sakakawea are on corps land. Working with the corps, to improve the parks, has led to unnecessary red tape and excessive delays in trying to get projects moving in the parks.

 - 2 The general economic environment has been and continues to negatively impact our operations due to the effects of inflation on all of our maintenance and construction projects. Projects are coming in as much as 200% over the estimates of our engineering firms. This has slowed down the execution of projects because we have had to relook all the project requirements and are having to extend project timelines to allow for rebidding. We continue to ensure that we are adding value for the citizens of North Dakota through our maintenance and construction operations.

 - 3 The other issue is contractor availability. We have seen inflationary pressure push costs higher, but we are also seeing fewer contractors bidding on our projects. Some projects are getting only one bid, and it isn't always fair and reasonable. Some projects require specialized skill, and those contractors are getting harder to find.

 - 4 Staffing continues to be an issue for us. We hire up to 300 individuals during our busy summer season to support park operations. We are finding that summer employees are wanting higher wages (inflationary pressures) and want to leave before the Labor Day Weekend, often by the middle of August. This shrinking window of availability requires our year-round staff to cover the loss of employees through longer hours and less time to recover. Our full-time staff requires a more diversified skill set as technology evolves especially with the increased use of AI and digital customer interface with our guests. The days of a park manager solely being able to identify trees, plants, and animals have given way to a manager that has to be able to run a small business, trouble shoot technical issues and provide outstanding customer service while protecting the guest and the environment.

 - 5 Weather plays a critical role in how successful we can be. In 2023, we had flooding in the Eastern part of the state. This closed down parks and didn't allow for people to recreate for safety reasons. 2024 started with minimal winter snow cover, high winds in the spring, and high summer temperatures that saw a decrease in general attendance and camping. Weather is vitally important to people who want to utilize our parks.

 - 6 The procurement process is causing us delays as we try and improve our parks for our guests. The public improvement portion of NDCC needs to be updated due to the inflationary reality we are facing. The current threshold is too low to do any meaningful project. The procurement process eliminates whole sections of the economy due to the engineering requirements. The state can't pursue bids for prefabricated cabin construction companies due to the engineering requirements. They have engineers and architects on staff that design their products. The state requires that an engineer sign off on the plans, who is with the engaged engineering firm for the project, before they can successfully bid on a project. These manufactures aren't willing to give out their intellectual property unless they have the bid.

Performance Measures

The Administration Division measures performance by ensuring that the budget is spent following legislative intent without exceeding the budget limits, while ensuring that invoices are paid on time and revenue is transferred to the BND. The recruitment of seasonal employees is tracked to ensure staffing meets park needs to support summer season visitation. The communications department works on marketing to ensure that visitors come to our parks and utilize our offerings. Tracking metrics include visitation (1.29 million in 2021) and camper nights (97,200 in 2021).

Parks & Maintenance measure performance by camper nights and visitation. In addition, they track interpretive programs offered and attendance, fiscal responsibility through delivering the park budget, and maintaining the buildings and infrastructure within the park properties.

Recreation tracks the federal grants awarded and completed by grant cycle. They also track state grants, to ensure that they are completed. The completion of federal grants leaves an inspection requirement every five (5) year for all LWCF projects. Snowmobile and OHV safety training is tracked to show attendance and successful completion. Trail maintenance is completed through a combination of state, federal, private, and tribal partnerships and funding.

IPG tracks admissions and annual memberships, camping nights, volunteer hours, rental and retail revenues and social media interactions. 2022 marked the 90th anniversary of the Gardens and planning is underway both through master planning and event planning for the 100th anniversary in 2032.

Program Statistical Data

The Administration Division supports 7 FTE staff members. Staff supported by the Administration Division includes the following: Administrative Assistant II, Account/Budget Specialist I, Account/Budget Specialist II, Administrative Officer II, Business Manager II, Public Information Specialist III, and the Director of ND Parks & Recreation Department. These positions provide the support needed in customer services, executive services, financial, payroll, and human resource functions for all NDPRD sites and programs. All financial obligations are handled by the Administration Division.

The State Parks program is comprised of 12 (FTE) park managers, 9 (FTE) park rangers, 9 (FTE) maintenance supervisors, 1 (FTE) interpreter, 3.75 (FTE) administrative assistants, 1 (FTE) field operations administrator, 1 (FTE) education and program chief, 2 (FTE) regional operations chiefs, and 15 long-term seasonal employees. Annually, up to 190 summer seasonal/ temporary workers are hired as grounds maintenance, administrative assistant, park rangers, park interpreters and park attendants.

Park operating revenue exceeded \$6 million annually in calendar years 2019 and 2020. Revenue in 2021 exceeded \$5 million dollars and in 2022 is tracking to be approximately \$4.5 million. This compares to revenue that, prior to calendar year 2015, never exceeded \$3 million. The increase is due to increased visitation, increasing rental facilities offerings, and improving basic infrastructure for campers. Park operating revenue comes from user fees including annual and daily entrance passes, camping, camper cabins, marina slip rentals, full-service cabins, yurts, tipis, special events, shelter and group facility rentals, equipment rentals (canoe, kayak, skis, bikes, snowshoes, motorized and non-motorized boats) along with contracts/leases. Dynamic pricing is anticipated to optimize parks revenue moving forward as well as broaden public access in low demand periods.

Reliance on extremely volatile mineral resource revenue, to fund a portion of ongoing NDPRD operational expenses, presents a risk to future sustainability of department operations.

Park revenue can be directly related to the weather. Cool late summers, high and low water levels, extreme heat, slow fishing, damaging windstorms, lack of snow cover, and blizzards all have an impact on revenue throughout the entire year. All revenue is used to help support the operation of our parks, maintenance needs, and extraordinary repairs such as issues in our marinas, cyclic maintenance projects and equipment needs. We continue to request general funds dollars to assist in funding top-quality full-time employee salaries. Low unemployment and higher paying jobs in both public and private sectors in many areas of the state, as well as

the remoteness of some of our sites, have made it difficult to find and retain quality employees. The parks will continue to use revenue to fund operation and maintenance costs and continues to request the use of general fund dollars to assist with funding salaries (both FTE and seasonal/temporary), extraordinary repairs, cyclic maintenance projects, and equipment needs.

The Project Management Program has 2 FTE project managers and 2 FTE carpenters. Seasonal carpenters may be hired as budgets allow. The types of projects that this program oversees is diverse, as many of NDPRD's properties are, in essence, small communities in terms of infrastructure. This Program is responsible for marina repair; underground infrastructure: water, sanitary sewer, electricity, and fiber; historic and modern building exteriors; roads, trails and bridges; building interiors including carpets, windows, diverse HVAC systems, plumbing and more. This program requires the ability to function in multiple areas of knowledge and expertise in addition to construction project and contract management.

According to an April 2018 OMB report, we have over 300 structures with a value of over \$38 million. The average age of the structures is 39 years old in 2022. This value does not include the on-the-ground and underground horizontal infrastructure that exists on our properties.

The Natural Resources Program in the 21-23 biennium includes two (2) FTE: a natural resources chief and a biologist. (Reorganization removed the biologists as an FTE position and changed it to an outreach and engagement chief). When budgets allow, up to four seasonal biological technicians assist during the summer months primarily with noxious weed control.

The Natural Resources Program budget includes funding for:

- Conducting environmental reviews of state-wide biotics and LWCF Section 6(f) lands.
- Responsibility for the management and implementation of the Nature Preserves Act as prescribed in NDCC;
- Mapping and control of noxious weeds through chemical, physical and biological treatments.
- Prairie restorations and monitoring assessments
- Woody species monitoring and restorations.

Explanation of Program Costs

The Parks and Recreation Department's 57.75 FTE's are divided among three divisions (Administration, Park Operations and Maintenance, and Recreation) in addition we support the International Peace Garden.

The Administration Division, with 7 FTE's and 2 long-term seasonals, provides department leadership and support to the other divisions through payroll processing, accounts payable, accounts receivable, internal and external communications, marketing, human resources support, recruitment, and procurement.

Park Operation & Maintenance Division manages and maintains all our state properties, with 44.75 FTE's, 15 long-term seasonal, and up to 190 summer seasonal employees, through maintenance operations of our infrastructure and facilities. This division interacts with all visitors to our properties and is the customer facing aspect of our agency. The division also provides the law enforcement, emergency disaster support, risk mitigation, and security at all our properties. This division faces inflationary increases as the fixed costs for electricity, water, gas, IT connectivity and communications rise along with support from third party vendors to maintain the parks to a level that visitors expect. Park Operations & Maintenance is further divided among the field staff, including park managers, rangers, and

interpreters, our project management staff; which are the project managers and department carpenters, and natural resources staff, which are our biologists and technicians.

The Recreation Division, with 6 FTE's and 3 long-term seasonals, is responsible for 3 major programs: i) Federal and State grants, ii) snowmobile and OHV safety, and iii) Planning. The grants program is responsible for managing and distributing federal grants (Land and Water Conservation Fund and Recreational to Trails Program) and state grants per legislative guidance. The planning program is responsible for the Statewide Comprehensive Outdoor Recreation Plan (SCORP), park specific plans, and prioritizing capital and extraordinary repair projects. The snowmobile and OHV programs are responsible to teach youth safety and maintain the trail networks throughout the state through public/private partnerships and working with landowners.

The International Peace Garden (IPG) is a symbol of the peace between the two countries with the world's longest unprotected border. The non-profit manages the grounds and maintains them with cooperation from North Dakota and the Province of Manitoba. IPG supplies all the water to the Department of Homeland Security's Port of Entry Inspection Facility.

Program Goals and Objectives

The Administration Division's program goals relate to provision of responsible government services for internal and external customers. The department strives to deliver cost effective, quality services, provide guidance and oversight of agency fiscal operations, provide system-wide technological infrastructure, and attract and retain high-quality state government employees. Program objectives include internal customer satisfaction, clear communication techniques, and provision of efficient and effective accounting practices.

Maintain and monitor all fiscal functions of the department including accounting, budgeting, payroll, accounts payable, accounts receivable, and revenue tracking.

Oversee all functions related to human resources management including recruitment and performance management.

The Park Operation & Maintenance Division's program goals are to provide users with a quality family-oriented experience in the state parks and state recreation areas. Our main focuses continue to be customer satisfaction, efficiencies and return on investments. Minimal complaints speak to the effectiveness of our efforts. We continue to monitor park users and the public for input into park appearance, customer service, and overall quality of the experience.

The Park Operation & Maintenance Division maintains annual training efforts to keep field staff current on critical safety related certifications including peace officer training, emergency disaster protocol, risk management requirements and fire and pesticide certifications.

The Park Operation & Maintenance Division continues to monitor revenues generated by user fees to meet budget expectations and we report visitation and camper numbers for comparison to department goals.

The Park Operation and Maintenance Division represents natural resource/outdoor recreation interests in multi-agency planning meetings for statewide outdoor recreation initiatives, issues and proposals.

Project management's goals for the 21-23 biennium include implementing process improvements around project tracking, contracting and risk management initiatives. The 21-23 biennium commenced with \$2.3 million in carry over funds from deferred extraordinary repair backlog and received \$17.9 million in capital and extraordinary repair funds for the 2021-23 biennium from the November 2021-23 special legislative session. This funding was in ARPA dollars. Project management goals: by June 30, 2022, to have expended all 15-17 and 17-19 funds. By June 30, 2023, to have expended all 19-21 funds and \$10 million in ARPA funds spent; and by December 31, 2024, have all remaining ARPA funds committed.

The Natural Resources program is primarily responsible for the following areas: environmental reviews, development of site-specific natural resource management plans, the Natural Heritage Program, and the Nature Preserves Program. Noxious weed control on departmental property, tree risk assessments in parks, prairie restoration. Tools used include mapping utilizing geographic information systems (GIS) technology.

The Recreation Division's goals are as follows:

Grants Program:

- Manage grant programs in compliance with federal regulations and requirements.
- Maximize available grant funds for the benefit of ND citizens and communities.
- Utilize data-driven decision making to ensure that grant funding addresses priority needs.
- Continue working with agency partners to ensure grant funds are leveraged to the highest extent possible.
- Improve public access to grant programs through utilizing a web-based grant management system (i.e. WebGrants).
- Facilitate and optimize the Recreational Trails Program (RTP) Advisory Committee through recruiting effective, diverse members, facilitating meetings and providing appropriate education and training to the members.
- Effectively administer the Land & Water Conservation Fund (LWCF) and RTP through appropriating federal dollars, monitoring approved projects and inspecting developed projects and maintaining Title VI non-discrimination compliance.
- Guide grant applicants through the environmental compliance process and serve as the agency liaison through the environmental reviews.
- Sponsor and plan continuing education programs and conferences with a focus on programs in the grants and motorized recreation programs. Serve as the agency's liaison to peer member organizations.

Motorized Recreation Programs:

- Improve access to high-quality OHV and snowmobile safety certification courses, with a special focus on youth ridership.
- Increase access to OHV riding areas not managed by the Department.
- Coordinate law enforcement initiatives for OHV and snowmobile trails.
- Maintain the snowmobile trail system.
- Promote participation in motorized recreation through marketing and outreach.
- Manage the off-highway vehicle (OHV) and snowmobile funds' expenditures in accordance with the North Dakota Century Code.

FEMA Comfort Stations (Priority: 01)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	924,000	924,000	0.00	-	924,000	924,000	0.00
Total	-	924,000	924,000	0.00	-	924,000	924,000	0.00

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Parks and Recreation is requesting \$924,000 from the Disaster Relief Fund (DRF) to fund the state match portion required by a FEMA grant and leverage \$2,772,000 of federal funds for a storm shelter/comfort station construction project. This match will enable Parks and Recreation to build four (4) FEMA approved storm shelters that will also incorporate modern shower and restroom facilities and serve as comfort stations at our parks. This dual use building helps us meet two of our primary goals for visitors - safety and comfort; and does so by leveraging three federal dollars for every

750 Parks and Recreation

Agency 750

state dollar. Our parks are located in remote and/or rural parts of the state with little or no storm shelter infrastructure. Currently during storm events, guests at our campgrounds utilize recreational vehicles that are not designed to withstand tornados or high winds. To provide shelter, for our guests, Parks and Recreation will build comfort stations that are engineered built to FEMA storm shelter standards. The FEMA money is part of a Presidential Disaster Declaration and the expenditure of state DRF funds as the state match for a mitigation initiative is allowed under NDCC 37-17.1-27. The minimal state request for funding will fund four (4) new comfort stations that are also storm shelters in areas of the state that are open, rural, and remote.

Necessary resources for implementation (including FTE's)*: To implement this capital construction would require \$924,000 from the DRF. No additional FTE's would be required. The planning department of Parks and Recreation would manage the projects.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected for this project.

Who is served and impact of not funding*: If this project is not funded, state parks will not have viable emergency storm shelters located in our campgrounds. Parks are located in remote and/or rural areas that do not have storm shelters. This will allow us to provide for the safety of our guests. Failure to provide funding will remove four (4) FEMA storm shelters from our capital plan and increase the risk of serious injury, to our guests, during violent weather events.

Matching Grant Program (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	10,000,000	10,000,000	0.00	-	5,000,000	5,000,000	0.00
Total	-	10,000,000	10,000,000	0.00	-	5,000,000	5,000,000	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During the last 2 legislative sessions, Parks and Recreation was granted \$4,632,800 for the Parks Matching Grant Program. These funds were \$2,316,400 from state sources and \$2,316,400 from non-state sources. Parks and Recreation has been able to utilize those funds for capital projects. We were able to open doors and engage private sector partners. We request \$10,000,000 for a Parks Matching Grant Program for the 2025-2027 biennium. This would be \$5,000,000 from state sources and \$5,000,000 from non-state sources with the funds to be spent on capital projects and improvements subject to the department obtaining matching funds from non-state sources on a dollar-for-dollar basis.

Necessary resources for implementation (including FTE's)*: The state would provide \$5,000,000 for the state portion of the match, subject to Parks and Recreation finding a dollar-for-dollar match from non-state sources for each capital project.

Are resources being redirected or are they new or additional (including FTE's)*: The funding would be a continuation of the \$2,316,400 + \$5,000,000 in new funding. No additional FTE's would be required.

750 Parks and Recreation

Agency 750

Who is served and impact of not funding*: The citizens of the State of North Dakota would be served, as well as those people visiting our parks to recreate. If this is not funded, we lose the opportunity to double our money with private individuals that have a passion for our parks and want to improve them.

New Full-Time Equivalent Positions (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	754,410	-	754,410	4.00	411,832	-	411,832	2.00
Special	-	-	-	0.00	-	-	-	0.00
Total	754,410	-	754,410	4.00	411,832	-	411,832	2.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request is for four (4) new full-time equivalent (FTE) positions. Currently, Parks and Recreation is authorized 65 FTE positions per SB 2019. To ensure that the citizens of North Dakota and all our visitors are served, the Parks and Recreation department utilizes year-round temporary (YRT) employees. These new positions will increase our coverage in the field to ensure that our parks are maintained, safe for visitors, and provide customer service for all our visitors. These positions will allow visitors to find and interact with our employees to help ensure that they are creating memories across generations. The Theodore Roosevelt Presidential Library in Medora, near Sully Creek State Park, and our newest state park at the Pembina Gorge will see an increase in visitors. These positions will increase the staffing to allow for coverage to support the increase in visitors and guests. Pembina Gorge State Park is an OHV destination with miles of trails to ride while Sully Creek State Park is South of Medora and a gateway to the Mah-Da-Hey Trail.

Necessary resources for implementation (including FTE's)*: To implement this request would require the authorization to create four (4) new FTE positions and the resulting general fund dollars to pay their salary and benefit costs. The positions will require \$754,410 for this biennium and increases based on the legislatively determined pay increases going forward.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected for this ask. The four (4) FTE positions are new positions.

Who is served and impact of not funding*: The funding will allow for additional resources, in the field, to help support operations, ensure visitor safety, and maintain our parks with respect the natural environment. Failure to support these positions will continue to see high turnover in our YRT staff (over 40%) and reduce the effectiveness of our staff. The parks will see the deterioration of assets and natural areas due to increased visitor traffic and lack of proper staff to maintain the parks.

750 Parks and Recreation

Agency 750

Year-Round Temporary Positions Conversion to FTE (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,635,100	-	2,635,100	9.00	269,900	-	269,900	9.00
Special	-	-	-	0.00	-	-	-	0.00
Total	2,635,100	-	2,635,100	9.00	269,900	-	269,900	9.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Currently, Parks and Recreation is authorized 65 full-time equivalent (FTE) employees per SB 2019. To ensure that the citizens of North Dakota and all our visitors are served the parks and recreation department utilized year-round temporary (YRT) employees. These employees are vital to the operation of our parks performing maintenance, administrative and law enforcement functions. Our YRT team members are year-round employees that work side by side with our FTE's. They are FTE's in everything but classification. This lack of FTE status has led to large turnover in our YRT employees. They leave us to receive benefits (vacation/retirement) and higher wages. As they leave, we lose their knowledge, skills, and abilities. This biennium has seen a 40% turnover or our YRT staff. The YRT team members informed us that they are leaving to obtain higher wages and/or benefits (vacation/retirement). Converting our 16 year-round temporary team members to full-time equivalent employees would help reduce the turnover in these positions, which is a great return on investment. It would also allow team member to develop ownership of their parks and help with improving the services/support offered to the citizen of North Dakota and other visitors when they visit our state parks.

Necessary resources for implementation (including FTE's)*: The conversion of 16 year-round temporaries would require an incremental increase in our general fund authorization of FTE positions to 85 FTE positions. An increase, of our general fund authorization, to \$2,635,100 would ensure all year-round temporaries are in FTE positions. This is an incremental increase of \$244,448, to cover the FTE benefits, over what we currently pay out of our park operating fund to utilize these team member's knowledge, skills, and abilities.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected. The resources requested are new to the department.

Who is served and impact of not funding*: This would allow Parks and Recreation to hang on to our vital workers and serve our visitors who utilize our parks to recreate and create lasting memories with their families. If we are not funded, we will continue to have turnover issues which will continue to degradate our ability to meet our visitors demands and maintain our parks. As people turnover, this places more and more work on our already stretched FTE staff, which is starting to lead to higher turnover in this group. Our turnover is currently running 10.9% for the biennium. This conversion will reduce the time required to recruit and train replacements. It is becoming increasingly difficult to find new hires willing to take a position that is not an FTE position with a complete benefits package including retirement.

750 Parks and Recreation

Agency 750

Deferred Maintenance and Capital Projects - Roads, Structures and Utilities, and Marinas (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	20,000,000	20,000,000	0.00	-	15,000,000	15,000,000	0.00
Total	-	20,000,000	20,000,000	0.00	-	15,000,000	15,000,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request \$20 million dollars to continue to reduce our backlog of deferred maintenance of our roads. NDPRD has \$60+ million dollars in a backlog of deferred maintenance and capital projects. We maintain 130 miles of paved roads. Park roads have a life cycle that increases with preventative maintenance. Eventually the roads require significant intervention or replacement. Some will have to be rebuilt from the base up to meet modern requirements. Today's larger and heavier recreational vehicles cause more wear and tear on our roads. Guests want well maintained roads to get to their campsites due to the cost of purchasing their recreational vehicle. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The continued work to repair and maintain park properties enhances the visitor experiences.

Necessary resources for implementation (including FTE's)*: \$20 million dollars for deferred maintenance and capital projects to repair our roads. There will be no requirements to hire additional FTE's since we will continue to utilize our Planning Division to manage projects and hire contractors.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected.

Who is served and impact of not funding*: Not funding this request will lead to the deterioration of park roads. This will reduce visitors' abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can't maintain basic road infrastructure for visitors to utilize to access campgrounds, boat launches, trail heads, and other facilities. We will see a decline in visitors which leads to lost revenue as visitors choose other outdoor recreational options. Poorly maintained roads increase the risk of damaging their recreational equipment or vehicles and possible visitor safety issues due to the condition of our roads. The wear and tear on state fleet vehicles will increase as the roads degrade.

Deferred Maintenance and Capital Projects - Structures and Utilities (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	15,000,000	15,000,000	0.00	-	-	-	0.00
Total	-	15,000,000	15,000,000	0.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request \$15 million dollars to continue to reduce our backlog of deferred maintenance. NDPRD has \$60+ million dollars in a backlog of deferred maintenance and capital projects. We have over 330 buildings, and multiple underground utilities and camp sites. Park infrastructure has a life cycle that increases with preventative maintenance, but eventually the infrastructure requires significant intervention or removal. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The continued work to repair and maintain park properties enhances the visitor experiences. In addition, older facilities often do not meet current code requirements, are not ADA compliant or are energy inefficient. Updates to the systems, modifications, or replacements are necessary to bring them up to current standards.

Necessary resources for implementation (including FTE's)*: \$15 million dollars for deferred maintenance and capital projects for structures and utilities.

Are resources being redirected or are they new or additional (including FTE's)*: This request is new funding. No resources are being redirected. There will be no requirements to hire additional FTE's since we will continue to utilize our Planning Division to conduct the work or hire the vendors.

Who is served and impact of not funding*: Not funding this request will lead to the deterioration of park infrastructure. This will reduce visitors' abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can't maintain basic infrastructure for visitors to utilize with their families. Potentially, over time, we will see a decline in visitors which leads to lost revenue as visitors choose other outdoor recreational options. Poorly maintained facilities increase the risk exposure and possible visitor and staff safety issues and outdated systems increase ongoing operating costs.

Deferred Maintenance and Capital Projects - Marinas (Priority: 07)

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

750 Parks and Recreation

Agency 750

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request \$6.5 million dollars to perform work on our four (4) marinas per our 2023 engineering study’s recommendations. Park infrastructure has a life cycle that increases with preventative maintenance, but eventually the infrastructure requires significant intervention or removal. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The continued work to repair and maintain park properties enhances the visitor experiences. In addition, older facilities often do not meet current code requirements and are not ADA compliant. The marina infrastructure requires updates, modifications, and replacement to meet current standards of efficient operation and safety.

Necessary resources for implementation (including FTE’s)*: \$6.5 million dollars for phase 1 of the engineer’s recommendations.

Are resources being redirected or are they new or additional (including FTE’s)*: No resources are being redirected. There will be no requirements to hire additional FTE’s since we will continue to utilize our Planning Division to conduct the work or hire the vendors.

Who is served and impact of not funding*: Not funding this request will lead to increased deterioration of park marinas’ infrastructure. This will reduce visitors’ abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can’t maintain basic infrastructure for visitors to utilize with their families. Potentially, over time, we will see a decline in visitors which leads to lost revenue as visitors choose other outdoor recreational options. Poorly maintained facilities increase the risk exposure and create visitor and staff safety issues and outdated systems increase ongoing operating costs.

Funding Source County, City, and Tribal Park System Grants (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	10,000,000	-	10,000,000	0.00	-	5,000,000	5,000,000	0.00
Total	10,000,000	-	10,000,000	0.00	-	5,000,000	5,000,000	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The funding of this program would come from lottery earnings. We request \$5 million per year or \$10 per biennium. In the 2021 Special Session, the legislature authorized \$5 million in ARPA funding to create a matching grant program for North Dakota park districts. The 2023 legislature modified the program to include our tribal partners and increased the funding to \$6 million. The program has seen an overwhelming response rate with projects out stripping matching funds by over 6x. This vital program needs to continue to allow for the local communities to maintain their park infrastructure for the benefit of their communities and visitors. To maintain this program, we are asking for a continuing authorization of funds.

750 Parks and Recreation

Agency 750

Necessary resources for implementation (including FTE's)*: The legislature would need to authorize a continuing appropriation for the program with funds being deposited in a new fund. Funds would come from the state's lottery earnings (\$10 million per biennium). No new FTE's would be required to administer the program.

Are resources being redirected or are they new or additional (including FTE's)*: No parks and recreation resources are being redirected. Lottery earnings would be redirected into a new fund for the sole purpose of providing the match for this grant.

Who is served and impact of not funding*: The local communities are impacted by the loss of this grant. The impact is to reduce the ability of the citizens of North Dakota to have viable outdoor amenities to drive outdoor recreation. The loss out outdoor recreation opportunities will have a negative impact on the health of citizens of the state.

County, City, and Tribal Park System Grants (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	20,000,000	20,000,000	0.00	-	-	-	0.00
Total	-	20,000,000	20,000,000	0.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the 2023 Legislation Session, Parks and Recreation received \$6,000,000 for the purpose of providing grants to county, city, and tribal parks systems. We request \$10,000,000 to continue this program for the county, city, and tribal park systems. The purpose of the grants is to renovate and upgrade existing facilities with the priority for outdoor facilities for the 2025-2027 biennium. County, city, and tribal park systems would be required to provide a dollar-for-dollar match for any funds received. No county, city, or tribal park system could receive more than \$750,000. This program has been funded over two (2) legislative sessions and the demand was amazing. This is a dollar-for-dollar matching grant. Both cycles we had over \$30 million dollars in grant requests for our \$5 million or \$6 million funded program.

Necessary resources for implementation (including FTE's)*: This would require a grant of \$10,000,000 from the State of North Dakota. No additional FTE's would be required to administer the grants. Parks and Recreation would utilize the current system that it is using for the previous biennium's grants.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected and no additional FTE's are required.

Who is served and impact of not funding*: This will ensure residents have an outdoor space to recreate in close to home. If this is not funded, the county, city, and tribal park systems will continue to have deferred maintenance issues to deal with. Many types of recreational facilities are available exclusively at the local level. Deferring maintenance further, will in some communities, mean that certain facilities, such as pools and older artificial turf fields, would need to be taken out of service for safety and liability reasons. This reduces the facilities available to support tourism, tournaments and workforce retention.

Total	150,000	3,500,000	3,650,000	0.00	150,000	3,500,000	3,650,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request is to extend our Wi-Fi capability in the parks to ensure that all state buildings, along with rental units (cabins and yurts) have access to Wi-Fi connectivity. Currently, not all state buildings have internet access, or their access is limited. This extension will increase the productivity of state park workers and allow a better visitor experience. The Wi-Fi extension will allow the park system to install cypher locks on the cabins and yurts, which will allow guests to check in without having to find a member of the park staff. The extension will enable Parks and Recreation to transform our business by adding self-service vending machines for guests to utilize to rent such diverse items as kayaks and firewood without requiring interaction with our team members. This will free up park staff to ensure other tasks are completed in a timely and efficient manner.

Necessary resources for implementation (including FTE's)*: The Installation would include engineering, installation, and operation of the systems. The engineering and installation would cost approximately \$3.5 million. An additional \$150,000 per biennium for the operation of the system to enhance the capabilities of our employees. There are no additional FTE's for this ask. Local providers will be utilized to install the access points and switches with assistance from NDIT.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are not being redirected; this is a new capability.

Who is served and impact of not funding*: Staff and visitors currently are required to conduct in person facility check in, which is a very inefficient use of staff time. Additionally, maintenance staff will not be able to work access manuals and instruction videos, which will hinder maintenance operations in the parks. Lack of Wi-Fi at our cabins and yurts makes us less competitive in the short-term leisure rental market and prevents us from attracting patrons wishing to work remotely.

Automation Transformation (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	-	2,000,000	2,000,000	0.00	-	1,000,000	1,000,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The park system is looking to modernize how visitors and employees interact. The automation transformation will allow for visitors to conduct business without having to find a park employee. This is critical for the park system because it is difficult to hire summer seasonal employees. These employees don't work the entire busy summer season. The automation transformation would allow visitors to purchase items, such as firewood from a vending machine, or check into a cabin using a cypher code instead of having to find a park employee to get a key. This also allows visitors to interact with employees when they want to not because they need to. It will allow our employees to focus on more value-added functions and ensuring the safety of all our visitors. We are requesting \$2,000,000 to run a pilot phase to leverage the expansion of connectivity among our state park facilities.

Necessary resources for implementation (including FTE's)*: This would require \$2,000,000 in new SIIF funding. There would be no additional FTE's required.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected.

Who is served and impact of not funding*: If this is not funded, visitors will be required to interact with park employees for everything, which will require us to have team members just waiting for someone to arrive, so they can perform a menial function that can easily be automated. Allows visitors access to items like firewood or their cabins during non-business hours.

Multi-Purpose Event Center (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	-	7,500,000	7,500,000	0.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

750 Parks and Recreation

Agency 750

Request explanation and justification (include any statutory authority)*: Build a multipurpose event center, at one of our parks, to expand our offerings to the public. This would allow families to have family reunions, weddings, or businesses to conduct meetings/retreats at our property. This building would allow for different events by ensuring a large meeting space with the proper audio-visual infrastructure to support a variety of electronic devices. This building would be an all-inclusive destination with meeting space and overnight lodging.

Necessary resources for implementation (including FTE's)*: This would require the construction of a facility, to include all the infrastructure associated with it.

Are resources being redirected or are they new or additional (including FTE's)*: We are requesting \$7.5 million dollars of SIF funds for the construction of this facility.

Who is served and impact of not funding*: If this facility isn't built, it will reduce our ability to stay relevant with today's visitors and their expectations. This will allow us to tap into a new market which should increase visitors and guest to our parks.

Cabin Expansion (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	3,500,000	3,500,000	0.00	-	3,500,000	3,500,000	0.00
Total	-	3,500,000	3,500,000	0.00	-	3,500,000	3,500,000	0.00

State Initiative*: State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The request is to add 10 year-round full-service cabins to the park system. Cabins would be added to parks to allow a variety of options for visitors to utilize during their stays. Cabins would vary in size based on location of the park and their location within the park. The variety of sizes would cater to different demographics from a single family up to several families or a family reunion. The cabins would be built utilizing low maintenance materials, to help reduce the cost of maintenance and allow for ease of cleaning. The cabins would increase revenue brought in by the department.

Necessary resources for implementation (including FTE's)*: 10 year-round cabins would cost, on average, approximately \$3.5 million to build and install infrastructure to support. Depending on the number of cabins added, a park could require additional FTE's or money for 3rd party companies to maintain the cleanliness of the cabins between visits. Parks and Recreation may have to purchase property or easements based on the location of the cabin vs. the proximity of neighbors.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are not being redirected. The resources would be new with the additional FTE's being required to maintain the cabins for guests.

Who is served and impact of not funding*: Visitors will not have the variety of options for their stays in our parks. This could reduce the ability of families to enjoy the healthful benefits and the creation of memories in our state parks. Serves a need for accommodation for park users in the 12-month use parks. In a 2022 survey,

750 Parks and Recreation

Agency 750

done for the 2023-2027 State Comprehensive Outdoor Recreation Plan, 55% of respondents indicated a high interest in full-service cabins. This is a missed opportunity to attract tourists who aren't travelling with a recreational vehicle.

Wayfinding (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	14,000,000	14,000,000	0.00	-	2,000,000	2,000,000	0.00
Total	-	14,000,000	14,000,000	0.00	-	2,000,000	2,000,000	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Due to the results of multi biennium construction and maintenance of state parks, we have no standardized entrance signs or way finding signs. We are looking to standardize our way finding signs to ensure that all parks have signs that are consistent across the system to direct visitors to our parks. Way finding signs would also be standardized within the parks, to ensure that visitors have an ease of finding trails, infrastructure, and other park amenities while in the park. We would also improve our entrance signage, sot that visitors can see it as they arrive at their destination.

Necessary resources for implementation (including FTE's)*: Due to the amount of signs needed to standardize park way finding and the required improvements to entrance signs, this project is estimated to cost \$14,000,000.00.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected and this will add no new FTE's.

Who is served and impact of not funding*: The current mix of older sign designs and graphics does not communicate a positive branding of the 21st century North Dakota park system. Visitors are impacted by not standardizing and improving our way finding signage. The improved entrance signage will help identify, to the visitors, that they have reached their destination without having to figure out which sign it the correct one, due the variety of signs that are currently in use within our park system. The standardization of signs, with in the park, will allow visitors to reach their desired destination more easily from the visitor center to our trail heads. Wayfinding is critical for effective emergency response.

Tree Planting (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	2,000,000	2,000,000	0.00	-	-	-	0.00
Total	-	2,000,000	2,000,000	0.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The goal is to create and maintain healthy, diverse ecosystems anchored by appropriate native tree and shrub plantings within state parks that support wildlife, provide recreational opportunities, contribute to broader conservation efforts, and enhance the visitor experience. NDPRD intends to undertake its most extensive statewide tree planting initiative to date. The requested funding will allow the department to execute a strategic and concerted tree and shrub planning program in Tier I A visitor centric areas in every North Dakota State Parks. Planting efforts to date have been relatively small volume with small stock and primarily aimed at replacing or supplementing existing trees. This increases the ability, for our 1.2 million annual visitors, to make cross generational memories in our parks.

Necessary resources for implementation (including FTE's)*: This would require \$2,000,000 in new SIIF funding. There would be no additional FTE's required.

Are resources being redirected or are they new or additional (including FTE's)*: No funds are being redirected.

Who is served and impact of not funding*: If this is not funded, parks will not have trees that provide habitat for animals, enhance the visitor experience, and improve the ecosystem of our parks. This will reduce the ability of visitors to generate memories and learn about nature through programming and hiking through natural habitats. We are losing large numbers of older trees, that were planted decades ago and are at the end of their life span.

Equipment Life Cycle Replacement (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	500,000	500,000	0.00	-	250,000	250,000	0.00
Total	-	1,000,000	1,000,000	0.00	-	500,000	500,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

750 Parks and Recreation

Agency 750

Request explanation and justification (include any statutory authority)*: Request funding to replace equipment, such as lawn mowers, skid steers, tractors, OHV's and other equipment, that has reached and exceeded its life cycle. Currently, Parks and Recreation is utilizing several pieces of equipment that exceeded their life cycle expectancy. This increases the costs to maintain the equipment and it is getting harder to find replacement parts. This leads to additional time required to perform routine tasks, thus reducing the park staff's efficiency. Replacing aged equipment helps with the retention of staff since they spend more time performing more value-added task as opposed to developing work arounds to make equipment usable. This also improves employee morale and increases efficiency.

Necessary resources for implementation (including FTE's)*: This would require funding of \$1 million to purchase new equipment to replace equipment that has reached or exceeded it lifecycle. The ask would be that 50% of the funding be general and 50% of the funds come from our operating fund.

Are resources being redirected or are they new or additional (including FTE's)*: Park operating funds would be redirected.

Who is served and impact of not funding*: Not replacing the equipment increases our costs and reduces our ability to maintain state property to minimum safe standards or the standards that the visitors expect.

North Dakota State Parks Outdoor Education Initiative (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	1,500,000	1,500,000	0.00	-	750,000	750,000	0.00
Total	-	1,500,000	1,500,000	0.00	-	750,000	750,000	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In January of 2022, Parks and Recreation received a grant, from DPI, for \$600,000 to conduct educational programs for any school across the state. Parks and Recreation has hosted 30 field days and 261 field trips. A field day is an outdoor educational experience for multiple schools rotating between stations. A field trip is one school going to a park for an outdoor educational experience. The field days have been presented to over 4,600 students, while 10,776 students have attended field trips. The grant offset the cost for the schools by allowing us to grant them a stipend for transportation costs. This stipend allowed schools, that couldn't afford to conduct field trips, to come and participate in the program and increase their students' learning through interactive outdoor learning. We are asking to continue this worthwhile program through a new grant of \$750,000. This program has a great return on investment for the students and it creates future park visitors and possibly employees.

Necessary resources for implementation (including FTE's)*: This would require a grant of \$750,000 from DPI to Parks and Recreation. There would be no required additional FTE's.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected.

750 Parks and Recreation

Agency 750

Who is served and impact of not funding*: If this is not funded, the program will go away because schools cannot afford to pay for bus service to our parks. This will deprive a unique outdoor learning experience that brings natural history, forestry, and ecology to students to develop a love for learning and the outdoors. We will lose this opportunity to instill in our younger generation, the appreciation for what North Dakota has to offer in its great outdoors and in turn their emotional investment in their state.

Fort Lincoln On-A-Slant Village Rebuild (Priority: 18)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	2,000,000	2,000,000	0.00	-	-	-	0.00
Total	-	2,000,000	2,000,000	0.00	-	-	-	0.00

State Initiative:* Tribal Partnerships

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request \$2 million to rebuild the On-A-Slant Village located at Fort Abraham Lincoln State Park. The On-A-Slant village tells the story of the first people to live in the Bismarck area. The village needs repair due to the deterioration of the wooden support members of the earth lodges. We would use modern materials and techniques to increase the life span of the buildings and reduce the maintenance requirements. We would be able to simulate the village, as it would have been when the Mandan people occupied the site. We will work with the MHA Nation to ensure that the rebuild is true to reality and help us with the interpretation of the site. Our interpretive staff would update the site for self-guided tours to ensure that the Mandan story is told accurately.

Necessary resources for implementation (including FTE's)*: The resources required would be the funding of the project to ensure that we could utilize modern construction techniques to rebuild the village and reduce maintenance requirements.

Are resources being redirected or are they new or additional (including FTE's)*: There are no resources being redirected. There are no new FTE's requested.

Who is served and impact of not funding*: The visitors to Fort Abraham Lincoln would be served with a rebuilt village to understand what life was like in North Dakota before the settlers arrived. It would also help us to strengthen our relationship with the MHA Nation. If not funded, the village will continue to be maintained on a piecemeal basis. The use of traditional building materials and techniques is getting harder to find and the price, for these services, has increased significantly. We will reach a point when even piece-meal fixes will not be enough, and we will have to close or remove these structures.

750 Parks and Recreation

Agency 750

IPG #1 General Operating Grant (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	373,671	-	373,671	0.00	373,671	-	373,671	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The International Peace Garden is seeking a 33% increase to the general operating grant, which would increase it from \$1,126,329 to \$1,500,000. The investments in infrastructure over the last several years allows us to expand our offerings to become a year-round destination. This expansion comes with the need for additional staff, including maintenance staff (such as a night shift) and programming staff to continue building toward our goal of K-12 field trips. We are struggling to hire North Dakotans due to the Province of Manitoba increasing the minimum wage. We need to be more competitive, with our wages, especially considering our remote location. We anticipate using approximately \$33,000 of this increase, to support programming at the International Music Camp to ensure more access for students and families from North Dakota.

Necessary resources for implementation (including FTE's)*: This would require \$373,671 in new general funds.

Are resources being redirected or are they new or additional (including FTE's)*: No funds are being redirected.

Who is served and impact of not funding*: If this is not funded, International Peace Garden will fall behind on maintaining their new buildings. They will not be able to expand their offerings to year-round nor increase programming to allow field trips for K-12 students.

IPG #2 International Music Camp Revitalization (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	-	1,500,000	1,500,000	0.00	-	1,500,000	1,500,000	0.00

State Initiative:* Smart, Efficient Infrastructure

750 Parks and Recreation

Agency 750

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The International Peace Garden is requesting \$1,500,000 to revitalize the International Music Camp Complex. The International Music Camp rents the facilities from the International Peace Garden. The current complex is still using its original HVAC system and water heaters. Six (6) of the primary dorms and the Performing Arts Center were constructed in 1993-1994. The Dining Hall and other two (2) dorms are older than that. As equipment breaks or we are conducting the required preventive maintenance, we are finding that the components are not being made anymore. This upgrade will allow the International Music Camp to continue to offer its world class instruction to North Dakota students and expand educational opportunities so that dining hall and dorms are available year-round for school trips. Currently the dining hall is not insulated, which prevents the International Peace Garden from becoming more self-sustaining through year-round facility rentals.

Necessary resources for implementation (including FTE's)*: This would require \$1,500,000 in new SIIF funds.

Are resources being redirected or are they new or additional (including FTE's)*: No funds are being redirected.

Who is served and impact of not funding*: If this is not done, the International Music Camp Complex will continue to deteriorate until it can no longer be safely utilized. This will be a great loss to the State of North Dakota.

IPG #3 International Peace Garden Sewer System (Priority: 21)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	1,000,000	1,000,000	0.00	-	1,000,000	1,000,000	0.00
Total	-	1,000,000	1,000,000	0.00	-	1,000,000	1,000,000	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The International Peace Garden's sewer system is a critical system for the park. The current system is over 70 years old. The upgrade to the International Music Camp complex would require that the aging sewer infrastructure be upgraded. This would entail running new lines from the complex to the lagoons. The new line will reduce the distance and provide new lift stations to improve the flow. This will reduce the work on the overall system.

Necessary resources for implementation (including FTE's)*: This would require \$1,000,000 in new SIIF funding.

750 Parks and Recreation

Agency 750

Are resources being redirected or are they new or additional (including FTE's)*: No funds are being redirected.

Who is served and impact of not funding*: Failure to upgrade the sewer system could result in a system failure that will shut down the International Music Camp and contaminate the local environment. This negative publicity will be hard to recover from considering that we are a garden that promotes peace and stewardship.

Capital Projects Summary

State Initiative:* Emergency Response Support

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: Parks and Recreation is requesting \$924,000 from the Disaster Relief Fund (DRF) to fund the state match portion required by FEMA. This match will enable Parks and Recreation to build four (4) comfort stations at our parks. These comfort stations will also serve as storm shelters for visitors in our parks. Our parks are located in remote and/or rural parts of the state with little or no storm shelter infrastructure. Guests to our campgrounds utilize recreational vehicles that are not designed to withstand tornados or high winds. To provide shelter, for our guests, Parks and Recreation will build comfort stations that are built to storm shelter standards in our campgrounds. The FEMA money is part of a Presidential Disaster Declaration. The minimal state request for funding will fund four (4) new comfort stations that are also storm shelters in areas of the state that are open, rural, and remote.

750 Parks and Recreation

Agency 750

To implement this capital construction would require \$924,000 from the DRF. No additional FTE's would be required. The planning department of Parks and Recreation would manage the projects.

If this project is not funded, state parks will not have viable emergency storm shelters located in our campgrounds. Parks are in remote and/or rural areas that do not have storm shelter infrastructure. This will allow us to provide for the safety of our guests. Failure to provide funding will remove four (4) storm shelters from our capital plan and increase the risk of serious injury to our guests during violent weather events.

State Initiative:* Smart, Efficient Infrastructure

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: Request \$20 million dollars to continue to reduce our backlog of deferred maintenance of our roads. NDPRD has \$60+ million dollars in a backlog of deferred maintenance and capital projects. We maintain 130 miles of paved roads. Park roads have a life cycle that increases with preventative maintenance. Eventually the roads require significant intervention or replacement. Some will have to be rebuilt from the base up to meet modern requirements. Today's larger and heavier recreational vehicles cause more wear and tear on our roads. Guests want well maintained roads to get to their campsites due to the cost of purchasing their recreational vehicle. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The continued work to repair and maintain park properties enhances the visitor experience.

\$20 million dollars for deferred maintenance and capital projects to repair our roads. Not funding this request will lead to the deterioration of park roads. This will reduce visitors' abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can't maintain basic road infrastructure for visitors to utilize to access campgrounds, boat launches, trail heads, and other facilities. We will see a decline in visitors which leads to lost revenue

750 Parks and Recreation

Agency 750

as visitors choose other outdoor recreational options. Poorly maintained roads increase the risk of damaging their recreational equipment or vehicles and possible visitor safety issues due to the condition of our roads. The wear and tear on state fleet vehicles will increase as the roads degrade.

Description	Fund	BU-Dept	Fin Class	Account	2023-25 Agency Request	2023-25 Executive Recommendation	Total Estimated Project Costs	2025-27 Operating Costs	2027-29 Operating Costs

State Initiative:* Smart, Efficient Infrastructure

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: Request \$15 million dollars to continue to reduce our backlog in deferred maintenance. NDPRD has \$60+ million dollars in a backlog of deferred maintenance and capital projects. We have over 330 buildings, multiple underground utilities, and camp sites. Park infrastructure has a life cycle that increases with preventative maintenance, but eventually the infrastructure requires significant intervention or removal. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The continued work to repair and maintain park properties enhances the visitor experiences. In addition, older facilities often do not meet current code requirements, are not ADA compliant, and are energy inefficient. Updates to systems, modifications, or replacements are necessary to bring them up to current standards.

\$15 million dollars for deferred maintenance and capital projects for structures and utilities. Not funding this request will lead to the deterioration of park infrastructure. This will reduce visitors' abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can't maintain basic infrastructure for visitors to utilize with their families. Potentially, over time, we will see a decline in visitors which leads to lost revenue as visitors choose other outdoor recreational options. Poorly maintained facilities increase the risk exposure and possible visitor, and staff safety issues and outdated systems increase ongoing operational costs.

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2025

Description: Request \$6.5 million dollars to perform work on our four (4) marinas per our 2023 engineering study’s recommendations. Park infrastructure has a life cycle that increases with preventative maintenance, but eventually the infrastructure requires significant intervention or removal. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The continued work to repair and maintain park properties enhances the visitor experiences. In addition, older facilities often do not meet current code requirements and are not ADA compliant. The marina infrastructure requires updates, modifications, and replacement to meet current standards of efficient operation and safety.

The \$6.5 million dollars for phase 1 of the engineer’s recommendations.

Not funding this request will lead to increased deterioration of park marinas’ infrastructure. This will reduce visitors’ abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can’t maintain basic infrastructure for visitors to utilize with their families. Potentially, over time, we will see a decline in visitors which leads to lost revenue as visitors choose other outdoor recreational options. Poorly maintained facilities increase the risk exposure and create visitor and staff safety issues and outdated systems increase ongoing operational costs.

State Initiative:* Smart, Efficient Infrastructure

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: Build a multi-purpose event center, at one of our parks, to expand our offerings to the public. This would allow families to have family reunions, weddings, or businesses to conduct meetings/retreats at our property. This building would allow for different events by ensuring a large meeting space with the proper audio-visual infrastructure to support a variety of electronic devices. This building would be an all-inclusive destination with meeting space and overnight lodging.

This would require the construction of a facility, to include all the infrastructure associated with it.

If this facility isn't built, it will reduce our ability to stay relevant with today's visitors and their expectations. This will allow us to tap into a new market which should increase visitors and guests to our parks.

Description	Fund	BU-Dept	Fin Class	Account	2023-25 Agency Request	2023-25 Executive Recommendation	Total Estimated Project Costs	2025-27 Operating Costs	2027-29 Operating Costs

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2025

Description: The request is to add 10 year-round full-service cabins to the park system. Cabins would be added to parks to allow a variety of options for visitors to utilize during their stays. Cabins would vary in size based on the location of the park and their location within the park. The variety of sizes would cater to different demographics from a single family up to several families or a family reunion. The cabins would be built utilizing low maintenance materials, to help reduce the cost of maintenance and allow for ease of cleaning. The cabins would increase revenue brought in by the department.

10 year-round cabins would cost, on average, approximately \$3.5 million to build and install infrastructure to support. Depending on the number of cabins added, a park could require additional FTE's or money for a 3rd party companies to maintain the cleanliness of the cabins between visits. Parks and Recreation may have to purchase property or easements based on the location of the cabin vs. the proximity of neighbors.

Visitors will not have the variety of options for their stays in our parks. This could reduce the ability of families to enjoy the healthful benefits and the creation of memories in our state parks. This serves a need for accommodation for park users in the 12-month use parks. In a 2022 survey, done for the 2023-2027 State Comprehensive Outdoor Recreation Plan, 55% of respondents indicated a high interest in full-service cabins. This is a missed opportunity to attract tourists who aren't traveling with a recreational vehicle.

State Initiative:* Tribal Partnerships

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: Request \$2 million to rebuild the On-A-Slant Village located at Fort Abraham Lincoln State Park. The On-A-Slant Village tells the story of the first people to live in the Bismarck area. The village needs repair due to the deterioration of the wooden support members of the earth lodges. We would use modern materials and techniques to increase the life span of the buildings and reduce the maintenance requirements. We would be able to simulate the village, as it would have been when the Mandan people occupied the site. We will work with the MHA Nation to ensure that the rebuild is true to reality and help us with the interpretation of the site. Our interpretive staff would update the site for self-guided tours to ensure that the Mandan story is told accurately.

The resources required would be the funding of the project to ensure that we could utilize modern construction techniques to rebuild the village and reduce maintenance requirements. The visitors to Fort Abraham Lincoln would be served with a rebuilt village to understand what life was like in North Dakota before the settlers arrived. It would also help us to strengthen our relationship with the MHA Nation. If not funded, the village will continue to be maintained on a piecemeal basis. The use of traditional building materials and techniques is getting harder to find and the price, for these services, has increased significantly. We will reach a point when even piece-meal fixes will not be enough, and we will have to close or remove these structures.

State Initiative:* Smart, Efficient Infrastructure

Start Date (MM/DD/YYYY): 07/01/2025

End Date (MM/DD/YYYY): 06/30/2027

Description: The International Peace Garden is requesting \$1,500,000 to revitalize the International Music Camp complex. The International Music Camp rents the facilities from the International Peace Garden. The current complex is still using the original HVAC system and water heaters. Six (6) primary dorms and the Performing Arts Center were constructed in 1993 - 1994. The Dining Hall and other two (2) dorms are older than that. As equipment breaks or we are conducting the required preventive maintenance, we are finding that the components are not being made anymore. This upgrade will allow the International Music Camp to continue to offer its world class instruction to North Dakota students and expand the educational opportunities so that the dining hall and dorms are available year-round for school trips. Currently the dining hall is not insulated, which prevents the International Peace Garden from becoming more self-sustaining through year-round facility rentals.

This would require \$1,500,000 in new SIIF funds.

If this is not done, the International Music Camp Complex will continue to deteriorate until it can no longer be safely utilized. This will be a great loss to the State of North Dakota.

IPG #3 International Peace Garden Sewer System (Priority: 21)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	493	750-2550	75075	-	-	1,000,000	-	1,000,000	-	1,000,000
Total				-	-	\$1,000,000	-	\$1,000,000	-	\$1,000,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: The International Peace Garden’s sewer system is a critical system for the park. The current sewer system is over 70 years old. The upgrade to the International Music Camp Complex would require that the aging sewer infrastructure be upgraded. This would entail running new lines from the complex to the lagoons. The new line will reduce the distance and provide new lift stations to improve the flow. This will reduce the work on the overall system.

This would require \$1,000,000 in new SIIF funding.

Failure to upgrade the sewer system could result in a system failure that will shut down the International Music Camp and contaminate the local environment. This negative publicity will be hard to recover from considering that we are a garden that promotes peace and stewardship.

Matching Grant Program (Priority: 2)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	493	750-1501	75072	-	-	10,000,000	-	10,000,000	-	2,500,000
Total				-	-	10,000,000	-	10,000,000	-	2,500,000

State Initiative:* Health, Vibrant Communities

Explanation / Justification: During the last two (2) legislative sessions, Parks and Recreation was granted \$4,632,800 for the Parks Matching Grant Program. These funds were \$2,316,400 from state sources and \$2,316,400 from non-state sources. Parks and Recreation has been able to utilize those funds for capital projects. we were able to open doors and engage private sector partners. We request \$10,000,000 for a Parks Matching Grant Program for the 2025-2027 biennium. This would be \$5,000,000 from state sources and \$5,000,000 from non-state sources on a dollar-for dollar basis.

750 Parks and Recreation

Agency 750

The state would provide \$5,000,000 for the state portion of the match, subject to Parks and Recreation finding a dollar-for-dollar match from non-state sources for each capital project. The citizens of the State of North Dakota would be served, as well as those people visiting our parks to recreate. If this is not funded, we lose the opportunity to double our money with private individuals that have a passion for our parks and want to improve them.

Funding Source County, City, and Tribal Park Systems (Priority: 8)

State Initiative:* Health, Vibrant Communities

Explanation / Justification: The funding of this program would come from lottery earnings. We request \$5 million per year or \$10 per biennium. In the 2021 Special Session, the legislature authorized \$5 million in ARPA funding to create a matching grant program for North Dakota park districts. The 2023 legislature modified the program to include our tribal partners and increased the funding to \$6 million. The program has seen an overwhelming response rate with projects out stripping matching funds by over 6x. This vital program needs to continue to allow for the local communities to maintain their park infrastructure for the benefit of their communities and visitors. To maintain this program, we are asking for a continuing authorization of funds.

County, City, and Tribal Park System Grants (Priority: 9)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	493	750- 1501	75072	-	-	20,000,000	-	20,000,000	-	-
Total				-	-	20,000,000	-	20,000,000	-	-

State Initiative:* Health, Vibrant Communities

Explanation / Justification: In the 2023 Legislation Session, Parks and Recreation received \$6,000,000 for the purpose of providing grants to county, city, and tribal park systems. We request \$10,000,000 to continue this program for the county, city, and tribal park systems. The purpose of the grants is to renovate and upgrade existing facilities with the priority for outdoor facilities for the 2025-2027 biennium. County, city, and tribal park systems would be required to provide a dollar-for-dollar match for any funds received. No county, city, or tribal park system would receive more than \$750,000. The program has been funded over two (2) legislative sessions and the demand was amazing. This is a dollar-for-dollar matching grant. In both cycles we had over \$30 million dollars in grant requests for our \$5 million or \$6 million funded program.

This will ensure residents have an outdoor space to recreate in close to home. If this is not funded, the county, city, and tribal park systems will continue to have deferred maintenance issues to deal with. Many types of recreational facilities are available exclusively at the local level. Deferring maintenance further, will in some communities, mean that certain facilities, such as pools and older artificial turf fields, would need to be taken out of service for safety and liability reasons. This reduces the facilities available to support tourism, tournaments, and workforce retention.

750 Parks and Recreation

Agency 750

North Dakota State Parks Outdoor Education Initiative (Priority: 17)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	398	750-2507	75071	-	-	-	-	-	-	750,000
	493	750-2507	75071	-	-	750,000	-	750,000	-	-
Total				-	-	750,000	-	750,000	-	750,000

State Initiative:* Transforming Education

Explanation / Justification: In January 2022, Parks and Recreation received a grant, from DPI, for \$600,000 to conduct educational programs for any school across the state. Parks and Recreation has hosted 30 field days and 261 field trips. A field day is an outdoor educational experience for multiple schools rotating between stations. A field trip is one school going to a park for an outdoor educational experience. The field days have been presented to over 4,600 students, while 10,776 students have attended field trips. The grant offset the cost for the schools by allowing us to grant them a stipend for transportation costs. This stipend allowed schools, that couldn't afford to conduct field trips, to come and participate in the program and increase their students' learning through interactive outdoor learning. We are asking to continue this worthwhile program through a new grant of \$750,000. This program has a great return on investment for the students, and it creates future park visitor and possibly employees.

This would require a grant of \$750,000 from DPI to Parks and Recreation. If this is not funded, the program will go away because schools cannot afford to pay for bus service to our parks. This will deprive a unique outdoor learning experience that brings natural history, forestry, and ecology to students to develop a love for learning and the outdoors. We will lose this opportunity to instill in our younger generation, the appreciation for what North Dakota has to offer in its great outdoors and in turn their emotional investment in their state.

Total				-	373,671	-	373,671	-	373,671	-

State Initiative:* Other

Explanation / Justification: The International Peace Garden is seeking a 33% increase to its general operating grant, which would increase if from \$1,126,329 to \$1,500,000. The investments in infrastructure over the last several years allows us to expand our offerings to become a year-round destination. This expansion comes with the need for additional staff, including maintenance staff (such as a night shift) and programming staff to continue to build toward our goal of K-12 field trips. we are struggling to hire North Dakotans due to the Province of Manitoba increasing the minimum wage. We need to be more competitive, with our wages,

especially considering our remote location. We anticipate using approximately \$33,000 of this increase to support programming at the International Music Camp to ensure more access for students and families from North Dakota.

This would require \$373,671 in new general funds.

If this is not funded, the International Peace Garden will fall behind on maintaining their new buildings. They will not be able to expand their offerings to year-round nor increase programming to allow field trips for K-12 students.

Outdoor Fine Art Venue Improvement Grants (Priority: 22)

Statutory Authority

Chapter 61-03 of the North Dakota Century Code

Agency Description

The North Dakota Department of Water Resources (DWR or Department) was created in 2021 by legislative action through House Bill 1353. DWR was previously called the State Water Commission (SWC or Commission), which was created by legislative action in 1937 for the specific purpose of fostering and promoting water resources development throughout the state. In addition to the creation of DWR, the 2021 legislation also moved functions of the Office of the State Engineer, established in 1905, within the DWR and allows the Governor to appoint a DWR Director, subject to approval by a majority of the members of the State Water Commission per NDCC § 61-03-01.1.

DWR has the authority to investigate, plan, construct, regulate, provide water appropriations, develop water-related projects, and serves as a mechanism to financially support those efforts throughout North Dakota. There are currently six divisions that make up the DWR: Administration, Atmospheric Resources, Planning and Education, Regulatory, Water Appropriation, and Water Development.

Agency Mission Statement

To responsibly manage North Dakota's water needs and risks for the people's benefit.

Major Accomplishments

- 1 Northwest Area Water Supply Project The Northwest Area Water Supply (NAWS) Project has reached several milestones, including the completion of the South Prairie Reservoir, flow control facility, and hydraulic control structure. Construction is ongoing on contracts at the Snake Creek Pumping Plant for the NAWS intake, the discharge pipeline connecting the Snake Creek Pumping Plant to the NAWS transmission pipeline, the Biota Water Treatment Plant, and the Bottineau Reservoir and Pump Station. For the Biota Water Treatment Plant, plans are underway to complete the startup and commissioning using water from the Sundre aquifer. This will allow City of Minot employees to train and learn how to operate the plant over the winter months, ensuring a smooth transition with Lake Sakakawea water. Lake Sakakawea water is expected to be delivered to the plant in late 2025. Progress is also being made on designing the permanent intake pipeline and screen structure for NAWS, with the Section 408 review application submitted to the United States Army Corps of Engineers.
- 2 Southwest Pipeline Project The Southwest Pipeline Project (SWPP) has also seen advancements, including identifying current and future needs to aid in designing a main transmission line expansion. This expansion will deliver water to communities, rural customers, and economic development west of Dickinson. Hydraulic improvement projects in four service areas were completed this summer, increasing capacity to serve over 100 wait-listed rural customers. Significant progress has been made on the design of the Southwest Water Treatment Plant expansion, with bidding anticipated this fall or winter. The DWR is also working with Southwest Water Authority to determine the next steps for rural expansion in the Burt-Hebron service areas.

Major Accomplishments

-
- 3 Devils Lake Through August 31, 2024, the West and East End outlets have removed over 77,000 ac-ft of water from Devils Lake. Projections through the end of the operating season (October 31, 2024) varies between 121,200 -127,200 ac-ft. Capital Improvement Plan A Capital Improvement Plan (CIP) for the West End Outlet was completed in April 2024, which included a comprehensive inventory list and field inspections of all the infrastructure, as well as a comprehensive document outlining capital improvements for the West End Outlet. This CIP report is used as a guide to prioritize the future projects at the West End Outlet to maintain long-term operations of the outlet. In addition, DWR has signed the master contract with BW/AECOM for engineering services for the Devils Lake Outlets operation to maintain the continued operations of both Outlets. Several on-going projects for both the West and East End Outlets are listed below. • Replacement of the existing non-functional flow meters at the West End Outlet. • Working on finalizing a contract for preventative maintenance for switchgears at both outlets. • Scheduling the onsite manufacture inspections for the pumps at both outlets. • Investigating the overflow issue at the Josephine tank at the West End Outlet. • Addressing sedimentation at the East End intake and assisting with final stages of transmission line repairs.
-
- 4 Pushing REmote SENSors (PRESENS) The Data & Tech Section along with the Water Appropriation Division continued to expand the role of the PRESENS data collection platform to expand collection of soil moisture, soil temperature, and precipitation data. By the end of summer 2024, there were 540 PRESENS units operating across the state. Of these 540 sites, 53 include rain gage and soil moisture sensors. PRESENS delivers real-time environmental data (water levels, precipitation, soil moisture, soil temperature, barometric pressure, and air temperature) from sensors located in remote locations to publicly accessible databases at the Department of Water Resources.
-
- 5 Cost-Share Program Since the beginning of the 2023-2025 biennium and through the month of August, the State Water Commission has approved cost-share totaling approximately \$409 million for water supply, flood protection, and other general water management projects across the state. This accounts for approximately 66% of the \$621 million in new project funding authority included in DWR's current budget. Examples of larger-scale project approvals to date include \$50 million for Bismarck's Regional Water Treatment Plant expansion, \$76.1 million for the Mouse River Enhanced Flood Protection Project, and \$180 million for the Red River Valley Water Supply project. In addition to funding approvals, the State Water Commission has implemented new Cost-Share Program policy requirements that became effective in June and July 2024. These include requirements of project sponsors seeking assistance for water supply construction projects to submit basic asset inventories and capital improvement plans. In addition, safeguards have been put in place to remind sponsors of their obligations to follow applicable laws when developing their projects, and to submit accurate information as part of the Commission's application process.
-
- 6 Irrigation An additional Cost-Share Program update included provisions for further support of irrigation development in the state. In April 2023, the North Dakota Irrigation Association (NDIA) submitted a letter to the State Water Commission requesting consideration of modifications to existing cost-share policies and loan opportunities concerning irrigation development. In response, the Commission and DWR team members worked with NDIA and collected public comments to develop new Cost-Share Program policies and improved loan support opportunities. To support off-farm central supply works, the Commission's cost-share amount was increased from 50% to up to 75%. In support of on-farm equipment options, the Commission increased their support for the Bank of North Dakota's (BND) Ag PACE Program as well. BND's Ag PACE program previously provided loan interest buy-down of up to 4%, with a cap of \$40,000 – with \$20,000 each from BND and DWR. The Water Commission approved increasing DWR's match, which raised the cap to \$60,000 – including \$20,000 from BND and \$40,000 from DWR. DWR is also a cooperative partner in an Irrigation Suitability Analysis (Project) at the request of NDIA. The Project is to identify land in North Dakota where there is a high probability of additional irrigation development in the short, medium, and long-term future. The research will be conducted by NDSU and will include evaluating each county in North Dakota for irrigation feasibility. The total cost of the Project is \$96,084, with \$30,000 from DWR.
-
- 7 Water Festivals DWR continued to support Water Festivals as a key component of the agency's Water Education Program. Water Festivals are one or multi-day events organized to educate large numbers of students from several schools at a central location about water resources. These highly-popular events consist of multiple structured learning stations where students actively engage in hands-on water activities and investigations that are taught by trained facilitators or natural resource professionals. So far during the 2023-2025 biennium, 13 Water Festivals have been held in various locations across the state, involving 134 schools and over 7,900 students in grades 3 through 6.
-

Major Accomplishments

-
- 8 In 2023, the DWR released a Requested for Proposal (RFP) for the purpose of evaluating Managed Aquifer Recharge (MAR) opportunities across North Dakota's glacial drift aquifers. This project was intended to provide narrative and guidelines for purposes of ranking the MAR potential for the state's aquifers, and to provide recommendations for next steps pertaining to the development of potential MAR solutions in North Dakota. The work completed for the RFP includes a detailed report which was accompanied by an interactive map. The report establishes the requirements and criteria for the definition of 5 separate tiers by which the MAR potential for North Dakota's glacial drift aquifers could be ranked. • Tier 5 (Poor MAR Potential): This rating indicates that the MAR would likely be ineffective or unsuitable given hydrogeological context. • Tier 4 (Fair MAR Potential): This rating suggests that MAR may provide some level of aquifer recharge potential or benefit, but there are significant limitations or inefficiencies. • Tier 3 (Good MAR Potential): This rating is given when MAR could be generally effective and appropriate in limited site-specific areas. • Tier 2 (Very Good MAR Potential): This rating indicates that MAR could be highly effective and well-suited to the local hydrogeological conditions. • Tier 1 (Excellent MAR Potential): This is the highest rating, signifying that MAR could be exceptionally effective, and sustainable when integrated into the overall water management system.
-
- 9 Continued to maintain a strong water right permitting process and worked to find efficiencies that provide for the orderly development of water resources in the state.
-
- 10 Dam Safety Standards In January 2024, the Department released new Dam Safety Standards, updating the Department's previous 1985 Dam Design Handbook. The Standards represent over 5 years of development and an investment of over \$300,000 by FEMA's Assistance to States grants. The Standards update and reflect the current state of the dam safety practice. The Standards outline the administrative and technical requirements necessary to obtain a construction permit that complies with DWR's dam safety focus. The Department solicited the regulated community for comment, receiving over 300 comments that were considered in the published version of the Standards.
-

Critical Issues

-
- 1 Economic Development As North Dakota continues to be actively engaged in working to attract a wide array of economic development opportunities to the state, DWR works cooperatively with the Department of Commerce to keep water as a key component of those discussions. In general, industries that will have a need for larger-scale water supplies are power generation, data centers, ore processing, fertilizer production, agricultural processing, biofuel production, animal agriculture, plastics production, and oil and gas.
-
- 2 International Relations DWR entered a Memorandum of Understanding (MOU) with the South Korean Meteorological Administration (KMA) for the purpose of enhancing scientific cooperation and exchange of expertise to advance the understanding and implementation of cloud seeding technologies. Areas of collaboration may include scientific research, data sharing, technical cooperation, operational trials, and joint training and knowledge transfer. The MOU signifies the commitment of both parties to contribute to the advancement of cloud seeding research and operations. In support of efforts to more effectively manage water in watersheds that include areas in Canada, DWR continues to remain actively engaged with the Red River Basin Commission, Assiniboine River Basin Initiative, International Souris River Board, and International Red River Watershed Board. This involves serving on both boards as well as multiple technical and executive committees.
-
- 3 Water Project Funding - Resources Trust Fund North Dakota funds the majority of its water projects through the DWR, with the vast majority of project funding from the Resources Trust Fund (RTF). The RTF is funded with 20.5 percent of revenues from the oil extraction tax, and for decades, a percentage of the RTF has been designated by the Legislature to be used for water-related projects and energy conservation. Without the availability of funding through the RTF, critical water supply, flood protection, and general water management projects would not move forward. As evidence of the need for RTF revenues, DWR conducted its biennial water project inventory process in cooperation with water project sponsors from across the state. For the 2025-2027 biennium, the inventory effort identified \$1.4 billion in funding needs from the state for water infrastructure. There is not enough revenue to support all of the identified projects, but any reduction in available funding for water development through the RTF would only widen the gap of unfunded project needs.
-

Critical Issues

-
- 4 Missouri River Water Use The Missouri River is a tremendous resource for many of North Dakota’s municipal, rural, industrial, and agricultural water users as the largest surface water supply in the state by far. There are currently several water supply intakes along the Missouri River for various purposes in North Dakota, and four of those are large regional water supply systems – the Northwest Area Water Supply Project, Red River Valley Water Supply Project, Southwest Pipeline Project, and Western Area Water Supply. When all four of these projects are fully completed, they will serve approximately 75% of all North Dakota water users. And as North Dakota looks to advance economic development opportunities in multiple industrial sectors that rely heavily on water, the Missouri River will be the most likely and reliable source. However, as other states, both in and out of the Missouri River Basin look to take advantage of Missouri River water, it is increasingly important that North Dakota put that water to beneficial use for our citizens and economy. North Dakota must demonstrate that it can use Missouri River water, or other states like California, Arizona, and Colorado will.
-
- 5 Development & Retention The DWR continues to face significant challenges in retaining experienced staff amidst intense competition in the labor market. Specific issues within the DWR’s workforce, such as the decline in cumulative years of experience and the need to improve team member engagement, satisfaction, and retention, remain a priority for the organization. Despite these efforts, the absence of dedicated personnel focused on the professional development and growth of staff further exacerbates these challenges, limiting opportunities to enhance overall team effectiveness and address long-term workforce needs.
-
- 6 Water Related Legal Issues The DWR has a long-standing need for legal services to effectively manage and develop North Dakota’s water resources in a sustainable manner. Its responsibilities encompass project development, the appropriation of surface and groundwater rights, and the regulation of drainage, dams, floodplain management, and the state’s sovereign lands. Historically, the DWR and the State’s approach to legal and national issues impacting the state water resources has been largely reactive. However, as the water landscape continues to evolve, it is essential for both the State and the DWR to adopt a more proactive and strategic posture to anticipate and address emerging challenges.
-

Performance Measures

The DWR established the following metrics in the July 1, 2022 five year strategic plan.

Quarterly Internal Review

- Conduct internal self-scoring of progress on objectives, goals, and tactics as an agenda item at quarterly DWR Strategic Plan Leadership meetings

Surveys

- External
 - o Utilizing surveys and interviews conducted from January 2022 – April 2022 as baseline
 - o Conduct a simplified annual survey of stakeholders
- Internal
 - o Develop and implement an annual DWR in-house morale and culture survey

Staffing

770 Water Resources

- Evaluate and compare staff turnover rates on at least an annual basis
- Track number of hours worked in excess of a standard work week

Water Resources

- Quantify water use in the state and track over time

Projects

- Amount of funding committed to water infrastructure and development
- Percent of project financial needs addressed that are included in the Water Development Plan
- Amount of water put to beneficial use
- Number of overall projects funded
- Number of counties affected by new state investments in rural and municipal water systems
- Number of successful irrigation projects or irrigation acres
- Miles of pipeline funded
- Population protected from 100-year flood events
- Cost/benefit ratios for projects
- Changes in flood insurance policies and rates

Missouri River

- Population served by Missouri River water
- Amount of water withdrawn from Missouri River

Cash Management

- Reduction in carry-over funds
- Measuring investment income rate of return compared to average market rate of return

Responsiveness

- Turnaround time for public inquires
- Number of applications approved/permits issued
- Track time from application to issuance

Signing of MOUs with Tribal Nations

Program Statistical Data

The Department of Water Resource's budget totals \$1.263 billion, of which \$367 million is carryover authorization. The budget contains \$1.132 billion of special fund authority and \$100 million of federal fund authority.

The DWR's appropriation has increased \$1.2 billion or 1,759% since the 1997-99 biennium. During the 1997-99 biennium, the DWR had 82 FTE positions for a total of \$827,253 of appropriation authority per FTE and has since increased to 93 FTE positions in the 2023-25 biennium for a total of \$13,562,981 of appropriation authority per FTE. During the 21-23 biennium, the DWR's accountant processed 22,637 transactions.

The DWR has deployed more than 540 PRESENS sensors/loggers at an average cost of \$1,200 per sensor and plans to have 680 units installed by 2025 providing 18 million measurements per year.

Since the early 2000s, the submission of temporary water permits has increased nearly 500%, while the volume of temporary water permits approved has surged 1,000%. The Appropriation Division currently faces a backlog of 547 permits: 97 from surface water sources (3 in deferred status and 94 pending review) and 450 from groundwater sources (217 in deferred status and 233 pending review).

Since the transition from the Office of the State Engineer to the Department of Water Resources, the DWR has had an increase of more than 117% in Director-level presentations, a 280% increase in news releases, and a 42% increase in social media posts (from 2020 through 2023).

Explanation of Program Costs

The authorizing legislation for the DWR is found in Title 61 of the North Dakota Century Code. Primary DWR functions and statutory responsibilities include:

- Allocation of the state's waters, including obtaining and recording data for the determination, development, and appropriation of the state's waters
- Hydrographic surveys and investigations of each stream system and source of water supply in the state, beginning with those most used for irrigation
- Facilitation of water rights determinations
- Water-related data collection
- Dam safety, including receipt of emergency action plans for high-hazard or medium-hazard dams

770 Water Resources

Agency 770

- Construction and drainage permits
- Staffing and analysis for the State Water Commission and execution of its decisions
- Rulemaking authority
- Oversight of water storage reservoirs
- Implementation of economic analysis for water conveyance projects and flood-related projects
- Implementation of life cycle cost analysis for water supply projects
- Cooperation with federal agencies in the execution of topographic surveys and maps of North Dakota
- Custodian of all plats, field notes, and similar records provided to the state by a federal government entity
- Inspection or investigation of alleged statutory violations
- Removal or modification of unsafe or unauthorized works
- Sovereign land management
- Removal, modification, or destruction of dangers in, on the bed of, or adjacent to navigable waters
- Hearings for persons aggrieved by an action or decision of DWR
- Cost-Share Program administration
- Floodplain management
- Cloud Modification Program administration
- State Water Development Plan
- Emergency response

Program Goals and Objectives

1. Effectively communicate with the public and stakeholders with a primary focus on collaboration and building partnerships with the following goals:
 - a. Increase public outreach and public relations to inform citizens of the DWR's mission, vision, and values for the purpose of broadening public education, awareness, and support.

- b. Expand communication efforts to improve opportunities to better inform DWR stakeholders about operations, priorities, projects, programs, and data resources both within and outside the DWR.
 - c. Establish a communication process to regularly update decision makers on the DWR's mission, vision, values, and progress, and to equip decision makers to make informed decisions regarding DWR and water-related issues.
2. Develop world-class, sustainable, and resilient water development and management practices.
- a. Support smart, efficient infrastructure and improve resiliency to floods and drought.
 - b. Assist and support public entities and citizens.
 - c. Complete water project planning efforts with continued emphasis on short and long-term planning horizons and incorporation of best practices.
 - d. Engage key stakeholders to provide education on water resources, identify needs, and develop policies and projects to support business, industry, and economic development.
 - e. Support efficient allocation of state investments in water infrastructure.
 - f. Support efforts to develop and improve irrigation opportunities where appropriate.
 - g. Continue efforts toward resolution of tribal water rights.
 - h. Maintain and operate the Devils Lake Outlets and Tolna Coulee Control Structure.
 - i. Enhance sovereign lands for shore fishing, canoeing, swimming, hiking and other forms of water recreation.
3. Support beneficial use of Missouri River system water and other available water supply sources.
- a. Support smart, efficient infrastructure and improve resiliency to floods and drought.
 - b. Complete construction of the Northwest Area Water Supply Biota Water Treatment Plant Phases I and II, Minot Water Treatment Plant Phase III, and the Souris Reservoir and Pump Station.
 - c. Work with Garrison Diversion Conservancy District in their efforts to advance the Red River Valley Water Supply project, Eastern North Dakota Alternative Water Supply (ENDAWS), and Central North Dakota Water Supply (CNDWS) projects.
 - d. Secure additional allocations for irrigation and industrial water use, including from the Missouri River.
 - e. Collaborate and develop MOUs with tribes for sharing of information, water needs assessments, allocations from the Missouri River, protection of water rights, and access to capital for water projects.

- f. Collaborate with the Dept. of Commerce to identify and support economic development opportunities that strengthen ND's economy.
- 4. Implement innovative ideas, technology, and grow analytic capabilities to improve efficiencies in water management and development.
 - a. Expand the Pushing REmote SENSors (PRESENS) initiative to a fully integrated solution for hydrologic data collection.
 - b. Enhance data analysis tools, including use of artificial intelligence, to leverage available data and collection technology for improved water management.
 - c. Streamline application processes and make it easier for stakeholders and the public to access services through on-line portals and project dashboards.
 - d. Continue improving automation of warnings, alerts, and pending water use regulatory actions.
 - e. Continue the refined delineation of the state's ground water resources.
 - f. Improve user accessibility of LIDAR and GIS mapping services through the website.
 - g. Support research into irrigation technologies and promote more efficient irrigation practices.
 - h. Continue to support research and identify opportunities for water storage, aquifer recharge, and water reuse.
 - i. Work with NDIT to develop and enhance DWR technology capabilities and initiatives.
- 5. Improve the DWR's internal resilience and promote a positive culture.
 - a. Attract and retain highly qualified team members.
 - b. Improve agency-wide communication, increase awareness of department-wide activities, and foster interaction of top DWR leadership with team members.
 - c. Empower team members to improve and grow through educational opportunities and professional development.
 - d. Modernize software, implement best practices for cyber security, and create redundancy of knowledge necessary to utilize unique DWR business applications.
 - e. Build an organizational culture that is fair, objective, accountable, responsive, engaged, and credible.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Northwest Area Water Supply (NAWS) project has faced numerous legal challenges since construction began in 2002., Despite extensive efforts to comply with the National Environmental Policy Act (NEPA) and the Boundary Waters Treaty Act, the Province of Manitoba filed a lawsuit that year, arguing the Environmental Assessment (EA) completed for the NAWS project was inadequate. A 2005 court order mandated further environmental analysis to address concerns about the potential transfer of biological organisms. In response, the Bureau of Reclamation (BoR) initiated an Environmental Impact Statement (EIS) in 2006, which was completed in 2008. However, Manitoba and the state of Missouri continued to challenge the project, resulting in a court-ordered halt on construction. A Supplemental EIS was released in 2014 and finalized in 2015, addressing the complaints from Manitoba and the

770 Water Resources

Agency 770

state of Missouri. Finally, in 2017, the District Court ruled in favor of the BoR and North Dakota. Manitoba and the state of Missouri appealed the District Court's decision at the Circuit Court. Later, Manitoba withdrew its appeal, and the Circuit Court upheld the District Court's decision against state of Missouri in 2019, ending 17 years of litigation.

With the legal challenges behind, NAWs resumed construction and is expected to serve 81,000 people when complete. The court ruling established water treatment standards to resolve the complaints from Manitoba and made the federal government financially responsible for both construction, operations and maintenance of the Biota Water Treatment Plant (WTP). The BoR and North Dakota entered into a Memorandum of Agreement (MOA) which lays out the roles and responsibilities of the state of North Dakota, BoR, and the City of Minot. The MOA notes that the state will own the Biota WTP, the City of Minot will operate and maintain the Biota WTP, and the federal government through the BoR has the financial responsibility for the operations and maintenance of the Biota WTP. A cooperative agreement between the BoR and state of North Dakota defining methods of fund transfer, have been approved. In accordance with the cooperative agreement, the State of North Dakota will act as a pass-through entity for federal funds from the BoR to the City of Minot.

Necessary resources for implementation (including FTE's)*: Continuing appropriation authority for the pass through funds to Minot for the operation of the Biota water treatment plant or an increase in federal funds spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: New federal resources for the operation of the BIOTA water treatment plant.

Who is served and impact of not funding*: North Dakota citizens served by the BIOTA water treatment plant.

Team Development Coordinator - FTE (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	246,806	6,500	253,306	1.00	263,568	6,500	270,068	1.00
Total	246,806	6,500	253,306	1.00	263,568	6,500	270,068	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Given the challenges faced by the Department of Water Resources (DWR) with experienced staff leaving and intense competition in the labor market, the introduction of a Team Development Coordinator is critical to meet workforce challenges. This role will be designed to address the specific issues highlighted in the organization's workforce, including the decline in cumulative years of experience and the need to bolster team member engagement, satisfaction, retention, and overall effectiveness. The DWR currently lacks dedicated personnel focused on the professional development and growth of its team members, exacerbating existing challenges.

Why An FTE is Necessary

770 Water Resources

Agency 770

- Creating a culture of learning and personal growth
- Developing a mentorship program
- Facilitating knowledge transfer
- Formulating tailored development plans
- Enhancing employee engagement
- Adapting to evolving roles
- Identifying untapped potential
- Maximizing return on experience
- Succession planning
- Partnering with universities to address shortages of highly technical skilled individuals and development of a certificate program
- Expanding the DWR's presence at job fairs

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, and funding for operating costs associated with the position.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resource trust funds.

Who is served and impact of not funding*: The DWR will continue to fall behind as it relates to the professional development of existing team members, struggle to recruit skilled individuals from the workforce in a highly competitive environment. The inability to fill vacant positions will continue to disrupt or extend timelines for services provided to North Dakota citizens.

Accountant/Budget Specialist - FTE (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Workforce

770 Water Resources

Agency 770

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DWR's appropriation has surged by \$1.2 billion or 1,759% since 1997. The DWR's sole Accountant/Budget Specialist occupies a pivotal role in the agency's financial process, having immense responsibility across domains critical for operational integrity and fiscal accountability. Responsibilities include:

- Accuracy and Transparency: Adherence to accounting best practices, fiscal policy, and reconciling financial statements.
- Mitigating Risk: Reviewing and verifying expenditures to safeguard against any misallocation or non-compliance with federal and state regulations.
- Procurement: Oversees agency procurement processes, OMB's vendor maintenance program and year-end reporting.
- Reporting: Managing accounts receivable, optimizing collections, and preparing fiscal and audit reports.
- Verification: Processing, monitoring and reconciling \$1.1 billion cost-share program.

The Accountant/Budget Specialist is a guardian of the agency's financial integrity, entrusted with the task of ensuring every dollar is accounted for, every regulation meticulously adhered to, and every decision rooted in fiscal prudence.

Why An FTE is Necessary

- Vital accounting tasks are being done by team members not specialized in financial or accounting best practices such as engineers and meteorologists.
- Additional responsibilities to properly account for and monitor federal funds passed through to the City of Minot for the operation of the Northwest Area Water Supply Biota Water Treatment Plant.
- Increased funding for water projects has resulted in requests for more financial reports along with increased funding source reporting requirements.
- An additional Accountant/Budget Specialist FTE would be able to provide managers with revenue and expenditure analyses to check for errors, for development of more accurate divisional budgets, and assistance for contracts and procurement.

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, and funding for operational costs associated with the FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resource trust funds for operational use.

Who is served and impact of not funding*: North Dakota citizens are served through improved fiscal prudence and DWR team members are better served with additional support for accounting/budget requirements.

770 Water Resources

Agency 770

Outreach & Education Division Director - FTE (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	352,434	6,500	358,934	1.00	374,575	6,500	381,075	1.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The passage of House Bill 1353 in 2021, and the resulting creation of the Department of Water Resources (DWR), demonstrated the Legislature and Governor Office’s support for fundamental changes to the (then) State Water Commission agency. Along with the new name, new leadership, and reorganization of the agency, there is also a new and expanded expectation and emphasis on citizen engagement, information dissemination, Tribal outreach, transparency, communication across all levels of government, and agency branding. However, DWR’s ability to grow in these areas is hindered by a lack of available team resources.

A new division within the DWR with a specific focus on outreach and education is necessary, including its oversight by an Outreach and Education Division Director. This will enable DWR to better support our vision, mission, and values - with expanded engagement and education of constituents, and more efficient coordination of presentations and media requests. In addition, involvement with interim Legislative committees, and local, state, national, international, and Tribal entities have also greatly expanded.

Necessary resources for implementation (including FTE’s)*: One FTE authorization, funding for salaries and wages, and funding for operational expenses related to the new FTE position.

Are resources being redirected or are they new or additional (including FTE’s)*: Redirecting resource trust funds for operational use.

Who is served and impact of not funding*: North Dakota citizens will be better served through improved engagement, information dissemination, Tribal outreach, transparency, and communication across all levels of government.

Deputy Director - FTE (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	427,980	6,500	434,480	1.00	454,153	6,500	460,653	1.00
Total	427,980	6,500	434,480	1.00	454,153	6,500	460,653	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: House Bill 1353, passed in the 2021 legislative session, established the Department of Water Resources (DWR), replacing the State Water Commission and the Office of the State Engineer. The DWR Director, appointed by the governor, serves as a Cabinet member, serves as the Secretary to the State Water Commission (Commission), and advocates for sound water management at the local, regional, tribal, national, and international levels. Collaborative approaches and high-level engagement continue to increase as heightened awareness of shared and competing water needs evolves, along with growing competition for state cost-share for water development projects. In response to the Director’s expanding responsibilities in safeguarding state interests in water-related matters, a Deputy Director becomes crucial to represent both the state and DWR under the Director’s oversight.

Why an FTE is necessary

- The State Engineer has been acting in a dual role as a Deputy Director, pulling the main focus of the position from crucial regulatory responsibilities.
- The Deputy Director would ensure a broader and more effective representation for the state in water-related issues by engaging with various entities concurrently, which also include tribal, national, and international responsibilities.
- The Deputy Director would assist in conversations related to increasing demand for water related to economic development.
- By distributing responsibilities between the Director and Deputy Director, the Department could address evolving demands more strategically, optimizing their efforts and resources for a more targeted approach.
- The Deputy Director’s specialized expertise could enhance the Department’s ability to navigate complex challenges, providing a deeper understanding of technical, legal, and policy intricacies for informed decision-making.
- The presence of a Deputy Director would create a resilient leadership structure, ensuring the Department can maintain consistent operations in the Director’s absence.
- The Deputy Director would understand the whole of the Department and be able to step in as Acting Secretary at Commission meetings, represent the Department at national and international meetings and legislative committee commitments.
- Nearly every department across ND state government has at least one Deputy Director.

770 Water Resources

Agency 770

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, funding for operational expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resource trust funds.

Who is served and impact of not funding*: The North Dakota citizens would be better served through more effective representation for ND for water-related issues by engaging with various entities concurrently, which include tribal, national, and international responsibilities.

NAWS Operator - FTE (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	349,154	16,500	365,654	1.00	366,454	16,500	382,954	1.00
Total	349,154	16,500	365,654	1.00	366,454	16,500	382,954	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Northwest Area Water Supply (NAWS) project has been under construction since 2002. Construction has continued and NAWS has been adding customers and infrastructure as project buildout continues. A full-time operator position was filled in 2010. As NAWS continues to expand, an additional FTE is needed to support the operations and provide 24-hour monitoring and response for one of North Dakota's largest water supply projects. The NAWS Operator will assist with extensive ND Department of Environmental Quality (DEQ) sampling and reporting, reading meters for billing, operations and maintenance of facilities, locating infrastructure in response to one call requests, coordinating repairs and maintenance with contractors, coordination with customer entities, and being responsive to pipe breaks or other emergencies. This position will additionally develop a routine maintenance schedule for the entire NAWS system. All costs for the NAWS Operator will be funded through the water rate from NAWS project customers. The requested FTE position will have an office located at the Lansford Pump Station and be required to have a Water Distribution System Class II certification as required by DEQ.

Why an FTE is necessary

- Currently, DWR has one FTE and one long-term temporary upkeeping a system that will one day serve one in ten North Dakotans. As the build-out of NAWS continues, the operations require the position for ongoing safety, redundancy, and support of the entire NAWS system.
- Continued build-out of NAWS has increased the population served, number of facilities requiring maintenance, miles of pipeline in service, as well as travel time between facilities. The treated water distribution system includes 242 miles of pipeline, and travel time to cover the full distribution system is over five and a half hours.
- The system includes 38 facilities that require regular maintenance, and approximately 500 appurtenances that needs attention at least once a year.

770 Water Resources

Agency 770

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, funding for operational expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE's)*: New funding from the NAWS operation and maintenance fund which receives revenues from users of the NAWS system.

Who is served and impact of not funding*: North Dakota citizens that receive water from the NAWS system.

Paralegal - FTE (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	273,824	6,500	280,324	1.00	-	-	-	0.00
Total	273,824	6,500	280,324	1.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Water Resources (DWR) has a long history of requiring legal services to sustainably manage and develop North Dakota's water resources. DWR's responsibilities include project development; appropriation of surface and ground water rights; and regulating drainage, dams, floodplain management, and ND's sovereign lands - all of which require a significant amount of legal support and knowledge of water law. The gained efficiency of having in-house legal support would mean the legal staff would be consistently aware of all agency actions, and both internal and external decisions.

A paralegal will support the agency's ongoing policy enhancement efforts, administrative hearings, legal challenge support, water rights cancelations, agency complaint processes, and assist in coordinating open records requests, administrative code updates, and coordination with the AG's Office. The paralegal will additionally support the general counsel and the DWR team with legal research requests.

Other consideration

- The DWR has committed to developing policy and guidelines transparently to ensure public awareness and understanding. As these policies are developed, paralegal and legal counsel support in-house would optimize the direction and review considerations.

- Until 2018, DWR had a paralegal FTE. During the 2017 Reduction-in-Force, this position was reallocated, and the duties were absorbed by technical staff or directed to the AG's Office. The reduction in paralegal support to DWR has been difficult to overcome with some of the duties remaining suboptimal and detracting from the technical responsibilities of the larger team.

770 Water Resources

Agency 770

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, and funding for operational expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resource trust funds.

Who is served and impact of not funding*: North Dakota citizens by improving the DWR's ability to sustainably manage and develop North Dakota's water resources.

General Counsel - FTE (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	452,162	6,500	458,662	1.00	479,681	6,500	486,181	1.00
Total	452,162	6,500	458,662	1.00	479,681	6,500	486,181	1.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Water Resources (DWR) has a long history of requiring legal services to sustainably manage and develop North Dakota's water resources. DWR's responsibilities include project development; appropriation of surface and ground water rights; and regulating drainage, dams, floodplain management, and ND's sovereign lands - all of which require a significant amount of legal support and knowledge of water law. The gained efficiency of having in-house legal support would mean the legal staff would be consistently aware of all agency actions, and both internal and external decisions.

The Assistant Attorney General currently supporting DWR through the Attorney General's (AG) Office is often requested to consult on water issues for other agencies and boards such as the Dept. of Environmental Quality, ND Game and Fish, ND Parks and Recreation, Dept. of Agriculture, Dept. of Trust Lands, and the Public Services Commission. In addition to continued services from the AG's Office, the DWR is proposing an in-house General Counsel to solely support the DWR's needs. With the increasing complexity of construction contracts, development of MOUs with Tribal Nations regarding water rights, growing federal overreach, and general water disputes, DWR finds itself in need of specialized legal services and an FTE dedicated solely to supporting these important initiatives.

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, and funding for operational expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resources trust funds.

Who is served and impact of not funding*: North Dakota citizens and several other state agencies by improving the DWR's ability to sustainably manage and develop North Dakota's water resources. The position would help ensure the State's position as there is increasing complexity of construction contracts, development of MOUs with Tribal Nations regarding water rights, growing federal overreach, and general water disputes.

770 Water Resources

Agency 770

Hydrology Data Analyst - FTE (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	285,186	6,500	291,686	1.00	-	-	-	0.00
Total	285,186	6,500	291,686	1.00	-	-	-	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Water Resource’s (DWR) Water Appropriation Division is charged with the management of the state’s surface and groundwater resources. In the late-1990s, DWR began collecting hourly water level measurements at sites growing to ~100 sites in 20 years. In 2019, Pushing REmote SENSors (PRESENS) was developed providing automated measurements of over 500 sites including water levels, barometric pressure, temperature, precipitation, and soil moisture data, compounding data coming into the agency. In addition to PRESENS, DWR has proactively acquired the associated data from 6 airborne electromagnetic (AEM) surveys which are used to characterize the subsurface geology for the purposes of further characterization and identification of aquifers.

Why an FTE is necessary

- 25+ years of aggressive data collection has resulted in an exponential increase of available environmental data.
- The real-time datasets create an opportunity to implement data-driven models to make decisions regarding water resource management that were previously unavailable.
- This position will facilitate the development of models and create GIS layers and maps using the incoming data. This will assist with faster and more accurate decisions regarding water availability, use, and permits.

Necessary resources for implementation (including FTE’s)*: One FTE authorization, funding for salaries and wages, and funding for operational expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE’s)*: Redirecting resources trust funds.

Who is served and impact of not funding*: North Dakota citizens are served through analysis of data collected by the DWR’s Pushing REmote SENSors (PRESENS) and airborne electromagnetic (AEM) surveys. Analysis of this data will facilitate the development of models and create GIS layers and maps. Overall this will help the DWR better manage the states water resources.

770 Water Resources

Agency 770

Assistant NFIP Coordinator - FTE (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	234,466	4,875	239,341	0.75	246,533	4,875	251,408	0.75
General	-	-	-	0.00	-	-	-	0.00
Special	78,158	1,625	79,783	0.25	82,181	1,625	83,806	0.25
Total	312,624	6,500	319,124	1.00	328,714	6,500	335,214	1.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Water Resources (DWR) supports the Federal Emergency Management Agency’s (FEMA) Community Assistance Program - State Support Services Element (CAP-SSSE) through 1 grantfunded FTE (known as the National Flood Insurance Program (NFIP) State Coordinator). The CAP-SSSE grant supports city, township, and county floodplain and emergency managers in their understanding, communicating, and managing of identified flood risks within their communities.

NFIP community support in North Dakota was previously served by 2 FTEs within the DWR, but this was reduced to 1 FTE as a part of the 2017 Reduction-in-Force. However, the complexity of the NFIP program, the available resources, and potential implications for communities and people of North Dakota have all elevated in support needs. There is currently a gap in support for communities that are actively involved or looking to become involved with the NFIP in North Dakota.

The Assistant NFIP Coordinator position is an eligible position to be covered by the CAP-SSSE Grant at a 75% federal cost-share for salary and benefits. The position will enable necessary collaborations and support to communities and enable the state to plan and succeed in managing flood risk for decades to come.

Why an FTE is necessary

- The NFIP Township Study (SB 2365; 2023) and FEMA’s Township Study have resulted in an increased number of ND communities joining the program. There are currently 338 communities participating, and DWR is aware of ~50 communities currently considering participation.
- Available grant funding is expected to increase by 28% (to \$270,000/year) if ND can meet the local match.
- CAP-SSSE program funding levels are dictated by a secondary level of program tracking called Tiered State Framework (TSF). Tracking two different sets of grant metrics took 160+ hours and 2,200+ pages of evidence in 2022. Grant funding availability is dependent upon these metrics.
- North Dakota is falling behind on community assistance efforts. In 2023, the program was only able to evaluate 2% of participating communities (8) instead of the program’s goal of 10% (34).

770 Water Resources

Agency 770

• With ND’s population growth comes additional economic and development growth. Ensuring community decisions are made with a solid understanding of known flood risk is a key mission in the CAP-SSSE program.

Necessary resources for implementation (including FTE’s)*: One FTE authorization, funding for salaries and wages, and funding for operating expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE’s)*: Redirecting resource trust funds to provide 25% match for new federal funds available.

Who is served and impact of not funding*: North Dakota citizens would be better served as the state is falling behind on community assistance efforts. In 2023, the program was only able to evaluate 2% of participating communities (8) instead of the program’s goal of 10% (34). With ND’s population growth comes additional economic and development growth. Ensuring community decisions are made with a solid understanding of known flood risk is a key mission in the CAP-SSSE program.

RiskMAP Program Specialist - FTE (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	350,706	6,500	357,206	1.00	367,468	6,500	373,968	1.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	350,706	6,500	357,206	1.00	367,468	6,500	373,968	1.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Water Resources (DWR) supports the research and identification of flood risk in North Dakota through the Federal Emergency Management Agency’s (FEMA) Cooperating Technical Partner (CTP), Risk Mapping, Assessment, and Planning (RiskMAP) program. As North Dakota communities continue to prioritize flood risk resilience, assessing and disseminating defensible areas of flood risk is an important step in allowing communities to ideate and deploy resilience measures.

Since 2009, the RiskMAP program has been fully supported through 1 federally-funded FTE within the DWR. Recently, the RiskMAP program oversight has had increasingly complex responsibilities tied to program management through GIS metrics, tracking, and deliverables; while at the same time, RiskMAP funding potential is increasing.

No additional FTE have been provided in support of this program even as demands related to project and grant management have increased. North Dakota is the only FEMA Region VIII Cooperative Technical Partner who services the needs of the Risk MAP program with only one dedicated staff member.

The RiskMAP Program Specialist position would be financed 100% by FEMA funds to support the program and are tied to the continued FEMA funding support.

770 Water Resources

Agency 770

Why An FTE Is Necessary

- Available grant funding is not being used as DWR does not have the staff to support the use of the funds. With an additional FTE, ND and the DWR would be able to apply for, and leverage, these funds that would enhance state flood risk resilience.
- This FTE would assist with additional tracking metrics and grant reporting required by FEMA on a monthly, quarterly, and annual basis.
- This position will increase outreach and communication with communities statewide to identify areas of need to match or develop resources efficiently, such as Base Level Engineering (a non-regulatory flood risk identification product).
- The FTE would allow increased collaboration with DES to identify projects and opportunities that would be eligible to accelerate statewide flood risk resilience efforts.

Necessary resources for implementation (including FTE's)*: One FTE authorization, funding for salaries and wages, and funding for operating expenses related to the FTE.

Are resources being redirected or are they new or additional (including FTE's)*: The RiskMAP Program Specialist position would be financed 100% by FEMA funds to support the program and are tied to the continued FEMA funding support.

Who is served and impact of not funding*: This position will increase outreach and communication with communities statewide to identify areas of need to match or develop resources efficiently, such as Base Level Engineering (a non-regulatory flood risk identification product).

The FTE would also allow increased collaboration with DES to identify projects and opportunities that would be eligible to accelerate statewide flood risk resilience efforts.

Silver Jacket Coordinator - FTE (Priority: 12)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

770 Water Resources

Agency 770

Request explanation and justification (include any statutory authority)*: The Department of Water Resources (DWR) supports North Dakota’s Silver Jackets team through a single temporary employee (Silver Jackets Coordinator). Silver Jackets teams are interagency (local, state, and federal) teams that facilitate collaborative ideation and solution development to achieve state flood risk resilience priorities. The ND Silver Jackets team has helped secure over \$9.4 million in grants to support ND entities for projects such as flood risk reduction feasibility studies, flood forecasting improvements, emergency action planning workshops, and scientific resource updates.

Since 2009, the ND Silver Jackets Coordinator has been classified as a temporary employee, with the state paying wages with no benefits. In the 2023 Legislative Session, the ND Legislature allocated funding to the DWR to provide benefits commensurate with the Silver Jackets Coordinator’s wages.

Why an FTE is necessary

- The DWR already has the FTE-equivalent funding allocation associated with the Silver Jackets position.
- Transitioning the position from temporary to FTE would enable long-term recruiting and retention benefits.
- An FTE would also enable the DWR to strategically utilize the position to achieve the enhanced pro-resilience objective of the Silver Jackets program, while also dynamically adjusting to ND specific priorities.
- Long-term support of the Silver Jackets program enhances and advances ND’s effort to promote increased disaster resilience across the state.

Necessary resources for implementation (including FTE’s)*: One FTE authorization. No new funding resources needed.

Are resources being redirected or are they new or additional (including FTE’s)*: No new resources needed.

Who is served and impact of not funding*: North Dakota communities and citizens through interagency collaboration to develop and achieve state flood risk resilience.

Cost to Continue Commissioner/Temporary/Overtime Adjustment (Priority: 13)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

770 Water Resources

Agency 770

Request explanation and justification (include any statutory authority)*: • State Water Commissioners (SWC) Budget – As a result of the significant increase in funding available for water projects, the SWC has implemented pre-commission meetings the month prior to regular SWC meetings where funding is approved for projects. This process allows Commissioners to be briefed by Department of Water Resources (DWR) team members, as well as project sponsors, regarding the details about projects seeking cost-share assistance. By being more informed about projects, Commissioners can more effectively and efficiently allocate public tax dollars. Furthermore, the number, extent, and complexity of water development and management issues across the state necessitates that Commissioners remain engaged with the water community and local constituents. This includes attendance at local government meetings, conferences, or workshops to stay informed.

In addition to expanding responsibilities, an increase in funding for increased commissioner pay is necessary as they are paid the same rate as Legislators and funding had not been adjusted to reflect the change over several biennia. The DWR is also looking to establish a biennial budget for each SWC member to better facilitate their awareness of what financial resources are available to them to complete their duties. The request is for an increase of \$53,760 in temporary salaries and \$85,200 in operating expenses.

• Overtime Pay – As a result of the equity adjustments and legislative increases that have occurred during the 2023-25 biennium, it is necessary to increase funding for overtime to accommodate those adjustments. The request is for an increase of \$36,000 in overtime and \$24,000 in temporary salaries.

• Northwest Area Water Supply (NAWS) On-call Pay – Northwest Area Water Supply (NAWS) On-call Pay – The DWR is responsible for the construction and operations of the critical water supply project. To maintain 24/7 operations NAWS team members are expected to be on call to cover evenings and weekends. To ensure team members are being properly compensated for their time, the DWR has implemented an on-call policy, which is like the North Dakota Department of Transportations on-call policy. In implementing this policy, the DWR is requesting an increase of funding in the overtime line item to accommodate this operational change. These increased costs are paid through revenues generated by the users of the water system. The request is for an increase of overtime expense which is necessary to ensure 24/7 coverage of operational on-call duties.

Necessary resources for implementation (including FTE's)*: Funding for salaries related to State Water Commissioner's pay, temporary salaries, overtime funding, and operating costs related to State Water Commissioners.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resource trust funds.

Who is served and impact of not funding*: North Dakota citizens, communities, and DWR team members. The adjustment of funding will help ensure the State Water Commissioners have adequate funding to accomplished their duties, it will help ensure funding is available for DWR team members to complete their duties.

Board of Water Well Contractors (Priority: 14)

State Initiative:* Other

770 Water Resources

Agency 770

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Board of Water Well Contractors (BWWC) is responsible for registering, licensing, and overseeing well contractors across the state. Since its establishment in 1971, the BWWC has partnered with the Department of Water Resources (DWR) to manage certain operational aspects, as the data collected from well contractors has been valuable to the State. Historically, a DWR team member has provided accounting and administrative services to the BWWC during their personal time. However, increasing demands have made it challenging to maintain a clear distinction between the team member's roles. To ensure transparency and simplify the working relationship between the BWWC and DWR, the DWR is requesting additional funding for salaries and wages, to be covered by revenues generated through a contract with the BWWC for accounting and administrative services. This will allow the team member currently serving the BWWC part-time to continue fulfilling these responsibilities without needing to balance duties between the DWR and BWWC.

Necessary resources for implementation (including FTE's)*: Funding for salaries and wages.

Are resources being redirected or are they new or additional (including FTE's)*: New revenues received from the Board of Water Well Contractors.

Who is served and impact of not funding*: The Board of Water Well Contractors and the Department of Water Resources mission.

Change Funding Source (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	(342,981)	-	(342,981)	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	342,981	-	342,981	0.00	-	-	-	0.00
Total	-	-	-	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Change funding source for Project WET program administrator to 100% Resources Trust Fund. To comply with 319 Grant requirements, DWR must focus many educational programming efforts on non-point source pollution. This is outside of the agency's typical mission and doesn't allow for more desirable and strategically-focused programming areas – like water development efforts that improve ND's resiliency to drought and floods, and projects that support economic development.

Necessary resources for implementation (including FTE's)*: Additional resource trust funds to convert position from 60% Federal to 100% State.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resource trust funds to fund position at 100%.

770 Water Resources

Agency 770

Who is served and impact of not funding*: At 100% state funding, DWR would be better positioned to leverage established facilitator networks and opportunities that have been created to engage and educate about ND's water development interests more strategically.

Internship Program (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	100,000	-	100,000	0.00	100,000	-	100,000	0.00
Total	100,000	-	100,000	0.00	100,000	-	100,000	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: It has been challenging to recruit qualified and experienced individuals for Hydrologist, Hydrogeologist, and engineering positions at the Department of Water Resources. The technical demands of these positions, combined with the limited candidate pool with the necessary expertise, make it increasingly difficult to fill these essential roles. To address this issue, the DWR plans to establish an internship program to engage potential candidates before graduation and provide training opportunities and experience thereby bridging the gap between academic learning and the practical skills needed in these fields. Funding for the internship program, in addition to the FTE request for a Team Development Coordinator, will help the DWR build a robust program to attract and retain talented team members, and develop a pipeline of skilled professionals to address the State's future water resource management challenges.

Necessary resources for implementation (including FTE's)*: Funding for temporary salaries and wages, and funding for operational expenses related to the temporary position.

Are resources being redirected or are they new or additional (including FTE's)*: Redirecting resources trust funds.

Who is served and impact of not funding*: The DWR and North Dakota citizens by providing the DWR the resources to maintain qualified and experienced team members who are responsible for managing and developing North Dakota's water resources.

SWPP Proposed Projects (Priority: 17)

770 Water Resources

Agency 770

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: FEMA's Cooperating Technical Partner grant program is anticipated to have increased grant funding levels than previously assumed for the 2025-27 biennium. This increase would enable the DWR to access this additional federal funding to advance projects that benefit all North Dakotans. These additional FEMA grant funds require no state matching funds. An example project would be the update of the North Dakota base level engineering data currently housed in the North Dakota Risk Assessment Map service.

Necessary resources for implementation (including FTE's)*: Increase in federal spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: Additional federal funding is available.

Who is served and impact of not funding*: This increase would enable the DWR to access this additional federal funding to advance projects that benefit all North Dakotans.

Missouri River Intake Sites Field Investigation (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Start Date (MM/DD/YYYY):

End Date (MM/DD/YYYY):

Description: On August 15, 2022, the Department of Water Resources (DWR) was required to evacuate the State Office Building (SOB) due to environmental hazards. As a temporary solution, part of the team relocated to the North Dakota Job Service building, while other team members began working remotely. At the time, it was uncertain how long the DWR would be displaced, but early indications suggested the need for a semi-permanent alternative location better suited to the department's operations.

By early November 2022, the DWR transitioned from the Job Service building to the Bank of North Dakota (BND). The DWR collaborated with Facilities Management and the Bank to occupy the second floor of the BND building. Additional space for storage was secured both within the BND's storage facility and by repurposing storage areas at the DWR's Bismarck shop into office space. During this transition, the DWR increased the number of remote workers and reduced its physical inventory of office and shop equipment, as well as physical files.

770 Water Resources

Agency 770

Just before the start of the 2023 legislative session, further testing of the SOB revealed the full extent of the environmental hazards. The Governor included funding in his recommendation to demolish the building. While the Legislative Assembly discussed the building's future, they ultimately chose to remove the demolition funding from the budget. However, they gave the Office of Management and Budget (OMB) the flexibility to proceed with demolition if it could be done within its existing budget. The DWR removed all recoverable and necessary items from the building by June 2023, and by September 2024, the Capitol Grounds Planning Committee approved the use of its funds for the SOB's demolition.

Although the DWR is currently operating out of the Bank of North Dakota, this location is not ideal for its needs. The DWR is required to be accessible to the public, but the BND's security protocols make public access more challenging and pose additional security risks for the Bank. Additionally, the space within the BND is limited, and its current layout is not conducive to the DWR's operational efficiency. As such, the DWR is seeking a permanent location that will provide the necessary space for its team to operate effectively. The DWR's current lease with the Bank expires on June 30, 2025.

The DWR, in consultation with the Office of Management and Budget's Facilities Management, identified space needs, potential space availability, and necessary funding to remodel a space for the DWR's needs. The resulting request is for \$3 million in capital assets for the purpose of remodeling a space for the DWR's needs.

Emergency Water Pump Replacement (Priority: 20)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	397	770-4000	77050	691000	-	1	480,000	-	480,000	-	480,000	-	480,000
Total					-	-	-	-	480,000	-	480,000	-	480,000

State Initiative:* Smart, Efficient Infrastructure

Justification: The DWR's Development Division has four inefficient and inoperable water pumps purchased in the early 2000s. These pumps are essential for the Construction Section's operations, including: dewatering during construction, dewatering Devils Lake Outlets at the end of the operation season; stormwater management, and flood-fighting efforts. Due to their age, the pumps have become unreliable, prone to breakdowns, and inefficient, leading to increased downtime and repair costs. Replacing them with modern 6-inch pumps, capable of handling 500-600 gallons per minute, will improve operational efficiency, reduce maintenance costs, and ensure reliable performance. This would allow for the agency to be responsive to critical water resource management needs.

770 Water Resources

Agency 770

Excavator Replacement (Priority: 21)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total					-	-	-	-	400,000	-	400,000	-	400,000

State Initiative:* Other

Justification: The current Volvo excavator, purchased in 2015, has incurred increased repair costs due to its age and service requirements. With regards to the service requirements, the local Volvo dealership is no longer available. Service must now be performed in either Fargo or Williston or service calls must come from those locations. This creates an additional expense of \$1,000 to \$1,500 for each service call, even for minor repairs. Moreover, parts are becoming harder to source and more expensive, further driving up maintenance costs. To ensure efficiency and reduce downtime, the DWR is requesting one-time funding to replace the excavator with a more cost-effective solution.

Data Logger Replacement (Priority: 22)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	397	770-3000	77050	691000	-	1	60,000	-	60,000	-	60,000	-	60,000
Total					-	-	-	-	60,000	-	60,000	-	60,000

State Initiative:* Other

Justification: The geophysical logging system, purchased and installed in early 2008, is essential for collecting subsurface data critical to hydrogeologic investigations. It provides detailed information about the geological formations encountered in boreholes, aiding in the identification of the most productive zones within an aquifer for well placement. Additionally, this data supports the calibration of Airborne Electromagnetic Survey equipment. Given that the current system is over 15 years old and has been operating beyond the typical 7-to-15-year life cycle for geophysical and surveying equipment, we are requesting funding for its replacement.

Statutory Authority

North Dakota Century Code Sections 24-01 through 24-15, 39-02 and 49-17.1-02.

Agency Description

Originally called the State Highway Department, the North Dakota Department of Transportation (NDDOT) was established in 1917. The NDDOT is an innovative and progressive organization that has a great team of employees that work hard across the state to carry out the Department's mission to safely move people and goods.

The NDDOT strives to build and maintain an efficient transportation system consisting of about 8,622 miles of roadway and 4,865 bridges. It oversees the development of surface transportation including highways, bridges, rail, transit, pedestrian and bicycle paths across the state.

Annually, the Department processes over 1.2 million vehicle registrations and serves over 500,000 licensed drivers at branch offices located across the state. The NDDOT's Central Office is located on the North Dakota State Capitol Grounds in Bismarck and has eight district offices across the state in Bismarck, Devils Lake, Dickinson, Fargo, Grand Forks, Minot, Valley City and Williston.

Agency Mission Statement

The North Dakota Department of Transportation's mission is to safely move people and goods.

Major Accomplishments

-
- 1 Infrastructure is vital to our economy, commerce, agriculture, tourism, and to North Dakota families. NDDOT's biennial budget of \$2.4 billion was utilized to provide transportation and motorist services, as well as maintain and improve state highways.

 - 2 Invested \$222.5 million into townships, cities, counties and state roadways through the Flexible Transportation Fund.

 - 3 Awarded 22 grants to aid township roads and bridges through the Township Assistance Program. The program provided \$10 million to NDDOT for improvements on township roads and bridges, using state funds to improve local corridors that are considered economic generators.

 - 4 Aggressively pursued federal discretionary dollars to advance transportation infrastructure projects in North Dakota. From July 2, 2023 through August 2024, \$596 million has been applied for. December 2023, \$55 million was awarded to 4-lane a segment of US 85 from ND 200 north approximately 13 miles. The project is planned to be constructed in 2026, pending final design and negotiation of the grant agreement.

 - 5 Launched a new North Dakota driver license design that features state-of-the-art technology to protect North Dakotans. As of August 2024, over 225,000 cards with the new design have been issued.

 - 6 Driver License and Motor Vehicle were awarded the Reinventing the Customer Experience award from the American Association of Motor Vehicle Administrators for their work to expand customer service and convenience.

 - 7 Nearly 15,000 driver license online knowledge tests have been completed in the last year using the online system. Tests are the same as the in-person written test but are conveniently done at dot.nd.gov and are available 24/7 immediately from anywhere with internet access.

Major Accomplishments

-
- 8 Invested nearly \$1.2 billion in approx. 350 construction projects in the 2023 and 2024 construction seasons. Major construction projects included: • Interstate 94 reconstruction from Beach to the Camel Hump Dam Interchange • Grant Marsh Bridge deck overlay and joint repair • Interstate 94 Exit 161 Centennial Road/ Bismarck Expressway Interchange reconstruction • U.S. Highway 85 four-lane project from Watford City to Long X Bridge • U.S. Highway 52 passing lane construction from Kenmare to Fessenden • U.S. Highway 81 repair in Grand Forks • Interstate 94 Exit 102 Eagles Nest Interchange reconstruction project • North Dakota Highway 6 widening and pipe culvert extensions from Selfridge to Bureau of Indian Affairs Road #7 • North Dakota Highway 1804 from the Hazelton corner to University Drive

 - 9 Vision Zero stakeholders were successful in getting a primary seat belt law passed. The law went into effect August 1, 2023. A primary seat belt law will increase North Dakota's seat belt use over time and save lives.

Critical Issues

-
- 1 North Dakota's state transportation revenues are dependent on motor fuel taxes and vehicle registration fees. The last time these rates increased was in 2005. Motor fuel tax appears to be following historical trends. Increased operating efficiency of automobiles will decrease revenues in the future. Future revenue shortfalls will affect funding needed to provide essential services including snow and ice control, roadway maintenance, Driver License and Motor Vehicle, building operations, administration, and information technology.

 - 2 The Infrastructure Investment and Jobs Act (IIJA) established new project demands, funding opportunities, and expanded existing program by 30%. IIJA has also significantly increased available grant funding opportunities, the NDDOT is aggressively pursuing this funding. The NDDOT along with other public agencies have seen an increase in costs due to inflationary pressures (approx. 26%).

 - 3 ND's construction program is based on federal funding and the state providing enough match dollars to access all the federal funds. Limiting amount of state dollars places constraints on the number of ready projects, limits the amount of discretionary (grant) funding which can be pursued, and the ability of the NDDOT to assist local public agencies in a timely manner.

 - 4 The Flexible Transportation Fund received \$432.3 million in requests of which \$87 million was awarded for local public agency projects. The Flexible Transportation Fund has been widely supported by stakeholders and NDDOT anticipates the requests will continue to exceed the funds available for distribution.

 - 5 ND has prioritized construction over operations for the last several biennia. This has led to a systematic reduction in funding for basic operations, training, needed capital improvements, updated operating equipment, project management systems and software. NDDOT will need to leverage increased federal/state construction funding to begin replacing the dollars needed to maintain the states highway system in a satisfactory condition.

 - 6 NDDOT continues to face recruitment and retention struggles and depleted staffing numbers following reductions compounding in increased workloads and other stressors. To combat this, NDDOT will need to undertake significant efforts to increase employee and supplier engagement and happiness.

 - 7 Securing funding to complete the expansion of US Highway 85 to a four-lane roadway from Watford City to Interstate 94.

Performance Measures

The NDDOT monitors performance through a wide variety of measures which are largely available on the following websites, particularly in the NDDOT dashboard and on the Vision Zero website.

<https://www.dot.nd.gov/dot/view/dotdashboard.aspx>

<https://visionzero.nd.gov/statistics/>

Program Statistical Data

The Administration Section currently provides human resource services for 1,001 permanent fulltime employees plus approximately 60 temporary employees; processes in excess of 120,000 vendor payments and 31,000 payroll payments and creates 3,200 information posts across all social media channels (Facebook, X, Instagram and LinkedIn).

From July 1, 2021, through June 30, 2023, the Driver License Division processed 333,511 permits, licenses, and identification cards; administered 102,991 written tests, 46,931 driving tests, and 293,396 vision screenings. In addition, the division processed 119,210 suspensions, revocations, and cancellations; 327,403 traffic citations; 6,401 temporary restricted licenses; 8,164 implied consent violations; and 3,511 hearings.

The Motor Vehicle Division processes more than 1.2 million motor vehicle transactions per year. In North Dakota, there are more vehicles registered than there are residents of the state.

There are approximately 136 miles of road for every 1,000 people. Therefore, we have a very large road network with a small population base to support it. NDDOT maintains approximately 8,622 miles of highway.

- North Dakota has one of the smallest DOTs in the country in terms of number of employees.
- NDDOT maintains more lane-miles of roads per maintenance employee than any other state.

The state fleet consists of approximately 3,550 motor vehicles used by 60 state agencies, 11 state universities, and 11 extension and research center entities. Most of the increased sales proceeds from State Fleet auctions have elapsed. The operational costs remain high and are further driven by increased cost of vehicle repairs.

Explanation of Program Costs

The NDDOT Administration program encompasses the following NDDOT divisions and areas: Executive, Legal, Financial Management, Human Resources, Communications, and Audit Services. The most significant budget items related to the administrative program are salaries and information technology programs.

The Driver License Division serves nearly 564,000 North Dakota licensed drivers, and the Highway Safety Division also serves other ND residents, infants and children, law enforcement officers, and courts of law. The Driver License Division helps to ensure qualified and competent people are licensed to drive. The Highway Safety Division educates the public about traffic safety issues. The most significant budget items in the driver license program are salaries and traffic safety grants in the Highway Safety Division.

The Motor Vehicle Division administers the programs relating to the titling and registration of vehicles. The division regulates motor vehicle dealers, interstate motor carriers, mobility-impaired parking privileges, and intrastate household goods carriers, and is responsible for maintaining and making available records created by its various activities. The most significant budget items for the motor vehicle program are salaries, license plates, and IT data processing.

The highways program includes the following divisions: Maintenance, Construction Services, Planning and Asset Management, Programming, Local Government, Design, Bridge, Environmental and Transportation Services, Materials and Research, Aviation Services, Employee Safety, and Civil Rights. There are eight districts across the state that are also included in this program that provide for the maintenance of roadways, roadsides, rest areas, signing, bridges, drainage, snow and ice control, construction oversight and contract administration, and equipment maintenance.

801 Transportation

Agency 801

Over 90% of the DOT's total budget is encompassed by this program. The most significant budget areas are consultant engineers, road materials, and construction contractor payments.

The mission of State Fleet Services is to provide motor vehicle transportation to state agencies and institutions at the lowest possible cost.

The most significant budget items to the fleet program are the purchases of vehicles, fuel, and repairs.

Program Goals and Objectives

The administration program provides business support, including fiscal, legal, internal and external audits, communications, human resources, and executive support. This work includes decisions in support of all divisions and districts in the agency.

The objectives of the driver license program include:

- Provide identification validation, licensing, and driver record management services for all North Dakota drivers.
- Suspend, cancel, or revoke licenses, enforce the points schedule, process hearing requests, collect funds for driver records and abstracts, process reinstatements, verification of insurance, and other actions to ensure the driving record is accurate.
- Develop, implement, and evaluate programs designed to reduce motor vehicle crashes, fatalities, and injuries. This includes the Vision Zero initiative.

The Motor Vehicle program has the following goals and objectives:

- Administer all programs relating to the titling and registration of vehicles.
- Maintaining all records created by its various activities.
- Provide public services through its central office in Bismarck, three privatized branch offices, seven chamber of commerce offices, one city office and seven county treasurer's offices.

The goals and objectives of the highways program include:

- Review business practices and procedures to improve ride, load, capacity and roadway width service levels.
- Enhance system preservation levels.
- Incorporate performance measures and asset management into the department's decision-making process.
- Provide a safe and secure transportation system and workforce.
- Be proactive and adaptive to provide superior external and internal services, products, and programs.
- Recruit, develop, and retain a high performing workforce that results in everyone working together to achieve our mission and vision.

801 Transportation

Agency 801

- Preserve and enhance assets managed by the DOT.
- Promote a culture of innovation to enhance external and internal services, products, and programs.
- Enhance snow and ice maintenance service levels.

The objective of State Fleet Services is to purchase, manage, operate, maintain and dispose of the state's licensed motor vehicles (approximately 3,350 vehicles). In addition, State Fleet Services conducts defensive driving course training for all state vehicle drivers, manages the alcohol and controlled substance testing for all state agency and university Commercial Driver License (CDL) drivers, the state fuel contract and driver ID program, and the NDDOT insurance programs.

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Operational Budget to support the increase costs associated w/ maintenance of roadway and bridge activities such as snow and ice control, road patching, fence maintenance, roadway crack sealing, bridge maintenance, etc.

Necessary resources for implementation (including FTE's)*: None, this plan would be fully funded. The NDDOT requests appropriation and authorization to support increased costs associated with the maintenance of roadways and bridge activities.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: Lack of adequate maintenance funds have long term ramifications due to increased costs for ongoing maintenance and replacement of infrastructure.

Barcoding Software/Interface for Inventory Tracking (Priority: 10)

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Barcoding software/interface for disposable and fixed asset inventory tracking(\$250K)-bar coding scanners (\$100K). Needed to more efficiently manage the departments extensive inventory of parts, signs, supplies, and materials.

Necessary resources for implementation (including FTE's)*: None, this plan would be fully funded. The NDDOT requests appropriation and authorization for a barcoding software/interface system for disposable and fixed asset inventory tracking to help manage the department's extensive inventory of parts, signs, supplies, and materials more efficiently.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: Team members will continue to conduct inventory, however the current process is inefficient. The inventory tracking system will provide efficiencies and enhanced accuracy.

Develop Data Mgmt. Plan & Bus. Process Review Team (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	903,784	-	903,784	4.00	484,608	-	484,608	2.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Hire four FTEs to develop a data management plan and complete an agency wide business process review to further our data management program. This will allow a better data driven decision making process.

801 Transportation

Agency 801

Necessary resources for implementation (including FTE's)*: None, this plan would be fully funded. The NDDOT requests appropriation and authorization for an additional 4 FTE positions.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions.

Who is served and impact of not funding*: Without funding NDDOT will not have a data management program. Funding this has the potential to reduce the cost of data storage needs.

Asst. with Bridge Load Rating and Railroad Coordinator (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	491,992	-	491,992	2.00	267,687	-	267,687	1.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Hire an FTE to asst with Bridge Load Rating and Analysis and Bridge Metrics and management program. Hire an FTE for to coordinate on all construction projects which intersect with railroad facilities.

Necessary resources for implementation (including FTE's)*: None, this program would be fully funded. The NDDOT requests appropriation and authorization for an additional 2 FTE positions.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions.

Who is served and impact of not funding*: Redundancy would be reduced to evaluate the load carrying capacity of bridges. Inefficient delivery of projects that impact or intersect railroad facilities.

Additional IT Operations (Priority: 15)

Total	4,022,016	-	4,022,016	0.00	4,022,016	-	4,022,016	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional IT ongoing operation costs due to seeking efficiencies by leveraging technology.

Necessary resources for implementation (including FTE's)*: None, this plan would be fully funded. The NDDOT requests appropriation and authorization for IT operational costs due to seeking efficiencies by leveraging technology.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: If ongoing IT costs are not funded it would adversely impact NDDOT operations.

Bldg. & Grounds for the Central Office (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	157,996	-	157,996	1.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Buildings and Grounds person to support the daily maintenance and operation of NDDOT's Central Office and central lab.

Necessary resources for implementation (including FTE's)*: None, this plan would be fully funded. The NDDOT requests appropriation and authorization for an additional FTE position.

801 Transportation

Agency 801

Are resources being redirected or are they new or additional (including FTE's)*: New FTE position.

Who is served and impact of not funding*: Without this position NDDOT would have to contract for Central Office maintenance services.

Staffing/equipment to meet the needs of additional miles of 4-laning Highway 85 (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	1,006,000	-	1,006,000	2.00	1,035,950	-	1,035,950	2.00
Total	1,006,000	-	1,006,000	2.00	1,035,950	-	1,035,950	2.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional resources for added lane miles completed during 4-laning Highway 85. (additional funding to maintain the added lane miles exceeding 50 lane miles/operator will cover investments in staff and equipment)

Necessary resources for implementation (including FTE's)*: None, this option is fully funded. The NDDOT requests appropriation and authorization for 2 additional FTE positions and equipment to support the added lane miles that will be completed while 4-laning highway 85 during the 2025-27 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions and equipment.

Who is served and impact of not funding*: The traveling public would be served. The impact of not funding this option would reduce the ability to effectively maintain roads as our equipment operators would cover more than our 50-lane mile/operator limit for their assigned area.

Fleet Operating Inflation & Additional Vehicle Purchases (Priority: 20)

801 Transportation

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increase the spending authority for operating and capital funding of the State Fleet to better serve State agencies and institutions.

Necessary resources for implementation (including FTE's)*: None, this program would be fully funded. The NDDOT requests appropriation and authorization for increased operating and capital funding of the state fleet program.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: There will be shortfalls in operating funding and Fleet will be unable to fulfill future growth in agency requests.

Formula Funds Match (Priority: 21)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	172,500,000	-	172,500,000	5.00	-	-	-	0.00
Special	-	-	-	0.00	505,831	171,300,000	171,805,831	2.00
Total	172,500,000	-	172,500,000	5.00	505,831	171,300,000	171,805,831	2.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Most federal funding is provided to NDDOT via formula funding, funding which is allocated to state, tribal recipients, and transit agencies based on a formula set by Congress. The largest formula funding program is the Federal Aid Highway Program, funding from this program is used to construct and maintain roadways and bridges.

Necessary resources for implementation (including FTE's)*: Formula funding for the Federal Aid Highway Program requires a state match of approximately 20%. The NDDOT requires \$172.5 million in state funding to match the Federal Aid Highway Program federal funding. This request includes the request for appropriation and authorization for an additional 5 FTE positions to assist with the increased workloads associated with engineering, design, billings, tracking and federal requirements that goes along with the federal programs.

801 Transportation

Agency 801

Are resources being redirected or are they new or additional (including FTE's)*: This would require new funding from an alternative source; as well as 5 new FTE positions. The alternative funding source should not be one-time funding, but rather ongoing funding received from a stable source.

Who is served and impact of not funding*: Without the state match for the federal formula funds, the federal dollars will not be able to be spent, therefore losing out on the ability to invest in infrastructure across the state.

Swap Program Match (Priority: 22)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	166,500,000	-	166,500,000	2.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	166,500,000	-	166,500,000	2.00	-	-	-	0.00

State Initiative*: Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Use of the "Federal Fund Swap" program for Local Public Agencies will eliminate the federal requirements for the funds swapped.

Necessary resources for implementation (including FTE's)*: This program would require new funding from an alternative source. The "Federal Fund Swap" program for local public agencies will eliminate the federal requirements for the funds swapped but would require additional state funding to match the Federal Aid to be utilized by the NDDOT. The NDDOT requests appropriation and authorization for an additional 2 FTE positions to assist with the engineering and design that goes along with the additional projects.

Are resources being redirected or are they new or additional (including FTE's)*: This would require new funding from an alternative source; as well as 2 new FTE positions. The alternative funding source should not be one-time funding, but rather ongoing funding received from a stable source.

Who is served and impact of not funding*: Local Public Agencies will have to continue to meet the many federal requirements which come with the use of federal formula funds.

Local Govt Team (Priority: 26)

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increase the Local Government Team to assist counties, cities, townships and transit providers with federal and state programs to improve service areas.

Necessary resources for implementation (including FTE's)*: This position would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional FTE position.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE position. This would require new funding from an alternative source.

Who is served and impact of not funding*: Service to Local Public Agencies (LPAs) will continue to erode as programs increase and staffing remains the same.

Compliance with Federal Requirements (Priority: 30)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: 1 FTE for Disadvantaged Business Enterprises (DBE) (\$258k), 1 FTE for Permitting (\$245k), 1 FTE for Director of Programs (\$270k) needed for compliance of federal requirements and stay eligible for federal funds.

801 Transportation

Agency 801

Federal funds are not utilized to fund these positions because the federal aid is committed to being put on the roadways.

Necessary resources for implementation (including FTE's)*: These positions would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional 3 FTE positions.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions. This would require new funding from an alternative source.

Who is served and impact of not funding*: Risk non-compliance with federal regulations and potential to lose federal funds.

Dedicated Grants Team (Priority: 31)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Pavement Preservation and Restriction Removal Program - A dedicated state program to be able to plan, develop, and construct infrastructure projects to preserve pavements and bridges and increase load carrying capacity.

801 Transportation

Agency 801

Necessary resources for implementation (including FTE's)*: This plan would require new funding from an alternative source. The NDDOT requests appropriation and authorization to fund a Pavement Preservation and Restriction Removal Program.

Are resources being redirected or are they new or additional (including FTE's)*: This would require new funding from an alternative source. The alternative funding source should not be one-time funding, but rather ongoing funding received from a stable source.

Who is served and impact of not funding*: Transportation system will have restrictions of freight movement and more expensive fixes will need to be completed due to reduced investment in preservation.

Tribal & Public Engagement (Priority: 35)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	1,249,970	-	1,249,970	5.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Establish a minimum level of infrastructure construction oversight in partnership with our consultant partners.

Necessary resources for implementation (including FTE's)*: These positions would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional 5 FTE positions.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions. This would require new funding from an alternative source.

Who is served and impact of not funding*: Less oversight will result in poor quality, shorter service life and potential for improper use of public funds.

University Coordination (Priority: 37)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	249,994	-	249,994	1.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: To build stronger relationships with our University partners, expand opportunities, and build new knowledge and ideas to add value to the transportation industry. Also provides a central point for contract oversight and funds awarded to Universities.

801 Transportation

Agency 801

Necessary resources for implementation (including FTE's)*: This position would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional FTE position.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE position. This position would require new funding from an alternative source.

Who is served and impact of not funding*: Will stay at a limited level of coordination and have inefficient processes for university engagement and financial oversight.

District Building & Grounds/Inventory Support (Priority: 38)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,279,952	-	1,279,952	8.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,279,952	-	1,279,952	8.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Establish Building & Grounds/Inventory Support positions in each District. Increased focus on inventory systems need additional resources and buildings and grounds need a central point to be responsible for maintenance and upkeep.

Necessary resources for implementation (including FTE's)*: These positions would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional 8 FTE positions.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions. This would require new funding from an alternative source.

Who is served and impact of not funding*: Continue to inefficiently maintain facilities with whoever is available at the time. Continue to be limited in inventory management efforts.

TMC & I29 Smart Corridor (Priority: 39)

Total	749,982	-	749,982	3.00	267,687	-	267,687	1.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Resources and partnerships for facility modifications and technology for the Transportation Management Center (TMC) and SMART Corridor. Provide higher levels of service to the traveling public and efficiently use resource for the operations of the state highway system.

Necessary resources for implementation (including FTE's)*: These positions would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional 3 FTE positions.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions. This would require new funding from an alternative source.

Who is served and impact of not funding*: Safety enhancements from the benefits of a TMC and SMART corridor technology will not be achieved.

Additional Road Miles Added to State Hwy System (Priority: 40)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	149,484,000	-	149,484,000	2.00	-	-	-	0.00
Special	516,000	-	516,000	0.00	-	-	-	0.00
Total	150,000,000	-	150,000,000	2.00	-	-	-	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional resources for additional road miles added to state highway system (FTE, equipment and facilities for Maintenance & Operations) (Legislation will remove the mileage cap on the state highway system) (additional funding to maintain these additional state highway system miles) 50 lane miles/operator will cover investments in staff, equipment, and facilities.

801 Transportation

Agency 801

Necessary resources for implementation (including FTE's)*: This program would require new funding from an alternative source. The NDDOT requests appropriation and authorization for an additional 2 FTE positions to manage the workload of adding additional roadway miles to the state highway system.

Are resources being redirected or are they new or additional (including FTE's)*: This would require new funding from an alternative source; as well as 2 new FTE positions. The alternative funding source should not be one-time funding, but rather ongoing funding received from a stable source.

Who is served and impact of not funding*: Additional miles would not be able to be added to the state system that would benefit both the Local Public Agencies and the traveling public.

State Initiative*: Technology Investment

801 Transportation

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Modernization of the Driver and Vehicle Services appointment system will increase customer service by customizing the system.

Necessary resources for implementation (including FTE's)*: None, this project would be fully funded and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: Continue with old system which is not customizable for better customer experience.

Start Date (MM/DD/YYYY): 08/02/2025

End Date (MM/DD/YYYY): 04/01/2026

Replace existing application? No

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits*: The new system will ensure that customers schedule the correct appointments, allowing them to wait from any location. It will effectively manage customer flow and enhance overall customer satisfaction by providing real-time insights into processes. This approach aims to streamline operations and improve the customer experience by offering greater flexibility and visibility into appointment management.

Project Risk*: Key risks include potential staff resource constraints and possible data migration issues, which could impact the smooth transition to the new system. Additionally, functionality issues with the new system may negatively affect the customer experience, leading to dissatisfaction and operational disruptions.

Issue/Solution*: To improve the customer experience, the new system will provide customers with a seamless way to make appointments and wait from any location until they are ready to be assisted. This approach is designed to enhance convenience, reduce wait times, and ensure a smoother, more efficient service experience. The Driver License and Motor Vehicle departments will be evaluating a Commercial off the Shelf (COTS) product for integration with our state record system. This approach aims to leverage existing technology solutions to enhance functionality and streamline operations while ensuring compatibility with our established systems.

CHATBOT to reduce MV/DL MTI Contract Calls (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
General	-	-	-	0.00	-	-	-	0.00
Special	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00
Total	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Use of a CHATBOT to answer customer questions from the DOT website will increase the customer service to the public. Has the potential to reduce the contracted cost for a call center.

Necessary resources for implementation (including FTE's)*: None, this project would be fully funded and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: Continue to use the contracted call center to answer customer questions.

Start Date (MM/DD/YYYY): 08/02/2025

End Date (MM/DD/YYYY): 05/01/2026

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* The new system will offer 24/7 availability and provide instant responses to customer inquiries and appointment request phone calls. It will also be designed with scalability in mind, ensuring it can accommodate growing demands and adapt to future needs without compromising performance.

Project Risk:* The new system aims to provide accurate and reliable information while being user-friendly to ensure ease of use for all customers. It will also include robust integration capabilities to seamlessly connect with existing systems. Additionally, attention will be given to addressing any language limitations to ensure accessibility for a diverse user base.

Issue/Solution:* The new system aims to significantly improve the customer experience by providing a platform where citizens can easily obtain answers and assistance 24/7. This continuous availability is designed to enhance convenience and ensure that support is always accessible regardless of time or location.

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Spring Load Restriction Plan (frost sensors/hire consultants to install) to optimize the protection of roadway infrastructure and minimize the limitation on the movement of goods and equipment.

Necessary resources for implementation (including FTE's)*: None, this project would be fully funded and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's)*: No, this decision package is fully funded.

Who is served and impact of not funding*: Without funding we will continue to manage road restrictions with limited data.

Start Date (MM/DD/YYYY): 08/02/2025

End Date (MM/DD/YYYY): 03/31/2026

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Spring Load Restriction Technology provides a cutting-edge solution consisting of data-driven, real-time monitoring that optimizes when and where load restrictions should be implemented. By using advanced sensors, real-time environmental data, and predictive analytics, we can prevent road damage before it happens, while still allowing optimized traffic flow.

Project Risk:* If the budget is not enough, there could be the potential to have a reduction in the number of sites, which would prevent proper implementation of the heavy freight load restrictions.

801 Transportation

Agency 801

Issue/Solution:* This project is aimed at introducing a more efficient way to protect our roads with groundbreaking technology solution designed to optimize Spring Load Restrictions (SLR) with precision and innovation while keeping freight operations running smoothly.

AI Uses for Core Business Functions (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	1,000,000	1,000,000	0.00	-	1,000,000	1,000,000	0.00
Total	-	1,000,000	1,000,000	0.00	-	1,000,000	1,000,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority):* Harness AI to optimize workflows and transform data to help in strategic decision making

Necessary resources for implementation (including FTE's):* None, this project would be fully funded and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's):* No, this decision package is fully funded.

Who is served and impact of not funding:* The efficiencies AI will provide team members to assist with daily work tasks, such as searching for information, will not be achieved limiting capacity of team member and work flows.

Start Date (MM/DD/YYYY): 08/02/2025

End Date (MM/DD/YYYY): 06/30/2027

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Experience lightning-fast, hyper-intelligent searches with an AI-powered search engine that understands you better than ever for many DOT daily operations such as DOT manuals, policies, licensing for special plate review, etc.

Project Risk:* If change management is not properly implemented, its features may not be utilized to its full potential.

801 Transportation

Agency 801

Issue/Solution:* NDDOT is expecting that NDIT staff will develop an AI search engine that will contain all NDDOT's manuals, policies, MV Special License data base, etc. to facilitate users search/review process.

Grant Management Tracking Software (Priority: 34)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	1,000,000	1,000,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	1,000,000	1,000,000	0.00
Total	-	1,000,000	1,000,000	0.00	-	1,000,000	1,000,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority):* Grant Management tracking improves efficiency by streamlining the grant life cycle. Accountability, transparency, and risk reduction are enhanced due to tracking and reporting capabilities.

Necessary resources for implementation (including FTE's):* This Project would require new funding from an alternative source and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's):* This Project would require new funding from an alternative source.

Who is served and impact of not funding:* Increased team member capacity and secondary benefits will not be achieved.

Start Date (MM/DD/YYYY): 08/02/2025

End Date (MM/DD/YYYY): 02/28/2026

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Productivity and efficiency gains; increased accuracy and compliance with federal requirements due to enhanced grant tracking and monitoring capabilities, substantially enhanced subrecipient monitoring capabilities.

801 Transportation

Agency 801

Project Risk:* Will require a substantial learning curve for users. Also, the system will have to be a very comprehensive system that can handle grant writing, reporting requirements, subrecipient monitoring, and integrating fiscal data from the state's official accounting system throughout the entire grant life cycle.

Issue/Solution:* NDDOT has experienced tremendous growth in discretionary grant acquisition and a tremendous increase in subrecipient monitoring requirements affecting NDDOT and local governments throughout the state of North Dakota. This project is aimed at providing a common platform where grant applications can be submitted, monitored, and reviewed by stakeholders efficiently throughout the entire grant process.

The objective is an end-to-end comprehensive grant management and tracking system consisting of Pre-Award Phase (the Notice of Funding Opportunity & Application Review), Award Phase (Award Decisions and Notifications) and Post-Award Phase (grant implementation, reporting and closeout, and comprehensive subrecipient monitoring capabilities, from both the grantee and grantor perspectives.
